Big Silk Seizure Made

\$2,000 Worth Seized in Dundee on Saturday

Probably the present is without precedent in the size of the smuggling operations that are attempted, and the customs officers are worked to the limit in trying to see that the law is obeyed. On Saturday Mr. C. M. Oney, accompanied by members of his staff closed down on Edmund Brooks of Dundee and brushed just as he was about to turn into his gate and seized his car and its cargo on a charge of smuggling. The car was a Chevrolet and was loaded with several bales of silk, conservatively estimated at \$2,000 worth. To make a better morning's results the officers added a Buick six passenger to their bag, it being at the same spot and not having reported to customs. The owner is supposed to be David Thomas of Albany.

The seizure of this silk marks the success of efforts that have covered a considerable period of time. It had become known in Montreal that certain people were selling silk at less than wholesale prices in Canada, so the supposition was that it was coming from the States. Allegations of a big silk smuggling ring were made, and the officers determined to run down the case. Mr. Oney was instructed to investigate along this part of the border and some days previous to the events of Saturday learned that large shipments had been received in Bangor. As soon as the bales were claimed from the express company the car was trailed and when well over the Canadian line the matter was closed by the officers surrounding the car.

Brooks was accompanied by another man who had left the car before the officers caught up, and a search was made all week in the hope of locating him. Yesterday he was caught and appeared before the Justices of Peace last night. He pled not guilty and is now out on \$200 bail. He is to appear for trial Saturday morning in Huntingdon. The man's name is Isaac Garshzon.

COVEY HILL

Mr. Tay Edwards who measures the rain fall, reports five inches fell between Friday night and Sunday night.

Karl Semple of Mooers' Farms had the misfortune to lose a good horse on Monday. In Alfred Brislin's pasture it was kicked by a horse of Mr. Brislin's and its leg broken.

Mr. and Mrs. Wm. Horne, Mr. and Mrs. Scott Simpson visited Mr. Simpson's mother at Champlain last Sunday.

Mr. Emmet Morris of Sarnia, Ont., was a guest on Monday of Mr. Jas. Barr.

Mr. and Mrs. Harry Edwards and daughter Kathleen of Vergennes, Vermont, are guests of G. B. Edwards and the Misses Edwards, "Keithburn."

Mrs. Thos. Boyce, Hemmingford who has been the guest of her sister, Mrs. Robert Brooks, Franklin Centre for some time is now visiting her brother, James Ferns and family, Hemmingford.

Mr. Andrew Philips, M. L. A. called on G. B. Edwards Tuesday.

ROCKBURN

A bee was held on Monday afternoon to clean up the Rennie Cemetery after which an informal meeting of those present considered the offer of Mr. Andrew Oliver of Buffalo, to donate \$500 towards a fund for creating a revenue for the maintenance of the cemetery, provided that another \$500 should be raised for the same purpose. It was decided to hold a public meeting in the near future when it is expected an organization will be formed to take definite action.

DEWITTVILLE

Mrs. Herbert Ferns and daughter Vera left Saturday evening for New York where they intend joining Mr. Ferns at the city home of Mr. Planche.

CHATEAUGUAY

The Chateauguay paddlers held a special meeting on Saturday, and at that meeting it was decided to carry on paddling this year although it was thought at first that they would drop paddling for this year. Therefore the first workout will be held this evening at the Chateauguay Club, when it is expected that there will be a large turnout of local men. After the workout there will be a meeting held at which they will decide their activities for the coming season.

The Ormstown Show

BIG DISPLAY OF STOCK Many Race Horses

The Ormstown show is under way, favored with the largest entry list in its history and marred by unfavorable weather. The list in the Secretary's office shows that there are 2002 entries this year, which is about 400 more than last year and a glance about the grounds fully proves the fact. The cattle barns are crowded, so that even temporary shelter has not been sufficient for all and they are tied to the fences. In the sheep pens the same is the rule, some pens having been built alongside the race track. As this display is all of the best it would stand unrivaled in the history of the show or of this part of the province. Unfortunately the weather did not act the proper part and considerable discouragement naturally resulted. The rain was unfair about it on Wednesday. A short two miles out of Ormstown at noon no reports of rain in any direction were made, yet within the grounds the clouds opened between eleven and twelve and made a mass of mud and mire. In consequence those with stock have had a most difficult time keeping their purebreds dry and in show ring state of cleanliness, while spectators have had to confine themselves to visiting the horses in the main building and in watching the judging. Never did the arena show its advantages better than Wednesday morning when it was possible to inspect the stock in comfort once they were in the big rings.

