

The Stanstead Journal.

VOL. LXXVI—No. 37

ROCK ISLAND, (STANSTEAD) P. Q., THURSDAY, SEPTEMBER 15, 1921.

WHOLE No. 3945

International Water Company

WARNING

On account of the present dry season, the use of water for sprinkling streets and lawns, or washing automobiles, wagons, etc., is strictly forbidden. It is "up to" everybody to economize in the use of water if a famine is to be avoided.

BY ORDER OF THE DIRECTORS.

Reed's Quick Lunch

on Railroad Street
is open all night; let's go down

NOW UNLOADING

Car of B. C. Shingles. Have sold several carloads from same mill this season, all of which have given satisfaction. Selling strictly lay-clears at \$4.50; all-clears, practically 100 per cent perfect, \$6.50 M. Our best advertisements are on roofs in both both Stanstead and Orleans Counties; consult your neighbor who has laid these shingles.

Also plenty of Spruce Clapboards and New Brunswick Spruce Shingles. Vermonters—Remember, there is no duty and we will allow you a premium of 10 per cent on your money.

Three Villages Building Association
ROCK ISLAND, QUE.

TOWN TOPICS

Found—Bunch of keys. J. Allard, Rock Island.

Mr. and Mrs. F. H. Barber visited friends in Fitch Bay last week.

Mrs. Clarence F. Crowe visited friends in Charleston the past week.

A son was born to Mr. and Mrs. George F. McQueston Tuesday morning.

Miss Dorothy Rosalee Burgess of Worcester, Mass., is visiting her aunt, Mrs. Harry D. Reynolds, of Lake Shore.

The Ladies' Guild of Christ Church will meet in the Guild Hall Sept. 20 at 2.30 p.m. All the ladies of the congregation are asked to be present.

The large reservoir of the International Water Co. has an area of about 16,000 square feet, and the loss by evaporation would be about 2,000 gallons every 24 hours. All open water contributes to the rainfall by this inevitable process; nature is sure of its toll.

The friends of Waldo J. Burgess of Worcester, Mass., who married the late Rosa B. Lee, daughter of Eugene Lee of Fitch Bay, will be grieved to learn of his death, Aug. 19, after a long and very painful illness. He leaves two daughters Dorothy R. and Jane E. He was tenderly cared for by his oldest daughter Dorothy, who was in constant attendance during the last six months when he was wholly confined to his bed. He was laid to rest beside his wife in Hope Cemetery, Worcester, Mass. The bearers were Mr. Fred Blake, Mr. William Spear, Dr. A. H. Lancaster, Dr. James C. Maslen. There were many beautiful floral tributes from his numerous friends.

Jane Eliza Mortimer, widow of the Rev. William Linton Thompson, a former rector of Stanstead, died at the home of her son, William M. Thompson, Haverhill, Mass., September eighth. The body reached Stanstead Sunday morning, and was taken to the Williamson home. The burial was at Crystal Lake cemetery in the afternoon. Rev. E. C. Russell conducted the service, and the bearers were Dr. E. P. Ball, Messrs. J. M. Williamson, E. W. Hay and Dr. C. I. Moulton. Mrs. Thompson was the mother of Mayor A. N. Thompson of Stanstead. It was during her husband's pastorate that the present church was erected in 1858. The family home was in Stanstead from 1856 to 1874.

On Saturday evening the drinking booth at the north end of Stanstead Plain was again raided by officers of the local Enforcement League. When the officers entered, three men were behind the "bar" and a considerably larger number in front of it. There was no drink in the room except as it was brought in by the attendants, to be served. However, the officers were not long in locating the direct source of supply which was an ice box in a clump of bushes about twenty feet back of the shack. Three bags of bottled beer were secured and carried away. The proprietorship of this booth would seem to have changed. It was formerly conducted by Jérôme Pepin and Joseph Turcotte. Saturday night Frank Roy, Arthur Rodrigue and a young man named McClure were in charge.

TOWN TOPICS

The Ursuline Convent opened September 6.

Miss Lillie Melache of Montreal is a guest of Mr. and Mrs. P. B. Dunn, Stanstead.

The Rev. E. C. Russell is taking a class of boys at the College on Mondays and Thursdays in Scout work.

Miss Frances Murphy and Mr. F. Landrey, both of Boston, Mass., are guests of Mr. and Mrs. P. B. Dunn of Stanstead.

Mr. and Mrs. Harry D. Reynolds, née Emma D. Lee are receiving congratulations on the birth of a son, Harry Lee, born Sept. 8.

Last week Mr. A. H. Tiffin and the Rev. E. C. Russell motored to Island Pond, Vt., where they were guests of Mr. P. M. Dennis, secretary of the Y.M.C.A.

Mr. and Mrs. T. Rushton and son, Mrs. Lizzie Mosenger, Mrs. Charles Mosenger, all of New York City, are guests of Mr. and Mrs. P. B. Dunn of Stanstead.

Mrs. Joseph Boucher has just returned from Boston with a fine assortment of fall and winter hats. See the Mona Lisa veils; they are up-to-the-minute in vogue.

Master George Carmona of New York City, who has been staying at the Stanstead Inn, in the care of the Rev. E. C. Russell, has entered the College to study English.

Mrs. Bertha A. Nurse has sold the Hollis Clark house on Foundry Hill to Edwin H. Davis. The building contains three tenements. Mr. Davis owns other property in the same locality. The Nurse sale was made through J. Allard.

Miss Edith Cowles, a recent graduate of Middlebury College, has accepted a position as teacher of French and Latin in the new high school at Port Henry, New York, and left for that place on Labor day.

The Lord Bishop of Quebec will make his Episcopal visitation to Stanstead and Beebe November 14, when he will administer the Apostolic Rite of Confirmation. Those wishing to be confirmed are requested to communicate with the Rev. E. C. Russell.

Mr. Oliver Girard of Athol, Mass., is here on his annual vacation. Mr. Girard is the practical head of an important custom tailoring establishment there. He says the selling price of a good suit of clothes is now about fifteen dollars above that of pre-war days, but predicts a return to old price levels in the not far distant future.

Edward W. Stearns of Holland and Miss Elta E. Baldwin of Marysville, Ohio, were married at St. Johnsbury, Tuesday evening, September 6, Rev. Mr. Cate, pastor of the Universalist Church officiating. Mrs. Stearns has been an employee of the U.S. government at Washington, D.C., in clerical work. Mr. and Mrs. Stearns went to Niagara Falls for their honeymoon.

Tuesday morning, when H. A. Rice of the Derby Line customs, was coming from his home to his office, he picked up Napoleon Roy and Alec Leroux, who had five quarts of booze on their persons, and were evidently waiting for a car to pick them up. After waiting some time for the car which failed to appear Mr. Rice brought his prisoners to the office and turned them over to Sheriff Cosby, who took them to Newport under the Volstead act.

The J. B. Goodhue Company of this place have closed their branch factory at Richmond. The equipment was moved back to Rock Island last week. The Richmond factory was opened in the spring of 1920 during the latter part of the industrial boom, it having been found impossible to secure a sufficient number of girls here to meet the demand for the Company's line of workmen's garments. Since then the demand has fallen off to such an extent that none of the local factories are running to capacity, which explains this company's withdrawal from Richmond. Mr. Joseph Lowell, who went to Richmond as manager of the branch there, is remaining in that town, where it is rumored a local company may be organized to carry on a similar business.

TOWN TOPICS

Harry W. Smith of Boston spent Sunday in town.

W. J. Gilmore is driving a new Buick touring car.

Miss Ruth Aldrich is teaching in the school at Orleans, Vt.

Miss Edith Cowles is teaching in Fort Edward, New York.

Nelson O'Rourke will attend St. John's fitting school at Danvers, Mass. Dr. and Mrs. G. F. Waldron and daughter returned from Boston Sunday.

Mr. F. D. Burns left for Boston Monday after a pleasant summer at "The Cedars."

For Sale—Large Belanger Range, first-class condition. Everett Hand, Hovey Apartments, Foundry Hill, 45-1.

Mr. and Mrs. T. Frank O'Rourke, Nelson O'Rourke and Mrs. H. A. Nelson motored to Boston Sunday.

Col. C. E. Nelson is making quite extensive repairs to his residence; W. A. Cramer is in charge of the work.

Hon. Mr. Justice Hutchinson and Mrs. Hutchinson of Sherbrooke are at the Derby Line Hotel for a few weeks. Mr. W. A. Arnold of Lowell, Mass., was a recent guest of Mr. Al Gustin and while here took in the Sherbrooke fair.

Mr. and Mrs. Walter Cady and sons, George and Conrad, returned Saturday from a two weeks' visit with relatives in Ontario.

Special at the Border Theatre, Wednesday and Thursday, Sept. 21 and 22: Tom Mix in "The Prairie Trails."

Mr. and Mrs. Charles R. Counter and Mrs. W. A. Cook motored to Montpelier and Hardwick, Sunday to visit relatives.

George T. Ames has added another gasoline pump to his garage equipment. Mr. Ames believes in being up-to-date.

The four o'clock shop whistle heard four days each week, is much to be preferred to none at all, as in many towns.

Mr. and Mrs. Walter Curtis have moved from the apartment in the Brown block to the home of Mrs. Curtis' mother, Mrs. W. J. Parker.

The crops of corn, beans and tomatoes in the local gardens this year is very large. Ripe tomatoes are a drug on the market, there being a large over-supply.

Mrs. Jerome T. Flint and the Misses Flint have moved from the living apartment in the Parker studio building to their residence which has been thoroughly repaired since the fire.

Walter J. Gilmore motored to Boston Friday. Mr. Gilmore was accompanied by his sister, Miss Edith Gilmore. Mrs. Gilmore is visiting in Boston and will return with Mr. Gilmore.

Mrs. J. W. Webb, Sr., reports having picked about half a peck of string beans for dinner on Sept. 13. The samples sent to this office appear to be as tender as those picked in July.

Mr. and Mrs. O. M. Carpenter, O. S. Clarke, Meadames G. E. Clarke and Flora C. Robinson, Mr. and Mrs. Carroll Davis and Mrs. Clara Robinson motored to Smuggler's Notch Tuesday.

William K. Carpenter, who lives on the old Carpenter homestead at Ruiter's Corner, is obliged to bring water for his stock from a lower-level spring, having only sufficient water at his house for domestic use. Hundreds of others are in the same predicament.

John Morel, carpenter and mason, who came to this place from Danville, Que., a year ago, left Monday for Timmins, Northern Ontario, where his son Alphege has been located for the past four years. There is said to be much building activity in that section just now and high wages prevail, as in other remote mining districts.

The water running to waste at the west end of the new highway, Baxter avenue, from the overflow from the ram and several springs along the slope, is sufficient to fill a three-inch main, and the water from the Parsons' springs, part of which is now running into a barrel on Railroad street is sufficient to fill a two-inch pipe. The two gathered in a reservoir at the Baxter avenue bridge would add more than the amount necessary for the use of the Three Villages, and this could be pumped into the present system. The probable cost of the preparation of a suitable reservoir would be about \$2,600, and the pump and installation would likely add \$2,400 to \$3,500, possibly bringing the total cost up to approximately \$6,000. This expenditure plus operation costs would likely add at least 300,000 gallons to the daily supply.

TOWN TOPICS

Mr. and Mrs. R. W. Darby have returned from their vacation.

Mrs. Arthur Murray and two children are visiting in Waterville.

Porter F. Hunt is drawn on the trial jury at the Orleans County Court.

Orion Smith will occupy the apartment in the Bly block vacated by Burton Dhu.

Mrs. E. E. Pinney of Cedar Rapids, Iowa, is visiting at her old home in Stanstead.

Councillor H. H. Smith was present at the meeting on Monday evening. Friends are glad to see him out again.

Special at the Border Theatre, Monday and Tuesday, Sept. 19 and 20: Wm. S. Hart, in the Testing Block.

Mrs. Wm. A. Cook (née Lena Bennett) of Somerville, Mass., is the guest of her sister, Mrs. Charles R. Counter.

Superintendent Harry Fraser of the John J. Power work at the Butterfield plant has gone to Worcester, Mass., to superintend another job.

Joseph Lowell has sold his double tenement, in rear of his former residence, to Mrs. J. E. McNulty for \$3,000, the sale being made through A. T. Labrie.

Miss Agnes Seguin of the Daylight Store and Miss Belisle of the Pike Store returned Saturday evening from a two weeks' visit in New Bedford, Mass., and other Bay State points.

Mr. and Mrs. Burton Dhu have moved to a farm in Craftsbury which they have rented. Mr. Dhu has been employed at the Butterfield shops for some time. The trek of shopmen back to the farms has begun.

Dr. E. P. Ball has a record five acres of Sanford sweet corn on Lee Farm. The ears are well developed, many of them being 12 to 13 inches long and the corn is nearly mature, but is, of course, being cut for the silo before a frost. This corn is excellent for boiling or roasting.

Elmore Smith, who was awarded the carrying of the U.S. mail between the Derby Line post office to the Boston & Maine railroad station has purchased from Orlas Choquette the bus equipment which formerly carried both Canadian and U.S. mails. The business remained divided only a few weeks; it is too small for division.

Mr. B. R. Bowen has sold his farm in Barnston, near the Hatley line, to Clarence Morse, and will sell the movable property at auction September 23. Mr. and Mrs. Bowen were in town Tuesday, and intimated that they would like to become residents of Rock Island if a suitable place could be acquired. They are good citizens. Who has the house?

Mr. Eugene E. Fox and son, Raymond H. Fox, of Auburndale, Mass., Mr. and Mrs. Henry Whittaker and son, Lewis R. Whittaker, of Brighton, Mass., Mr. E. E. Haines of New York, Mr. and Mrs. Elmer Jack of Newport are guests at White Rock Farm, township of Stanstead, this week. Other guests expected are Mr. E. A. Fox, Barre, Vt., and Mr. and Mrs. H. Brown and daughter Dorothy of Hatley, en route from Barre. This bid fair to be a happy family gathering.

Aaron L. Tilton, commonly known as "Harry," who owns a wood lot in the tract between the Brown's Hill and Walker farm roads, in the township of Stanstead, living in a cabin thereon, was arrested last week and taken to Sherbrooke together with a still he was alleged to have been operating. He was convicted in the Magistrate's Court Friday. His sentence was one month in jail and a fine of \$200 in costs, or in default of payment, on additional six months in jail. The prisoner formerly worked as a cook and at one time conducted a lunch cart at Rock Island.

Mr. E. E. Haines of New York, manager of the New York Life Insurance Company's restaurant which feeds its two thousand employees one meal a day, is visiting relatives in this vicinity. On Monday he was a caller at the JOURNAL office. He says that while conditions are not too bad in New York, people generally, producers and consumers alike, would welcome a return to old price levels. Then everybody would get down to business and all channels of commerce would open up. Asked how prohibition was working out in New York, Mr. Haines said it was accomplishing everything that could be expected. Closing the bars was the big thing and he thought the desire for intoxicants would die with the present generation. Generations to come would not be racing after booze because under improving conditions they would not have acquired the habit.

TOWN TOPICS

Miss Mary Foster of Montpelier is spending a little time here.

George E. Crawford of the National Bank of Derby Line is taking his vacation.

A. P. Davis of Griffin, has moved to the house purchased from Miss Butters in Stanstead.

Kingsbury Foster has closed his farm houses in Derby and returned to New York.

Albert and Raymond Fregeau returned to Loyola College, Westmount, on Tuesday.

