

HUERTA WILL NOT ABDICATE

Has Large Force of Artillery Ready to Defend Capital From an Attack

PRESIDENT WILSON WILL MEET BODIES OF MEN KILLED IN VERA CRUZ AT NEW YORK.

Washington, May 4.—(Special)—President Wilson plans to go to Brooklyn on Monday and meet the Montaña, which is bringing to the United States the bodies of the men killed at Vera Cruz.

ENVOYS IN SESSION.

Washington, May 4.—(Special)—The mediating envoys went into conference with Secretary Bryan at the State Department shortly before noon. Ambassador Dagama, of Brazil, and Minister Naon, of Argentina, arrived first. A few minutes later the Chilean minister, Mr. Suarez, joined them. Secretary Bryan said that some announcement might be made later.

DEMONSTRATION IN FAVOR OF MEXICO.

Brussels, May 4.—(Special)—Under the auspices of the local Hispano-American Committee there has been a demonstration in this city in favor of Mexico and against the United States, in which several hundred persons, chiefly students from the universities of Brussels, Liege and Louvain, took part. The demonstration marched with flags to the Mexican Legation, where speeches were made on the subject of American aggressions in Mexico.

DREAD APPROACH OF VILLA.

Vera Cruz, May 4.—The better class of residents of Mexico City are quaking with fear over the possibilities of Villa coming to the Capital, and Huerta continues to evince every intention of making a stand to the last ditch, according to the report brought here yesterday by A. W. Churley, an American, who was superintendent of the Y. M. C. A. in Mexico City.

Mr. Churley says that artillery is mounted in the suburbs of the Capital in readiness for a possible attack by Americans or rebels, while recruiting for the Federal army continues, even bootblacks being compelled to bear arms.

Many of the better class of Mexicans are leaving the Capital and going to their ranches, fearing the consequences should Villa and his bandits capture the city, and believing that the sack of the place would be inevitable.

Persons from San Luis Potosi state that General Antonio Eribe has been sacking that city the past three days. The troops, long unpaid, became unruly, whereupon the officers joined in the sacking.

Huerta is reported to have announced the receipt of a telegram from General Joaquin Maas, at Saltillo, stating that 25,000 men were massed there, prepared to invade the United States and fight until their last cartridge was fired.

This, however, was generally believed to be an official exaggeration intended for local consumption.

PLAN PEACE CONFERENCE.

Washington, May 4.—The three South American envoys who have undertaken the task of pacifying Mexico by diplomacy, on Saturday made another decisive move in their plan by requesting General Huerta and General Carranza to appoint representatives to confer with them at Washington. Ambassador de Gama of Brazil and Ministers Naon and Suarez of Argentina and Chile, respectively, called on Secretary Bryan asking him to designate the United States representative to attend conferences of the mediators. At the same time they telegraphed the head of the government at Mexico City as well as the Constitutionalist chief to the same effect.

CONDITIONS BAD AT TAMPICO.

Vera Cruz, May 4.—Conditions at Tampico are daily growing more serious, according to Capt. Blackader, of the Ward liner Camaguay, which arrived here yesterday flying the Cuban flag. He said the water supply had been entirely cut off and that conditions in that city were filthy. The inhabitants were bordering on famine and prices were continually increasing, eggs fetching one dollar apiece, potatoes and tomatoes fifty cents a pound, and other foods in proportion.

ALL QUIET AT VERA CRUZ.

Vera Cruz, May 4.—After Saturday's acute alarm, when it was reported a considerable force of Mexicans had attacked the American outpost at the water front, nine miles out, all was quiet here yesterday. Many of the American soldiers attended mass in the old cathedral in the morning, while in the afternoon great crowds attended the bullfight. The question of the food supply still occupied general attention, but it has not reached a stage which may be regarded as critical, although many products have run short.

ROME FAVORS UNITED STATES.

Rome, May 4.—The Giornale d'Italia published a long editorial article on Saturday couched in terms favorable to the course of the United States in the Mexican situation. The purpose of the article is to remove misapprehension concerning the American attitude and to emphasize the sympathy of the northern republic to the South American sisters "who would almost certainly have perished in the hour of their birth without this sympathy, which has continued uninterruptedly one hundred years."

SHERBROOKE THE BEAUTIFUL

Rev. G. Ellory Read Made Clean-up Week Basis of Sermon Yesterday

COMMENDED BOARD OF TRADE IN BEING ALIVE TO BRING ABOUT BETTER CONDITIONS IN THE CITY.

"The City Beautiful," a prelude to Clean-up Week, was the subject of the morning sermon, at Plymouth Congregational Church yesterday by the Rev. G. Ellory Read, who took for his text the words, "The city that men call the perfection of beauty, the joy of the whole earth." (Lamentations 2:15)

After recalling the fact that Jeremiah poured forth these lamentations because of the destruction of Jerusalem—a visitation on her innumerable sins and failures to accomplish the will of Jehovah, Mr. Read said that from the text which expressed the intense civic patriotism that animated the average Jew, ideals of civic perfection and beauty could be drawn. Christ had also poured forth His heart's sorrow because that centre of life pulsating with such great possibilities, had failed to realize its divine destiny, and those two instances widely illustrated that a nation's life to a large extent centralized in its cities, that the ambitions, the hopes and the desires of a nation were summed up to a great extent in the life lived in the cities. History proved that men who strove to make a mark upon the civilization of the ages in which they lived, who sought to leave behind an impress of their character and words, tried as hard as possible to centre their life in some city. Athens, Rome and Babylon were associated with the names of such men. Augustus boasted that he had made Rome an immortal city, that he had transformed it exteriorly and had made it great to look upon and a joy to the whole Roman Empire. Solomon and David were possessed of a similar ambition and as they carried forward the development of their kingdoms they centralized to a large extent in the city of Jerusalem. It was inevitable that men should thus seek to express their ideals of what national life should be, and sum up in the city all that was best in the life of a nation.

MOVE TOWARDS THE CITY.

The growth of the city was one of the most striking episodes of modern life. All over the continent the trend of life was towards the city. "We sometimes speak," said Mr. Read, "of getting men back to the land, but I venture to say it is almost a dismal failure, they are moving to-day towards the city and I do not think you will be able to turn the stream of that tendency." The preacher quoted figures showing the enormous growth in the population of New York, Montreal and Toronto, during the last two or three centuries, and stated that the urban population now represented 35 per cent. of the whole in place of 4 per cent. as in 1800. The same tendency was observed all over the world and the cities were growing at a phenomenal rate. Men were moving towards the city largely because they thought that material success was to be rapidly gained there. Some of the farmers and their sons were getting tired of the slow rate at which they accumulated wealth. Then the country people were attracted by the glamour and stimulus of pleasure found in the city with which the monotony of country life could not compete. This was an unhealthy tendency. "Blind are they indeed to the great pleasures that the country offers, to the numerous attractions that God offers them in nature, and deaf are they indeed to the voices that come out of the Infinite and the Eternal." How could that be remedied with people who only wished for the experience of some strong sensation of some emotional life that the country did not offer?

On the other hand, what may be called the progressiveness of life was centralized to a large extent in the cities. The towns and cities became converted to Christianity when the villages and rural districts largely remained heathen. To a large extent this was expressed in modern life in another way. Cities were progressive while rural districts were slower to take up with new ideals and movements.

WHAT WILL BE INCREASED IN SHERBROOKE.

Referring to Sherbrooke, which had practically doubled its population in about twelve years, Mr. Read asked "What will be the increase in the next ten, twenty-five or fifty years?"