The show opened on Tuesday night by Mr. McClintock and President Sangster marching around the ring with the Scotch piper giving proper swing to the occasion. Behind them marched the Orchestra and with a sign from Mr. Sangster the 13th annual show was on. The crowd on Tuesday night is not generally a large one, altho the classes merit a bumper house, and this year's attendance set no new precedent.

The entries are well distributed among the various classes of stock and represent the best of each. In the poultry the largest increase over last year's showing is made when about 300 more are reported. The entry list shows:

Horses	400
Cattle	661
Sheep	235
Swine	140
Poultry	626
Total	2062

The only drop in numbers is among the horses where a loss of 20 is reported. Last year there were 420 entries.

The show is rapidly changing and enlarging. A few years ago there were few booths of any description. This year a fair start towards a big midway is made.

Racing

The racing card for the day had to be postponed and the weather this morning put an end to the hopes for today. The track is hard, in fact last night automobiles barely made marks in it as they crossed to park in the centre of the course. The water is also draining off cleanly and with over fifty horses available efforts are being made to give them a good chance, if the weather will only clear up for a while. To-morrow the card will start at one o'clock. To-morrow the plan last night was to run a four card event: 2:20 trot and pace, 2:24 trot. Free for all and a farmers' race.

Special Lighting

Rumour went around during the beginning of the week that the power plant was giving trouble, but all danger of a failure in the Arena has passed, for Mr. Walsh has rushed a special plant from Montreal and has it erected on the grounds, and current is being generated there, which makes the show independent of any trouble which may arise at the dam. There is still uncertainty as to what exactly happened at the wheel in the dam. The current went down suddenly, then came up and later went off. A diver was brought from Valleyfield and he went down to investigate, but when he came up said he couldn't find anything wrong. The supposition was that a piece of wood had gotten into the wheel, so it was raised and a chance to wash out the trouble was given. Those near could hear something grinding for about ten minutes and then the wheel appeared to run freely. It is thought that a piece of board had worked loose and that the

spikes in it had caught in the wheel. Needless to say Mr. Walsh's installment of a second plant in the Arena is a great relief to the directors and the light last night gave satisfaction to all.

The Evening

Last night the weather continued bad, but in spite of all there was a big turnout—it wasn't a record breaker but was sufficiently large to catch up on some of the day's losses so that the show opens the gates this morning about \$1,000 behind last year's receipts. While it was disagreeable for those who were driving cars, owing to the wet ground and slippery mud, once inside the building it was quite comfortable, and the judging of the classes could be watched with far more comfort than if the weather had been hot. The mud made it quite troublesome for the exhibitors, who had to go out in the rain for their carriages and wagons. It also caused the committee to cancel the big cattle parade which is a feature of the evening show.

The judging got away on time and with the first two or three classes light, a close running to schedule was possible. Later on when the classes were unusually large, such as in the Lady drivers, roadsters and carriage pairs, it took the Judge longer and he had to take advantage of the time gained earlier in the evening.

A contrast of yesterday and today was staged early. Class 62 being for a pair of heavy draft mares brought three fine teams of heavy horses into the ring. The Judge had just finished placing them when in strolled a pair of oxen. They were massive animals, the fat hanging all over. Slowly they lumbered around the ring and then went out. They are owned by Mr. Harvey of Freighsburg. As the oxen and the heavy horses pulled out in drove the next and most serious class of all, for the drivers at any rate. It was the Shetland pony class and the boys had their eyes out for the Judge and put their ponies through their best paces. From then on the classes followed quickly, large displays facing the Judge in every one. The evening performance ended with the high jumping class, Miss Viau of Montreal winning with a jump of five feet.