Mr. and Mrs. R. R. Harris left Wednesday for Boston and Rockland, Mass., for their annual vacation.

Special at the Border Theatre, Friday and Saturday, Sept. 23 and 24: Constance Talmadge, in "Good References."

Fred Brown Crawford, D. M. D., announces the opening of his new dental offices at 30 Main street, over Frank D. Flint's store, Newport, Vt., September first.

John J. Parker and family have moved back to the living apartments in his studio building where they will remain while their new house on Caswell Avenue is being completed.

Ticehurst Brothers are making good progress brick up their garage, which begins to show up well. The second floor of the rear building will be a hall, 60 by 96 feet, a splendid acquisition for this section.

The new coat of paint on the J. T. Flint house is a marked improvement. All roofs will be stained moss green, making the exterior appearance of the building, like its interior, very attractive.

Mrs. Colby and Mrs. Stevens will entertain the Ladies Aid Society of Centenary Methodist Church at Patton Place, Wednesday, September 21, at 3 o'clock. This being the first meeting of the season, a good attendance is anticipated.

I have for sale a new six-room house, having bath, furnace and electric lighting, finely located in one of the villages. It has two lots with a frontage of 100 feet. A reasonable amount can be left as a mortgage. Charles E. Bennett, Library Square. 4w2

Monday evening, after several days of quiet at the Derby Line customs, Officers Rice and Locklin had a hunch that a car of booze would pass through the quiet village of Derby Center. With George T. Ames and a Peerless car they started out. Timing their going correctly, they interrupted their quarry on Main street, Derby. When the blue caps showed up Messrs. Cotton and Robinson in their seven passenger Studebaker undertook a get-away, but turned the St. Francis Corner from Main street to the Charleston road too sharply and went into the ditch. However, the car was quickly righted and away the fleeing fugitives went, but they were overhauled at West Charleston and taken to Newport jail. The car was a good one and contained 125 quarts Scotch whiskey, 24 quarts Canadian Club, and 16 broken bottles. The two young men were from Worcester, Mass. There was some shooting at the gasoline tank and tires and Derby people were reminded of the days of the Fenian raid.

An attempt was made to get away with something like a thousand dollars' worth of booze stored in the cells at the municipal building, early Tuesday morning. About two o'clock the officer on watch inside became aware that something unusual was going to happen. A well-known individual had appeared in the vicinity, let down the big street light in the "diamond," smashed the globe and then signalled to his pal, who was quickly on the spot. The two men went to the middle window on the north side of the building. Failing in an attempt to raise the lower sash, they removed the strips from the upper one and pried this down from the top. Through the opening one of the men dropped to the floor. Just then the officer was standing on the opposite side of the room; he made a rush for his man who, however, sprang to the opening, apparently going out head first. From this window to the ground is a big drop, but the larger man of the two, who had boosted the other up in the initial operations, may have been on hand to break the fall. The two men were quickly out of sight, but they had been fully identified. Very few people knew the building was being guarded, and the surprise of the housebreakers was great. The municipal council is fully alive to the seriousness of this offence and the case will be vigorously prosecuted.

MUNICIPAL AFFAIRS

At an adjourned meeting of the Rock Island Council on Monday evening a by-law was passed levying a tax of 30 mills (3 per cent) on all real estate, and 32 mills on rental rates. The general assessment against real estate last year was 17 mills. The increase of 13 mills this year has been necessitated largely by the rebuilding of the Neveu retaining wall and other improvements on Foundry Hill. Aside from the general assessment of 30 mills there is a special assessment of 3½ mills under by-law number 38 (water stock) and 6 mills under another by-law for general improvements some years ago. The school commissioners this year found it necessary to advance the assessment from seven to ten per cent, so that the total increase on real estate will be sixteen mills, or \$16.00 on each \$1000 of the valuation. The total tax this year is approximately 5 per cent.

At Monday's meeting of the council notice was given of a by-law which, if passed, will provide for a new contract with the Southern Canada Power Co., for light, heat and power for the next ten years. Under the proposed contract the net meter rate would be 7½ cents per k. w. h.

A small delegation of citizens made complaint concerning alleged nocturnal noises, some small business places near the junction of Railroad street with Main, being especially indicated.

The matter was referred to the chief constable who was instructed to take all necessary steps to prevent a repetition of such disorders, even to the closing of such places as public nuisances, if disorder be continued.

BEEBE

Quite a number from here attended the Ayer's Cliff, Sherbrooke and Barton fairs and spoke well of the exhibits.

Mr. Robert Dexter left last Thursday for his home in Mattapoisett, Mass., after spending several with Mrs. R. S. Smith and Mr. and Mrs. Carlton Twombly.

Mr. and Mrs. Richard Jenkins of Northfield were in the place last Saturday going from here to the home of Mrs. Jenkins' father, Mr. Gardine, at Fitch Bay, where they will remain two weeks. Mrs. Jenkins' niece, Miss Nellie Ketcham, went with them.

James Croden, who formerly lived here is spending a few weeks with old acquaintances.

Mrs. W. B. Sharpe, Beebe Millinery Store. Opening display of Ladies' and Children's Fall and Winter Hats commencing Thursday, Sept. 22.

Mrs. J. G. Ayer of Brown's Hill visited her daughter, Mrs. (Dr.) Gilfillan, a few days last week.

Mr. Gardine and daughter, Mrs. Peaseley of Fitch Bay, called on his granddaughter, Mrs. Edward Washburn, last week. Mrs. Washburn is in quite poor health.

Mr. Burton Robbins preached at Fitch Bay last Sunday.

Miss Ada Longland is assisting Mrs. Carroll Brainerd for a few weeks.

Mr. Quinn is still quite sick.

Mr. and Mrs. Charles Gage and Mr. and Mrs. Harold Rediker of Marlow spent the week-end with the former's daughter, Mrs. Logan, at Greensboro.

A new baby arrived at the home of Mr. and Mrs. William Alexander last week.

GEORGEVILLE

Dr. Haig and family closed their cottage and left on Tuesday for their home in New York.

Miss Ida Wilcox closed her camp last week and left for New York to take up her school work.

Mr. Charles Asher and bride of New York are occupying Miss Wilcox's camp for a couple of weeks.

Mrs. J. P. Brevoort and Miss Dorothy Brevoort are guests of Mr. and Mrs. Davidson for a couple of weeks.

Mr. Roland Taylor went to the Canadian West on the harvesters' excursion.

Mrs. A. T. Drew of Franklin, N.H., is a guest at the home of Mr. and Mrs. Percy Taylor.

The Anthemis has discontinued regular trips but will have some excursion this week.

Mr. Lynwood Farnam of New York is spending a few days at the home of Mr. and Mrs. Davidson.

Mrs. Warren Achilles is visiting her daughter, Mrs. Newman, at Newport.

Christ Church, Stanstead.
Rev. Edward Charles Russell, rector.
(Seventeenth Sunday after Trinity.)
Morning service 11 a.m.
Sunday school 3 p.m.

All Saints Church, Beebe.
Evening service 7.30 p.m.

GOOD HIGHWAYS

FEDERAL AID FOR HIGHWAYS

Approval Given for 855 Projects Up to September 30, 1920—Western States Lead.

(Prepared by the United States Department of Agriculture)

Federal aid for the construction of 9,630 miles of national highways has been approved by the United States Department of Agriculture. Up to September 30, 1920, approval had been given for 855 projects, which form links in one or the other of the 24 marked trails which have been laid out by private associations to cross the country from East to West and North to South.

The mileage which will be constructed with federal aid on each of the several trails is shown in the following table:

Name of Highway.	Length Federal aid approved projects. Miles.
Dixie Highway	895
Ozark Trail	294
Yellowstone Trail	455
Bankhead Highway	963
Meridian Highway	977
National Oil Trails	836
King of Trails	474
National Parks Highway	647
Theodore Roosevelt International Highway	425
Jefferson Highway	994
Lincoln Highway	766
Old Spanish Trail	516
Mississippi Valley Highway	237
Dixie Overland Highway	259
Jackson Highway	181
Pacific Highway	183
Roosevelt National Highway	314
Colorado to Gulf	22
Pikes Peak Ocean to Ocean	319
Atlantic Highway	140
Miscellaneous	452
Total	9,630

The extent to which federal aid has been applied to the trails varies in the different states. Naturally, the Western states are using much more of the federal apportionments in developing roads of this character than the Eastern states. This is due to the fact that the routes in the Eastern states already had been improved to a large extent before the roads were selected by the pathfinders. This was not true in the West, where long stretches of the selected roads were still in an unimproved condition when they were designated.

Nevada leads in its use of federal funds on roads of this character. Eighty-three per cent of its entire mileage of approved federal-aid roads lies on one or the other of the trails which cross the states. On these roads Nevada will spend 90 per cent of the federal money which has been granted to her.

Indiana is a close second, with 80 per cent of its entire federal-aid mileage and 83 per cent of its money aid

Building a Federal Highway in Virginia.

applied to the construction of the trails; and Oklahoma, with 76 per cent of its mileage and 81 per cent of its federal funds, is not far behind.

Florida takes the lead in the percentage of its funds which will be used for trail building, with 94 per cent of its federal allotments so applied; but this amount will be spent for only 56 per cent of the mileage which has been approved in the state.

In addition to the above, the states of Illinois, Kansas, Montana, New Mexico, Utah, and Washington are each using 50 per cent or more of their federal money for the upbuilding of the trails.

Life of Concrete Road.

The life of a good concrete road should be at least twenty years and it would seem that this country could afford to spend a large sum of money in the development of such highways if the money were put into roads which will last at least twenty years under motor-truck traffic. Experts here and abroad believe that the concrete road is good for much longer than twenty years.

Intelligent Understanding.

If we are to have an improvement in the roads, then the improvement must come from an intelligent understanding of the problem.

Poor Roads No Hindrance.

In spite of the absence of suitable roads, there are now between 400 and 500 automobiles in Guatemala.

Salary of Engineers.

Chief highway engineers of California and New Jersey are paid at the rate of \$10,000 a year.

SALEM-DERBY

DEFERRED

Dr. and Mrs. Austin Greenwood closed their cottage and returned to Brooklyn, N.Y., on Saturday, accompanied by Mr. Eddie Rbegan and his two sisters, Frances and Gertrude, who had been visiting at the camp for a couple of weeks.

Mrs. Mary Wells of Stanstead is spending a few weeks with her niece, Mrs. George Curtis.

Dr. Oswald D. Humphrey and family left Camp Myosotis on Tuesday for their home in Jamaica, L.I.

Mr. and Mrs. Morgan L. Knowlton were callers at Salem Pond Farm recently, en route from Old Orchard Beach, Me., to their home in Knowlton, Que.

Mr. Herbert Blanchard was at Newport Center on Sunday.

Miss Candace Shannon has returned home after spending the summer with relatives at Brownington and Orleans.

Mr. and Mrs. E. W. Channell and family of Stanstead and Mr. and Mrs. J. F. McVeay of Ayer's Cliff were at the home of Mr. and Mrs. G. W. Curtis on Sunday.

Our school reopened on Tuesday with Miss Helen Gray of Derby Line, teacher.

Mrs. J. Duval's house was struck by lightning one morning last week doing considerable damage.

VERMONT ITEMS

The automobile registration in the state has passed 40,000.

Miss Grace Annis of North Troy will teach French in Barton Academy this year.

William Bucklin of Derby has sold his residence to Arthur Bailey of Newport.

Commissioner of Agriculture E. S. Brigham is mentioned for the U. S. senate to succeed C. S. Page.

Dr. Wilson of West Lebanon has purchased a lot on Seymour Lake and will build a cottage for his summer home.

The two Shepley cottages at the "Bluffs" on Lake Memphremagog have been sold to Frank D. Flint of Newport.

At a recent meeting of the directors of the Orleans Trust Co., Newport, John W. Redmond was elected president, succeeding the late Charles A. Prouty.

Howard L. Hindley of the Rutland Herald is mentioned for congress. Mr. Hindley is a brother of Rev. J. G. Hindley, a former pastor of the local Congregational Church.

The September term of Orleans County Court was convened Tuesday, Sept. 13. Judge Harry B. Chase of Brattleboro is the presiding judge.

The trial jurors are: Albany, A. C. Cheney and J. B. Dow; Barton, H. R. Barron, David McDonald and C. E. Jenkins; Brownington, Arthur Miles; Coventry, E. L. Bryant and H. C. Goss; Craftsbury, M. E. Williams and F. H. Goodwin; Charleston, J. B. Buck and C. E. Coruth; Derby, R. S. Kelley, F. T. Rich and P. F. Hunt; Greensboro, E. R. Collins and H. W. Calderwood; Glover, N. H. Smith and F. H. Percival; Holland, B. F. Stratton; Irasburg, O. W. Metcalf and N. D. Collins; Jay, G. C. Lucier; Lowell, H. S. Richardson and P. B. Stephenson; Morgan, L. H. Burroughs; Newport City, L. F. Kay, W. E. Tripp and C. N. Brady; town of Newport, Royal E. Bowman and Alec Allen; Troy, F. P. Hunt and Frank Farman; Westfield, W. O. Wright and E. H. Hitchcock; Westmore, H. L. Hinton. There are twenty-four divorce cases on the calendar for this term.

Some of the comments by the press of the state on the common sense of former state highway commissioner, S. B. Bates, reminds us that this characteristic of the man is not wholly the fruit of his make-up, but largely the result of his fifteen years' experience with the highway problems of the state. He would have been a very dull scholar not to have accumulated a liberal fund of that old fashioned quality, so aptly described as common sense. As we gain information of the progress of the road work of the state, it is very apparent that the present heads of the department of highways are just commencing where Mr. Bates did fifteen years ago, and we are paying their tuition, or, as the gamins of the street would say we are the "suckers." The "elder statesman" idea does not obtain with the present administration; the "I know it all" spirit is in the saddle, and we believe, as is usually the case, they are riding to a fall. A just and economical handling of public work is to eliminate all politics and continue the use of all trained service units. The present administration of affairs totally disregards the integrity of civil service, it has been thrown to the winds to pay political debts.

Work Done by Leaves of Trees.

A single leaf of an apple tree has 100,000 pores through each one of which water is continually passing off into surrounding atmosphere. There are 7,000 leaves on a 60-foot elm tree. These leaves, if spread out, would cover a surface of 200,000 square feet, or five acres. Over seven tons of water, in the form of vapor, pass out of these leaves into the air within a summer day.

VERMONT ITEMS

Sharon has just dedicated its new two-room school building.

Harry Laffin of Springfield is the Secretary of Civil and Military affairs.

Keith Barney of Springfield has been awarded a scholarship at West Point by Congressman Dale.

The census shows that only three per cent of the population are illiterate, 1½ per cent less than in 1910.

The open season for partridges in Vermont will begin October 1st. The item in this department last week was inaccurate.

R. S. Kelley of North Troy has been called to be the professor of chemistry in the Massachusetts College of Pharmacy, Boston.

Norman A. Carpenter of Huntingdon Center, died recently at 85 years of age. Mr. Carpenter was a member of the legislature in 1906.

Reports of the department of agriculture show that during July and August 14,155 cattle were tested for bovine tuberculosis, 1,771 being killed.

Asbestos is coming into its own in the state. Its fireproof quality gives it a big market, but time is required to make a commercial success of even a good product.

Down on a rocky hill in Westminster, cheap pasture land, George A. Dascomb has completed a plan inaugurated ten years ago. One thousand pounds of dynamite a week for seven weeks, permitted setting out of a 12,000-tree apple orchard.