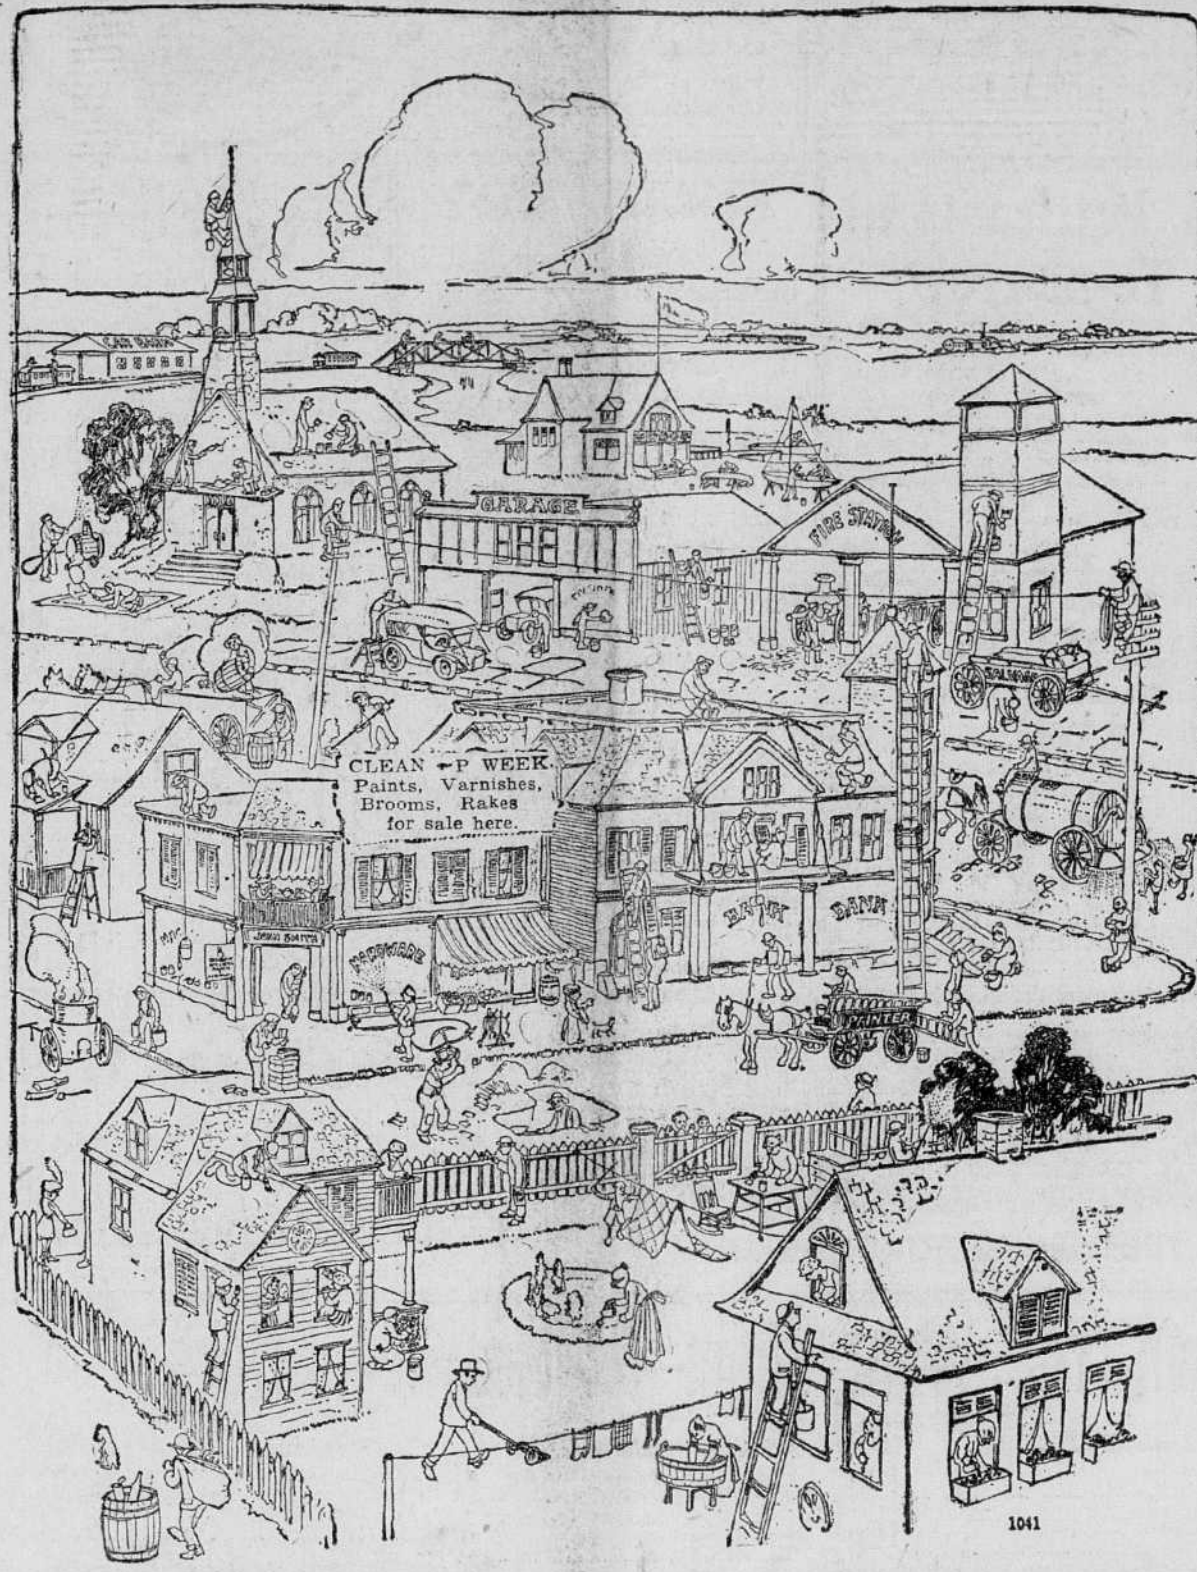

MAKE CITY PERFECTION OF BEAUTY.

Proceeding, he said that at the beginning of this clean-up week they had to determine to make the city "a perfection of beauty and the joy of the whole earth." It may sound like a tremendous piece of egotism run rampant indeed, to say that here in the Eastern Townships, away from the great centre of our life in the Dominion, to say nothing of the life of the Empire—we could speak of having a city in the future like the text described. He did not think it was egotistical or at all conceited, because Providence had given us the splendid St. Francis Valley in which to live in the midst of most beautiful surroundings. They could travel north, south, east, west and scarcely find anywhere a situation rivaling this in its excellence of beauty and its possibilities of development. Having been so favored what are they going to do with it? It had been said that Providence had done so much that the citizens did not so much that the citizens did not

U. S. TROOPS IN STRIKE ZONES

Their Presence Gives Sense of Security in Colorado Coal Field Regions

STATE GUARDSMEN AND PEACE OFFICERS GIVE OVER WORK TO FEDERAL SOLDIERS.

Denver, Col., May 4.—(Special)—Heavy patrols of Federal troops scattered throughout the strike zones of Colorado gave State officials a sense of security to-day which they had not felt since the inception of the industrial strife.

With the coming of the troops and their establishment at various centres of disorders, practically all of the Colorado National Guardsmen were withdrawn, and peace officers gave over the task of preserving order to the Federal soldiers. In quiet portions of the State peace and quiet prevailed.

FIFTY LIVES LOST IN VALPARAISO FIRE.

Valparaiso, Chile, May 4.—(Special)—More than fifty lives were lost in a fire last night which broke out in the commercial section of this city.

Several buildings were completely destroyed. Their flimsy construction rendered the efforts of the firemen virtually useless.

SECOND TRIAL FOR BECKER

New York District Attorney Will Call Some Seventy Witnesses

MANY PROMINENT IN FIRST TRIAL WILL NOT BE RECALLED.

New York, May 4.—(Special)—For the second trial of Charles Becker, former police lieutenant, on a charge of having instigated the murder of Herman Rosenthal, which will begin on Wednesday, District Attorney Whitman will call seventy witnesses.

Many new faces, it is said, will be seen in the witness chair, and several witnesses prominent in the first trial will not appear.

ONTARIO LINEMAN ELECTROCUTED.

Kingsville, Ont., May 4.—Carl Marriot, a lineman employed by the Essex County Light and Power Company, was electrocuted near Leamington Saturday afternoon.

EXCLUSION IS ONLY REMEDY

Mr. A. J. Balfour Reiterated His Firm Stand on the Ulster Situation

HOME RULE WILL BE OVERSHADOWED THIS WEEK BY THE LLOYD GEORGE'S BUDGET.

London, May 4.—The Right Hon. A. J. Balfour, speaking at Coventry Saturday night, reiterated his firm stand as exhibited in his speech in Parliament a few days ago, strongly condemning Home Rule. The speech is described as the most passionate utterance made during the entire controversy.

The Observer, the Sunday organ of the "die hards," says—Mr. Balfour's speech was one of the greatest fighting efforts he has ever made, and the speech delivered by Lord Milner was at first sight even more uncompromising. What both speeches mean is that the settlement must be speedy.

BELIEVE GOVERNMENT "ON THE RUN"

The general attitude of the Unionists suggests their belief that the Government "is on the run," and is prepared to make the fullest concessions to secure peace, which, the Morning Post says, will not be the result of any round table conferences.

HOME RULE IN BACKGROUND.

London, May 4.—The Home Rule struggle with its attendant "Ulsteria" will be put in the background this week in consequence of the introduction of the Budget this afternoon. Mr. Lloyd George, in presenting his sixth budget, faces an expenditure which is variously estimated at from £205,000,000 to £220,000,000. The published figures show that the past year's national revenue falls £7,000,000 short of this year's estimated expenditure. The national growth of the tax revenues should be four or five million pounds, but it is expected that the Chancellor will apply £5,000,000 to the relief of local taxes and it is also suggested he may sacrifice another £3,000,000 in revenue in order to secure "a free breakfast table."

P. J. SLATTERY, FORMERLY OF SHERBROOKE, PASSES AWAY.

The many friends of P. J. Slattery, formerly of this city, will regret to learn of his death in Sault Ste. Marie, Ont., yesterday. Deceased was taken down with an attack of pneumonia about a week ago and seemed to be getting better, when he had a relapse and gradually sank until the end came.

The deceased was well known in Sherbrooke where he resided for many years. He was an enthusiastic lacrosse player. Prior to leaving the city he had been superintendent of the Sherbrooke Street Railway. He leaves a widow and two children. His brother-in-law, Rev. Father

DUKE OF ARGYLE DIED AT COWES

Was Former Governor-General of Canada From 1878 to 1883

MARRIED TO THE PRINCESS LOUISE, DAUGHTER OF QUEEN VICTORIA, IN YEAR 1871

London, May 4.—His Grace the Duke of Argyll, former governor-general of Canada, died at East Cowes, Isle of Wight, last night, aged 69. John Douglas Sutherland Campbell, P.C., K.C.I.G.C.M.G., G.C.V.O., LL.D., Duke of Argyll, Marquis of Lorne and Kintyre, Earl Campbell and Baron Inverary, Mull, Morvern, and Tully, Baron Campbell, was born at Stafford House, London, on August 6, 1845, the son of the eighth Duke of Argyll. Educated at Edinburgh Academy, Eton, St. Andrew's and Trinity College, Cambridge, he was elected M. P. for Argyllshire in 1868 and sat thereafter until 1878, when as Marquis of Lorne, he was appointed Governor-General of Canada, an office which he held until 1883.

MARRIED TO PRINCESS LOUISE

He was married in 1871 to H.R.H. the Princess Louise, who came to Canada with him, and while here became very popular with Canadians. On his return to England the Marquis attempted to re-enter political life, but was defeated in both Hamstead and Bradford before being elected for South Manchester in 1895. He held that seat until 1900 when he succeeded his father and became Duke of Argyll, or, as the Scots designate the holder of the dukedom, the Mac-Calleen Mhor.

There have been no children from the marriage with the Princess and the title now descends to Niall Darnley Campbell, the son of the late Lord Archibald Campbell, who was born in 1878 and has had no public career.

WILL NOT POSTPONE WESTERN TRIP

Ottawa, May 4.—The Vice-Regal party will go into mourning owing to the death of the Duke of Argyll. His Royal Highness the Duke of Connaught will carry out the Western Ontario trip, as planned, however. Special permission has been secured from the King for this.

