QUEBEC, TUESDAY, NOV. 29, 1881.

THE "ALLAN LINE" IN PORTLAND, MAINE.

On referring to our despatches from Boston this morning, our readers will note an important item of shipping intelligence. The ALLAN LINE, of Portland, Maine, a strong move in favor of Portland, Maine, as their winter port of the Dominion, instead of embracing the facilities offered them by Boston. We presume the Grand Trunk Railway's new departure, in the Forest City, noticed in our paper the other day, has been the means of inducing the Great Canadian Steamship-owning Line, to go in heavily for Portland, which, in other ways also, offers handsome encouragement from Boston. Of course, the whole arrangement is to be a purely business basis and the ALLAN LINE have the right to take their business to the port which pays them the best, but we thought Halifax stood some chance, after what we read in the newspapers of last fall, of being the real winter port of Canada, for the ocean trade. Perhaps, Halifax is too far away.

PARTIES AND CLUBS.

Up in Ontario they talk about forming a third party, something more advanced than the Conservatives, and more radical than the Liberals. It is to be composed of young men and they are to have the work of governing this country, in the future. The plans are very generous in principle, but with the fate of the "Canada First" before our eyes, we see no hope for the success of the new idea. The "Canada First" party began well. They had in its ranks such men as GOLDWIN SMITH, EDWARD BLAKE, W. H. HOWLAND, Mr. FOSTER and hundreds of others—all of them first-class in the way of ability and culture, and oratory and literature. They had their organ too, and it was a readable and excellent paper. They formed sister societies all over the country, the time was ripe for the body, and they got a start which no third party will ever get again. At a decisive moment the back-bone of Mr. BLAKE failed him, and down went The Nation and the whole fabric of the new party. The idea has never come up again. We have no room for three parties in our little country, and the new political organization will be dead and buried inside of two years. There are no men connected with it, that we can see, though there will be plenty of barnacles ready to "hitch on," we may be sure.

Speaking of parties, what do the politicians think of the hundred and one little cliques which parade themselves in the cities and towns as powerful clubs? Do they not do more harm than good to a cause? As a rule, men of principle, men of brains and human activity despise these self-appointed parliamentarians and their small tactics. They will not be cajoled or dragged by a club of office-seekers, no matter how historic or high-sounding its name may be. They refuse dictation from such a source, and they are right in maintaining perfect independence of any such organization of rascals.

MR. SENECA.

And now we observe in the newspapers that an effort is being made to divert the SENECA question into a side issue and to change its whole complexion. The motive which prompts such a change of basis clearly seen through, and it will not affect public opinion much, except perhaps in remote districts where gross ignorance prevails, and phobias of all kinds reign. Still we may draw the attention of sensible readers to the true inwardness of the little game sought to be introduced into the question. Our esteemed contemporaries, who differ from us on almost every topic, and whose sense of honour is so small that no one can see it, have discovered that our opposition to Mr. SENECA is a mere question of race. They import the Franco-Quebec element into the case, and cry out with harmonious unanimity that the CHRONICLE opposes the General Superintendent simply because he is a Frenchman! Mr. BURNARD never arrived at a sager conclusion, and it is worth a note by itself. If this view is correctly stated, if Mr. SENECA only holds his office by virtue of his nationality, irrespective of his fitness or unfitness for the post, then all discussion ends, and he can go on holding the position for life, with a codicil in his will, leaving the office and all its emoluments to his heirs and assigns. Need we assure our readers that our criticism of Mr. SENECA and his man, agreement has been made on higher grounds than the nationality craze, that baggage of enmities into all the petty politics of emulated wire-pullers. What differences does it make to us whether Mr. SENECA is a Frenchman or a Hottentot, so long as he is honest and acts honestly in the discharge of his duties. It is his character, not his nationality which we have been discussing. It is in the former and not especially in the latter, that the people of Quebec Province are interested. Why do Mr. SENECA's friends try to shirk the main question, and endeavour to veil the whole argument by raising up a flimsy pretext or side issue to divert public notice from the real object of attack. Let Mr. SENECA stand or fall on his own merits. His race is not called into question by us or by anybody else. We have no objection to an honest Frenchman as manager of our leading asset, but we certainly have a decided objection to trust Mr. SENECA with \$13,000,000 of the people's money. We have repeatedly pointed out to the Government that in retaining his services in his present capacity, they were jeopardizing their own interests, and we adhere still to that impression. They will find our words true, ere long, for depend upon it a day of reckoning is near at hand, and it will make its influence felt in every quarter of the Province.