Horace P. McClary, treasurer of the Windsor Savings Bank at Windsor, who died recently at 75 years of age, was born in Albany. He was a nephew of the late I. H. McClary, who about 35 years ago was the "maple sugar king" of Orleans County, being the first to buy and handle this product in a large way.

Jack Norton of Windsor has turned, in his last news copy and Vermont newspaperdom loses its star copy writer. His sheets and life were clean. No man in official reporting equalled him in the state. He got the meat of things and his English and the legibility of his copy were all that could be desired. His character amply vied his entrance to the beyond.

The remnant of the third Vermont regiment of the civil war, met at St. Johnsbury September 6. Out of a full original quota of 881, only 22 were present. J. R. Symes of Barnet, 90 years of age, Col. Samuel E. Pingree, 89 years of age, an ex-governor, were the oldest present. Capt. Horace French of Lebanon, N.H., presided, and was re-elected president.

R. Bruce Corlies, cashier of the Welden National Bank has been very successful in loaning farmers money on their maple sugar and assisting them in marketing the product. The result of Mr. Corlies' plan shows the need of cooperation of producers in marketing. All men are not farmers or salesmen. Each is born, not made by training, hence the sugar maker may need the assistance of the salesman.

The Vermont Rural Letter carriers association held its sixteenth annual meeting at Hardwick, August 24 and 25. The officers for the ensuing year are: President, E. M. Farr of Chester; vice-president, A. C. Hooker, Hardwick; secretary, E. H. Sargent, East Thetford; treasurer, J. H. Beckwith, Bethel; executive committee, P. F. O'Connor, Putney, George W. Rice, Bennington, J. C. Carpenter, Irasburg. Next year's meeting will be held in Rutland.

Rev. Fraser Metger of Randolph has been able to bring together the churches in his town at Chandler Music Hall for Union Sunday evening service. The chief attraction was the presentation by moving picture machine of such reels as, "The Life of Christ" (Passion Play), "The Miracle Man," "The Good Samaritan," etc. Congregations of a thousand people are becoming very common, and the expenses are fully met by collections. Who shall say this is not reaching the un-churched?

Barre just lost by death its wealthiest woman, Mrs. Calista E. Bolster, at 86 years of age. Her wealth was evidently not confined to realty, stocks and bonds. Barre's welfare was her chief thought; her legacy to her home city is that of the better part. Her late husband, Levi J. Bolster, was a silk merchant, and over half a century ago his elegant cart or store on wheels, visited this section regularly. His success began in those early days, and many of the silk gowns of the countryside contributed to the foundation of a very large fortune.

Springfield, Vermont, grew in population from 4,784 in 1910 to 7,202 in 1920, the greatest percentage of increase of any town in the state. Now it is back about to the 1910 census. Gov. Hartness has not explained why he cannot apply his boasted panacea for industrial ills to his own town. Vermont is passing through an experience that should open the eyes of the voters, who should learn that printers ink is used in counterfeiting as well as in genuine publicity. Often the spurious is so fine in workmanship that it escapes detection until it is too late.

VERMONT ITEMS

The Caledonia County fair is on at St. Johnsbury this week, Tuesday, Wednesday and Thursday.

Mrs. Walter H. Cleary of Newport is in the St. Johnsbury Hospital, convalescing from a successful operation for appendicitis.

Miss Dorothy L. Wemple of Schenectady, N.Y., is the home demonstration agent of Franklin County, a recent acquisition.

Frank Burns of Newport, who is in a Boston hospital suffering from serious injuries received in an automobile collision, is reported to be recovering.

Forty-two guarantors of the Community Chautauqua at Springfield paid \$22.21 each, the amount representing a \$932.82 shortage. This seems to be quite common.

The campaign for ten dollar memberships to the Farm Bureau in Orleans County, has passed the 1,000 mark and now looks like 1,250. Let the good work go on.

W. M. Wright, municipal court judge in Orleans County, is decreasing the fines of rummies. This is unfortunate, as a good stiff fine is real cooperation with the police arm of justice.

Prof. and Mrs. Humphrey and daughter, who spent the summer vacation at their cottage on the south shore of Big Salem Pond, have returned to their home at Jamaica, L.I.

High Sheriff E. J. Hill, while at Barton fair, corralled a little booze, but the three bootleggers got away. The sheriff's presence was salutary. John Barleycorn fades away when the signs are wrong.

William Nelson of West Charleston, who was recently taken suddenly ill with appendicitis and removed to Brightlook Hospital, St. Johnsbury, for an operation, is recovering. It was reported here that he did not survive the operation, but this report was untrue. Mr. Nelson is one of Charleston's most public spirited citizens and his removal would be a great loss to the town and county.

THE BEEBE GARAGE

At your service as usual

A good line of Goodyear Tires—Columbia Storage Batteries—Ford Parts—and Automobile Accessories.

Storage Batteries tested and filled with distilled water at any time without charge.

All kinds of Repair Work and Overhauling. Pass your automobile "grief" on to us.

C. W. BRAINERD, Proprietor.

THE STORE OF DEPENDABLE GOODS SOLD IN A DEPENDABLE WAY

ROCK ISLAND,

QUEBEC

IS NOTABLE DATE

May 23 Anniversary of Birth of English Journalism.

Two Hundred and Ninety-Nine Years Ago Nathaniel Butter Got Out First Newspaper in London.

May 23 was the 299th anniversary of the birth of English journalism. The first English newspaper was founded in London by Nathaniel Butter May 23, 1622. There previously had been from time to time efforts toward the sale and distribution of news. The Tohing-pao, a paper of the Chinese court, enjoyed a continuous issue from the year 713 to 1900, when it ceased publication and gave its name to a successor published in Peking today.

Ancient Rome had its newspaper, the Acta Diurna. It was the organ of the capital, containing military reports, political comment and the latest sport "dope" concerning lions and Christians. Parents of young Romans used to hide the paper from their sons, who, strange to say, preferred to look at the feminine scandal ads rather than view the actual article always on display along the Appian way. Sporting editions were eagerly bought by business men in the Forum. A record sale was reported the day Rome's pet gladiator, Bamberus Ruthicus swatted a full-grown tiger over the bleachers out the Coliseum. Finally, the paper with the rest of the Eternal city fell into the hands of the German invaders and soon after ceased to exist.

There were no papers during the years that followed, but toward the close of the Middle ages there came into circulation what were known as continental news letters. These letters were unauthentic reports with no fixed date of publication, to which the early correspondents contributed stories of the Crusades, the discovery of America, or the latest anti-Semitic movements in Austria. The accounts were always highly colored and the facts distorted. The publications were never sold. They were read in taverns on the payment of a fixed sum. The writers were not held responsible and the news was little better than gossip. From this source which had found its way into England came Nathaniel Butter's weekly.

Butter's paper was called the Weekly Newes, and to him goes the distinction of "printing all the news of the day upon a single sheet and publishing it regularly week by week upon fixed days and of giving it a distinctive title at a time when there was nothing that could with strictness be called a newspaper."

It was formerly stated and for a long time believed that the first English newspaper made its appearance in the year 1588. The London museum contained copies of the old Mercury publications bearing the date 1588, but not long ago students at Cambridge discovered that these papers were forged copies, according to the Columbia Missourian. The type of printing employed in producing these papers was not invented until many years after that date. In fact, it was nearly two hundred years later.

No less a person than King Charles I used the columns of Butter's paper. He was probably the first of that vast army of persons who seek lost dogs through the pages of the public prints. An old copy of the paper contains an advertisement for a strayed spaniel very dear to his majesty. A reward is offered.

Butter introduced the editorial "we" into the newspaper for the first time. He also employed "newsboys," who were women, to hawk the paper on the street. These news vendors were frequently interfered with by persons who sold the news booklets or pamphlets that came into use toward the close of the sixteenth century.

In his early days Butter was considered wealthy, but through misfortune he lost his possessions. He was a member of the Royalist party in England. He died on one of Prince Rupert's ships in 1649.

An Eskimo Opera.

Copenhagen opera goes recently have witnessed the production of an Eskimo opera, "Kaddars." Hakon Boerresen, the composer, has based his score on the few vestiges of ancient song which the Greenlanders possess. A group of Eskimo traveled to Denmark to assist in preparing the stage pictures, and to appear in minor roles. They carried with them a large collection of native costumes. Mention of an opera with Greenland's icy mountains as background naturally connotes India as a scene for stage entertainment. One would not be greatly surprised to learn that the next Drury Lane melodrama is to have Tibet for scene, now that the Mount Everest expedition is so much in the public eye.

Conscienceless Turks.

Recently at a fancy ball in Constantinople many Turks appeared wearing American pajamas, and when investigation was made it was discovered the Turks had raided some warehouses where garments for Armenians were waiting distribution after being sent from this country.

The Gentle Ego.

"What do you consider the ablest document in history?" "Can't tell you now," replied Senator Sorghum. "But the typist has it in hand, and I think I will give it out to the public tomorrow."

Liquor Commission

CLUBS, STEAMBOATS, DINING-CARS

IT is permitted to sell Beer and Wines in the Dining-room only, of a Club authorised by the Commission, where complete meals are regularly served to its members and their guests, provided that such Beer and Wine be consumed on the premises. Meals at which it is permitted to sell Beer and Wines, must be served between nine o'clock in the morning and ten o'clock in the evening (standard time) The same rule applies to Steamboats and Dining-Cars while carrying passengers.

CLUBS, STEAMERS, DINING-CARS CANNOT SELL ANY STRONG LIQUORS.

Article 31—Clause 3—"Any person in charge of any Steamboat, Dining-Car, or Club, may during any meal taken by a traveller or a member of the Club, as the case may be, sell him, by the glass or by the bottle, wine or beer, which must be consumed by him and his guests, on the premises, in the Dining Room only, during the meal, provided, however, that a permit therefor be granted to such person, upon payment of the duties prescribed by this Act, and that such permit be in force."

Beer and Wine, so served, must be served to travellers or members of the Club, as the case may be, in the original bottles. It is forbidden to add to beer or wine any alcoholic liquor whatsoever.

The permit for the sale of Wines and Beer must be kept constantly posted in public view in the Dining Room of the Club, Steamboat, or Dining-Car. Any infraction of this clause of the law will be severely punished.

Quebec Liquor Commission

This advertisement is not being published to advance the sale of any alcoholic liquor, but to acquaint the people with this new law and secure their co-operation in its successful enactment.

NOTE: The Commission desires to inform the public that all of its employees carry the necessary means of identification. Any person presenting himself without this official identification may be considered as an importer.

The next advertisement will deal with the sale of WINES AND BEER AT BANQUETS AND SUMMER RESORTS.

HAVE NEW GLORY

Incident Typical of the Fine Spirit of France.

How Madame le Baraquet Views Her Squalid Quarters in the Once Splendid City of Soissons.

Al. and Mme. le Baraquet live in the shadow of Soissons cathedral. They are very partial to Americans. Particularly Mme. le Baraquet, a dear old aristocrat, confesses that she adores them for, as she explains, "If the Americans had not come, we could not have returned home." And she shakes her white curls in testimony of her great earnestness, remarks a writer in the American Legion Weekly.

Living amid their old scenes is very difficult for the Baraquets. If you knew Soissons under shell fire, you will wonder why in heaven's name any one would care to come back to this town of underground dugouts. You will remember that all the houses around the cathedral were leveled by the bombardment. Once upon a time the home of the Baraquets, with its carved rafters in the dining hall and its oak-paneled library, was a thing of rare Seventeenth-century beauty. But there is not one stone of it laid upon another nowadays, and the Baraquets live in what was once their wine cellar. Monsieur is 82 years old. Madame is 76.

Today the couple sleep in a bed which the old man has fashioned out of a packing box. A decrepit French army stove stands at the foot of the bed. Just beyond, Monsieur (in spite of his rheumatism) has built a little table against the wall. Their cooking utensils have been picked up from the debris. Their plates are American issue mess kits. Once their table was graced with rare Limoges china and antique silverware. Gone are the ancestral paintings. In their place there are three crude lithographs, one of Marshal Foch, one of Prince Bonaparte and one of Gen. Pershing.

Yet when they invite you into their dugout it is with all the grace of pre-war days. It is dingy down there. Their little room is filled with smoke and the walls are covered with mildew and slime. The hacking cough of Madame tells its own pathetic tale. Sitting in these squalid quarters, your mind wanders back to the days when a great house stood above those ruins. You see the wonderful tapestries, the old lamps, the marble statues, the liveried servants, the library rich in treasure of a forgotten age.

We fell to talking of other times. "When I was a lad," explained M. le Baraquet, "I watched Empress Eugenie, herself, ride up to this house. . . . I mean of course, our house as it was . . . in elegant coach and four. I watched her as she stepped out on the carriage stone that you will still find in front of our dugout. She was a great friend of my mother's. When I brought Madame, as my bride, to this home, Eugenie attended the ball my father gave to honor us. Little did he know that we were destined to be the last of our line. . . . Our son, Pierre, died in the first battle of the Marne."

Monsieur turned suddenly to stir up the wood fire in the French army stove. The embers were fleecy white, growing gray. I turned discreetly to where Madame sat on the edge of the packing box bed. Madame is deaf, so she had not heard the name of her son, which Monsieur had spoken in a lowered voice. Her eyes peered far into the gloom, dreaming of the fair ladies of old France that once had crowded her salon.

Suddenly her face changed and her eyes sparkled brightly with a new fire. "The old house knew many a famous guest, Pierre, to be sure," she cried. "But this new home of ours, this dugout, it has sheltered many a brave soldier. We have reason to live here in greater pride—a new glory for the old!"

Too Many Commandments.

Lord Leverhulme some time ago bought an island off the coast of Scotland, with a view to improving the lot of its 30,000 inhabitants, mostly small farmers, farm workers and fisher-folk. Lord Leverhulme's lawyer drew up a very elaborate contract to be signed by each tenant. It contained no fewer than 26 clauses or stipulations.

"One old fellow," relates Lord Leverhulme with great gusto, "returned the contract unsigned and sent with it this note: 'I havena been able to keep the ten commandments for the sake of a mansion in heaven, and I'll be d—d if I'll agree to keep 26 commandments for a sma' house in the island o' Lewis.'"

Bad Lights Slow Production.

A survey of 446 industrial concerns in 15 states and 57 towns, recently made, showed that 25 per cent of the work is done under artificial light, but that only 40 per cent of the factories have been adequately lighted by their owners. Proper lighting facilities, it was shown, increased production, reduced spoilage, decreased number of accidents, improved discipline and brought about better hygienic conditions.

Urges Athletics for Women.

The woman of today needs to learn and play more athletic games than ever before if she is to take her new position in America as the bearer of the burdens of citizenship, according to Dr. William Burdick, supervisor of physical education for the public schools of Maryland.

HATLEY

Mr. and Mrs. W. Schoolcraft, Mr. and Mrs. Rush Harris and Miss Morrill of Derby Line were calling at Highland place recently.

Miss Linda Pellerin has returned to the home of her sister, Mrs. Jos. Smith, in Derby Center, after spending a few weeks at her home in Hatley.

Mrs. Mary Henry and granddaughter, Miss Mildred Henry, have returned to Montreal after visiting relatives in this place.

Mr. and Mrs. J. B. Reed, Misses Rosamond and Helen Reed, and Master Stewart Reed were recent visitors at C. P. Young's.

Mr. and Mrs. Victor Larson and Master Edwin Larson, also Mrs. McAllister and child of Coaticook, were calling on friends in Hatley last week.