Cattle

No one can gainsay the fact the display of Ayrshires and Holsteins is a record breaker. The Holsteins are especially strong and the classes are remarkably hard to place. Class after class in both breeds were filled with from a dozen to twenty entries and competent observers could find little difference among the first seven or eight. In fact all were fit to head the class at any show, which about marks the Ormstown fair as the blue ribbon classic of the east. The prizes are not going to any particular herd, being well divided, again proving that the uniform quality of the crack breeders herds. If mention may be made of two breeders in the Ayrshires who are holding many ribbons Gilbert McMillan and R. R. Ness are the ones.

The Holstein classes are just as well divided with little to pick among the breeders so far. In the aged bull class last year's winner Mr. Harvey had to step down in favor of a wonderful bull belonging Dr. Clark of Brockville.

RETAIN OLD RELIGIOUS RITE

Quapaw Indians Stick to Form of Worship of Which Feast Forms an Important Part.

In the vicinity of Devil's Hollow, several miles east of Quapaw, Okla., there is a wigwam-shaped church building located miles from any white man's habitation, and a long distance from the nearest Indian domicile, where the Quapaw full-blooded Indians congregate regularly to worship the Great Spirit in silence. They sit about a tiny fire that has been built on a stone base in the middle of the dirt floor, from Saturday night at sundown till Sunday noon, fasting and praying, but never speaking a word.

A feature of their church meetings is the feast that follows the fast and religious rites. The meal is served in a little mess house nearby, and when the services are over the squaws, who have slipped out a few hours before the time to close, are ready with the dinner and all sit down to partake of the food that is always a part of the program.

The church was built many years ago, so that the residents might have a place to worship, a custom still kept up, regardless of the fact that there is no preacher, no choir, nothing to call them but the religious spirit of the Indian. Chief Quapaw owns nearly 1,000 acres of land in this region, but when he was offered \$20,000 for a few acres of it that lay in the city of Quapaw, which was named after him, he refused because, he said, he knew the white man would try to get the money, but could not get the land away from him.

Huntingdon Academy

Again the scholars in the Academy make a good showing. Not only were good marks taken by the leaders, but uniformity resulted throughout.

The list of successful pupils of Grades I to VII inclusive is as follows:

GRADE I. Possible Marks 500

1. Isabel McEwen 478
2. Isabel Shearer 465
3. Lloyd Wilson 430
4. Roy Small 424
5. Frances Gardner 408
6. Edna Elliot 393
7. Finlayson Ross 386
8. Gladys Lewin 383
9. Foster Gardner 376
10. Viola Clark 356
11. Reggie Daniels 348
12. Forbes McGill 331
13. Herman Galipeau 291

GRADE II. Possible Marks 900

1. Elizabeth Bruce 896
2. Douglas Hayter 852
3. James McCoy 845
4. Janet Cunningham 836
5. Merle Clark 820
6. Tilly Levinson 809½
7. Billie Stephen 750
8. Gertrude Maxwell 743
9. Kenneth McNair 742
10. Norman Smith 705
11. Alice Levine 704
12. Nellie MacFarlane 671
13. Fanny Monette 416

GRADE III. Maximum 900

1. Hessie Hamilton 806
- Meriam Levine 806
3. Allison Cunningham 796
4. Cecil Tedstone 779
5. Tom Vine 773
6. Gladys McLean 751
7. Bruce Cleland 738
8. Douglas Fortune 730
9. Robert Walker 729
10. Jean Stephen 725
11. John Brown 708
12. Robina Gardner 689
13. Viola White 639
14. Clarence Wilson 632
15. Jack Elliott 628
16. Florence Helm 597
17. Ernest Tryon 524

GRADE IV. Maximum 1000

1. Stanton Small 979
2. Ronald Bruce 973
3. Ruth McEwen 973
4. Clarence McCoy 966
5. Allan Bigger 917
6. Eddie Cappiello 880
7. Pearl McClatchie 858
8. Muriel Ruddock 849
9. Allan Hunter 827
10. Joan Ruddock 814
11. Edna McDowell 776
12. James McFarlane 737
13. James O'Hare 737
14. Rose Maxwell 736
15. Sydney Barrington 728
16. Purcell Fortune 714
17. James Barrington 712
18. Nelson Antoine 703
19. Paul Rolland 658
20. Olive Hurdis 596