KING HONORS TORONTO CHOIR.

Toronto, May 4.—Sir Edmund Walker on Saturday received a cablegram stating that His Majesty the King had graciously consented to patronize the London concerts of the Toronto Mendelssohn Choir.

Fisette left for Sault Ste. Marie yesterday. The body will be taken to Ottawa for interment. Messrs. E. Kelly, T. Belanger, Wm. McManus and Eugene Olivier will represent the local Council Knights of Columbus, at the funeral.

KILLED BY PIECE OF ROCK

L. C. Boulanger, Cookshire, Struck on Head When Blast Was Discharged

RIVER DRIVERS WERE CLEARING JAM FROM CHRISTMAS RIVER WHEN FATALITY OCCURRED.

Cookshire, May 4.—(Special)—L. Cleophas Boulanger, who was working on the drive on Christmas Brook between Island Brook and La Patrie, died yesterday morning about four o'clock in the camp as a result of injuries he received the previous day.

On Sunday afternoon he and a number of workmen were engaged in blasting rock at the side of the river, so as to relieve a jam of logs that had taken place. During this operation he was struck on the head by a piece of the rock and rendered unconscious. Medical aid was called, but he never rallied and passed away about eleven hours after the accident.

Coroner Bachand, of Sherbrooke, was notified, and an inquest was held yesterday afternoon. After hearing the evidence a verdict of accidental death was returned.

The remains were then brought to his late home on Craig street of this town. Deceased, who was 41 years of age, was a widower and leaves an only daughter. The funeral will take place at the Roman Catholic Church, Cookshire, on Tuesday morning at ten o'clock.

SOUTH DURHAM

Again death has visited the community and claimed another of the highly esteemed citizens in the person of Mrs. Arthur Johnston, who passed peacefully away on Friday morning, April 24th, 1914. The deceased (nee Frances Medley) was born in County Cabin, Ireland, in 1840, and came to Canada with her parents when six years old. On March 16th, 1858, she was united in marriage with Arthur Johnston, who survives her. Of their children, four sons and six daughters survive, and all were present at the funeral but two sons, John Johnston of Alaska, and William Johnston of Escanaba, Michigan. She is also survived by four sisters, Mrs. G. A. Wilson, Mrs. F. Graham, Sr., Mrs. Hugh Patrick, Mrs. Robert Montgomery, and one brother, Mr. William Medley, of New Westminster. All the sisters were present at the funeral and many grandchildren and great grandchildren. The funeral took place on Sunday afternoon from the home of her daughter, Mrs. R. C. Griffith, to St. James Church, the sacred edifice being taxed to its utmost capacity by the many relatives and friends assembled to pay their last tribute of respect to this departed.

Rev. W. A. Adcock officiated and read for the lessons Psalm 90, also part of the 15th Chapter of 1st Corinthians, and he spoke from Hebrews 13:14: "For here have we no continuing city, but we seek one to come." The choir sang by request, "Jesus, Lover of My Soul," "Forever With the Lord" and "On the Resurrection Morning"; also the voluntaries, "I Know That My Redeemer Liveth," and "Lord, Now Lettest Thou Thy Servant Depart in Peace." The casket was covered with beautiful flowers including a wreath from her children; a pillow and bouquet from Mrs. Wilson, and son, Ellis; and a spray from Mr. and Mrs. Russell Walker of Allandale, Ont. The bearers were four grandsons and two nephews: Messrs. Frederick and Royal Walker, Forest Johnston, Edison Montgomery, Frederick Graham, Jr., and Ernest Patrick, who tenderly laid her to rest in St. James' Church Cemetery. Relatives present from a distance were Mrs. G. A. Wilson, and Mr. E. A. Wilson of Brownville Junction, Me.; Mr. Edison Montgomery from Vancouver, B.C., and Mrs. Brown from Kingsbury.

Recent arrivals include: Mr. Edison Montgomery from Vancouver, B. C., with his parents; Miss Elizabeth McCrea, from a few days with relatives in Sherbrooke and Bromptonville; Dr. L. Charpentier, from a business trip to Montreal.

Mr. Robert Morrill's condition does not show much improvement.

Mr. Geo. Ford to Montreal on Tuesday on business.

Mr. Geo. W. Johnston to Montreal on Thursday attending the funeral of his aunt.

The Ladies' Missionary Society of Emmanuel Congregational Church held their regular monthly meeting in the Church parlors Thursday afternoon entertained by Mrs. Chas. Steel and Mrs. Jas. Johnston. After the routine business the ladies listened to a very interesting and comprehensive report from Mrs. W. M. Hawk and Mrs. P. E. Draper, who were delegates to the 21st annual meeting of the Quebec Provincial branch of the Canadian Women's Board of Missions held in Montreal last week.

Miss D. Dunlop, who has been visiting Mr. and Mrs. E. E. Lawrence at Shady-side, to her home in Stansfeld on Friday morning.

There was a very pleasant meeting of the Guild in Trinity Church Hall

on Thursday afternoon entertained by Mrs. Bruce Miner. There was hardly the usual attendance owing to many being in Montreal.

There was a large and enthusiastic meeting of the Girls' Friendly Thursday evening at the home of Miss C. Hauer.

Miss Ruth Taber is quite recovered from her recent illness.

Mr. H. L. Turner with a gang of men has this week replaced the benches under the iron bridge preparatory to moving the road roller from one side of the river to the other as needed.

Mr. L. C. Parsons arrived home on Thursday looking well after a six weeks trip to Maple Creek and other points.

Miss Isabel McClatchie gave a party to a number of her little girl friends on Friday afternoon, the 6th anniversary of her birthday. There were 22 little girls present.

The birthday cake was beautifully decorated, also here six small wax candles, one for each year. The cake was cut and with ice cream enjoyed by the little ones. Games were indulged in for some time when Mr. McClatchie brought around his automobile and returned the little ones to their various homes.

The Cowansville W.C.T.U. held a very successful meeting at the home of their President, Mrs. W. H. MacFarlane, Friday afternoon. Ten comfort bags were filled and sent to the distribution.

In these bags the ladies put thread, needles, buttons, darning yarn and etc., also temperance literature. Then at the Institute a small Bible is added. Contrary to the rules (which are only broken comfort bag day), refreshments were served. The delegates were not appointed, as those present could not promise to attend, but Mrs. P. F. Miss Mary Taft, of Montreal visiting friends in Cowansville and Sweetsburg.

Mr. F. R. Pichel home from a visit to friends in Ottawa.

There has been quite a lot of May moving in this place.

On Wednesday afternoon last, the funeral of the late Mr. E. S. Gleason, took place from his late residence, Mr. Gleason having been born and grown up and always lived in Cowansville and Sweetsburg, his funeral was attended by the business men of both villages, with whom he was popular. He was born in Cowansville, August 19th, 1875, being in his 39th year at the time of his death. He was educated in the Cowansville Academy, the flag of which was flown at half mast Monday, Tuesday and Wednesday out of respect to him and his children, two of whom are attending the Academy now. Mr. Gleason worked for Mr. McClure, and later for his successor, Mr. W. G. Brown. After his marriage he started for himself at Sweetsburg, doing a good business, until about four years ago, when he was obliged to relinquish it on account of ill health. Since that time he has been a great sufferer, undergoing several operations, and putting up a great fight, until finally the end came on Sunday the 26th ult. The service was held at the home, being conducted by the pastor of Emmanuel Church, the Rev. A. H. Trill, assisted by the Rev. W. P. R. Lewis, and the Rev. M. Brundage, after which the remains were conveyed to the Union cemetery for interment. Mr. Gleason leaves a sorrowing mother, one sister, three brothers, a wife and four children to mourn his loss.

On Wednesday evening the Boy Scouts and their friends had the pleasure of listening to an illustrated lecture given by their Scout Master, the Rev. Geo. Forde. The first picture thrown on the screen was one of Gen. Baden-Powell, the founder of the Boy Scout Organization. After explaining the events which brought the movement to the mind of Gen. Baden-Powell, namely the good work done by the boys during the siege at Mafeking, South Africa. The lecturer told what was required of those who wished to enroll as members, after which he explained the different ranks and what a scout would be obliged to be proficient in to win the badges of the different classes. All

of which went to prove that boys who were attentive to the duties of the organization are bound to make good men and useful citizens. A series of pictures followed, showing the different phases of camp life. The pictures were very good and much enjoyed by all, as well as the able manner in which the Rev. Mr. Forde put before the minds of the audience the good work of the Boy Scout movement.

Na-Dru-Co Dyspepsia Tablets

Quickly Put Disordered Stomachs Right

It's a revelation to the chronic dyspeptic to feel so discomfort after a hearty meal, when that meal is followed by Na-Dru-Co Dyspepsia Tablets. He is hardly prepared for the almost magic relief which the tablet gives him from the various discomforts to which he is accustomed after eating.

Na-Dru-Co Dyspepsia Tablets sweeten stomachs that are sour—relieve stomachs that feel as if a stone had been swallowed—stop heartburn—and give the needed assistance to stomachs that are weakened.

Containing in themselves the active principle needed for digesting every kind of food, Na-Dru-Co Dyspepsia Tablets enable even the weakest stomachs to get the good out of what is eaten, preventing the accumulation of undigested food and gas. With a little help for a while, the digestive organs recover their strength, do their work properly, and your troubles are over.

Don't go on suffering! Get a box of Na-Dru-Co Dyspepsia Tablets from your druggist today. National Drug and Chemical Co. of Canada, Limited, Montreal.

On Wednesday evening the Boy Scouts and their friends had the pleasure of listening to an illustrated lecture given by their Scout Master, the Rev. Geo. Forde. The first picture thrown on the screen was one of Gen. Baden-Powell, the founder of the Boy Scout Organization. After explaining the events which brought the movement to the mind of Gen. Baden-Powell, namely the good work done by the boys during the siege at Mafeking, South Africa. The lecturer told what was required of those who wished to enroll as members, after which he explained the different ranks and what a scout would be obliged to be proficient in to win the badges of the different classes. All

of which went to prove that boys who were attentive to the duties of the organization are bound to make good men and useful citizens. A series of pictures followed, showing the different phases of camp life. The pictures were very good and much enjoyed by all, as well as the able manner in which the Rev. The Junior Mission Band will meet on Wednesday afternoon at 4 o'clock in Plymouth Hall.