The Thanksgiving services of the English Church were conducted by Rev. Cecil Stevens of Coaticook. Following the Sunday services a congregational picnic was held on the church grounds on Monday, which was quite largely attended and much enjoyed by all.

Mr. William Fish and daughters Clarabell and Vivian, also Mrs. Eva Macintyre and little daughter were recent callers on old friends in the village.

Mr. and Mrs. Milton Sharnan are to be congratulated on the birth of a son, born on Tuesday, Sept. 6.

Mr. Monta Whitcomb of Andover, Mass., was the guest of his people here last week.

Mrs. Wm. McClary accompanied her brother, Mr. A. E. Hodges, to his home in Ashland, N.H., from which place she will go to Amesbury, Mass., where she will be the guest of her sister, Mrs. Jenkins.

Mr. Fred Ayer and family have been spending the past week at the Pomeroy cottage, Round Bay, Lake Massawippi. They had as a week-end guest Miss Elsie Gibson of Hatley.

Miss Hazel Emery of Newport is spending a few days at the home of her parents, Mr. and Mrs. Vere Emery.

Mrs. W. E. Greer and Mrs. Hamilton of Hatley Center were visitors at C. P. Young's on Friday of last week.

Mrs. O. H. Glidden went to Stukely on Saturday to visit her husband who is employed in teaming that place.

Mr. and Mrs. A. E. Gage and Mr. Stanley Haines were at Emberton on Sunday, the latter remaining for a time as the guest of his cousin, Mr. Harold Sutton, who is in charge of a camp there.

School opened on Tuesday with Miss Watson of Stouffville in charge of the elementary department and Miss Kirby of Cookshire as principal.

The old North Church school has also opened with Miss Walkenshaw as teacher.

A number from this place attended the School Fair at Ayer's Cliff on Friday.

AYER'S CLIFF

It is expected that Rev. E. H. Timberlake will preach in the Union Church here next Sunday at 2:30 (standard time); also in the evening.

Mr. and Mrs. S. W. Emery, also Mr. and Mrs. W. L. Brown and daughter Alice attended the Ellis and Barter wedding at Stanstead last Wednesday evening.

Mr. and Mrs. Ezra Woodard, also Mr. Russell Woodard of Beebe were guests of their parents, Mr. and Mrs. G. W. Woodard, last Sunday.

Mrs. H. Siliker is able to be about after a few days' illness.

Mrs. Irving Standish and daughter were guests of Mrs. Standish's parents Mr. and Mrs. Charles Robinson on Sunday.

Mr. and Mrs. Walter Brown attended church at Newport last Sunday. Remember the Loyal Workers' meeting every Tuesday evening at 7 o'clock (standard time).

Mr. Eugene Colt is making rapid progress on his new house, which will be a fine residence when completed. Hope others will take notice and do likewise.

GRANITEVILLE

Mr. and Mrs. Harold Rediker motored to Greensboro, Vt., on Saturday.

Miss E. Batchelder of Stanstead spent the week-end with Mr. and Mrs. G. E. Moir.

Mrs. Floyd Blair and two children of Worcester, Mass., have been visiting Mr. and Mrs. W. C. Blair.

A daughter was born to Mr. and Mrs. Robert Williams Sept. third. Congratulations.

Mrs. Bert Moigis of Beebe visited her parents, Mr. and Mrs. Walter Keniston, one day last week.

Our school opened on the eighth with Miss Treasa Walker as teacher. R. D. Brodie of Itherville was a week-end visitor in the place.

OBITUARY

LULA MERRIMAN

The community was greatly shocked when the sad news went abroad that Lula, youngest daughter of Mr. and Mrs. Eugene Merriman of Stanstead, was no more. Her sickness was of short duration, and we little thought the end so near. A weak heart, however, made the case more critical.

Although she had not been well for some weeks, she was able to be out among her friends. She was stricken seriously ill Thursday afternoon. A doctor was summoned, but to no avail. She gradually failed and at half-past one a.m. the following Monday, Sept. 5, the death messenger suddenly appeared; the spirit fled, so calmly and quietly, just as her life had been. Loving hands ministered to her need, all was done that could be, but "God loved her best." We will all remember Lula as a loving friend, always ready to lend a helping hand, with a kind word and cheery smile. She was born in Stanstead, March 21, 1902. Why a loved child, an idolized sister, was taken is a mystery, but "sometime we'll understand." The many beautiful flowers that covered the casket and filled the room were silent tokens of the esteem in which she was held by her many friends. She leaves a father, mother, sister Ethel, in Regina, Sask., brothers Fred and Charles of Stanstead, many relatives and friends to mourn her untimely death. She was a member of Cepentary Methodist Church and Sunday school. The funeral took place on Wednesday afternoon, at the home, where many of the friends gathered to show their respect and sympathy for the bereaved family. Rev. H. Mick, her pastor, officiated, speaking words of comfort to the sorrowing friends. She was laid tenderly away in Crystal Lake Cemetery, beside her little sister Mildred, who went before, nine years ago. There we left her at the close of the day till the "Life Giver" appears.

Sleep on thy beauty, thou sweet angel child, By sorrow unlighted, by sin undefined, Like the dove to the ark, thou hast flown to thy rest. From the wild sea of strife, to the home of the blest.

A FRIEND.

MARK SMITH

Mark Smith, a well-known resident of Barnston township, died at his home on the Baldwin's Mills road on Monday, Sept. 5. For a long time he had been in feeble health, but on the eve of his death seemed better than he had been for some months, and his silent passing ere morning came was a great shock to relatives and friends.

The late Mr. Smith was born in Stanstead, Aug. 27, 1850, and there spent most of his boyhood days. At the age of 20 years he married Cynthia Caroline Smith, the daughter of the late Robert and Eliza Smith of Stanstead. Mark Smith was a highly esteemed citizen, "a friend to all and enemy to none." He leaves to mourn their loss two sons and one daughter, Orrin Smith of Rock Island, Mrs. Percy Haskell of Stanstead, Delbert Smith of the home farm; two brothers and two sisters, Charles Smith of Holland, Vt., John Smith of St. Johnsbury, Vt., Mrs. Vernon Akley of Orleans, Vt., and Mrs. Cortland Pomroy of Stanstead; also five grandchildren, as well as nephews and nieces and many friends. The funeral took place at the home being conducted by Elder Wilcox of Holland, Vermont. The bearers were Orange Washburn, Arthur Washburn, Leslie Washburn, Willie Washburn, and two brothers-in-law, William Hartley of West Brome and Henry Smith of Tomifolia. Burial in the family lot at Crystal Lake Cemetery.

Gently the stars are shining
Down on the silent grave
Where lies our dear father,
Sleeping, the one we loved
But could not save.
Sleep on, dear one, thy labor o'er,
Thy willing hands shall toil no more.

WAY'S MILLS

Miss Rose Horn has returned from Manchester and is with her brother, Mr. W. N. Horn.

Miss Mackenzie of Inverness has arrived to take her place as principal of the model school here. She will make her home with Mr. and Mrs. Harry S. Dyson.

Mr. E. J. Gilbert is ill with grip. The young son of Mr. F. C. Humphrey is very ill with cholera infantum.

The Young People's Society have joined the "Y's" and will meet with the Ayer's Cliff "Y's" on Saturday evening.

Mr. and Mrs. F. C. Daniels, Mr. and Mrs. W. G. Thompson and Mr. W. Horn were in Sherbrooke on Sunday and Monday.

Mr. and Mrs. B. Baldwin of Baldwin's Mills spent the week-end at I. E. Thompson's.

Another good dance will be held in Way's Mills hall on Friday evening, Sept. 23. Music by International orchestra. Refreshments will be served.

CARD OF THANKS

We wish through the Journal to Express our most sincere thanks and gratefulness to those who so kindly assisted us in our time of sorrow and affliction and those who were so kind to bring flowers.

Mrs. Mark Smith,
Mr. and Mrs. Orrin Smith,
Mr. and Mrs. Percy Haskell,
Mr. and Mrs. Delbert Smith.

BARTER-ELLIS

At Christ Church, Stanstead, on Wednesday evening, Sept. 7, the marriage of Muriel Vienna, younger daughter of Mr. and Mrs. Parker L. Ellis, and Howard Charles Barter, only son of Mr. and Mrs. Oliver Barter of Bury, was solemnized, the Rev. E. C. Russell performing the ceremony.

Mendelssohn's wedding march was very acceptably rendered by Mrs. Brownlee as the bridal party came up the aisle to the altar.

The bridegroom was attended by his cousin, Mr. Chauncey Barter, of the Canadian Bank of Commerce, Mansonville.

The bridesmaid, Miss Ruth Aldrich, B.A., walked alone, looking very pretty in a gown of pale green organza, with lace hat, and carried a sheaf bouquet of sweet peas. She was followed by two little flower girls, Miss Janet Wheeler and Miss Doris Holbrook, cousins of bride and groom respectively, who were very sweet in their white dresses with flower-trimmed veils, carrying baskets of sweet peas.

The bride came in with her father who gave her away, and was a charming picture in a white satin gown with pearl trimmings, embroidered veil and orange blossoms. She wore the groom's gift, a chain and pendant set with pearls, and her bouquet was white roses with tulle streamers.

The ushers were Mr. B. Corey of Beebe and Mr. F. Barter of Bury.

A reception followed at the bride's home where her mother and father received the large company of relatives who offered their good wishes and congratulations to the bridal pair who stood under a yellow and white floral arch in the living room.

The dining room decorations were also carried out in yellow and white. After the wedding supper the Rev. Mr. Russell with a few remarks, proposed the toast to the bride and groom, which was drunk in the usual manner.

Later the bride distributed portions of wedding cake tied with white ribbon, to each of the guests.

The bride's going away gown was of brown embroidered crepe, with hat of velvet and flowers.

As an appreciation from the bride and groom, the bridesmaid received a gold and pearl brooch; the small flower girls, gold initial rings; the best man, a set of military brushes; and the ushers scarf pins.

Tokens of good will were shown in the choice array of gifts arranged in the upper hall, where silver, china, cut glass, pyrex, bedding, linen, and checks were displayed.

Amid the interested "send-off" of the company, and showers of rice and confetti, the groom took his bride away for a motor honeymoon trip to the White Mountains.

The good wishes of their friends, for a happy future, go with them to their new home in Bury where Mr. Barter is on the staff of the Merchants Bank. Mrs. Barter, who is a deservedly popular young lady, has just resigned from the teaching staff of the Sherbrooke High School.

Many out-of-town guests from Bury, Island Pond, Lennoxville, Waterville, North Hatley and other points attended the wedding.

MASSAWIPPI

At the Sunday service Mrs. (Rev.) Hopper acted as organist very acceptably.

Mr. A. Laduke and family have been away several days on a motor trip to relatives and friends at Perceton and Stanbury, returning Monday.

Miss Alice Griggs of Sherbrooke spent the week-end with Miss A. Hitchcock.

Miss Alice Whitecomb was home from Sherbrooke for the week-end.

Mrs. Elmer J. Smith of Newton, Mass., has been visiting her sister, Mrs. George Hunter, at "Twin Elms," and other relatives here the past two weeks. She left Saturday for Newton.

W. W. St. Dizier spent the week-end with friends at Holland, and motored to Brownington Sunday.

Mrs. Hodge of Sawyerville, who has been staying with Mrs. A. Wheeler the past three weeks, returned home Sunday.

Mr. G. Hitchcock, Miss A. Hitchcock, W. W. St. Dizier and Mrs. E. St. Dizier were at Magog last Wednesday for the afternoon and evening.

Miss Maude Adams of Three Rivers, who has been a guest at Bellevue Heights, left for her home on Friday. She was accompanied to Sherbrooke by Mrs. C. W. Wilson.

Miss F. C. Wilson, who has spent her holidays in Inverness, East Angus and Cookshire, has returned to resume her studies at Waterville academy.

Mr. and Mrs. C. Hool of Hatley, and children, were guests of her parents here on Sunday.

During the week Mr. and Mrs. C. Wilson of Bellevue Heights entertained Mr. and Mrs. A. W. McKay of Danville, Vt., Mr. and Mrs. D. D. Kimear and family of East Angus, Mr. and Mrs. Walter Edwards and Misses Bertha and Margaret McVetty of Cookshire, Mr. and Mrs. R. Baptist and Mr. Robert Clark, B.C.L., of Three Rivers, and Mr. Peter Clark, B.A., of Montreal.

BEEBE ACADEMY NOTES

Beebe academy reopened Sept. 6, with an unusually large attendance. 150 pupils are already enrolled. Much credit is due to those who had charge of the repairing of the school building. Nearly all of the interior has been done over.

Friday, Sept. 9, the academy was closed to give the pupils the opportunity to attend the school fair at Ayer's Cliff.

The successful pupils in the June examinations of the Senior Grades of Beebe academy were as follows, the names appearing in order of merit:

Grade IX: Sarabel Layfield, Georgia Packard, Chellis Bacon, Dorothy Haselton.

Grade VIII: Margaret Woolis, Hannah Leslie, Harold Haribut, Elizabeth Damon, Opal Laraway, Kathleen Kezar, Marjorie Bacon.

Grade VII: Olive Brown, Evelyn Laraway, Rachel Elliott, Ruby Lavers, Blanche Sharon, Gwendolyn Matthews, Beulah Brainerd, Robert Waugh, Doris Parker, Leah Wells, Mildred Robertson, Allan Pocock, Clinton Stratton, Barry Clark, Lillian Crook.

MANSONVILLE

Correction—It is Mrs. Fred Boyce (not Brice) who fell and broke a wrist. Dr. Gallenger attended her.

Miss Mason is the new principal of the academy, and Miss Percy is teacher of the intermediate department. Both make their home with Mrs. William Jersey. Miss Marjorie Holmes is teacher of the primary department.

Ernest Chappell and family returned Friday to their home in Pittsburg, N. H., after visiting friends in town.

Mr. Benjamin is making some necessary repairs on the residence of C. H. Besette.

The old Roman Catholic Church building is being finished off into a store.

MARRIED

BARTER-ELLIS—At Christ Church, Stanstead, Sept. 7, 1921, by the Rev. E. C. Russell, Muriel Vienna, daughter of Mr. and Mrs. Parker L. Ellis, to Howard Charles Barter, son of Mr. and Mrs. Oliver Barter of Bury, Que.

PUBLIC NOTICE

Is hereby given that the list of Parliamentary Electors for the Municipality of the Township of Stanstead has been prepared according to law, and that a duplicate thereof has been lodged in my office at the disposal and for the information of all persons interested and that a final revision, correction and examination of said list will take place at a session of the Municipal Council to be held at Tomifolia, Que., commencing at the hour of 10 o'clock a.m. on Monday, October 3rd, 1921.

L. E. CARPENTIER, Sec'y Treas.
Tomifolia, Que., Sept. 15.

BARNSTON

Rev. C. H. Schutt, superintendent of Baptist home missions, will give an address in the Baptist Church on Thursday, Sept. 22, at 8 p. m. This will be Mr. Schutt's first visit to the Eastern Townships, and it is hoped the people in this section will turn out in large numbers to hear him speak. He will be accompanied by Mr. W. C. Senior, who will speak and sing. Those who have heard Mr. Senior in the past, will be glad to come and hear him again.

The annual offering in aid of Baptist Home Missions will be taken next Sunday, Sept. 18.