GRADE V. Possible 1000

1. Wilbur Wilson 856
2. Keith Wells 765
3. Bertha McLean 721
4. Maitland McCracken 709
5. Grace Warden 702
6. Alice Brown 691
7. Reginald Cooper 657
8. Willard Allen 655

GRADE VI. Possible 1200

1. Jessie Goodfellow 1059
2. Grace Lumsden 978
3. Elizabeth Brown 929
4. George Maxwell 927
5. Donald Maxwell 926
6. Annie Smith 874
7. Bertha Goodfellow 842
8. Ivor Daniels 825
9. Maude Bicknell 823
10. Ralph Goodfellow 727

GRADE VII. Possible 1000

1. Eileen Walker 972
2. Gerald Hunter 971
3. Marjorie McEwen 941
4. Charles Reid 886
5. Margaret Dunca 882
6. Doris Allen 813
7. Earl Tedstone 782
8. Bessie Seward 759
9. Margaret Ross 759
10. Nelson White 756
11. Robert Maxwell 754
12. Almata Oney 749
13. Ethel Coulter 748
14. Thomas Barrington 729
15. Daniel Murphy 721
16. Annie Levine 710
17. Leo Cappiello 683
18. Norma Lunan 682
19. Cecil Brown 672
20. Morris Hunter 691

ENTRANCE PUPILS. Possible 1000

1. Florence Farquhar 846
2. Helen Elder 746
3. Warren Dalgleish 729
4. Watson Tannahill 704
5. Nichol Stark 682
6. Hope Stewart 620
7. Patrick Walsh 492

Florence Farquhar wins Mr. M. Robb's Prize.

Ormstown Academy

Again the youngsters know their fate and the parents know by the results that the teachers have worked faithfully. The standing in the lower grades are:

Grade II. Possible Marks 600

1. Ruby Tate 550
2. Georgina Small 535
3. Alice Middleton 534
4. Robert Todd 532

Grade III. Possible Marks 700

1. Marjorie McClintock 672
2. Dolce Baird 670
3. Linda McCaig 665
4. Lenore Scott 659
5. Violet McWhinnie 658
6. Ivan Barrington 657
7. Eileen Watson 656
8. Jean McBain 640
9. Mervyn McCartney 640
10. Maitland Patton 628
11. Victor Lang 628
12. Melva Campbell 626
13. John Conley 622
14. Thomas Brooks 599
15. Allan Lucas 598
16. Charlie Klain 583

Grade IV. Possible Marks 800

1. Mary Tate 768
2. Lorna Middleton 760
3. Thomas Baird 728
4. Burry McGerrigle 747
5. Lila Winter 741
6. Robert Clark 725
7. Clarence Baird 702
8. Donald Lang 669

Grade V. Possible Marks 1000

1. Allan Gruer 885
2. Dorothy Alexander 841
3. Mary Klain 833
4. Dorothy Cullen 828
5. Josephine Gruer 808
6. Arthur Furey 791
7. Wendell Roberts 764
8. Willie Todd 750
9. Louella Roy 718
10. Isabel Todd 717
11. Ralph Watson 652
12. Annie Williams 650
13. Armand Borloz 640

Grade VI. Possible Marks 1300

1. Wilma Roy 1144
2. Flora Watson 1102
3. Kenneth Finlayson 1064
4. Elma Campbell 1026
5. Louva Bustard 1014
6. Donald McCaig 1003
7. Jean Greig 894
8. Archie Finlayson 875
9. Merle Alexander 853
10. Anna Struthers 910
11. Beryl McCaig 867
12. George Conley 816
13. Beatrice McAdam 752
14. Robert Cullen 728
15. Melvin Todd 582

Grade VII. Possible Marks 1000

1. Christina Drysdale 879
2. Isabel Elder 875
3. Alice Anderson 872
4. Inez Patton 857
5. Eileen Middleton 813
6. Isabel Drysdale 809
7. Isabel Ross 800
8. Marjorie Payne 791
9. Bessie Cullen 790
10. Mary McGerrigle 777
11. Douglas Cooper 776
12. Audrey Logan 737
13. Wesley Roy 725
14. Jennie Cullen 723
15. Jean Cullen 687
16. Walter Roy 686
17. Edward Baird 583
18. Arnold Bryson 590
19. Donald Craig 552
20. Lawrence Tannahill 393
21. Bessie Oliver (absent 2 exams)

Unranked.

