* **TORONTO**—The "Queen City of the West," and capital of the Province, is situated on the north-west shore of Lake Ontario, county of York. The city faces a spacious bay. From a distance it presents no striking aspect, owing to its site being rather flat, but on nearing it, especially from the lake, it gradually unfolds itself. Magnificent buildings come into view, topped by the domes and spires of the churches and public buildings, giving it an imposing and picturesque appearance. The city, which was originally called York and founded in 1784, is laid out with singular regularity, in the form of a parallelogram, the streets intersecting each other at right angles. King and Yonge are the two principal streets: the former—the great thoroughfare and promenade—with its broad sidewalks and handsome well-filled shops, runs parallel with the bay; the latter, intersecting it, runs northward through a rich and prosperous agricultural country, forming a sort of irregular village of upwards of thirty miles in length. The Esplanade facing the bay, with its lines of quays and parallel lines of railway, presents at all times an animated scene. Toronto has many industrial establishments, including foundries, mills, tanneries, breweries, distilleries, and a great variety of other factories, all thriving and prosperous. The public buildings of the city are numerous, and many of them extremely handsome, such for instance as St James' and St Michael's Cathedrals, the General Hospital, Exhibition buildings, Lunatic asylum, City hall, Trinity college, St Lawrence market, Music hall, Rossin and Queen's hotels, Post office, Banks, Masonic hall, Normal, Model, Parochial and other schools, Convents, Churches, Girls' home, Gaol, &c. Osgoode hall, the seat of the Superior Courts of Law and Equity for the Province, situated on Queen street, and the University of Toronto and University college, standing retired amid the sequestered shades of University Park, are noble edifices. A magnetical observatory established by the Imperial Government in 1840, is attached to the University. Its position is lat 43° 39' 4" N., long 79° 21' 5" W., or 5h. 17m. 26s. slow of Greenwich time. The University Park, with its beautiful monument to the

volunteers who fell at Ridgeway, and its avenues to Queen and Yonge streets, as also the Horticultural gardens, tastefully laid out and planted, are places where all may freely go for tranquil walks and healthful recreation. The Lieutenant Governor's residence on King street and the Parliament buildings on Front street are commodious and suitable structures. Toronto has a good harbor, easy of access to the largest craft that navigate our inland waters, and perfectly sheltered by a long narrow island which faces it and keeps out the lake. During the season of navigation steamers ply daily between Toronto and Montreal and all important places on the lakes. Three lines of railway run through the city—the Grand Trunk, Great Western and Northern, to be shortly augmented by two others now under contract and in course of construction, the Toronto, Grey and Bruce, and the Toronto and Nipissing railways. The head offices of the last three companies are located here. The construction of these railways, opening up as they will some of the richest districts in the west, will add much to the future prosperity and importance of Toronto. The city returns two members to the House of Commons and two to the Provincial Parliament. Distant from Hamilton 45 miles, from Niagara Falls 50 miles, from Collingwood 94 miles, from London 114 miles, from Kingston, 165 miles, from Ottawa 236 miles, from Montreal 333 miles, from Quebec 513 miles, from New York 500 miles, from Boston 593 miles, from Liverpool 3,953 miles. Value of assessed property in 1870, about \$27,000,000. Mail daily. Population about 60,000.

GRAMMAR SCHOOLS OF ONTARIO.

In cities the trustees are all appointed by the city council, except where there is only one school in the county. The head master must be a graduate of a British or Colonial University, unless certificated and appointed by the 18th September, 1865. Besides fees, local rates or contributions to the extent of half the Government grant must be raised for the master's salary. The grant is payable to those schools only which attain a certain standard, and is based on the average attendance of pupils in the prescribed studies. An extra grant is provided for masters taking certain meteorological observations, and giving preparatory scientific military instruction. Pupils attending these schools are prepared for matriculation in the Universities.