Mr. Gordon England, who is conducting the school at Baldwin's Mills, spent the week-end at his home here. Mr. Herbert McCutcheon has put a metal roof on his barn, and is installing electric light in his cosy home.

Among those from here who attended the school fair at Ayer's Cliff last week were Mr. and Mrs. W. L. Cleveland and family, Mr. J. N. Jenks and sons, and the Misses Jones and Wheeler.

A baby girl was born to Mr. and Mrs. Henry Wheeler, Sunday. Congratulations.

The municipal council met at the town hall Monday of last week.

A new metal roof has been put on the town hall.

Mr. and Mrs. Tabor Buckland of Bridgeport, Conn., who have been the guests of Mr. and Mrs. W. H. Buckland, have gone to Orleans, Vt., to visit Mrs. Buckland's parents, Mr. and Mrs. B. E. Converse.

The water supply has failed at the creamery, and Mr. Lamarche is carting his supply from the Jenks' farm.

Mr. George Moore of Montreal is paying a visit to his children, Ruby and Roy, at Mrs. Morrison's.

Mr. and Mrs. J. C. Cushing, Holyoke, Mass., spent a day, and Mrs. Amy E. Clark of St. Johnsbury, Vt., several days, at the McCutcheon home.

Mr. P. R. Thornton of Coaticook took dinner with Mr. and Mrs. J. N. Jenks, Sunday.

Miss Bertha McKay of North Hatley has recently been the guest of Mrs. R. N. Jones.

Miss Dorothy Jones is spending some weeks in Montreal, the guest of Mrs. Wm. Busby.

The board of school commissioners have, after much effort, succeeded in securing a principal for the Way's Mills model school, which reopened Monday.

Mr. B. Kezar and party of North Hatley were calling at "Woodland Rest" Sunday.

Mr. and Mrs. Herbert McCutcheon this summer motored to Pittsburg, N. H., also accompanied by Miss Lucy Kathman, spent a day at Stanstead and Derby Line.

Mr. and Mrs. G. A. Hadlock and son of Lennoxville spent Sunday with relatives here.

Mr. and Mrs. C. T. Adam spent Sunday at Ayer's Cliff.

Friday evening of last week Mr. and Mrs. G. B. Hall entertained the visitors in town from Bridgeport, Conn., and also Mr. and Mrs. W. Parsons and Mr. and Mrs. W. H. Buckland.

Mrs. C. J. Cushing spent a couple of days very pleasantly last week at Lennoxville at the home of Mr. and Mrs. G. A. Hadlock.

Fine ripe tomatoes, cauliflowers for pickling, celery, cabbage, corn, etc., etc., for sale at the Jenks' farm.

BALDWIN'S MILLS

A large number from this vicinity attended the school fair at Ayer's Cliff on last Friday, and several of the children received prizes.

Mrs. Charles Washburn, who is over eighty years of age, has been visiting her daughter, Mrs. Edwin Davis, of Rock Island for the past three weeks.

Mr. and Mrs. Harry Mizo of Newport were at Mr. T. Blake's on Sunday.

Miss Annie Markwell is visiting at the home of her uncle, Mr. C. H. Markwell.

Mr. and Mrs. Stewart George of Holland, Vt., were recent visitors in town.

Mr. and Mrs. W. G. Belknap were at Soth Barnston on Sunday.

Miss Alfretha George, who spent the summer at Mr. L. Markwell's, has returned to Lowell, Mass.

Mr. D. S. Caron has sold his cottage to Mr. J. S. Pyne of Coaticook.

MAGOON'S POINT

Miss Iona Drew is teaching the school here.

Mr. Joseph Little was in Sherbrooke on business last week.

Mr. E. R. Camber got a fine deer on Friday.

Rev. Henry and Mrs. Mick of Stanstead recently returned to their home after spending the past month at Mr. G. A. Boynton's cottage.

Mr. Joseph Little was at Tomifobia on Friday.

School opened in the Boynton schoolhouse on Monday, with a good attendance. Miss Curtis of Crystal Lake is teacher.

Mr. and Mrs. Glennie Wheeler and family of Beebe were guests of her parents, Mr. and Mrs. C. Mishia, on Sunday.

Mrs. Philip Covey of Stanstead spent Sunday at her cottage at The Narrows.

MAGOG

Mrs. F. Waterman of Manchester, N.H., was a recent guest of Mrs. Merrick.

Miss Lillian Pike is spending her vacation with her mother in Colebrook, N.H.

Miss Muriel Cunningham left last week for Montreal, where she is engaged as teacher.

Mrs. G. A. Colburn spent the week-end in Waterloo.

Mrs. Manning, assisted by other ladies, entertained on Thursday evening at a miscellaneous shower in honor of Miss Mary Shonyo, whose marriage takes place Sept. 14. A prettily decorated basket was drawn into the drawing-room on a cart laden with gifts and presented to the bride-to-be, who accepted the gifts in her pleasing manner. After a social hour dainty refreshments were served and the guests departed wishing Miss Shonyo much happiness in her new home.

Mrs. Rowell of Boston is a guest of her sister, Mrs. A. Shedrick.

Dr. Marston Adams is entertaining a friend from Montreal.

Mr. F. E. Patch has his new garage nearly completed. Mr. Sam Kennedy has charge of the work.

Miss Ruth Parsons of Waterville was a recent guest of Mrs. George Cunningham.

Mr. and Mrs. R. Styan and three children returned last week from Ottawa, where they visited his mother and other relatives.

Miss Edie Shonyo from Saskatoon is visiting at the home of her uncle, Mr. Henry Shonyo.

Rev. T. Roy of Richmond and Rev. C. A. Adey of Inverness were in town last week calling on old friends.

School opened on Tuesday of last week with a full staff of teachers.

Miss Georgiana Shedrick spent her vacation with relatives in Bruce, Alberta, returning home a few days before going to Montreal for her school duties.

Miss Dorothy Donald of Montreal was at home Labor day.

Miss Claire Donald returned to Montreal after spending the summer holidays at her home.

Miss Minnie Shedrick from the Children's Memorial Hospital is spending her vacation with her parents.

Miss Grace Horner attended the Robinson-Duncan wedding in Montreal Sept. 7.

FITCH BAY

Mr. and Mrs. H. Beecher, Miss Emily Beecher and Mr. S. Preston Williams returned to New Haven, Conn., on Tuesday, Mrs. Williams remaining for a longer visit with Mr. and Mrs. B. H. Rider.

Miss Rachel Holden of Sherbrooke is the guest of Mr. and Mrs. Bailey.

Mrs. Lewis Dean of Montreal is visiting her sisters, the Misses Sheldon.

Mrs. D. C. Waite, Rosamond and Harold Waite are visiting Mrs. Waite's parents in Manchester, N. H.

Mrs. Horace Alex, while attending Sherbrooke fair on Wednesday of fair week, was taken suddenly ill, making it necessary for her to be removed to the Sherbrooke Hospital where she was obliged to remain for the remainder of the week. She is now at her home and making good progress toward recovery.

Services will be held in St. Matthias Church on Sunday at 1.30 p. m. Sunday School at 10.15 a. m.

Burton E. Robbins will speak in the Advent Church at Fitch Bay next Sunday morning and evening as usual.

The W. C. T. U. will meet with Mrs. F. H. Rider at three o'clock Friday afternoon, Sept. 16, instead of the regular day. Visitors welcome.

A chicken pie harvest supper will be held at the home of Mr. and Mrs. Geo. Gill on Tuesday evening, the 20th inst., beginning at 6 o'clock. Everyone is invited to come and enjoy all the good things of the season at this hospitable home.

MCCONNELL

Two sad deaths occurred here recently. Little Rita, the two-year-old daughter of Eug. Gamache was taken ill with cholera infantum and passed away the following day in spite of all that could be done to save her.

Last Thursday Mayor F. Gauthier's little son Ovilla was taken quite ill. The next day he seemed somewhat better but on Saturday as he seemed to be suffering more, Dr. Brown was called, pronounced the disease appendicitis and advised taking the patient to the hospital, which was done. The boy was operated on soon afterwards but it was of no avail and the little fellow passed away Sunday morning, age 8 years. Much sympathy is felt for the bereaved family.

The Misses Florence and Julia Bacon have received bonuses for successful teaching last year at Burroughs Falls and Boynton.

Miss Bacon is teaching near Fitch Bay, Miss Julia Bacon at Burroughs Falls and Miss Olive at Brown's Hill for this term.

The Misses Gauthier were called home on account of the death of their little brother.

Mrs. H. Rowell of Swampscott, Mass., is visiting her sister, Mrs. G. D. Chapman.

Mr. and Mrs. C. Dezan were guests of Mr. and Mrs. C. Brown at Fairfax on Sunday.

DERBY ACADEMY NOTES

D. A. opened its doors Tuesday morning, Sept. 6. 107 students have registered so far. Both old and new students are welcomed to study rooms and athletics.

Iva Nason has returned to take up work with her class, '22.

The different rooms are numbered now, so we cannot get lost.

Our athletic field has become a reality. Judge Hunt of Manchester, N. H., has purchased the six-acre field directly back of our school, and intends to give it to Derby Academy in memory of his wife who was a student here at one time. It is hoped that it may be fenced off in the near future so that it may be made ready for use. We are going to show our appreciation of this gift by making everything connected with it the very best.

Eleven girls have registered so far for the teacher training course. Miss Bessie Clark of Maine is the teacher in charge of this department.

A son, Robert William, was born to Mr. and Mrs. Cyril Darby, '15, September 22.

Hazel Shompany, '18, and Clyde Albin of Guide Rock, Nebraska, were married Aug. 8.

The following officers have been elected by their respective classes: senior—Ursford Cargill, pres.; George Ware, vice-pres.; Virginia Margie, secretary; Lillian Calhoun, treasurer; junior—Charles Boright, pres.; Arthur Lewis, vice-pres.; Wenonah Davison, sec'y-treas.; class 4—Wilfred Wood, pres.; Frances Davison, vice-pres.; Luella Tice, sec'y-treas.

Seven new students have come into the sophomore and junior classes.

The first C. E. meeting of the year was held Thursday evening. After a brief business session the time was devoted to a consideration of "The Right Beginning." Mr. Eddy gave a very helpful talk on that subject. There were 39 in attendance. We want many more this week.

D. A. baseball team went to North Troy Saturday and were there defeated 13 to 3. Cheer up, boys! Better times coming.

Remember the "new student" reception Friday evening. Even though the name is changed the new students do stunts just the same.

Some time ago as we went to play, Leaving our studies in old D. A., Some of us almost wanted to say, My, I wish I were out to stay. But after a bright and extended rest, We knew what we thought was all in jest. We are going in to stand the test, And going in to do our best. Everything is so bright and gay; If we try we can make it always that way. Even the building seems to say, "Welcome, everyone, back to D. A."

NORTON-PACE

Miss Katharyn Norton, of Beebe, was united in marriage on Thursday evening, September 1st, to Dr. John D. Pace, of the General Hospital, Montreal. The bride was gowned in a dress of white satin with pearl trimming, made en train. Her veil was of tulle, cap effect, and caught with sweetheart rosebuds; she carried a shower bouquet of white roses. The ceremony was solemnized in the drawing-room, the single ring service being used. To the strains of Mendelssohn's wedding march, rendered by Miss Edith Tilton, of Waltham, Mass., niece of the bride, Miss Norton, leaning on the arm of her father, entered the room where she was met by the groom under an arch of evergreen and goldenrod. Little Margaret Dixon, dressed in pale yellow and bearing the ring on a long stemmed rose, was followed up the aisle by Josephine Wells, in rose pink, and Alice Haselton, in azure blue, acting as flower girls. The bride was attended by Miss Helen Haselton in a most attractive gown of pink satin and georgette crepe, and carrying a bouquet of pink roses. Dr. George Little acted as best man. Rev. Fred Matthews, pastor of the Beebe Methodist Church, officiated.

After a brief reception, the wedding party and guests retired to the dining-room, where a buffet luncheon was served. Mrs. Magoon, of Newport, catered, assisted by Misses Margaret and Jessie Candlish, Mae Dance, Mae Squires and Isabel Bullis. The ushers were Misses Maud Akin, Grace Dustin and Blanche Tyler.

The bride's present to the bridesmaid was a string of pearl beads; to the pianist and ushers, pearl pins; flower girls and ring bearer, gold pieces. The groom's present to the best man was a pair of gold cuff links. Many beautiful and useful presents were received by the happy couple.

Amidst showers of rice Dr. and Mrs. Pace left on their honeymoon, the bride traveling in a suit of navy blue wool tricotine with black embroidery, grey hat with feathers and blouse to match. They will be at home to their many friends in Parsons, Kansas, after November 1st.

Universalist Church Notes.

Rev. E. L. Conklin, minister.
10.45 a. m., morning worship,
12.00 a. m., Sunday school.

Have you "a church consciousness?" Does it make any real difference to you or others whether you have or not? Come over to the church next Sunday morning and we will talk it over.

The Jolly Juniors are invited to meet with Mrs. Conklin at the parsonage, next Tuesday evening, Sept. 20th.

New Dress Woolens

Jersey Cloth is the ideal fabric for the popular Jumper Dresses, comes in tubular form, requires only one length for a dress; shown in all popular shades, 54 inches wide, \$2.25 a yard.

Perhaps the most popular material shown for fall is Duvetyn, used for Hats, Dresses and Skirts, we are showing a wonderful line of colorings, 40 inches wide, \$4.50 a yard.

Fall Coatings and wide variety of Silks for Linings; just a little more than half last year's prices.

For Children's Wear there is Popular Cloth, 30 inches wide, 59c. a yard.

All Wool Serge, 36 inches wide, \$1.00 a yard.

Blankets for the cool autumn nights and at prices that all can afford them, in fact, at less than will be possible when there is a greater demand.

Renown and Stay Fast, Double Mesh Hair Nets. The Double Mesh costs no more than the single and will wear twice as long, priced 15c., 2 for 25c.

The greatest line of Ready-to-Wear Garments that we have ever shown at only about half last year's prices.

The buyer for this store has been in market the last ten days and our stock at present is the most complete it will be at any time during the season.

For Week-End Bargains We Shall Offer Some Excellent Values This Week.

Extra Heavy Twilled Flannelette, plain colors, Light Blue, Pink, Dark Grey and White. This grade of Flannelette could not have been sold a year ago at 50c. a yard, Week-End price, 12c. a yard.

Liberty Baking Glass, carries the same guarantee as the other makes.

Pie Plates—Week-End price, 59c. each.

Ecu Scrim, Fancy Border, 25c. value, Week-End price, 14c. a yard.

Wiping Towels made from Glass Crash, 17x36 size, 25c. values, Week-End price, 12c. each.

Pears' Unscented Soap, Week-End price, 11c. a cake.

DERBY LINE, - VERMONT

POULTRY CACKLES

REDUCE POULTRY FEED BILL

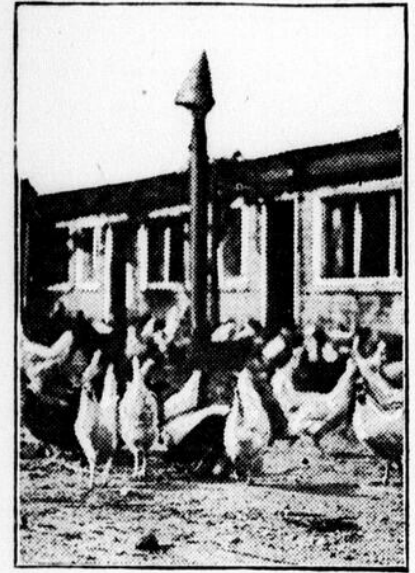

Utilization of Table Scraps and Kitchen Waste Is Most Wise and Economical Plan.