THE FASHION SHOW MATTER.

The President, Secretary and members of the Sherbrooke Hospital Committee regret extremely the failure of the "Fashion Show," and the consequent disappointment, to say nothing of the financial loss of the public and those who purchased tickets.

They feel bound to say, however, that in spite of a much adverse criticism, they acted in perfect good faith, and thoroughly believed the promoter to be all that he represented himself to be.

Their position was further strengthened by numerous references, programmes of similar entertainments, etc., held in Toronto, St. Catharines, and other places, which if not genuine, must have required a great deal of ability as well as imagination to produce.

The percentage agreed on for the Hospital was obtained from the individual in question at, so to speak, the sword's point, and at the same time the secretary took the opportunity of telling the promoter a few home truths.

ST. JOSEPH'S DAY OBSERVED.

Yesterday being the festival of St. Joseph, patron saint of Canada, was fittingly celebrated by the "Union St. Joseph" of the city, an organization with a very large and influential membership. Some three hundred members of the Union assembled at their hall on Wellington street, and in full regalia, marched in procession by way of Wellington street, Aberdeen Avenue and Gillespie street to the parish church of Notre Dame, South Sherbrooke, where special preparations had been made for their reception.

The Harmony Band, playing National and patriotic airs, led the way while the magnificent banner of the Union was carried at the head of the procession, with several other flags.

Arriving at the church the officers, including Mr. T. Belanger, president, Messrs. F. P. Vaillancourt, F.H. Hebert, S. Fortier, L. H. Guay and others were accommodated with seats in the front of the nave, and solemn high mass was celebrated by Mgr. E. C. Tanguay, of St. Charles Seminary, assisted by the Rev. Abbes Ledoux and Adam, as deacon and sub-deacon.

The sermon, an eloquent discourse, was delivered by the Rev. C.A. Busiere, parish priest, who after extending a cordial welcome to the members of the Society, and expressing pleasure at seeing so fine a turnout, proceeded to dwell upon St. Joseph, the husband of the Blessed Virgin Mary and the head of the Holy Family, as an exemplar for the men of Canada, a new and growing country. St. Joseph was a humble carpenter, working with his hands, obscure, comparatively poor and unknown, yet he was chosen and set apart for the great purpose of God, and his faith and devotion made him a fitting instrument of the Divine will. In addition, his industry, contentment and thrift might well be imitated in this age of unrest and revolt against existing conditions.

A large choir rendered the Royal Mass.

A Brick Limerick

The ancients had trouble to make their bricks,
Without using straw for a binder.
Since those times, the people have learned some tricks,
And the task-masters, too, have grown kinder.

But, alas! you will find, it is true of to-day,
And this we have learned from our mascot,
That good bricks can only be made from good clay,
And the good clay is all in the Corner of Ascot.

LETTERS TO THE EDITOR

SHIPPING AT MAGOG

Editor Daily Record,

Dear Sir:—In your issue of the 30th inst., I notice in Magog locals reference is made to my instructions from the Department of Public Works re-wharfage to be charged at the Government wharf here. No charge was made in the past nor do I know of any being contemplated for small yachts or pleasure boats wishing to land. Boats carrying passengers or freight for hire will be subject to the regular tariff furnished by the Dept. I wish to make this correction as your correspondent might lead our summer residents up the lake and others to think they were not welcome to our city, but we want them all. Thanking you, Mr. Editor, for valuable space, I remain,

Yours sincerely,

D. E. PETERS,

WHAT HUERTA TYPIFIES.

(Christian Science Monitor)

Mexico is and has been for years in the grasp of a power that shuns the light, that takes advantage of hidden ways, that works against progress and enlightenment and the popular enjoyment of those riches of the soil, and climate, and situation, which would seem to be the natural heritage of Mexico and the Mexican people. Some would now call this power Huerta; others, anarchy; others, illiteracy. We think the events of the last few days have shown that President Wilson has done wisely in not attempting to recognize it officially; for it is obvious that no one of these possible claimants for recognition is really Mexico. And every act of the United States Government, we hold, should be wisely calculated to recognize and assist the real Mexico, the great body of humanity which, one way or another, can properly claim the right to life, liberty and the pursuit of happiness with a home on Mexican soil. If Sr. Huerta is the visible embodiment of forces that would restrict that right, that would prevent the Mexican people from proper realization of that peace and progress and security which civilization unites to insure, then the use of force to remove the disturber would be not so much a move for war as a move for peace. The United States Government seems to be acting with the authority of civilization behind it, but amid the clamor over trivialities the Government and all its factors can afford to ponder that the call of the golden rule is greater than any call for "punishments," and that where passion would destroy, wisdom builds.

BRITISH WORK FOR EGYPT.

(London Engineering)

If we would have an adequate picture of what British enterprise, combined with scientific skill has achieved for Egypt, it is necessary to reconstruct, as well as we can, the Egypt of the early eighties, when the nadir of financial chaos and popular misery had been reached, when a starving nation lay helpless at the caprice and tyranny of the Egyptian pasha and the native ruler. Then we may compare the abject misery and hopeless stagnation of a race, who had known sixty centuries of misgovernment and oppression by various rulers from Pharaohs to Pashas, with the regenerated condition and renewed strength that followed British occupation and rule, hampered though it had been by special political complications and exceptional difficulties arising out of the international jealousy. We must admit that the introduction of western reforms and scientific methods has been of incalculable value, and that perseverance in well-doing has enormously benefited the country. A very superficial investigation will show that the factor that has worked the greatest change has had the control of the Nile waters, enlarging the acreage of cultivated land under irrigation, increasing the production of more valuable crops, stimulating industry and promoting prosperity. Enlarged opportunity and the certainty of order government have inspired the natives with hope and energy. The welfare of the country has advanced by leaps and bounds. During ten years the total value of the imports of Egypt more than doubled, rising from £11,500,000 to over £22,000,000, while the exports increased in value from £13,000,000 to £24,000,000. During the same period the revenue of the country increased from £11,500,000 to £16,000,000.

APPRENTICE TO GREATNESS

(Review of Reviews)

For thirteen years, at the bleakest post in the company's empire, Strathcona served his apprenticeship to future greatness; and he served without union hours, for wages beginning at \$100 a year, and never exceeding \$1,500, and he saved. Put that fact down plain, and clear cut, too! We all remember the tragic death of Leonidas Hubbard trying to come out of Labrador. Well, young Donald Smith thought no more of coming down to Montreal, 2,000 miles by dog train in the teeth of the wildest north-easters, than we do of walking a block in New York on a windy day. Once his eyes went wrong—snow-blindness from fishing through glare ice and making long trips in the face of blizzards. He "dog-trained" down to Montreal in mid-winter, had his eyes operated on and in two days set out on the return journey. Sir George Simpson happened to be the resident governor for the party. He was famous for the drive he put into his men; but the man who set the pace and did not flinch went up to promotion as inevitably as the years went round. Sir George made careful note of this young fellow, who took 2,000 mile trips in midwinter and quadrupled returns in the company's poorest section.

UNDER CONTROL

"Is he completely under his wife's domination?"

"I guess so. He wears a bathing suit that she made for him."—Puck.

Baritone voices are the most common among masculine singers of today, and even these are distinctly a shade deeper in tone than the baritone of fifty years ago.

The English opera could never be sustained by the voices of her countrymen, and it is to the southern climes we must look for the slowly but surely lying "fute" voice.

NIGHT IN CAMP

How Travellers Protect Themselves in the Far North

R. J. Fraser, writing in "Rod and Gun," thus describes a winter night on a lonesome trail in the far north:

By the heat of the fire dry duff and moccasins were hastily put on, and slacked tied so as not to stop the circulation in the feet and limbs that were already in various stages of swoliness. One by one the men rolled up in their elderdowns, which we had sewn up into the form of bags. Into these each put such mittens or moccasins as were still damp. If the heat of our bodies did not dry them they at least prevented them from freezing. Pulling woolen caps down over face and ears, we crawled feet first into the bags and pulled the coverings up and over us, enveloping even the head. After one has grown accustomed to half-suffocation, the arrangement is found to be almost comfortable; it is necessary to prevent the face from freezing as well as preserve the warmth of the body by retaining it within the bag. Make an opening no larger than the size of one's fist for a very few minutes only and you let in a quantity of the penetrating, frosty air that takes the natural heat of the body a quarter of an hour to overcome. Of course some opening must be left at the top of the bag to permit of the sleeper's breathing; but the steaming breath, blown out through a tiny aperture, is at once converted into frost that covers the head of the bag and that of its inmate. At times that nearest to the source of heat melts and trickles down the face and neck of the sleeper, proving most discomforting.

About Shampooing

Even the best shampoo is somewhat drying, and if the hair is not naturally oily, I suggest that just before the shampoo, you apply olive oil to the scalp, rubbing it into the hair roots vigorously. Then use pure stallax for the shampoo. Dissolve a teaspoonful in a cup of hot water. This will leave the hair very clean, soft and fluffy.

A Good Complexion

Skin, to be healthy, must breathe. It also must expel, through the pores, its share of the body's effete material. Creams and powders clog the pores, interfering both with elimination and breathing. Women should use ordinary mercurized wax instead of cosmetics and they would have natural, healthy complexions. This remarkable substance is not absorbed by the skin; its action is just the opposite. The skin repels mercurized wax, and at the same time throws off all impurities. An exquisite new complexion peeps out, quite free from any appearance of artificiality. Apply nightly like cold cream, for a week or so, washing it off in the morning.

