THE "MACHINE" IN GOVERNMENT.

The "machine" is an elaborately designed arrangement by which the combined and concerted action of a working of the political party is gathered together in a single knot and can be managed by a single body of men. That idea, although it conduces to efficiency, does not conduce to political life. The great danger of the "machine" is that it gives an exalted power to a few pullers; and this is a most tremendous danger of party government, because if party government ever reaches to that point that it is a mere race, a mere auction—that nothing is thought of except that a party shall win, then political life becomes degraded, honorable men are banished from its ranks, conviction ceases to animate the combatants, and it becomes a mere trade and profession.

Its danger is shown in what is passing in England. Public opinion outside, all the prominent independent speakers on the Liberal side of the House of Commons, and four-fifths of the genuine opinion of the Liberal party itself have unmistakably condemned the foreign policy of the Government—especially in Egypt—and have branded it with incompetence; but, on account of the fear of a transfer of power to the Conservatives, the House of Commons, obedient to the party caucus, is impotent to influence the progress of events. It dare not exercise its prerogative and censure the Government, for fear of "putting a blank cheque in the hands of Lord Salisbury." And crushed in the embrace of the caucus, it no longer possesses any independent action.

But that was not the case before the "machine" was adopted. When in 1854-5, the Liberal government of Lord Aberdeen was defeated by a Liberal majority it was replaced, not necessarily by the Conservatives, but by the Liberal government of Lord Palmerston. The same thing happened with Lord Palmerston in 1858, when he went strongly against the opinion of the country on the Conspiracy Bill, and he was defeated by a Liberal majority and his government replaced by a modified one. But the Liberal dependence cannot find place now, for the whole Liberal party of English are constricted in the embrace of the Chamberlain caucus-machine.

THE NORTH-WEST.

Mr. W. Henry Barney is the author of a book just published on "Life and Labor in the Far West," and some of his opinions on Manitoba matters are worth quoting as those of an "outsider." He has visited the great North-West Territory, and thus writes of Winnipeg: "Winnipeg, however, has a future before it—in fact it is looked upon as the great city for the whole of the North-West, while it is believed that any investment in land which could be made at a fair price within ten or twenty miles of the town would be of much ultimate value. The soil is a black loam of very considerable depth; there is some small scrub wood about, but this, of course, would all be cleared out if the land were cultivated. The winter lasts about six months, and usually commences with November, January and February being the hardest months. June is considered to be the rainy month. Thunderstorms are not frequent, and mosquitoes are not particularly troublesome. Speaking more at length in a subsequent chapter concerning Southern Manitoba, Mr. Barney gives it as his opinion that, while a great deal of the soil is undoubtedly of first-class quality and far superior to anything he saw in the North-West Territory, it is mostly a grazing country, and that stock-raising would be more profitable than the present system of farming at least, must collapse in a few years. The land is not so deep nor so suitable for wheat as that in the Red River Valley, but for stock-raising it has in many parts great advantages, both from its undulating character and the number of its ponds and creeks. The present settlers have not enough capital to invest largely in stock, and should they ever come to possess it, our author thinks that the land is so out of ploughing that it will be impossible to keep the cattle off the crops without doing a great deal more fencing than would have been necessary had the farms been judiciously laid out at first. As regards these crops themselves, wheat, oats, barley, and potatoes grow most luxuriantly upon the land when first broken, and for from one to four years afterwards, according to the depth of soil. Potatoes, especially, do exceedingly well. Mr. Barney hardly ever saw a bad crop in any of the Southern Manitoba.

MR. BLAKE IN THE TOWNSHIPS.

The Reform demonstrations give the Reformers in the country districts an opportunity of seeing their leader face to face, but for all practical purposes Mr. Blake is right when he says that the press is the best medium between politicians and people. The newspapers spread the speeches broadcast, and people in all parts of the country read them and are influenced by them. It is charged against the Reformers that there is not much enthusiasm at their political demonstrations. Enthusiasm is a very good thing in its way, no doubt, but there are other things for people to live for besides shouting and gesticulating at a political picnic. Those speeches carry most conviction which read best. The man who makes his audience laugh or cheer, or get excited, does not always carry most weight with thinking people. Sir John Macdonald can work up more enthusiasm to the square inch than any other man in our public life, but his speeches have nothing like the food for thought contained in those delivered by Mr. Blake.

THE CHURCH ARMY.

The "Church Army" is an organization started in England about two years ago. It comprises the largest part of the lay department of the Church Parochial Mission Society, and has the patronage of many of the Bishops. It has 50 stations in active operation; the expenses of which have been borne mainly by the poor in the respective districts. It has been felt, said the Bishop of Oxford, at the first great meeting held a few weeks ago, that the way to deal effectually with the lowest classes was by the working of their own class—by the action of those who knew the bitterness of the life and could appeal to their fellow-sufferers by the light of their own experiences. Such was the working of the Church Army. He had no hesitation in acknowledging that the Church Army was an imitation of the Salvation Army, and he held that the Church to be true to herself and to her mission, must pick up all that was of use to her—she was to borrow the jewels of silver and of gold, even from the Egyptians. * * * He bore witness to the remarkable character of the work the Salvation Army had carried out; but he thought that it had become a sect, and when the guiding hand was withdrawn would be liable to fall into half a dozen sects. The Church Army was not liable to these dangers, and he maintained that it afforded a means of reaching the great masses of the people outside all religion.

