ECLIPSES.

There will this year be neither eclipses of the moon nor of the sun, visible at Quebec. There will however, on the 5th May, be a remarkable passage of Mercury over the disk of the Sun, visible at Quebec from sun rise to about eleven o'clock in the morning.

MOON'S RISING AND SETTING.

At four days old it sets at, and shines till, about 10 at night.	15, at full, it rises about 6 in the evening.
5 - about - 11	16 - at $\frac{1}{2}$ after - 7
6 - about - 12	17 - at $\frac{1}{2}$ after - 8
7 at near 1 in the morning.	18 - about - 10
	19 - about - 11
	20 - about - 12

Of the Changes of the Moon.

Many persons, understanding that the mean time between one new Moon and another is 29 days, 12 hours, 44 minutes and a fraction, imagine that, to find the full or quarters of the Moon, they have only to add a half or fourth part of that time; and when they do not find the changes marked in the Calendar to correspond with this method, they impute it to mistake in the calculation of those changes. It is therefore, necessary to put them in mind, that the great inequality of the Moon's motions renders the above rule extremely inaccurate, so that nineteen times in twenty, it must fail in giving the true conjunction or change.

ECLIPSES.

Il n'y aura point, cette année, d'éclipses de soleil ni de lune, qui puissent-être visible à Québec. Mais il y aura un passage très remarquable de Mercure sur le disque du soleil, visible à Québec, le 5 Mai, depuis le lever du soleil jusque vers les 11 heures du matin.

Full Moon.

This Tide Table shews the time of high water on any day of the moon's age nearly, and the stream continues to run one hour and a half after high water, or, in the seaman's phrase, it flows "Tide and Quarter Tide," and this is to be observed in every part of the River.

RULE. Having found the age of the moon at the top of each month in the Calendar, look in the left column of the table for the day from new to the full moon then in the right column the day from the full to the new moon, and in the middle column you will find the time when it is high water ashore.

Times of High Water, on the days of New & Full Moon, at different places of the River St. Lawrence.