 Cora Blair 503
 Delbert Henderson 420

New Use for Soda-Water Bottles.

One means employed in studying the growth and distribution of fishes is to set afloat both empty and weighted soda-water bottles to determine surface and bottom currents. In 1920 the Fishery Board of Scotland released 2,400 bottles for this purpose and recovered, during the same year, 290 of them.

Back of every condition

which exists there is a reason. The next time you require to have your automobile repaired drive it into our garage. You will learn the reason which has made it necessary to increase our staff from two in July 1921, to ten mechanics in June 1922.

Huntingdon Motors Limited

The Breed Tells!

AND nowhere does it tell more than in Live Stock.

LET us know what you would like to do for the improvement of your stock, and we shall be glad to go into the whole question of financing the plan with you.

THE CANADIAN BANK OF COMMERCE

Capital Paid up \$15,000,000
 Reserve Fund \$15,000,000

Huntingdon Branch - C. W. Thomas, Manager

LOST, FOUND, FOR SALE, WANTED, ADVERTISEMENTS, 2 CENTS A WORD.

PROPERTY FOR SALE

One 8-roomed stone house and shed, with an acre of land. Also one wooden building suitable for a kitchen. Apply to Miss M. E. Gebble, Howick, Que.

PROPERTY FOR SALE

Situated 2 miles west of Anderson's Corner, on the Gore road, running spring water, with never-failing well at barn. Good house and outbuildings. For particulars apply to S. E. Frier, Huntingdon.

FARM FOR SALE

25 acres standing hay in lots to suit purchasers, 1 cow, 8 yrs. old, large splendid Holstein "Hampson-town" just freshened, 1 bull, purebred Holstein, 20 months old, B. L. K. milking machine, used only 4 months, good as new; 3 H. P. Massey-Harris engine, used very little; 2 rowed Massey-Harris corn cultivator, used only 2 seasons; 1 cheap work horse, 5 bushel of seed corn for silage. The whole to be sold very reasonably. Credit allowed to reliable parties.

W. R. Cooper, Huntingdon, Que. Tel. 635-13 R. R. No. 2

FOR SALE

FOR SALE—Grade Holstein Bull. Apply T. E. WHITALL, St. Agnes, De Dundee.

FOR SALE—A pure bred Holstein

bull, 18 months old; also a frame barn 24 x 75. Apply to A. H. CRUTCHFIELD, Phone 615r4

FOR SALE—Building 24x28 ft. 14

ft. sidewalls, double boarded and clapboarded. Apply to R. H. Crawford, Huntingdon.

FOR SALE—One grade Holstein

bull 15 months old. J. T. McCartney, Huntingdon, Que.

PUBLIC MEETING

A meeting of the Elgin Co-Operative Agricultural Association will be held in the Elgin Town Hall on FRIDAY EVENING, JUNE 30th at 8 P. M. A full meeting is requested as business of importance is on hand. By order of the Chairman A. W. Elder.

FOR SALE—2 cows newly freshened

and 2 to freshen in a few days. Apply J. H. FITZSIMMONDS, Tel. 601-23.

AUTOBILE FOR SALE

Hudson Super Six, touring, in perfect condition apply Rev. J. M. Phaneuf, Howick, Que.

FOR SALE—Two Clyde Fillies,

been handled some, both having teamed it a little. M. Gilbert Dewitville.

SITUATION VACANT

WANTED—Girl to assist with general housework, Apply to Mrs. Stanton R. Jack, Chateauguay Basin, Que.