Of course, the English are in a minority in this Province. It is their weak point as well as their strong point. They are powerful if they but once used their power, but the spirit of moderation has rightly, we say in all sincerity, governed their actions and thoughts.

Coming back to Mr. SENECA, isn't it rather odd that he has no defenders in

the English Conservative press? We have carefully examined the files of Canadian newspapers for some time back, and with the exception of the Montreal Gazette, not a single English Conservative journal has said a word in behalf of the General Superintendent. Even the Gazette's washing is laborious and painful, and written with no heart for the work. Not a word for the poor gentleman in the Toronto Mail, in the Hamilton Spectator, the London Free Press, the Halifax Herald, the St. John Sun, or the Moncton Times. The St. John News (Sir LEONARD TILLEY's organ) indeed says, Mr. SENECA must do harm to Mr. CHAPLEAU's Government, and Sir CHARLES TUPPER's organ, the Halifax Herald, thinks Mr. SENECA will do sorry he brought action against the Quebec CHRONICLE before he is done with his suit. "Call you this backing of your friends?"

FINANCIAL.

The prospectus of the Canadian Pacific Railway Company's first mortgage land bonds appears in our advertising columns this morning. The Montreal Herald of Saturday, in reference to it, says:—The total amount authorized by Parliament is \$25,000,000; of this \$5,000,000 are held by the Federal Government as security for the completion of the contract, and of the remaining \$20,000,000, \$10,000,000 are offered to the public at par. The prospectus very clearly sets forth the conditions of the sale of the bonds which are at the minimum in the market of the day. The bonds are of the denomination of \$1,000 each, and the principal payable in gold on the 1st October, 1931, and the interest at points convenient to the investors, also in gold, at Montreal, New York and London, England, at 4 1/2 per cent. sterling per dollar. Though the payment of the principal extends to 1931, the bonds may be tendered in payment of lands, or they may be redeemed by the trustees of the proceeds of sales of lands, by purchase at the current market price, or drawings at a premium of 10 per cent. These bonds are secured by a mortgage deed of the lands, which are the property of the company, who are Charles F. Smithers, President of the Bank of Montreal; Hon. John Hamilton, President of the Merchants' Bank of Canada; and Samuel Thorne, President of the Bank of Montreal. The prospectus also sets forth the powers for enforcing payment of the bonds, principal and interest, for securing to the bondholders the net proceeds of the lands. The prospectus also sets forth that the bonds will be taken by the company in payment of lands and accrued interest, and among the clauses which govern the issue the mortgage deed obliges the company to pay to the holders of the bonds semi-annually, and the principal at maturity. The net proceeds of all lands sold must be handed over to the trustees, to be held by them to secure the company's obligation to pay the interest, and so long as that obligation is punctually performed, to be applied to the purchase of bonds for cancellation, provided the price does not exceed 110 per cent. and accrued interest; but if the bonds cannot be bought at or under that price, then the Trustees are authorized and required to designate by lot, from time to time, as funds become available in their hands, the bonds that shall be presented for payment and cancellation at 10 per cent. premium and accrued interest. An official memorandum has been issued by the company, which, considering the character and standing of the Directors, should be accepted with perfect confidence. The prospectus, over his own signature, on behalf of the company, states that they are aiming at having the line to the Pacific completed and open for traffic, without availing themselves of their right under the Charter to suspend the work on the road; and that they fully expect that all the additional capital required to complete the contract, and equip the line, can be obtained by the issue of common and preferred stock. In that case, the only fixed charge on the revenues of the company will be the interest on these land grant bonds taking precedence of any dividend on both common and preferred stock.

PERSONALS, Etc.

Burnard, the editor of Punch, has a pleasant, handsome face. Though grey and bearded he is comparatively young. He has fourteen children. He was converted to the Catholic Church while at Cambridge, and after reading a course of theology, was tonsured and took Minor Orders with a view to the priesthood. Finding he had no vocation for that life, he took to humorous writing as a profession. He still, however, keeps himself au courant with the theological questions of the day.