(Prepared by the United States Department of Agriculture.)

If the chicken flock is to prove an economic success, it must be fed cheaply. All table scraps and kitchen waste should be utilized.

Scraps of meat or leftover vegetables which cannot be utilized in any other way make excellent feed. Many other waste products, such as beet tops, turnip tops, carrot tops, potato parings, onion tops, watermelon and cantaloupe rinds, the outside leaves of cabbages, waste lettuce leaves, and bread and cake crumbs are relished by the hens and can be used to good advantage.

In saving the scraps and waste it is well to separate the portions adapted for feeding to the flock and place these in a receptacle or pail of their own.

Meat Scraps and Waste Vegetables Make Excellent Feed for Chicken Flock.

Decomposed waste material or moldy bread or cake should never be saved to feed to the hens, as it is harmful to them and may cause serious bowel trouble. Sloppy materials, such as dishwater, should not be thrown into their pail. It is also useless to put in such things as banana peels or the skins of oranges, as these have little or no food value.

Any sour milk which is not utilized in the house should be given to the chickens. This should be fed separately, however, either by allowing the hens to drink it or by allowing it to clabber on the back of the stove and feeding it in that condition. When the family's table waste is not sufficient for feeding the flock, it is usually possible to get some of the neighbors who keep no hens to save material suitable for feeding. Many people are glad to do this if a small pail in which to put the waste is furnished.

Table scraps and kitchen waste are best prepared for feeding by running them through an ordinary household food chopper or meat grinder. After the material has been put through the grinder it is usually a rather moist mass, and it is well to mix with it some corn meal, bran or other ground grain until the whole mass assumes a crumbly condition. The usual method is to feed the table scraps at noon or night, or at both times, as may be desired, in a trough or on a board. All should be fed that the hens will eat up clean, and if any of the material is left after one-half or three-quarters of an hour, it should be removed. If allowed to remain it may spoil and be very bad for the hens.

POULTRY NOTES.

A hen is in her best condition only when she is seen industriously at work.

Nothing will more quickly make scrubs out of good stock than scrub treatment.

Perches should be built low and arranged so they can easily be taken out and cleaned.

Uniformity in the size of eggs can best be obtained by keeping one standard breed of hens.

If ducks are overfed, they sometimes become so fat that their legs are incapable of supporting their bodies.

Every poultryman should lay in a supply of alfalfa and clover for his fowls during the winter. Green feed is as essential as grain.

If every farm flock could be rid of the drones and worthless members that lay few eggs, there would at once be an amazing increase in profits.

One of the greatest drawbacks to successful poultry-keeping is the attempt of many folks to crowd 50 fowls where there is only room for 25.

One of the greatest mistakes in feeding poultry is that of giving an exclusive grain ration. Meat, greens, vegetables, etc., should all have a place.

Poultry raising is similar to farming in that it is not so much the number of acres owned, but the number properly handled that gives the profits. Small, well cared for flocks of fowls always bring the best returns.

TAKES LIFETIME TO MASTER

Unlotted Human Span Barely Sufficient for Complete Understanding of Possibilities of Violin.

The average span of human life, when wholly devoted to the diligent study of the loveliest of all musical instruments, is barely long enough to afford one the satisfaction of having even partially explored the heights and depths of its concealed possibilities, declares Victor Kuzdo in Musical America. Therefore, it is utterly unreasonable to expect a great violinist to be familiar with anything else but his fiddle. If he knows that thoroughly he does well—very well, indeed.

Napoleon could not write three lines of correct French, but, then, his business was military science. He knew his guns and his soldiers. The knowledge of perfect French could not have aided him in becoming the great war lord that he was, nor could it have placed him on the throne of France.

The gross ignorance of Stradivarius is a historical fact. He never traveled, never read; knew nothing of mechanical science, nor had he ever heard of acoustics. He was simply a common workman who understood the selection of fiddle wood and the mixing of fiddle varnish. He needed no other education or knowledge to make him the world's unrivaled luthier. And, above all things, let us not forget that the greatest violinist of all times—Paganini—was notoriously illiterate and unschooled. The simple arithmetic of the primary classes was a sealed book to him. He had no education of any kind, yet he mastered the fiddle and bow as has no other human before or after him.

Huherman, the Polish violinist, played the Brahms concerto when barely 12 years old with a mastery and intellectual grasp that was astounding. The austere Brahms himself was dumfounded and delighted with the maturity of the performance. Veesey, the Hungarian, at the same age gained, with his playing of the Beethoven concerto and the Bach sonatas, the admiration and friendship of the serious Joachim. Heifetz, the Russian wonder, also created a sensation at the same age with his sound musicianship and extraordinary virtuosity. None of these boys had any schooling or education worth speaking of.

Formation of Mountains.

The physical chemist, by spending a few days in his laboratory has been able to duplicate nature's thousands of years of mountain building. Over 150,000 pounds per square inch pressure has been applied to rocks and minerals by Dr. L. H. Adams of the geophysical laboratory of the Carnegie Institute in Washington, and he has found out how they act when squeezed so hard.

"Using the results of these experiments and the data which the geologist obtains in the field, we can explain how mountains were made," declares Doctor Adams. "Geology," he explains, "is largely the study of the warping, folding and deformation of the rock masses which make up the crust of the earth." His work is even more exact than that of nature, because when he imitates her high pressures he has the great advantage that he can accurately measure and control them."

Explaining Thunder-Clouds.

The thunder-cloud is a vast electrical generator of very short life. This cloud has great vertical thickness, and it may have a base 3,000 or 4,000 feet high, with a summit 20,000 feet high, according to a late Royal Institution lecture by C. T. R. Wilson. It is from the energy of the great uprush of air in this cloud that the electrical energy is derived. The existence of the uprush is demonstrated by the size of the upheld ballstones, which are said to be sometimes as large as a man's head! In some way—just how is being debated—there is a vertical separation of the positive and negative electricity, one kind being carried upward, and the other going down. Whether this is an effect of the air current or a result of electrical disturbance previously created is the question. The cloud is between two conductors, the earth being one. An atmospheric layer about 25 miles high is supposed to be a fair conductor, and with the surface of the ground this forms an imperfectly insulated condenser.

Shows Power of Sentiment.

Even military necessity bows before sentiment.

This was exemplified here recently when a military road under construction back of Schoefield barracks, twenty-five miles from Honolulu, took a detour to avoid an ancient Hawaiian landmark, says a Honolulu correspondent.

The road was being constructed through Kolekole pass of the Waianae range when it came to an ancient Hawaiian sacrificial stone which balanced on the almost knife-like edge of the pass. The stone was in the way of the engineers, but, under orders from Maj. Gen. Charles G. Morton, in command of the Hawaiian department of the army, the route was altered to pass the sacrificial rock and leave the remainder of ancient days intact.

A Mixed Debt.

According to statistics of the Swiss federal government, soviet Russia owes that country 466,000,000 rubles, 129,000,000 Swiss francs, 6,000,000 French francs, 44,500,000, 3,000,000 marks, together with varying lesser amounts. In other words, as we get it, the soviet owes Switzerland something in every known language.—Philadelphia Inquirer.

RAISE OWN FOOD

Writer Tells of Agricultural Ants In Central America.

Have Really Comprehensive System of "Gardening" as Well as Knowledge of Other Trades.

The dark forests of Central America shelter a remarkable tribe of agricultural ants, if we are to credit the testimony of competent investigators. These are foresters, road makers, wood choppers and gardeners, and it is said they actually plant and raise all their own food. The traveler in these forests is surprised to see many great trees half stripped of their foliage, and whole tracts of smaller ones left completely bare, says a writer in the Christian Science Monitor.

Everywhere, too, he sees little well-beaten paths leading in and out, from the open country to the center of the forest, and these are covered with busy workers. They run to and fro, some heavily laden with bits of leaf they have torn from the trees, others empty-handed on their way to market.

These ants, as a rule, build their nests on the outer edge of the forest, often under some big tree. The roads are kept in perfect repair by corps of workers detailed for the purpose—trained civil engineers and road menders, one supposes, who can do their work intelligently and well. One can see them picking up stray bits of debris, or earth, clearing the track of everything that might hinder the busy gardeners in their work.

What becomes of all of the green stuff they collect? All the ants in that part of the world could not consume such piles of leaves.

The little ants are gardeners, and the leaves are used in their mushroom-beds. In the first place, they work the green-leaf substance over into little brown balls that eventually become a soft, spongy mass, grown over with fungus germs. On close examination, one can see tiny white knobs, the swollen ends of hairlike filaments. These are the mushrooms on which the farming ants live.

An enthusiastic student has made some interesting experiments with the ants and their garden-truck. He placed a few ants in a glass dish half-filled with the sort of rose-leaves of which they were fond. They made tunnels in the sand, but left the leaves untouched.

He repeated the experiment, but placed some of the little "ant cabbages" on one of the leaves, and with his forceps lifted one of the imprisoned ants upon it. The little insect at once rushed off with the news of food to its comrades, and all came hurrying to taste.

The experimenter then put into the dish some of the loose ant food found in their nests. It was curious and delightful to watch the busy creatures as they began at once to put it into order, arrange it in careful piles, and continue the cultivation of the tiny mushrooms.

Another scientist found on an abandoned ant-mound a large mushroom that had evidently been left to grow up from some spores of ant food left in the nest. It was of a handsome species; the cap was reddish purple and dotted over with small scales, the gills were white, and the spores of a yellowish color. He planted some of the spores, and they grew thrifflily, thus proving that the ants really raise true mushrooms, and can be said to follow the occupation of kitchen-gardening.

Destroyers Supreme.

"We knew whenever a submarine left a German port, and we kept track of it day by day until it returned home," says Admiral William S. Sims, in the World's Work. "No U-boat ever made a voyage across the Atlantic without our knowledge. The submarine was a slow traveler, and required a minimum of 30 days for such a trip; normally the time would be much longer, for a submarine on this long voyage seldom cruises at more than five knots. Our destroyers and anti-submarine craft were much faster, and could easily cross the Atlantic in ten days. It is, therefore, apparent that a flotilla of destroyers stationed in European waters could protect the American coast from submarines almost as successfully as if it were stationed at Hampton Roads or Newport."

A Better Show.

A "militant," as the really virulent type of advanced woman is called, said to Governor Miller at a charity ball in Albany:

"You men! We'll take your special privileges from you yet. We'll oust you from politics, the arts and everything else."

Governor Miller smiled before the militant's ire. Then he nodded toward a group of pretty girls in backless and sleeveless gowns, short skirts and all the other extravagances of the 1921 mode.

"Oh, I don't know," he said. "As I look around, it seems to me that the ladies are giving man a better show than he ever had before."

New Wheat Storage Plan.

An old suggestion comes from England as to conserving wheat. It is proposed to crush or rough grind wheat, then soften with superheated steam and compress in hard blocks and store until wanted, when a simple crushing process would fit it for flour manufacture.—Scientific American.

FINE FOOD AT CHINESE INN

Delicious, Abundant and Wholesome and at Prices That Are Described as "Ridiculous."

Your mouth will water if you read the following delectable description of palatable food. We take it from an article by Mr. William A. Anderson in Travel in which he describes the cooking he found at an inn in the Chinese province of Chihli, says the Youth's Companion.

In the chow room, he says, were several huge clay stoves like coffee percolators, except that the dry stalks that are used for fuel are where you'd expect the boiling coffee to be; the basin-shaped receptacle on top tightly confines the flames, which play about it. In the bottom of the receptacle, which has a wooden cover, is a little water. Anything from egg omelet to sharks' fins can be stewed, baked or broiled in the basin.

Personally, I very much like many of the steaming messes—broiled squabs; vegetable soups, thick and various; broiled duck, soaked in rich brown sauces and so tender that the flesh almost drops from the bones at a touch; fried fish, as crisp as pastry on the outside, and as clear and smooth as a fresh mushroom within; crisp chips of mutton boiled in lard; crackling shrimps by the bucketful; unleavened greasy bread fried like buttered toast—an endless variety, in fact, of every conceivable sort of food, fresh, rich and wholesome.

The fish you order are taken flapping from buckets of fresh or salt water; the fowl flutter, cackling or cooing, about the yard; the meat and the vegetables are brought in alive and fresh by the farmers; the eggs are taken warm from the mangers; the bread is made from whole wheat grown within a mile of the table and ground by hand inside the yard; the dates in the rich yellow cake are plucked from the trees that overhang the village lanes; the bean curds are pressed within the chow room itself. Everything is served piping hot, and the prices are utterly ridiculous.

There are no tables such as, foreigners use; the eaters prefer the low Chinese tables beside which they sit on the kang. Strings of leeks, peppers, garlic and lichen are suspended from the smoke-stained rafters as in the country inns of Spain and Italy. Wine made from rice or the juicy stalk of the kaoliang is stored in huge clay-lined baskets sealed at the top. It is served hot in thimble-sized cups, for it is as potent as vodka. But no one becomes intoxicated.

Psychology of Kissing.

Dr. Charles E. Baker, the psychologist, is shamefully confusing the romantic issue. He says that after a man has kissed a girl he doesn't want her. "Withhold thy kisses, fair maiden," says this cruel sage, "more girls have been robbed of future husbands by the good-night kiss than for any other reason."

"But how, oh, how does the dear chap know? Were they the spinsters who confided in him, or the kiss-snatching bachelors? And is it the kiss itself or the impression that the lady is too free with them that wrecks the prospect?"

On the score of decorum and exclusiveness the sage may be right in demeaning the value of the pre-marital kiss, but it isn't good logic. Most of the irrevocable spinsters I know were brought up on that coy theory and are apt to blame their spinsterhood upon it. What the gentleman really means is that some other girl's frisky good-night kiss robbed those spinsters of their swains. But, of course, the other girl was probably careful to imply that this was her very first offense. It is much more likely that it is when he surprises her in conferring the good-night kiss on some other fellow that he feels she is not the wife for him. That is why the "kiss-and-never-tell" doctrine is essential to gallantry.—Los Angeles Times.

Arrangement of Searchlights.

Searchlights require movements of rotation about a vertical and a horizontal axis. At one time the control about the horizontal axis was limited to a depression of about 30 degrees, and the elevation to about 60 degrees. In later models the light beam could be raised to a completely vertical direction. Originally this was done by a system of link motions, says Popular Mechanics Magazine, but this has now been superseded by a method of transmitting the motions electrically. In this apparatus, the projector itself does not move, but the beam of light is reflected into any direction by means of a plane mirror. On a ship the projector may be mounted at the foot of a hollow mast, with the beam of light projected to a mirror at the masthead capable of rotation about its horizontal and vertical axes, by means of electrical control operated at any desired location.

Radio Time Useful.

How useful it would be to watch-makers and repairers to have a simple wireless telephone outfit with which to receive the daily time signals is brought out by H. Gernsback in the Radio News (New York). He says: "If once the jeweler sees how simple it is to work a time-receiving radio outfit he will soon become enthusiastic, and, as many of his trade have done, will even go so far as to put the outfit in a show window in order to attract trade. We know a jeweler in the South who uses a loud talker to his window where every one can hear a clock and see the time at noon."

VACATION TIME

It is the Good Old Summer Time again, and soon you will be starting for your annual outing. When you turn the key in your door won't you regret leaving your silver or valuables unprotected from fire or theft?