Replanting the Forests

Over twelve thousand letters have been received at the Dominion Government Forest Nursery Station at Indian Head, Sask., and almost two and three-quarter million trees distributed for planting on the farms of Alberta, Saskatchewan and Manitoba. To accommodate this constantly increasing demand, a branch nursery has been established near Saskatoon. Nine inspectors supervise these prairie-farm plantations, and give personal advice to the farmers, and the Forestry Branch, Ottawa, issues bulletins free of charge to anyone interested in this work in Canada or elsewhere.

Modern Drama Decadent

Preaching at St. Paul's Cathedral, Canon Alexander deplored the decadence of the modern drama and of public taste. "I suppose," he said, "no thoughtful person can regard with satisfaction the wave of morbid sensationalism which has crept over the national consciousness, creating an art, if we call it so, which is full of the vulgarity from which all true art is always and inevitably free, and which moves in a wholly different world from that which gave us the phrases and situations of 'Measure for Measure,' 'Othello,' or 'Romeo and Juliet.'"

Voices Are Growing Deeper

Nowadays there is a noticeable stir in musical centres when a new tenor or soprano is discovered. A baritone or contralto voice, on the other hand, however beautiful may be its quality, attracts but little notice.

All the great masters agree that sopranos are becoming more and more difficult to find, and so rare is a pure tenor that the possession of such a voice has been called a disease.

The reason for this is that with each successive generation the human voice has become a shade deeper. A genuine bass voice was unknown among our more remote ancestors, and most of their carolling was in what would nowadays be called falsetto tones.

Baritone voices are the most common among masculine singers of today, and even these are distinctly a shade deeper in tone than the baritone of fifty years ago.

The English opera could never be sustained by the voices of her countrymen, and it is to the southern climes we must look for the slowly but surely lying "fute" voice.

BIG FOUR AND N. L. U. MEET

Ottawa Was Admitted to the Latter Organization

SHERBROOKE WILL LIKELY DROP OUT FOR THIS SEASON. KENNEDY OUT OF BIG FOUR

Montreal, May 4. (Special)—Both the Senior Lacrosse organizations held meetings on Saturday afternoon, and there were many surprises at both meetings. Things are shaping themselves for the coming season and the public now has a pretty good line on the composition of both leagues.

The National Lacrosse Union met in the M.A.A.A. club house with President Murphy in the chair, and the following clubs were represented: Montreal, Cornwall, Shamrock, Ottawa and Sherbrooke. G. B. Maguire represented the latter city.

The surprise of this meeting was the application of Mr. Bannerman of Ottawa for admittance, as it was generally expected that he was anxious to enter the "Big Four."

The application was enthusiastically received and the franchise granted. Mr. Maguire, of Sherbrooke, stated that it would be impossible for his team to remain in the league unless they were guaranteed \$75 towards their expenses by the Ottawa club. Mr. Bannerman stated that if the league upheld this demand he would have to withdraw Ottawa. It was the opinion of the meeting that if Sherbrooke wanted to remain in the league as the other clubs. It was decided that Mr. Maguire should consult his club on this question.

Officials of the Sherbrooke club however, when interviewed, stated that it would be impossible for them to make the trip to Ottawa, and they will no doubt withdraw their application.

The election of officers resulted in Mr. Peter Murphy being chosen honorary president, and Mr. James Murphy, of Toronto, President.

KENNEDY WITHDRAWS FROM "BIG FOUR"

Toronto, April 4. (Special)—The D.L.U. met at the Prince George Hotel on Saturday.

The league refused the request of Mr. Kennedy of Montreal to transfer his team, the Irish-Canadians, to Quebec, and he announced that he was out of lacrosse. Ottawa's application was refused and the Quebec club was admitted and the league will be composed of the following teams: Tecumseh, Toronto, Nationals and Quebec.

WITH THE ATHLETICS

The team had a good workout on any being contemplated for small Malay, the new infielder, is the best ball player seen on the local diamond.

Brophy, another new man, will strengthen the team in the outfield. He is also a pitcher.

Mackay has a great assortment of curves this season and opposing teams will have some difficulty in hitting his offerings.

With Hammond, Long, Parker, May, Povey and Molyneux the Athletics have a speedy and hard hitting infield.

Prefontaine, the French-Canadian twirler seems to grow better with age. He was out Saturday and on the showing made will be a help to the pitching staff.

The Baraca E. T. League team had a workout against the Athletics for a few innings.

WATERED BUTTER

We often hear of watered milk, but watered butter goes it one better. In item in the census and statistics monthly is deserving of some attention. It appears that a good deal of adulterated butter, that is butter containing more than 16 per cent. of moisture, has been lately manufactured in Montreal, and this is strictly against the law. It is brought out in this item that butter properly made should not contain more than 16 per cent. of water, and in most countries this is the legal limit, the same in Canada. As a rule butter made in Canada does not contain more than this percentage of water, but within the last year or two, according to this report, fraudulent practice has been developed by unscrupulous dealers, principally in Montreal, of adding as much as 30 or 40 per cent. of water to butter, the adulterated product being sold as ordinary butter. The fraud is practiced and the poor people are the sufferers, as it is in the poorer quarters of the city that this fake butter is sold. The Dairy and Cold Storage Division of the Dominion Department of Agriculture is putting forth a determined effort to stamp out the evil. Several manufacturers have been convicted, and at the time the report was sent to the publication in question many other actions were pending.

East Angus Unable to Stand Fast Pace Set by Locals

USTON SCORED ALL THREE GOALS—DUGUID, CENTRE HALF, STARRED

Y.M.C.A. won the first game of the E. T. League, on Saturday afternoon when they defeated East Angus by 3 goals to nil on Athletic grounds.

A fairly large crowd was on hand and they were well satisfied with the game, which was very fast throughout.

East Angus won the toss and the locals had to play against a strong wind during the first half, but they pressed hard. The Muir brothers, at full back, had a very busy session but they proved equal to the occasion and saved many times.

The Angus left winger also played a strong game during the first half but could not get past Wootton and Preece. Play during the first period was largely in favor of Y.M.C.A. and they claimed two goals, but Referee Woods, of Waterville, disallowed, and the half ended without either side having the advantage so far as scoring was concerned.

Shortly before the whistle blew D. Anderson, inside left, was injured and was unable to continue. Y.M. playing with ten men during the last period.

Condition told heavily against the East Angus team during the last half. With the wind in their favor Y. M. forwards bombarded their goal and the defence weakened. The first goal was scored by "Young" Aston, who headed a pass from the left into the nets. About ten minutes later he went through again after a pretty piece of combination play. He scored the third and last goal with a long drive after a pass from Capt. Myers.

The Y.M. team showed unusual strength on the half line, Duguid being perhaps the best man on the field, while Brown and Engleke were exceptionally strong. Muir brothers as usual played a great defence game but their goaler lacked experience. The Angus centre forward, Warren, and Irwin, at outside left, were the pick of the forward line.

The teams were as follows:

Y.M.C.A.—Aveling, goal; Preece, Wootton, backs; Brown, Engleke, Duguid, half backs; Myers, D. Anderson, Aston, H. Anderson, Corfield, forwards.

Angus—Cote, goal; W. Muir, R. Muir, backs; A. Munday, F. Crump, (Capt) J. Riddick, half backs; S. Cosgrove, R. Murray, W. Warren, G. Rowley, R. Irwin, forwards.

Referee—F. Woods, Waterville.

ROYALS BIG WIN AT COATICOOK

Forwards Scored Ten Times While Defence Kept Opponents Well Out

Croft, speedy inside right, WAS VERY EFFECTIVE—ROYALS VERY STRONG

Coaticook, May 4. (Special)—The Royal Athletics, of Sherbrooke, were here on Saturday last for the first E. T. League fixture and won by a record score.

Stevens, the Athletics captain, won the toss, and decided to play with the wind in favor.

Coaticook started off with dash and for a while bombarded the Athletic goal keeper but were unable to score.

The Athletics soon found their stride and settled down to some fine combination football. Croft opened the score with a fast low drive which the home goal keeper had no chance to save. Croft scored three more and Maguire one, and the first half ended 5-0 for Athletics.

Coaticook again pressed pluckily when play was resumed but were unable to find the "nets." Croft broke through and scored again, and soon after repeated on a centre from Stevens. Wilson and Hatch took a hand in the scoring and added one each. Croft wound up his first day's work with a goal, making his total seven.

The final score was 10 to 0.

Emtage, Howitt and Leeman were the pick of the Coaticook team.

The Athletics showed unusual strength and on Saturday's showing are favorites for the championship.

The teams lined up as follows:

Coaticook—Turner, goal; Whalling, Faulkner, backs; Emtage, Smith, Jones, half backs; Sparks, Dalton, Howitt, Leeman, D. forwards.

Athletics—Goal, Henderson; backs, Banks, Tomlinson; half backs, Stevens, Tomlin, Hornett; forwards, Wilson, Croft, Maguire, Hatch, Jude.

Referee—Immes.

JUNIOR BASEBALL LEAGUE FORMED

FOUR TEAMS WILL CONTENT FOR CHAMPIONSHIP

A meeting was held on Saturday at the Y.M.C.A. for the purpose of forming a junior baseball league. The following teams entered: St. Pat's, Shamrock's, Baracas and Y.M.C.A.

The age limit for players was set at nineteen years.

A schedule and constitution was drawn up. Double headers will be played, commencing Saturday 9th until the 14th of June.

FARNHAM JRS. VS. HIGH SCHOOL

Farnham, May 4. (Special)—A game of baseball between the Farnham Juniors and the High School team was played on Saturday afternoon, which was won by the former, by the score of 19 to 12. The youngsters take a great interest in the game.

WILLIE'S CONFESSION

Little Willie had been very naughty so much so, in fact that after having reproved him several times, his mother was at last forced to severely punish him.

When the father arrived home in the evening, he at once perceived that Willie's eyes were suspiciously red.

"What's the matter, sonny?" he cried.

"Oh nothing," responded Willie untruthfully.

"Come, don't be frightened," said his father, in coaxing tones. "Tell me all about it; I want to know."

Willie remained silent for some time.