A correspondent of the Richmond Dispatch

says that on his recent visit to Hollywood Cemetery his attention was attracted by an American flag planted over a grave. Attached to this flag was a paper with the following written upon it:—"The grave of John Tyler, once commander of the American Army and Navy and the tenth President of the United States. It is fitting that during these centennial festivities the American flag should wave above his grave, so that strangers visiting this beautiful cemetery may know who it is that sleeps beneath."

The death is announced, at the patriarchal age of 82, of Dr. Treaham Dames

Gregg, of Dublin. He was a commanding figure, well known in certain circles in London. He was rector of St. Nicholas Within, Dublin, but the office was purely a sinecure, for there was no church or parishioners. One great peculiarity about him was his belief that he would live for ever in this world, or at any rate as long as the world lasted, free from sin and suffering; and, following up this belief, he seriously proposed to the late Archbishop of Canterbury, to meet him at the Vatican, where he was a noted controversialist on religious dogmas. His most famous antagonist was the celebrated Rev. Thomas—of as he was more familiarly known, "Father Tom"—Maguire, after the latter's celebrated encounter with the Rev. Mr. Pope—a somewhat anomalous name for a clergyman of the Church of England—and which O'Connell was one of the three arbiters. Doctor Gregg's death almost simultaneously with that of Doctor Maguire is somewhat remarkable, as it is very unlikely that such an aggressive spirit as was the former did not, perhaps frequently, cross swords with the latter Archbishop.

In Arthur Adamovitch Nepokitchky, the

Russian army has lost one of its most distinguished officers. He was born in 1813 and educated at the Corps des Pages and the Military Academy, of which he was considered the best pupil. In 1839 the young officer was sent to the Caucasus, where he served under Count Grabbe for seven years, winning the epaulettes of a colonel, and especially distinguishing himself as the leader of one of the columns directed against Sharnyl. When, on the outbreak of the Hungarian revolution, the Emperor Nicholas, in obedience to his oath to Francis Joseph's father, marched an army into Austria's territory to restore order, Nepokitchky was made chief of staff to General Luder, in command of the corps occupying Little Wallachia. From this campaign he returned Major-General. In the Crimean war he acted as chief of staff to Prince Gortschakoff on the Danube, directing the operations upon that river and before Silistria. On the outbreak of the Turkish war, in 1877, General Nepokitchky was appointed chief of staff to the Grand Duke Nicholas, commanding the army of the South, a position which he held for several months, until Tolstoy was summoned to direct the investment of Plevna.

Holloway's Pills—Teachings of Experience.

The united testimony of thousands, extending over more than forty years, most strongly recommends these Pills as the best purifiers, the mild aperients, and the safest restoratives. They move the bowels delicately, and gently remove the bile, and so eradicate those impurities which are the source and constituent of almost every disease. Their medicinal efficacy is wonderful in removing enfeebled constitutions. Their action embraces all that is desirable in a household medicine. They ease every nervous and effete matter, and thus the strength is nurtured and the energies stimulated.

A Tonic Without Alcohol.

Dyspeptics and those suffering from chronic diseases should read the following from Rev. John Gregory, pastor of the Wesleyan Methodist Church, at Pittston, Pa.
 "My Dear Sir—Having at various times personally, and in my own and other families, tested of the great value of the medicine called PLEASANT STOMACH or Protected Solution of Protocatechu of Iron, I most cheerfully recommend it, especially to those who are suffering from dyspeptic and nervous disorders. As a reliable and powerful alternative, it is a most valuable remedy. As a tonic, free from all the objectionable features of alcoholic remedies, it is a most effective substitute for those dangerous remedies. This testimony is given unsolicited, with the hope that some who are not yet acquainted with the valuable properties of the medicine may be induced to give it a trial.
 Sold by all druggists.

PRATT'S ASTRAL OIL!

THE GENERAL INTRODUCTION OF A

Superior Illuminating Oil has long been needed in Canada. The above Oil has a world-wide reputation as the only perfectly safe illuminating oil coming within the means of all and adapted to the use of the common Coal Oil lamp and burner.
 While its essential feature is Absolute Safety it gives a soft, clear, beautiful light far superior to gas. It is free from disagreeable odor, and when care is given to the selection of lamps and burners it furnishes the perfection of artificial light.
 The ASTRAL is the leading Family Oil in America and is more extensively used than all others combined. During the past twelve years it has invariably taken the premium at all the numerous county, state and world's fairs where it has been exhibited.
CHARLES PRATT & CO., New York, Sole Proprietors and Manufacturers, **PEVERELL & CO.,** General Agents, Quebec, November 28, 1881.