Our Storage Vault will enhance the pleasure of your trip, if you use it. Plenty of room for silver, clothing, rugs or other valuables. Charges reasonable.

HOUSE FOR FOUR SOWS AND LITTERS

Constructed of Good Materials and Is Weather Tight.

GOOD FOR THE AVERAGE FARM

Affords Clean, Warm, Sunshiny Home in Which the Sows Can Bear Their Little Pigs—Hog Is Cleanly if Given Chance.

By WILLIAM A. RADFORD.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 187 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

During the last year farmers in the corn belt states have discovered that they get a great deal better price for their corn when they market it "on the hoof." In other words, they turn their corn into pork and market the hogs.

Raising hogs so that they pay a profit for the food they consume and the labor of bringing them to marketable size is not a haphazard business. Experience of successful hog raisers has shown that there are a number of rules that must be followed if the

illustration. This is a frame building 14 feet wide and 40 feet long, and contains four farrowing pens and room for the feed the animals consume. The building is well constructed of good materials to make it weathertight. It is set on a concrete foundation and has a concrete floor. Along one wall runs a feeding alley, while doors at the floor line permit the hogs to leave their pens when weather conditions are right.

The building is set east and west, with windows facing the south. This gives the late winter and early spring sun a chance to give the interior of the house the benefit of its warmth. As the weather gets warmer and the pigs are allowed to run out doors the windows may be opened for better ventilation.

To be healthy young pigs must not be subjected to draft, neither must they be chilled. Plenty of bedding placed on a plank floor that is raised slightly from the concrete floor helps to keep them warm and dry. Contrary to the general opinion among those who do not know better, a hog is a cleanly animal, and will keep himself clean if the conditions are such that he can. The plank floor covers only about two-thirds of the pen, and the hogs themselves will keep the bedding placed on it clean.

Two litters a year are natural with sows. But if the young pigs are to be brought to maturity at the right time, they must be born in late February or March and in September, or the early part of October. Spring pigs are hard to raise unless they have such a home as here described.

Outside the hog house on the south side is a concrete feeding floor, where the pigs are allowed to run outside, when they are fed. This feeding floor

TAKE BIG RISKS

Trapping of Wild Beasts Most Dangerous Business.

Those Who Engage in It Literally Gamble With Death, and Their Reward Is Never Sure.

How are the wild animals obtained which make up the menagerie of a large circus? No business is quite so risky as that of trapping them.

Most of the wild animals come from Africa. These beasts must be trapped along the Zambesi, which means 2,000 miles of toilsome journey before even a start is made. The man in charge of an expedition must be experienced and resourceful; must know the country, the languages and dialects, and be something of a physician as well.

Fearful risks are taken, especially with fever. Native carriers by the score are employed. Each porter is required to carry 60 pounds and the charge merely on such a load from the coast up to the great lakes is from two to three shillings a pound. Provisions in large quantities must be carried, also a large amount of beads, cloth and trinkets with which to cajole the natives for fresh supplies and information.

Lions are taken in a great net, some 18 feet square and rimmed by a very powerful rubber elastic band. It is set over a pit near a water hole, and when caught the lion is transported in a bamboo cage.

The tyro who captured or trapped a "rhino" in a pit in the heart of Africa would be equally puzzled as to how to get him to the coast. An inclined plane must be dug and the creature, half-tamed by fright and hunger, must be securely shackled with chains and ropes and led through tangled forests and over sands and stony plains for hundreds of miles at great risk to the lives of all concerned.

The hunted rhinoceros is the very epitome of fight and gameness, but after capture gives up quickly and dies if not properly cared for and fed. The two most difficult creatures to trap and bring to the coast are the giraffe and zebra. The latter can only be caught in high and barren hills and with the utmost difficulty. Once caught, the zebra becomes a tough proposition, doing most of his thinking with his heels.

The giraffe is ultra shy and his transport after capture a serious matter. He stands so high and his legs are so like a pipe stem his safe conveyance is something of a feat. This animal is considerable of a baby as regards tenderness, and has a heart-breaking way of shuffling off his mortal coil after a circus has made a daring investment in one or more of them. The rarity of giraffes in circuses and municipal zoos is due not alone to the original high cost, but also to the fact that the animal dealers abroad will not guarantee safe delivery in this country.

The Indian tapir perhaps attracts but little attention at the circus and yet is a most expensive animal. The gorilla is practically priceless. There have been but four ever brought to this country.

Chimpanzees are relatively plentiful at circuses and zoos, but they are prone to tubercular trouble and are hard to keep.

Lions for zoological purposes cost from \$400 to \$500. Tigers, jungle-bred, will bring even higher figures. Elephants, or "bills," as the circus folk term them, cannot be bought much under \$2,500 in the rough, and as they are trained to do "stunts" their value to the owner rapidly increases. Their disposition, too, enhances their value or otherwise. Asiatic elephants are more expensive than the African type, being better natured and more intelligent, as a rule. Hyenas are inexpensive. Camels of the Siberian breed cost from \$300 to \$800. The Polar bear is expensive and hard to keep, as is the Kodiak bear of Alaska.—Baltimore American.

Frankincense.

Most of the genuine frankincense produced in the world today comes from trees growing in Somalia, in eastern Africa. When the resin is ready for the harvest—shortly after the beginning of the rainy season which makes an abundance of sap in the trees—natives gash the bark of each tree in a number of places, taking care to loosen the bark at the bottom of each cut sufficiently to form a little pocket.

The sap oozes out and gradually collects in the pockets. It hardens slowly in contact with the air. Within about a month it becomes hard enough to be handled. Then the little pellets of gum—called "tears"—are cut out of the pockets and new incisions are made in the bark. This process is repeated at 30-day intervals until the end of the harvesting season in September. The pellets or "tears" are marketed as soon as they are fully hardened. A vigorous tree will produce about 16 pounds of frankincense yearly.

Appropriate.

It happened on the transport coming back. "Show me your identification tag," demanded the medical officer of a colored private. "Ah, done chucked it overboard, sub," confessed the other. "Ah, just naturally ain't got no ambition for no more of dem death checks!"—American Legion Weekly.

THEY CALLED HIM "WARRY."

Appalling Irreverence That Shocked Dignified Butler on Duty at the White House.

One of the most imposing butlers now in captivity south of Boston or New York butties at the White House. He has been on the job for a long time, and nobody of his race in the world could wear his uniform of blue and gold with more distinction or hauteur. He would take a fat part, to speak in stage parlance, against any kind of emperor, and a whole flock of princes would be pite for him in any competition for the limelight. He is over six feet tall, and dignity is his middle name. Life, at least while he is on duty, is a terrible serious affair for him, and the smile he gives those he knows is not one that means anything more than welcome.

The wives of two senators called at the White House not long since. As they left, after leaving their cards, as is the custom at times, one of them turned and thought she saw the President himself behind the curtain of a nearby window. She had known President Harding when he was in the senate and didn't believe very much in dignity and the putting on of dog and such things.

"Why," she said, "there's Warry now." The butler overheard. He gasped. The senator's wife turned to him.

"Isn't that Warry there?" she asked. The butler almost dropped to the flagstones of the portico.

"Yes, mem; no mem," he said rapidly. "I think it was not the President."

"Well, I think it was," insisted the senator's wife, "and when you see Warry you just tell him we caught him that time."

Do you suppose that butler delivered the message?

Read Secrets of Parchment.

Much of the lore of ancient palimpsests—parchment manuscripts from which the original writing has been erased and written over at a later date—is about to be laid bare by the mysterious power of the ultra-violet light produced by the mercury-vapor lamps. Previous to 1914 the discoverer of a new method of using the rays, a Benedictine monk of the Bavarian order, had made such progress that many of the ancient parchments in the Benedictine abbey of Wessobrunn had been made to disclose their secrets.

In principle the new method is quite simple, being based upon the peculiarity, possessed by many organic substances, of fluorescing—glowing with a pale cyan-colored light—when brought under the influence of the invisible ultra-violet rays. The old parchments possess this property to a remarkable degree, while the ink of the older writings upon them, containing ingredients insensitive to the action of the rays, remains dark and forms a contrast of sufficient intensity to register clearly on a photographic plate. Old paintings, overlaid with new ones on the original canvases, have also been discovered by this method.—Popular Mechanics Magazine.

Society Plays Craps.

Craps no longer can be referred to exclusively as "African golf." It is just at the moment the amusement par excellence of debutante New York—that is, at such times as there are no men about to make dancing eliminate the fascination of the little ivory cubes. Nearly every jewelry store and novelty shop in town is displaying sets of these cubes in silver and gold cases, fit for a place in any mesh bag carried on the Avenue. And it has even been suggested by some flippant soul that with the present length of skirts worn by the girls in question artistically embroidered knee pads will have to come next. For no real crap player of the days when it was confined to quiet alley corners would be without his pads to protect his knees while he knelt on the hard stones to "shoot."—Pittsburgh Leader.

Sewn Plywood.

In England there has recently appeared a special plywood material for aircraft construction. This material, we are told, must not be confounded with ordinary plywood, for it is something infinitely superior. It is a super-plywood, so claims its manufacturer, which is actually sewn together. The layers are first cemented together with waterproof material and then stitched through in parallel rows about 1/4 inches apart. This gives a rigidity and resilience unattainable by any other method. Weight for weight, it is the strongest material yet evolved. The sheets are made to any desired size or shape up to 8 feet wide by 60 feet long, and from one-eighth to five-eighths inch thick, thus eliminating waste in the conversion.—Scientific American.

Big Price for Old Lamp.

An Arab glass lamp of the Fourteenth century, which formed part of the late Morgan S. Williams' collection of arms and armor, was sold at London recently for £2,500. The lamp bears inscriptions from the Koran, while another inscription has been translated as "Power and Might to Our Lord and Sultan, Protector of the World and Religion."

The Momentous Silence.

"You don't talk as much in Washington as you did in your home town," "No," replied Senator Sorghum. "When a man succeeds in getting sent to Washington it is sometimes his best play to convey the impression that he is engaged in intense and silent thoughts."

ON CRAZY BRIDGE

American Crossed River Where Misstep Meant Death.

Reader Will Be in Full Accord With the Statement That It Was a "Creepy, Ghastly Process."

An American tells of crossing the Teesta river, in the Himalayan region on a rickety bamboo bridge.

The bridge, always dangerous, was at that time a mere ragged skeleton of itself, and to make matters worse was slippery with green slime. Such bridges are usually rebuilt once in two years, but this one had evidently not been touched for much longer than that. On this narrow, tottering structure, open at the sides, the American had to cross over the turbulent, rapid river, 300 feet wide and seventy feet below the bridge.

The instant one steps on such bridges they recoil from him and swing and shake in an alarming way, rolling from side to side and pitching like a ship in a storm. They swerve with a sudden jerk every time one lifts his foot; not only sideways and lengthwise, but downward and forward, as one's weight depresses the bridge. This goes on until one passes the middle of the bridge, after which the oscillating structure kicks up behind one as he ascends.

Now, this American got on fairly well as long as he could see the bamboo rod on which he had to walk, although the open sides heightened the sense of insecurity. But away from the bank, if one looks down to see where to place his foot, the rush of leaping water in the torrent below gives him the giddy sensation that both he and the bridge are running swiftly up stream.

Yet one must keep his eye upon the single bamboo overhanging the abyss and find a shaky footing upon it, since to miss it means certain death.

The American was a quarter of the way over, perhaps, when as he stepped from one bamboo to the next it tilted up and he could see most of those in front were lying loose and disjointed in their V-slings. They had been broken away by the passing of persons who had preceded him. He could not swing round to go back; forward was his only course.

He went on with long strides to get a foothold on this shaking, swinging line of slimy bamboos. After each step he had to half close his eyes to counteract the giddy feeling of the upward rush of the bridge. It was a creepy, ghastly process. A false step meant death in the raging gulf below. After what seemed an age he reached the opposite bank.

Old Elevators Still Run.

Back in 1883, when Portland was a fledgling city, came an historical incident with the installation of the first passenger elevator in the Labbe building at Second and Washington streets. The old cage is there yet, making its regular trips. By a calculation it has traveled over 4,000 miles in its 38 years of life, half of the distance up and half down.

When it was first placed in operation it was one of the sights of the city, and no trip to Portland was complete without at least a look at the new contraption. As most of the visitors wanted to ride, it was very popular.

Just about three years after it was installed Ed. Joost came to the building, and since that time, 35 years ago, he has been running the lift, for over a decade being engineer-in-chief. In the course of events and in keeping with the march of progress the motive power has been changed from the old hydraulic system that served the downtown buildings to an electric motor, but the old cage, an elaborate structure of metal filigree, is yet on duty.—Portland Oregonian.

Women in China.

Perhaps as an outcome of a movement started early this year by Chinese women's organizations in Canton to open avenues of employment hitherto closed to women, the national assembly of the southern government has given a job to a girl. This is a clerkship and the first in Canton, if not in all China, to be given to a woman. Miss So Kan, the appointee, has been assigned to a post in connection with publication of parliamentary records.

In response to action taken by Chinese women's clubs the Canton-Samsun railway has sanctioned a plan to employ girls, while the Canton Telegraph company also is planning to include women in its working staff.

Monster Sturgeon.

A 65-pound sturgeon, five feet ten inches long, was recently caught in the Red Deer river at Drumheller, Alberta, by some miners fishing near the Midland mine. Five men in all were required to get it to dry land, gradually playing it into shallow water, when one of the fishermen cut its throat. The fish is thought by old-timers to be the largest caught in the river at Drumheller. Another, presumably of the same size, was seen in the water at the time this fish was caught.

Getting Rid of Typhoid.

In Baltimore, where formerly typhoid fever was so prevalent, only 270 cases were reported last year, and of these it was definitely proved that 96 were brought there from other places. The deaths numbered 35. In 1910 there were 235 deaths.

LETTER FROM

MRS. WAKELIN

Tells Remarkable Story of Sickness and Recovery.

Toronto, Ont.—"I suffered greatly from weakness, seemed to be tired all the time, and had no ambition to do anything or go any place. My nerves were in bad shape, I could not sleep at night, and then came a breakdown. I read of Lydia E. Pinkham's Vegetable Compound in the newspapers and several of my friends advised me to use it, and it surely put new life into me. Now I am quite able to do all my own work, and I would strongly advise every suffering woman to give Lydia E. Pinkham's Vegetable Compound a trial."

Mrs. CHARLES WAKELIN, 272 Christie St., Toronto, Ont.

The makers of Lydia E. Pinkham's Vegetable Compound have thousands of such letters as that above—they tell the truth, else they could not have been obtained for love or money. This medicine is no stranger—it has stood the test for more than forty years.

If there are any complications you do not understand write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass.

SAVE MONEY

The New 5, 10, 15 and 25c Store

will help you cut the high cost of living. Large variety of Household Conveniences, Victrola and Records, Sheet Music, Novelty Hardware, Stationery. New stock constantly arriving. Come in.

C. P. LYONS

Waldron Block Derby Line

FOR SALE

Three 24-inch Flower Urns, \$10 each or \$25.00 for the set. C. G. TILTON, Three Villages Building Ass'n, Rock Island.

WOOD TURNING

I am prepared to do wood turning of all kinds and make a specialty of light stands. Prices reasonable. Give me a call at the factory of the Three Villages Building Association. CECIL G. TILTON.