THE SPANISH PENINSULA AN ISLAND.

A Spanish newspaper states that a canal from the Atlantic to the Mediterranean, which is to convert the Iberian Peninsula into an island, appears now to be in a fair way to become an accomplished fact. Starting from the Gironde, the proposed canal is intended to touch Toulouse, continuing through Langoude and joining the Mediterranean near Narbonne. The contract for the work is said to be already signed between the founders and the contractors of the Suez Canal, for a canal capable of taking vessels of the largest size. The funders have asked the French Government for a guarantee of 10,000,000 francs annually, to begin in 1889, when the works are expected to be completed. Opinion in Spain appears to be favorable to the scheme. The canal, if made, would constitute a new line of commerce for France. It would not only bring the Spanish ports nearer to those of England and Northern Europe, but would connect those of Catalonia with the Biscayan provinces, Asturias, and Galicia; and the importance of Gibraltar, from a strategic point of view, is expected to be considerably reduced.

THE ROLLER SKATING RINK.

Was not enthusiastically celebrated in Sherbrooke this year. Almost at the last hour the Sherbrooke Lacrosse Club arranged a match with the Canadian Club of Montreal, and it proved one of the best contested games ever played in Sherbrooke. The teams were pretty evenly matched, and after a game which had been a long one, the Sherbrooke team won by a score of 3 to 1. The match was won by the Sherbrooke Club, took over one hour in the contest. Of course some delay occurred by the ball being thrown out of the field and by game being once called, but the most of the time was spent in playing. The Sherbrooke Band furnished the music during the game.

THE EXCURSION TO MEGANTIC.

via the International R. R. in honor of the Hon. J. H. Pope was well attended. About 50 persons were taken by the special train from along the line. On the return to the lake they had rather a serious experience. A building standing near the track had caught fire and fell across the track burning the ties and bending the rails so as to stop the train when it was approaching. The passengers got out and fought fire in order to get back to Lake Megantic, where they arrived at 3 p. m. At the picnic the speakers were W. B. Ives, Esq., M. P., R. N. Hall, Esq., M. P., B. S. Parker, U. S. Consul, Hon. J. H. Pope, and Mr. Chagnoy, but as we had no representative we cannot give their speeches. The return was made in five hours, reaching here at midnight. The steamer "Lena," Capt. Jones, made trips during the day on that beautiful sheet of water, Lake Megantic.

LUXURIANT TRAVEL.

We the other day had the pleasure of riding into the city in one of two new Palace Sleeping Cars which have been placed on the through route between Newport and Quebec via the Passumpsic and the Q. C. Railways. They are palaces indeed. Built for the Levee and Alden Palace Sleeping Car Co., by the Gilbert Manufacturing Co., of Troy, and named "Hollotrope" and "Mignonne," they are as refreshing to weary traveler as, or weary and weary alike, the delicious flowers of which they are named. The interior is light and cheerful, finished in polished cherry wood, on which is painted a flower sprig. The sleeping berths—of which there are ten double- and single-berths, with two extra for special occasions—are furnished with spring seats and mattresses, and are very spacious, enabling a person to sit upright in either the upper or lower, and by means of a window, which lights and air both, to see outside. During the day these berths give place to crumpled plush covered easy chairs (which are cunningly folded up and disposed under the berths during the night) and so compactly is everything arranged that then the berth-occupants hardly noticeable among the polished furniture and the convenient windows. The cars are furnished with very elegant toilet rooms, a smoking room, and a buffet—where may be obtained tea and coffee, toast, and the light constituents of a breakfast, lunch, or supper. Altogether they are most convenient and comfortable, and the handsome and solid structure—the wheels are of hydraulically pressed steel—40,000 lbs. to the square inch, steel tires and discs—and are so much superior to anything seen in this part of the continent, that we trust the enterprise of the railways concerned in their use will be recommended by the public.

THE SCHOOLS.

THE CLOSING EXERCISES AT THE CENTRAL SCHOOL on Wednesday last were attended by a number of the parents and friends, and were presided over by Mr. H. C. Wilson, Chairman of the Board of Education, School Commissioners, and Messrs S. Sanborn, W. A. Morehouse, and J. S. Mitchell. The exercises were held in classes, under Mrs. Rogers, the principal, Miss Wilson, Miss Hogan, and Miss B. Tom. The exercises were held in the afternoon in all the branches taught, the answers to the several questions in geography, arithmetic, history, etc., being given quickly and correctly. The proceedings were varied by a programme of music and recitations, rendered by the pupils in a very creditable manner. Lessons in music and recitation were given, although not so frequently as we could wish—to the school by Mrs. Bond (who accompanied the exercises today) from which, judging from the program made by the pupils, we anticipate a beneficial result both in music and recitation to both the pupils and the teachers. At the close of the examinations prizes were distributed among the several classes. In that of Mrs. Rogers—a general course of study—the following stood in the honor list:—1st, W. A. Morehouse; 2nd, J. S. Mitchell; 3rd, J. S. Mitchell; 4th, J. S. Mitchell; 5th, J. S. Mitchell; 6th, J. S. Mitchell; 7th, J. S. Mitchell; 8th, J. S. Mitchell; 9th, J. S. Mitchell; 10th, J. S.