TO SYSTEMATIZE STREET NAMES

A street-naming system which has been suggested denominates all main east and west thoroughfares as "streets" and minor ones as "places," all main north and south thoroughfares as "avenues" and minor ones as "cours," and all diagonal thoroughfares as "ways." All "streets" to the north of a central east and west base would have even numbers, and all those south of that line odd numbers. In the same way, all "avenues" east of a north and south base line would have even numbers and those south of that line odd numbers. Diagonal "ways" may be numbered, or given a name indicating the direction from the centre of the city. The house numbering would be on the decimal system, 100 to each

A Spring Vacation

Most stomachs need a rest after the heavy work of the usual winter diet.

What is needed is easily digested food—food that furnishes plenty of nourishment, but with least tax upon the digestive organs.

Grape-Nuts

is that kind of food!

Made of prime whole wheat and barley, it contains all the rich nutrition of these food grains, and by long baking is partially predigested. It comes crisp, delicious and ready to eat when the package is opened.

Grape-Nuts digests usually in about one hour (Bread, for instance, requires about 3½ hours).

RECALLS THE EARLY DAYS

Interesting Find Made Near Banff of Famous Man's Initials

To carve one's initials on a tree trunk is a great and passionate desire of all school boys, and to this habit the world is perhaps indebted for the interesting discovery of initials on a fallen giant of the forest in the Canadian Rockies believed to be those of Sir George Simpson, at one time Governor of the Hudson's Bay Company, and of his guide, James Roland. When Mr. John M. Gibbon was at Banff, B.C., endeavoring to locate records of David Thompson, who was the geographer in the early days of the West to the North West Trading Company, the great rival of the Hudson's Bay Company, he was referred to a Mr. James Brewster, a rancher, as a person well versed in local history, and he found the latter gentleman had made a discovery of great interest. He had been investigating Simpson Pass, hoping to discover some trace of Sir George Simpson's historic passage through the Rockies, and, halting to examine the under side of a large fallen tree trunk, found some carving which read: "G.S. I.R. 1841." It is evident that these initials are those of Sir George Simpson and his guide, James Roland. The year 1841 is that in which the famous explorer made his trip through the Rockies, choosing the pass which has been named after him.

The life of Sir George, the veteran King of fur traders, is one of the most picturesque in Canadian history. He went to the Canadian North West from Scotland in 1820, to take charge of the affairs of the Hudson's Bay Company. In 1841 he took up his tour of the world, leaving London on March 3rd of that year. With canoe and pack horse he crossed the continent, took ship from Fort Vancouver for Siberia, and reached London on his return journey in exactly 19 months and 26 days from his time of starting.

PROGRESS OF AVIATION

Passenger Machines Are Proving Successful

Big aeroplanes are the most striking development in aeronautics—six passenger, eight-passenger, and even ten-passenger machines having made successful flights. Many theorists have recently declared that there are physical limits to the size of successful aeroplanes, and that these limits have nearly been reached; but on the practical side the development continues.

One Russian aviator has made long flights with a machine having a wingspan of more than 100 feet. The latest model in Wright machines, in contrast, has a span of only 38 feet; and the span of the high-speed French machines is much less. The Russian aeroplane carries ten passengers, all seated comfortably in an enclosed car. Four hundred horsepower is used to turn four propellers.

A tandem biplane recently tried out on the Seine in France, adapted to rise from the water, weighs more than three tons loaded, and is driven by three engines developing 400 horsepower. Two sets of wings have a span of 82 feet each. Machines are now being constructed to carry twelve and fourteen passengers.

HENDERSON VALE

Mr. Jas. Sutor passed away at the home of his daughter, Mrs. Edwin Little on Sunday morning, April 26th, as previously reported. He was in his usual health until Wednesday morning. As he was coming in from the barn he was stricken with paralysis and fell down. He was carried into the house and never spoke again. He only lived four days after being stricken. Mr. Sutor, a son of Mr. and Mrs. Thos. Sutor, was born in St. Sylvester, Jan. 12th, 1841, and was married to Miss Ann Russell in March, 1861. To this union were born eight children of whom six are living, three sons and three daughters. After the death of his first wife, he married Miss Rachel Johnson, September 28th, 1875, and to this union was born six children, of whom four are living. One died in infancy and his son, Joseph, was killed three years ago. He leaves to mourn his loss, his wife and ten children, sixteen grand-children and five great grandchildren; one brother and four sisters, and a number of friends and neighbors. He was a kind husband and loving father, and will be very much missed. Six of his children were able to attend his funeral: Hugh and Henry of Graniteville, Vt.; Mrs. M. Smith, of Barre, Vt.; Mrs. John Campbell of St. Johnsbury, Vt.; Mrs. E. Markney, of New York; Mrs. Edwin Little, with whom he lived; Rev. Mr. Miller, of Inverness conducted the funeral service in the house. The remains were interred at Kinnear's Mills. The bearers were Messrs. John Moore, Robt. J. Little, Herbert Marshall, James Robinson.

Departures: Messrs. H. R. and Henry Sutor, Mrs. M. Smith, Mrs. J. Campbell, to Vermont and Mrs. E. Markney to New York, after having been home to attend the funeral of their father, Mr. Jas. Sutor; Mr. and Mrs. J. Marshall, visiting their daughter, Mrs. R. Bennett, at Lower Ireland; Miss Bertha Henderson, home after a week with her sister, Mrs. R. D. Briggs, at Kinnear's Mills.

Mr. Albert E. Little gave a sugaring off to quite a number of young people, Saturday evening, which was very much enjoyed.

"THE CURSE OF SCOTLAND."

Why the nine of diamonds should be called the curse of Scotland, has

never been satisfactorily explained. Like the birth of a celebrated literary personage, its origin is "wropt in mystery." Several explanations have been put forward from time to time, but very few of these can be said to be a real solution.

The three most plausible suggestions are these:—1—In the game of comets, introduced into Scotland by Mary of Lorraine, daughter of the Duke of Guise and second Queen of James V., the nine of diamonds is the winning card. The game was the curse of the country, from the fact of the large number of courtiers who were ruined by it; 2—In the game of Pope Ivan, the nine of diamonds is called the pope, who was considered by the Scottish Presbyterians as a curse; 3—And one which is generally accepted as correct. The card got its name from its resemblance to the 9 lozenges or, arranged saltire-wise on the armorial bearings of Sir John Dalrymple, afterwards of Stair. He was secretary of State for Scotland during the reign of William III., and was the chief author of the massacre of Glencoe, which left such a stain upon his memory and upon the king's as well. Dalrymple's name became utterly abhorrent to the people, being regarded by them as a curse. Chambers' Encyclopaedia gives this as the real explanation.

Of the other suggestions, the most likely royalty and every ninth king noteworthy are these: 1—Diamonds of Scotland has been a curse to his country. This explanation is rather far-fetched to say the least. It is an example of how far people will go in the desire to find a reason for the term; 2—The word curse is a corruption of "cross" and the nine of diamonds is so arranged as to form a St. Andrew's Cross. Another example of the proceeding: as the nine of hearts would answer this just as well, that it was on the back of a nine of diamonds that the Duke of Cumberland, "the butcher," wrote the order for the merciless execution of the highlanders after Culloden (1746). The suggestion must be placed on one side as useless; 3—Some have it, however much this suggestion may appeal to a national sentiment, it, too, may go the way of the others. The term was used in the year 1715, as the Justice Clerk Ormiston was nicknamed by the ladies "The nine of Diamonds." There is also a caricature of the date Oct. 21, 1745, which represents the young chivalier attempting to lead a herd of bulls laden with papal curses, ex-communications, etc., across the Tweed. Such are some of the common explanations of this term, and it could be wished, they were a little more satisfactory. One cannot say with certainty that any of them is the correct one, but they are the best that have as yet been brought forward.—T.P.'s Weekly.

MOVING MOUNTAINS TO MAHOM-ET.

Present tendencies of designing central stations for supplying power to large districts and of concentrating their output in a few mammoth generating units, have given rise to transport problems, not always sufficiently appreciated. In connection with an installation in the Argentinean Corderilleras, the cost of transport rose to enormous figures. Even the masonry walls entailed ten times the usual price. In such cases the

bricks have frequently to be conveyed great distances by mules, or by camels, as in Egypt.

The absence of cranes, winches, trucks of sufficient capacity, etc., may compel the engineer to invent new methods. As an example, large boilers, and even gas tanks, have like ship hulls, been floated by their own buoyancy on rivers or at the seacoast from one place to the other. This course must be adopted in the absence of transport vehicles of sufficient size, or when they cannot come close to the unloading station. Such remarkable sea-trips have been made by some Sulzer fire-tube boilers installed at the lead and silver mines of Almagrera, Spain, near the Mediterranean coast. Since the boilers, on account of their mechanical strength, could pass the breakers without any danger, they were readily hauled to the coast from the transatlantic steamer anchored at the roadside.

In transporting a heavy Sulzer steam engine destined for a spinning mill in the interior of Russia, bridges had to be constructed specially for the purpose.

Such transport work is frequently made even more difficult by the lack of skilled workmen, although this deficiency may be made up by the numbers.

Unexpected difficulties may occur in the winter when the rivers are frozen. A disagreeable surprise was experienced in connection with a large steam engine to be conveyed upstream from the mouth of the Dnieper. Since the river was not free from ice and no delay was permissible in fitting up the engine, it had to be taken to pieces, the parts being transported over the country roads to the spot, which, of course, took many days.—Power.

GOLD-PLATED DOOR HANDLES

Five thousand pounds per annum is several thousand more than most people could pay as rent for a flat, yet that is the amount demanded for some flats on Upper Fifth Avenue, New York. The land there is worth £20 per square foot, yet this alone does not regulate the enormous rent for the flats contain twenty-five rooms, comprise a whole floor, and are fitted with every known device to render life safe and comfortable.

The entrance is of such simplicity that a casual observer would wonder where the value of £5000 came in. The walls are a pinkish cream marble, and so are the floors, though covered with heavy red pile carpet.

One of the rooms is a miniature reproduction of the famous Long Gallery at Haddon Hall. Even the lovely plaster work of the ceiling has been reduced to scale. The room is finished in English oak panelling.