FARM FOR SALE

One of the most desirable properties in Macgregor Township, one mile from Stanstead township line; two miles from Oliver Corner on R. M. D. route; telephone in house. 101 acres, 50 acres in tillage, productive soil easily carried on, sugar place of 450 trees rigged, wood and lumber for home use, quantity of pulpwood. For further particulars apply to A. A. Bachelder, R. M. D. 1, Way's Mills, Que.

GARDENS

Attractive gardens planned and planted. MISS S. L. BOND, Stanstead, Phone 28.

TEAM FOR WORK

I have a single team and man that I can spare a portion of each day for odd jobs at a reasonable charge. F. W. D. MELLOON.

The Norton Restaurant AND HOME BAKERY

We have secured the services of a Chinese chef, with fifteen years' city experience and are now in a position to render prompt and satisfactory service in our dining room as well as to supply high class "home-cooking" on short notice. A trial will convince you.

Good, all round Horse, or would exchange for some good cows. C. F. HOVEY, 43w2 Way's Mills, Que.

SAPHO
SAPHO INSECT POWDER
Kills flies, roaches, bed bugs, lice, etc. Not poison for humans.
Sample sent for 15 cts. in stamps.
SAPHO LIQUID—Wonderful moth remedy. Bed bug cure. Kills insects and eggs. Does not stain.
Kennedy Mfg. Co. • 508 Henry Jettie Ave., Montreal

Home Town Helps

CUT DOWN LOSSES BY FIRE

Recommendations That Should Be Heeded by Every Dweller in City or Country.

Read all tall buildings, using standard equipment and see that it is properly installed. Inspect every inch of rodding at least once a year.

Put up "no smoking" signs about barns and outbuildings, and enforce them.

Ventilate the barn, but also see that tight doors and windows are provided against the invasion of sparks and blizzards.

If you have nothing to fight fire with, get something if only a bunch of buckets.

Do not put the well pump too close to the barn—you may need that water to save your property some night.

Get non-freezing pumps.

Know where the ax is, and have two ladders on hand long enough to reach over the eaves of the tallest buildings.

Talk over with the family just what each is to do in case of a fire in home, barn or field.

Keep oils out of the house and barns.

"Stagger" your buildings with reference to the prevailing winds. Do not let a fire in one building wipe out your entire place.

Watch for spontaneous combustion in the barn.

Cut the weeds and do not "bank up" the house with dead herbage.

Keep matches in a metal box away from children, mice and rats.

Never leave an outdoor fire for the night nor leave an indoor fire without safeguarding your home from fire.

Do not stack crops close to buildings and see that your road from pike to house and barns is in good shape.

Conserve your water supply.

CARELESS DRIVER WARNED

Instructions to motorists who disregard signs merely calling attention to steep hills or railroad crossings must be explicit, according to the Travelers' Standard. Any novice should be able to make a safe crossing if he follows the advice set forth by this warning near Ithaca, N. Y.

Grow Flowers With Vegetables.

There is no reason why flowers and vegetables should not be grown together. It is difficult to draw the line, anyway. The dahlia, now one of the most popular flowers, was originally planted with the intention of using the tubers as a potato substitute. The scarlet runner bean, grown by the acre on the farms of England, is most often used in America as a climbing vine around the house; in fact, there are many persons not aware the beans are good to eat.

The ideal garden is one which combines flowers, vegetables and fruit. Such a garden should have a place on every farm and back of every suburban home. Oftentimes the vegetable plot can be surrounded with a border planted on two sides with small fruit like raspberries, currants, gooseberries and grapes, and on the other two sides with annual and perennial flowers.

May Restrain Billboards.

Many people, especially those that go down to the country in motorcars, will welcome the efforts that are being made in Maine to deal more faithfully than ever with the billboard. If an amendment to the state billboard regulations now before the senate is carried, no billboard or advertising sign may in future be erected at any point where it can obstruct the view of a curve or angle. It is a good amendment so far as it goes. A better one would be to abolish the billboard in the country, altogether.—Christian Science Monitor.

Four-Handed Twin-Grand Piano.

A twin-grand piano, the first of its kind ever constructed, was recently demonstrated at an orchestral concert, at Leipzig, Germany. This novel instrument, of which a photograph appears in Popular Mechanics Magazine, is like two grand pianos placed end to end and inclosed in one frame, excepting that it has only one soundboard. Consequently, the keyboards are at opposite ends, and the players face one another. The soundboard is constructed so that there is no intermingling of sound waves.

BABY CONTEST

A child welfare contest, under the auspices of the Women's Christian Temperance Union, was held during the Ayer's Cliff fair, when twenty-seven of the finest little children in this province entered the contest. Dr. R. O. Ross, of Stanstead, was the examining physician, and gave many valuable help hints to the mothers. Dr. Ross was ably assisted by Nurse Clara Wyman, of Stanstead, Nurse E. Taylor, of Stanstead, and Mrs. A. I. Beaumont, of Ayer's Cliff. The reception committee were Mrs. C. P. Rider, Fitch Bay; Mrs. F. J. Wilkison, Ayer's Cliff; and Mrs. J. M. Etam. Mrs. E. G. Davidson, W.C.T.U. Superintendent of Exhibitions and Fairs for Quebec Province. The prizes were awarded as follows:

Best baby, six months and under: 1, Thelma G. Libby, Way's Mills; 2, Hazel N. Long, Stanstead; 3, Jane Willey, Stanstead.

Six months to two years: 1, G. Palardy, Ayer's Cliff; 2, Ingrid Kullman, Stanstead; 3, Denise Belorin, Barnston.

Two to three years: 1, Carleton Whitcomb, Hatley; 2, Carlene Wheeler, Way's Mills; 3, Floyd Rider, Hatley.

Centenary Methodist Church
Rev. H. Mick, B.D., Pastor.

10.30 Morning service.

11.45 Sunday school and Young People's class.

7.30 Evening service.

Ready for the Unexpected.

In case of any unusual damage as by reason of an explosion or accident of any kind it is desirable to get the debris out of the way as soon as possible and to remove other evidences of the affair. It was thought that in the United States this work was usually done with great promptitude. In the case of railroad collisions it is quite common for every evidence of the affair to be removed in a few hours so completely that it is a difficult thing to locate the scene. In the case of the bomb planting on Wall street, in two hours a great deal of the damage had been repaired and at 4 o'clock the same afternoon a few boarded up windows was about all to be seen of the fearful damage that had been done. But in Paris these incidents are more common and the authorities are on the alert to meet them. There are maintained a regularly organized department for such emergencies and it is always on the job with the same promptness that an American fire company answers the alarm. The work is subdivided among trained squads and every part of it is attacked at once. Even a torn up street is repaired in a few hours.

Caught Handle—Scratched.

Roberta lives with her parents in the St. James apartments. One night she was with her parents visiting the Youngs in the northern part of the city.

While they were discussing the latest dances and the probability of a big mosquito crop this year, Roberta wandered through the house in search of adventure. Espying the family kitten she gave chase, which ended when the kitten started to crawl under the buffet.

Roberta made a grab for the disappearing tail and connected with it. The owner promptly turned around and administered scratches sufficient to cause the child to let go. Roberta ran wailing to her mother.

"What's the matter, dear?"
"Well, the kitten crawled under the box and left its handle sticking out and I took hold of it and it scratched me."—Indianapolis News.

Putting Houses on the Market.

In an attempt to stop landlords from refusing to rent houses in order that they may be sold at inflated prices British government officials have introduced a bill in parliament which would authorize local authorities to rent these houses.

If a house has remained unoccupied for three months, according to the bill, local authorities may make an order for compulsory hiring. The building must be suitable for letting without reconstruction and, apart from the rent payable, no landlords will be entitled to any compensation for the houses that are compulsorily hired.

Chickens Singed With Acetylene.

One of the most recent uses for acetylene is for singeing chickens. It is said that the acetylene flame, properly used, performs this operation in a small fraction of the time usually required, that it removes the last vestige of feathers from the fowl, and that the burning off is accomplished without scorching the skin or heating the delicate flesh.

This is no more remarkable than the use of acetylene in removing paint from canvas, which is done without even the slightest injury to the fabric.—Popular Science Monthly.

Modernness of the Ancients.

We have only to turn back the pages of history to discover that the ancients had some very modern notions.

Mr. E. W. Hulme pointed out before the Newcomen society, recently organized in England to study the history of engineering and technology, that in the great Palace of the Two Axes in Crete there was a system of water-carried sewage and terra cotta socketed drain pipes that could not be paralleled in Europe prior to the eighteenth century.—Popular Science Monthly.

MAPLE VALLEY

Mr. and Mrs. John Crawford and Misses Doris, Dorothy and Zoa Waid, and Master Harold Waid were guests of Mr. and Mrs. Bert Young on Sunday.

Mrs. Bert Young visited Mrs. W. H. Temple one day last week.

The Amy Corner school opened Monday, September twelfth.

Mr. and Mrs. Calvin Buzzell have left the home of Mr. Albert Flanders and gone to Eastman to live.

Mr. Walter Mosher was at Beebe on business one day last week.

DEFERRED

Mrs. Ida Stirling of Lisgar visited her aunt, Mrs. Bert Young, recently.

Mrs. Orvia Waid and two children, Harold and Zoa, spent Sunday with Mrs. Waid's mother, Mrs. Young.

Mrs. Roy Heath is spending a week in Magog, the guest of Mrs. Orville Waid.

Last Friday Mr. Walter Mosher captured a big turtle which measured thirty-two inches and weighed thirty-five pounds.

Little Milton Heath went to Magog to see Dr. Cabana about a very bad thumb last Thursday.

Mr. Calvin Buzzell is laid up with a bad thumb and went to see a doctor Saturday.

Master Francis Waid spent a few days with his mother and father at Fitch Bay last week.

One of the worst storms for many years passed here on Tuesday.

Mr. and Mrs. John Mosher spent Sunday at Bert Young's.

DEMICK'S MILLS, VT.

The Ladies Aid will meet with Mrs. George Rumery, Sept. 22 for dinner. All are welcome.

Mr. and Mrs. Burnam George and family of Derby Line spent several days with their father and mother, Mr. and Mrs. Leslie Tabor, recently.

Mrs. Martha McCormick of Derby Line is spending several weeks with her sister, Mrs. L. F. Hartley.

A son, Lawrence W., was born to Mr. and Mrs. William Ross, Aug. 30, 1921.

Mr. and Mrs. James O. Garland of Salem, Mass., Mrs. G. A. Stokes of Manchester, N. H., Mrs. W. E. Vancour and mother, Mrs. Vancour of Newport, were recent guests of Mr. and Mrs. J. G. Ross.

The annual business meeting of the A. C. Church will be held Sept. 24. It is hoped that all members will be present.

Our school will commence Sept. 12, with Miss Hazel Wark as teacher.

Mrs. J. G. Ross was in Morgan Center last Friday.

Mr. and Mrs. Ralph Hartley of Greenfield, Mass., were in town last week, the guests of Miss Mabel Sanborn.

Mr. and Mrs. Henry Parker, Frank and Ernest Parker attended the funeral of their father, Mr. W. J. Parker, in Rock Island, Que., recently.

Mr. and Mrs. Stuart George spent a few days in White River Junction last week.

TOMIFOBIA

A good attendance of members and visitors of the Women's Institute spent an enjoyable afternoon at the home of Mrs. Layfield Thursday, September 8. Plans were made for a card party to be held at the home of Mr. and Mrs. Alex. Mackay, Wednesday evening, Sept. 21. It is expected that Mr. McQuat will be there to organize a singing school in this district. It was decided to pack a barrel of clothing and magazines to send to Miss Kirby at Sherbrooke, to be used in the soldiers' settlement work. Mrs. Hastings kindly offered the Institute the use of her house for a halloween party. A paper dealing with "The Advantages of Medical Inspection of Schools," was read by Miss Flora Bryant. The judges for the "cleaning-up" contest decided as follows: Mrs. Layfield, 1st prize; Mrs. R. A. Temple, 2nd prize. The Institute are grateful to the judges, Messrs. Bown and Merrill, of Fitch Bay, who took the trouble to go about to the homes of the different contestants the first of the summer and again this fall. The prizes were five dollars' worth of shrubs. The meeting adjourned to meet with Mrs. F. J. Brown in October.

WEST HOLLAND

Mr. and Mrs. F. E. Goodall, Mr. and Mrs. H. J. Goodall and Mrs. Brewer attended Barton fair on Wednesday.

Mrs. Geo. Moulton and little son Hector of Stowe who have been visiting her mother, returned home the past week.

Wm. Gardner and sister, Mrs. White, visited at F. E. Goodall's recently.

H. L. Perkins and wife of Stanstead were callers in town Saturday.

W. V. Graves and daughter Jessie have returned from their trip to Nova Scotia. They report that it is very dry there, with very poor crops with the exception of apples of which there will be a bumper crop.

About twenty-five young people gathered at the home of Miss Margaret Todd, Saturday evening, the occasion being her eighteenth birthday. A very enjoyable evening was spent.

E. W. Channell and family of Stanstead were callers at the home of B. T. Hall and W. V. Graves, Sunday.

LEADVILLE

Mrs. Harold George of New York was a recent guest of Mrs. W. W. Brown.

Mr. A. G. Clough, accompanied by his mother, Mrs. Lucy Berry of Ayer's Cliff, was here Sunday calling on friends.

Mr. and Mrs. Geo. Brown of Coventry, Vt., were in the place on Sunday calling on relatives.

Mr. Joseph Bigras has been visiting friends in Montreal.

Mr. Floyd Tinker of Province Hill is spending a few days here at the home of his brother, C. R. Tinker.

Stanstead South Congregational Church
Rock Island

Rev. E. LeRoy Rice, B.A., pastor.

Service 10.30 a. m. Sermon, "A Great Experiment." Sunday School, 11.45 a. m. Service 7.30 p. m. Sermon, "Dodging Our Difficulties." Students and young people are especially invited to the evening service. Bright music. A community church.

CARD OF THANKS

We wish to thank the many kind friends and neighbors for all assistance rendered to us in our recent bereavement; also for the beautiful floral tribute.

Mr. and Mrs. Eugene Merriman and family.

MILLINERY

BUGBEE BUSINESS COLLEGE

will give you a sound Business Education.

Individual instruction by experts in Bookkeeping, Stenography and Typewriting, Penmanship, French, Arithmetic, Rapid Calculation, Commercial Law, Correspondence, Office Systems and Equipment. When you graduate from Bugbee Business College you are equipped to take a position at a good salary and advance steadily, because you know, and you know you know.

You can also take special courses in academic subjects at Stanstead College, with which Bugbee is affiliated. Modern buildings, up-to-date equipment, gymnasium, rink, large grounds, healthful surroundings. The rates are low compared with city schools—because the college is endowed. School opens September 13th. Write for full information. Students may enter at any time.

J. D. McFADYEN, STANSTEAD, Que.

PERMANENCE

is a greater condition than Passing Beauty

THERE are many old homes even to-day in excellent preservation, and if the old walls could only speak they could disclose the conversations of three generations. To paint for the sake of decoration alone is a short-sighted policy and entirely misses the bigger, broader purpose—that of protection.

For durability as well as for pleasing effect always insist on the paint with a reputation for permanence.

B-H "ENGLISH" PAINT

70% Pure White Lead
(Approved by Canadian Govt.)
30% Pure White Zinc
100% Pure Paint

Canadians for three generations have proved that B-H "English" Paint goes farther, gives a greater brilliance and protects for a longer period of years than other paints.

It is true economy then to use B-H "English" Paint—as gallon for gallon it is the most economical paint on the market to-day.