WANTED

A man speaking French and English with a car or horse to sell products on commission plan in the County of Huntingdon. J. GELINAS, Huntingdon Tel. 149-2

HUNTINGDON, Q., JUNE 22nd, 1922

NOTES OF THE WEEK

Liquor on the Seas
Two troubles which are mutual exist in Canada and the United States. One is handling of the government merchant marine, and the other is prohibition. The latter question has been one that has alienated many friends of this country, because the feeling has been that the Canadian authorities have been working hand in glove with the bootleggers. On the other hand many Canadians from reading reports in the newspapers, articles and fiction in magazines have gained the impression that the Volstead law was not being enforced as it should, so when prohibition and shipping became tangled up in the one dispute common interest attracts attention. A. Busch, of pre-war beer fame set off the fireworks, when in a communication to President Harding he made the allegation that "the ships of the United States shipping board were the wettest on the ocean, which makes the United States the biggest bootlegger in the world." This immediate reply brought a reply from Chairman Lanier of the Shipping Board to the effect that law officers of the Board had decided that the Volstead Act did not apply beyond the three mile limit and that therefore the Board was justified in serving liquor on their boats. He went on to say: "There is a vital bill pending before Congress now providing aid for American shipping which if enacted into law stamps the belief of America (as expressed through its legislative body) that we have reached the point in our national life where an established merchant marine is essential for our prosperity in times of peace and our protection in times of war. "No type of ship is so essential for either of these major purposes as the fast passenger and combination passenger and cargo ships. Of this type Great Britain has 250, whereas we have but 50; when speed and age are considered the factor is even greater in favor of Great Britain. So long as Great Britain, Japan, France, Germany and other maritime nations continue to serve liquor to American passengers I am ashamed to state that my experience leads me to believe there is a sufficient number of Americans without proper pride in their own flagships who would divert their trade to the foreign flags to the extent that the competition would be very heavily against the American ship. "I do not believe I speak inadvisably when I state that so long as foreign ships can enter America serving liquor the lack of that privilege might be the very determining factor in the life or death of the American merchant marine, and that so long as foreign ships are allowed the privilege of entering and departing from American ports serving liquor that same privilege must be allowed our merchant ships." This is a new angle to the question, and it will probably give the Administration some difficulty before the decks are cleared. The President wants to bonus the ships to the extent of fifty millions, but Congress is thought to be preponderantly "dry", and may turn down any such appropriation. It is a problem that demands settlement. The prohibition officers along the line will be hampered in their work if the government for private gain permits under a technicality what it prohibits at home. From the Canadian viewpoint it may dampen the ardor of that great mass of well meaning people who to-day recognize that the illicit line running is hurting neighboring feelings, and who are constantly bringing what pressure they have on the government for more stringent laws affecting the sale and transportation of liquor.

An Odd Sequence of Dates
We are apt to think of the odd use of the numeral eleven in thinking of the closing hours of the war, ending at the eleventh hour of the eleventh day of the eleventh month of the year. A more remarkable instance arises in connection with the opening of the war, which was set in motion eight years ago, on the 28th day of June, 1914. It was on that day that the Serbian student Gavrilo Princip shot the Archduke Ferdinand. He was tried for the deed and sentenced on the 28th day of October. Being a minor the death sentence could not be imposed, so the next best was done—he was sent to a damp cell. Tuberculosis developed and he was moved to the prison hospital. On the 28th day of April, 1918 he died. On the same day he was buried under a pathway, but two years later, on the 28th of June a delegation from Jugoslavia came and with impressive ceremonies exhumed the body and have caused it to be reinterred in Sarajevo where a most imposing memorial has been erected. The figure 28 played a most important part in his final history. But with himself the sequence ends, the number who suffered from his act was not so limited.

Voted for Treaty
If the greatest problem in the world were asked for nine out of ten would unhesitatingly say "Ireland." For generations it has been a world topic of interest, finally culminating in the Easter Sunday rebellion in 1917. War from then on existed and men, women and children lost their lives in the long months that followed. A few months ago when De Valera was set aside by the Sinn Fein it was thought that the end might be in sight, but the factions which followed him were sufficiently strong to hinder efforts for peace and understanding. A crisis was expected to be precipitated sooner or later, unless the ordered elections would clearly show how the people were thinking. The vote was taken last week. Candidates stood either for or against the treaty with England. It was the only issue, altho the presence of many independent candidates and men standing as laborites robbed the election of some of its clarity. However the result is plain. The treaty men are in control by comfortable majorities. What the final majority will be is not certain, but it is certain that De Valera and the extreme element are defeated. The election was held under the proportional representation scheme of voting so a clearer exposition of the intents of the voters is given. In the cities the vote was all for the treaty, Dublin, where the centre of interest was held, went seven to one for the treaty. In the University where the students were said to be radical the result was three to one for the treaty. Cork, the home of Mayor McSweeney, on the straight vote was four to one for the treaty, and if the labor votes are added the vote stood ten to one. In consequence it must be admitted that the people are acting together, and unless the unexpected again happens, Southern Ireland should be able to complete its constitution and organization as a free state. There is bound to be trouble, but with the extreme element, who are more agitators than representatives, defeated, it would mean in other countries that the nation wants peace, but prophesying about Ireland is a foolish pastime. An instance of the condition of affairs was given last week when a dispatch from Belfast stated that within the past two years 2000 outrages having murder as their goal were perpetrated in that city. As a result 200 persons lost their lives.