DOMINION OF CANADA.

CANADIAN PACIFIC RAILWAY CO'Y.
 Incorporated by Letters Patent Under the Great Seal of the Dominion of Canada.
FIVE PER CENT. FIRST MORTGAGE LAND GRANT FIFTY YEAR GOLD BONDS.
 Total Authorized Issue, \$25,000,000
 Accepted by the Government of Canada as Security for the Completion of the Contract between the Government and the Company, \$ 5,000,000
 Now Offered to the Public, \$ 10,000,000

Principal and Interest payable in gold coin of the present standard weight and fineness—

the Principal in Montreal, Canada, and the Interest on 1st April and 1st October, at the option of the holder, either in Montreal or New York; or in London, England, at the rate of 4 1/4 per cent. sterling for each dollar.
 Bonds in denominations of \$1,000 and \$500 each. Principal payable 1st October, 1931, unless previously tendered in payment of lands and thereby cancelled; or redeemed by the Trustees out of proceeds of sale of land, either by purchase at the current market price, or by drawings at ten per cent. premium.
 The Bonds will be accepted by the Company in payment for lands at 110 and accrued interest.

TRUSTEES FOR THE BONDHOLDERS:

CHAS. F. SMITHERS, Esq., President of the Bank of Montreal.
HON. JOHN HAMILTON, President of the Merchants' Bank of Canada.
SAMUEL THORNE, Esq., Merchant, of New York.

The Bonds are secured by a Mortgage Deed of Trust to the said Trustees, which confers

upon them, under the express authority of the Dominion of Canada, ample powers for enforcing payment of the Bonds, Principal and Interest, and effective means for securing to the Bondholders the entire net proceeds of the lands. Before its execution the Deed was submitted to the Government, which has since accepted the \$5,000,000 secured bond by it as security for the completion of the contract in accordance with the provisions of the Charter.
 The Mortgage, thus created, constitutes a first charge upon the entire Land Grant of the Company, amounting to 25,000,000 acres of the finest farming lands situated in what is known as the "Fertile Belt" of the Canadian North-West, which is now admitted to be the largest tract of uniformly rich land suitable for growing the best quality of wheat, etc., to be found on the continent of America, and which may locate its entire Land Grant exclusively in this tract, rejecting all sections unsuitable for settlement.
 By the Mortgage Deed the Company expressly undertakes to pay the interest on the Bonds semi-annually, when it becomes due, and the principal at maturity. The net proceeds of all Land Sales must be handed over to the Trustees, to be held by them, in the first place to secure the performance of the Company's obligation to pay the interest on the bonds, and so long as that obligation is punctually performed, to be applied to the purchase of bonds for cancellation, but if the price does not exceed 110 per cent. and accrued interest, then the Trustees are authorized and required to designate by lot, from time to time, as funds become available in their hands, the bonds that shall be presented for payment and cancellation at 110 per cent. and accrued interest.
 The Contract provides that the whole issue of Land Grant Bonds shall, in the first instance, be deposited with the Government, and that the proceeds of all sales thereof shall also be deposited with the Government, and only be paid to the Company as construction proceeds. The interest, at four per cent. per annum, upon the amount remaining in the hands of the Government is, by the Deed of Trust, expressly pledged for the payment of the interest on the Bonds, and cannot be applied to any other purpose.
 It will be seen by reference to the accompanying official statement, made by the President of the Company, that the Directors are aiming to have the line of Railway to the Pacific Ocean completed and open for traffic without availing themselves of their right under the Charter to suspend the work on the road; and that they fully expect that all the additional capital required to complete the contract, and equip the line, can be obtained by the issue of Common and Preferred Stock. In that case, the only fixed charge on the revenues of the Company will be the interest on these Land Grant Bonds, taking precedence of any dividend on both Common and Preferred Stock.

These Bonds will be taken by the Receiver-General on deposit from insurance companies

under the Act 40 Vic., cap. 42.
 Provision is made for the registration of the Bonds at Montreal, New York and London.
 Copies of the Act of Incorporation of the Company may be inspected, and copies of the Mortgage Deed of Trust, The President's Statement, and the Prospectus may be obtained at the offices of any of the undersigned.
 These Bonds are now offered to the public by the undersigned at par and accrued interest, the right being reserved to advance the price at any time without notice.
 Applications for the Bonds may be addressed to