Perhaps the most unusual feature of these flats is the "hardware," every bit of which was gold-plated before being placed in position. "Hardware," in this connection, means the metal parts of door handles, key plates, hinges, brackets, window fixtures and so on. Gold does not tarnish, and the fixtures therefore need only a light rub with a piece of dry leather to be kept perfectly bright. No polish is necessary, and the woodwork surrounding the metal consequently does not get discolored. In the dining-room, silver-plating on white metal is used instead of gold.

Another device for which the millionaire tenant pays is fitted to the

windows. Ever since casement windows were invented they have, as the builder says, "leaked air." The windows of these sumptuous flats are the exception. When the tenant wants air he moves a gold-plated lever and the whole window moves up an inch and gets clear of the window sill.

The dining-room is about 21 feet by 25 feet, a perfect example of a seventeenth century Adams-room. Nine coats of paint have been spread over the walls with as much attention as is devoted to the panelling of a motor-body. But while the motor car is brought to the highest possible glaze, these flat walls are left with a soft, silky finish. White and gray is the color scheme of the room.—Tit-Bits.

WHY WOMEN DO NOT SLEEP IN CHURCH

It is doubtful if one woman to a thousand men go to sleep in Church, and people have long held an entirely wrong impression of this. It has been said that the men are a bit more stupid, that they do not pay enough attention to the sermon, or do not comprehend it sufficiently to retain their interest, and hence get sleepy. It has also been said that women are brighter, quicker to understand, and have more self-control and so do not lose interest and close their eyes in slumber while the minister is preaching.

But all this is quite wrong. A German professor has been making a study of the problem and he declares that men fall asleep in Church because they do pay more attention to the sermon than do the women. Further, he declares that the average woman does not begin to grasp the purport of the sermon, that she is far slower of understanding than man.

The man will watch the minister every minute, he will concentrate all his mind upon the preacher and what he is saying, he will watch his every gesture and every motion of his lips and listen to every word until finally he drops off to sleep simply because he has watched so steadily, gazed so intently that he has hypnotized himself.

If the woman does not grasp the meaning of the sermon so readily, if her mentality is not quite so keen and quick, one would think that she would fall asleep. But the fact remains that she has plenty to interest her. A man cannot look about the Church and be interested in John Jones's Cravat, or William Smith's vest, or Sam White's cuff buttons. He doesn't care anything about them, but a woman will sit quietly in the church, she will hear what the minister is saying without giving much thought to it, but she will be interested in everything every other woman is wearing, and there is enough to keep her just moderately entertained and wide awake—New York Sun.

HIS THREE WIVES.

A man who had been married three times used to say, even in the presence of his third wife, "I married the world, the flesh and my present wife." And he gave his experience (says Rev. E. J. Hardy, in "Still Happy though Married") as follows: "My first wife cured me of romance; my second taught me humility; and my third made me a philosopher."

FRENCH SOLDIERS DEFEAT MOORS

FOLLOWERS OF NATIVE PRETENDER IN MOROCCO SUFFER ENORMOUS LOSSES.

Fez, Morocco, May 4.—A desperate battle between the French troops and the followers of the native pretender in the Moroccan throne resulted yesterday in the defeat of the Moors, who suffered enormous losses.

The French casualties totalled nine killed and twenty-five wounded. Early in the morning the French troops, consisting of a column composed of all arms, attacked the natives in a mountain stronghold, which they carried at the point of the bayonet, in spite of a tenacious resistance by the natives. The Moorish camp was destroyed.

TWO PRISONERS RETURN TO JAIL

Made a Get-away With Two Others From the Prison at Sweetburg

GAVE THEMSELVES UP VOLUNTARILY TO THE AUTHORITIES AFTER BEING NIGHT IN THE WOODS

Sweetburg, April 4.—(Special)—Two of the four persons that escaped from the Sweetburg jail on Friday night, voluntarily returned on Saturday. They evidently were satisfied to be in the warm quarters of the jail rather than to be out in the open these cold nights.

So far the authorities have not found any trace of the other two. H. E. Frame and G. E. Warne, who made a get-away at the same time. Both men were in jail awaiting trial on a charge of theft.

Warne is below the medium height, six feet in height, of pleasant address, and has red hair.

Frame is below the medium height, talks French and English fluently; blue eyes and brown hair, and walks with a limp.

THE STRENGTH OF STEEL CARS
The report of the Committee on Car Construction, presented at the annual meeting of the Master Car Builders' Association at Atlantic City, recommends that existing steel or steel-underframe cars which have less than a certain strength must be classed with wooden cars, and be subjected to the same rules for condemnation defects.

The standard of strength should be as follows: 1 Area of centre sill should be not less than 16 square inches. 2 The ratio of stress to end strain should be not more than 0.09. 3. The length of centre or draft sill members, or parts of members between braces, to be not more than 20d, where "d" is the depth of the member, measured in the direction which buckling might take place. For new cars the area of centre sill should be not less than 24 square inches, the ratio of stress to end strain not more than 0.06, and the length of centre or draft sill members or parts of members between braces should be as stated above.—(Scientific American.)

ATTRactions FOR SHERBROOKE FAIR

Committee Has Already Booked Many of Their Acts For Fall Exhibition

NEGOTIATIONS GOING ON WITH VIEW OF SECURING AVIATOR THAT WILL LOOP THE LOOP IN MID AIR

The Attraction Committee of Canada's Great Eastern Exhibition have booked many of their acts for this year's Fair, and several entirely new acts will be seen during the Exhibition week this year. Among those already booked are the Sensational high diving act, one of the best of its kind; the Florenz Troupe of Acrobats, late of Barnum and Bailey circus; Cortrell-Powell high school circus; a horse and acrobatic act of a high order which recently appeared at the London Hippodrome; The Three Olfans, a comedy acrobatic act; Stains Comedy circus; the Four Dordens, one of the most sensational aerial troupes in the show business today; and the Leffel Comedy Trio, another comedy act.

For the evenings' attractions the Committee have secured one of Jesse Laskey's original musical acts, consisting of some 15 young people, the same that is seen on the big vaudeville circuits of the United States and Canada.

Another special turn will be two teams of dancers introducing the novelty dances of the day and demonstrating the tango as it should be danced. Johnnie Nestor, "the man who sings to beat the band" will be heard in the latest songs at each evening's performance.

The committee have also in view the securing of an airship which loops the loop and performs other sensational aerial manoeuvres. If this act can be secured it will prove to be the most exciting performance ever seen in Canada.

The securing of another up-to-date evening attraction is also engaging the attention of the Committee. Taken altogether the programme this year promises to surpass in variety seen on any vaudeville stage in Canada.

SHERBROOKE THE BEAUTIFUL

(Continued from Page 1)

think it necessary to do much for themselves. While that was a harsh criticism which he did not endorse, there was a danger of citizens thinking that way.

SHOULD BE GOOD PLACE TO LIVE IN.

The city ought to be made a splendid place to live in—first of all, healthful. The boys and girls should grow up vigorous and strong and proud of their city because it was first of all a place where they could find health. Unhealthy children did not get very much joy out of life, but here was every opportunity to develop health and strength.

Among some of the things that would develop unhealthy conditions were tenement houses, and it had proved that 35 per cent. of tuberculosis cases in the large cities originated from this cause in crowded districts where no parks or play-grounds were found.

COUNTRY CHILD LEADS.

It had been established unquestionably by statistics that in the old cities in Europe the difference between town and country bred children was 34 inches in height and ten or eleven pounds in weight in favor of the country child. The same statistics obtained in cities between well to do children and children brought up in the slums. Every child in Sherbrooke should be fully developed in physical vigor and stature, and everything possible should be done to make the city healthful for the children and their parents.

LOOK AFTER THE MORALS.

The city should be made a perfection of beauty, morally. There were dangers in the way and if some of them knew more about the undercurrent of life found in this small town they would be more anxious about the young people. A young man had offered to take the preacher on a Sunday afternoon to a place where boys and young men congregated to drink and gamble. He did not know how true that was, but he thought in a city of nearly 20,000 inhabitants it was impossible that these things should not exist. There was always a tendency on the part of some to develop that kind of thing; there were always human monsters seeking to prey upon the young life of the community, bringing nothing so much as that they themselves would profit thereby. Healthy amusements should be provided for young people; no one who was sane would keep them back from the healthy instincts of life fitting their natural development. But the amusements should be properly guarded and the best way was for the citizens to be sure that those to whom their children looked up, those who influenced them in any way, were guided to take the highest ideals of amusement.

BEAUTIFUL FROM RELIGIOUS STANDPOINT.

The city ought to be made beautiful from a religious standpoint. To do that, giving a wide interpretation to the term, it should, first of all, be given a moral form, and everything should be made beautiful according to the ideal of love manifest in service. It should be made beautiful for men to live in by attracting them by the power of brotherhood. Under this power of brotherhood men would not build houses simply for the purpose of gain, but so that men may have healthy and beautiful homes. Men would go into land deals not only for the purpose of enriching themselves, but to make it possible for men and women to have splendid areas before them so that they might, indeed, breathe freely in their surroundings and have the joy and gladness of touching nature on their own doorsteps. The industries would be run not only for the sake of dividends, but for the purpose of making men realize that life was more than one dull, hard grind throughout the year, and that there was joy in service and a holy relation between employers and employees.

The old prophets emphasized the necessity of making Jerusalem beautiful in truth, righteousness and love, in everything that belongs to the inward life of man. When men were seized with that sense of beauty and saw the joy and gladness that sprang from true brotherly relations then they would, indeed, dwell in the city of God, and this place would be called "the perfection of beauty and the joy of the whole earth."

WORK OF BOARD OF TRADE.

"The Board of Trade," concluded Mr. Read, "is co-operating with the Board of Health, and our civic administration is alive to the great possibilities of this clean-up week and of making the city what it ought to be. Men and brethren, let us thank God for the awakening of this sense of civic responsibility, and here to-day, on the first day of this week, consecrate it to this sacred purpose, this holy end, of making a clean city, and consecrate ourselves to the service of the highest and holiest. All for each, and each for all."

BROME.

On Wednesday evening, 6th May, at 8 o'clock, in the Hall, Brome, the Rev. Walter Western, a missionary from Pelly, Sask., in the Diocese of Qu'Appelle, will give an address on the work of the Church in Western Canada, which will undoubtedly prove to be very entertaining as well as profitable to those who hear. He carries with him a series of slides, and there is a good prospect of being able to secure a lantern, so that the message to the car will in all probability be enriched by the conveying to the eye of the actual conditions in which the work described is done. Admission will be free, but there will be an opportunity given to those who wish to do so, to contribute to the good work.

JOS. FRECHETTE BURNED TO DEATH

Was Trying to Rescue Hired Man From Flames at St. George de Windsor

George de Windsor

LATTER, HOWEVER, SUCCEEDED IN MAKING BRIDGE COLLAPSE. DOCTOR COLLAPSED. DOCTOR

HAD NARROW ESCAPE.

Danville, May 4.—(Special)—A very sad affair occurred at St. George de Windsor on Friday morning, in which Mr. Jos. Frechette, a very estimable resident of that place, lost his life by being burned to death. Mr. Frechette is a sash and door manufacturer and uses the lower part of his house as a mill for making of them and lives in the upper storeys. He and his family, consisting of wife and daughter and hired man, retired the night before, and about half-past two in the morning he awoke to find the building on fire. So rapidly did the flames spread that he only had time enough to save his wife and daughter. He returned to the building to rescue the man, who in the meantime had escaped by jumping from a window.

After the fire had burned itself out a portion of his remains were found among the smouldering ashes. The coroner, Dr. Bachand, was notified and after holding an investigation a verdict of death by accident was returned. Mr. Frechette was a man very well known in Danville and vicinity, and great sorrow is expressed at the lamentable manner in which he met his death.

RECOVERING FROM ACCIDENT.

Mr. John Johnson, of Thngwick, returned from the hospital in Montreal Friday where he has been several weeks. Mr. Johnson was unfortunate enough during the winter to have his foot crushed while unloading logs at the mill of the Danville Chair & Specialty Co. He was obliged to have one of his toes amputated. During his illness gangrene set in, with the result of prolonging his stay in the hospital.

OFFICERS OF TENNIS CLUB.

A meeting of those interested in the formation of the Danville Tennis Club again this summer was held in the office of H. Max Richey & Co. on Thursday evening. The meeting was well attended. The following gentlemen were elected: Hon. Pres. Mr. Alexander McLeay; Mr. W. L. Murray, Pres.; Mr. H. B. Richey, Sec.-Treas.; and Messrs. H. Gibson, A. Brown and J. B. Drope, General Committee. It was decided to put the grounds in proper condition as soon as the weather permitted. Ladies are invited to use the grounds, for which no charge would be made. The club anticipate holding matches with neighboring clubs during the season and the secretary would be glad to open correspondence with any with this end in view.

BRIDGE COLLAPSED.

The bridge known as the Gibson Bridge, near the power house, suddenly collapsed on Thursday owing to the stonework of the abutments giving way. It might have been the cause of a serious accident had it occurred in the night time. As it was, Dr. Letendre had a narrow escape. He had just crossed and had gone about one hundred feet along the road before it fell. The councilors of the Township of Shipton were notified, when proper precautions were taken to warn the traveling public of its dangerous condition. People from beyond Proulx's cheese factory will have to come to Danville by the road passing Mr. Clement Andrew's house.

INTERESTING MUSICALS.

A very interesting musicals was given by the pupils of Mrs. (Dr.) Adams at her residence on Saturday afternoon. The performance was listened to by a number of friends of the pupils and was a rare treat for those present.

The following programme was rendered: Trio, Jubelfeier (Kramer). Piano, Solo, Sonata, C Minor, 1st movement (Mozart), Ardice Adams. Mennet (Padewski), Miss Elliott. Tyrolenne (J. Rummel), Miss Ruth McCallum. Romance, four hands (Tours), Missed Richey. Solo (Mendelssohn), Ruth Murray. Barcarolle (Bellairs), Miss Margaret Richey. Solo, Andante (Heller), Myra Kearney. Forget Me Not (Meister), Leslie Porter. Romanza (Schumann), Miss Richey. Beethoven Sketch. Septette, arr. for 4 hands (Beethoven), Miss Scott and Mrs. Adams. Myrtle (Lichner), Ruth Murray. Song, selected, Miss Margaret Richey. Columbine (Gerritt Smith), Myra Kearney. Walzer (Beethoven), Miss Richey. 2nd Mazurka (Godard), Miss Elliott. Stimmungsbild (Merkel), Ardice Adams. Prelude, 4 hands (Tours), Miss Elliott and Mrs. Adams.

LOGS FOR EXPORT.

Ing Mr. Lawrence Hannan has been busy the past week getting his logs ready for shipment to Montreal for export. He has already loaded two cars, and will finish next week.

FIRST CATCH OF SEASON.
The fishing season, which opened on May 1, has got the local fishermen on the move. Mr. A. E. Stockwell opened the season with a catch of 22 nice trout.

NOTES.

Mrs. F. H. Bridgman entertained a few friends in honor of Mrs. C. F. Stockwell on Saturday afternoon. Dainty refreshments were served. Inspector Parker was in town Friday making an inspection of the Academy here. He was the guest of Rural Dean and Mrs. Murray.

Mr. and Mrs. Byron Barnard and family returned Friday after an extended stay in Florida.

Farnham, May 4.—(Special)—The Council has ordered this week commencing May 4 to be cleaning up week for Farnham.

REPAIRING FARNHAM BRIDGE.

Farnham, May 4.—(Special)—The crib work at the north end of the steel bridge which spans the Yamaska River is being repaired and the road straightened leading to the bridge. A long piece of cement sidewalk is being laid from the bridge towards the Roman Catholic Church while more cement walks and much road macadamizing is expected to be commenced at an early date.

GATHERED IN VAGRANTS AT FARNHAM.

Farnham, May 4.—(Special)—Special C.P.R. Constable Kidd gathered in two more vagrants from the C.P.R. yard on Saturday morning. They gave their names as Joseph Williams and Charlie Jones, of Detroit, Mich., aged 30 and 26 years respectively. They claimed to be tradesmen, but had no money and were locked up for the day, when High Constable Boisvert came down and took the prisoners to Sweetburg Jail. They will probably be deported.

DUNCAN McMARTIN DEAD IN TORONTO

WAS FORMERLY ONE OF THE LA ROSE, LAWSON AND OTHER COBALT PROPERTIES.

Toronto, May 4.—Duncan McMartin, director of the Hollinger Mines, formerly one of the chief owners of the LaRose, Lawson, Princess and other valuable mines at Cobalt, died at the Wellesley Hospital here on Saturday night. He was taken ill with a cold about two weeks ago.

For a week Mr. McMartin hovered between life and death, and it was his strong constitution which enabled him to fight off the end for so long. Four doctors were called in consultation, namely, Dr. Caven, Dr. McPhedran, Dr. J. E. Elliott and Dr. Anderson.

The body was taken last night to Cornwall, and the funeral service will be held at Mr. John McMartin's home there on Tuesday morning. Interment will be at Williamstown, four miles from Lancaster. The deceased leaves a widow and small family.

MILLIONAIRE SEVERAL TIMES.
It was Duncan McMartin's romantic fate, and misfortune, to be several times a millionaire in the early forties of his life, and to have his career terminated just when greater wealth and the enjoyment it afforded was in the maturing.

IRON HILL.

The Rev. Walter Western, missionary from Pelly, Sask., will give a missionary lecture on his work among the Indians, on Tuesday, May 5, at 8 o'clock, in the hall.

HAD A RIB BROKEN.
West Sutton, May 4.—(Special)—Mr. Thomas Staphenhill had one of his ribs broken by a fall he sustained while at work chopping in the woods.

BANK WILL BE OPEN DAILY.
Bury, May 4.—(Special)—The Merchants Bank of Canada will be open every day in the week instead of three days as formerly, and Mr. Howard Simons will act as manager.

CLEANING UP AT MARTINVILLE.
Martinville, May 4.—(Special)—Tuesday, May 5, has been appointed "cleaning-up day" around the church premises, also for setting out trees and otherwise beautifying the church property. It is hoped that as many as can will try to be present on Tuesday afternoon and assist in this good work.

MEGANTIC WILL HAVE MARKET.
Lake Megantic, May 4.—(Special)—The Municipal Council are to fit up the store in the Town Hall that has been occupied as a butcher's stall for some years back, to accommodate the farmers as a public market. The basement of the building is also to be fitted up to be used for the same purpose.

VICTIM OF GREAT LAKE STORM

BODY OF J. B. SMITH, WASHED FROM NOTTINGHAM LAST NOVEMBER, FOUND.

Sault, Ste. Marie, Ont., May 4.—A corpse was brought here by a gasoline launch from Goulais Bay last night which is believed to be the body of Joseph B. Smith, of the steamer Nottingham. It bears a life preserver belonging to that boat. This completes the recovery of the bodies of the three seamen who were washed overboard from the Nottingham in the great storm of November 9 last.

MANSONVILLE.
Mr. I. S. Coffin home from Lake Megantic on sick leave.

Mr. Western, a missionary from Pelly, Sask., gave an interesting account of his work there on Thursday last in the Parish Hall.

The inmates of the Anglican Parsonage were somewhat nonplussed last week owing to the sudden termination of the water supply. The local plumber was sought for and on manipulating the valve in the cellar, water flowed forth, bringing with it the remains of a fish of some considerable size, which met its death evidently in the effort to get back again after losing its way.

LOG DRIVERS WAIT FOR RAIN.
Lake Megantic, May 4.—(Special)—The different drives are getting along very slowly. The recent cold nights and winds are shutting down on the supply of water, so that much progress will not be made until there is rain. The water in Lake Megantic has not risen any during the past week.