ORMSTOWN
The school cadets were inspected on Friday by the O. C. of the district, Lt. Col. Keefler of Montreal, who found the work to be in a most satisfactory condition and recommended them for their work. As the boys have had a thorough training under Major Hewton it was bound to be satisfactory. The concert in McDougall Hall Thursday night was all that the advance reports claimed for it. It was given by the Riverfield congregation and portrayed yesterday and to-day. It was one of those entertainments where uniform high talent sends away all well content with the evening. The attendance at the show on Wednesday evening was large, considering the weather and many enjoyed the new seating arrangement. The old style of straight back benches has been reconstructed by David Baxter and chairs are now in order. Mr. Baxter deserves much credit for his engineering ability as many thought it impossible to make this marked improvement.

New England Least American.
Talk of Americanizing New England rings oddly on American ears. If the cradle of our country needs Americanizing, where are we? We think of Massachusetts as the heart of New England. Among the states it is "next to the oldest." But a count of her present generation's parentage shows Massachusetts to be almost the least American of the 48 states, the World Outlook states. The 1910 census discovered that only 32 per cent of Massachusetts folks were native born of native parents. More than 68 per cent were either foreign born or were born here of foreign parents. Later figures would be even more astounding. The years that intervene between 1910 and the outbreak of the war saw the greatest influx of immigrants the country has ever known.

ST. MARTINE
Daring Hold Up Early in the Evening—Stuart Silver Wounded

Right beside Forrester's big store on the Main street in Ormstown and at 3:30 last night Stuart Silver was held up, and shot. His assailants are not known for the street was vacant at the time and the report of the revolver sounded like a small tire blow out, or the back fire of a Ford engine. The rain was pouring down and the few people who were around the front of the Union Hotel knew nothing about it until the man staggered over and collapsed in a chair and called for a doctor saying, "I'm shot, get a doctor." Drs. Levesque and Hunter were called. Dr. Levesque arriving first. It was seen that the wound was small, clean and not ragged. It entered his body on the right side just above the liver. Silver was conscious and told what he could and by 9:30 was rushed to the Alice Hyde hospital in Malone where the doctors inform us his condition is very serious this afternoon. "A touch and go" case is their verdict. The patient's condition is such that it has been considered impossible to attempt to remove the bullet or make any further pain for the patient than can be avoided. He has not made any further statement. Many stories of what happened are being passed around, and there is a distinct variance in most of them. One of the most reliable was told by a resident who was on the main street within 50 yards of the place of the accident at the time. He said that he noticed the bright head lights of a car straight across the road lighting up the fence in front of Mr. R. J. Walsh's house for some time previous to the affray and that the car appeared to be stalled. At 8:30 he heard the report, but never for a minute thought it was a bullet and consequently did not move towards the place. A minute later after some shouting or loud talking he heard the car start and it rounded onto main street and turned down towards the show grounds and then backed and turned out again along Station street and went off. It was a large car, in fact apparently an unusually large one, lighted by two bright head lights and two smaller ones. Whether these were the parties or not is not known, but in any event the occupants were situated where they should have known what was happening. From what Silver said, and from what he told others when he was lying in the waiting room of the hotel it appears that the young fellow was riding a bicycle and rode up from the show building shortly before. He works for Geo. Forrester, a brother of E. Forrester and went around to the back of the building to see if Mr. Forrester happened to be still in the store. When looking in the window to do this three men came up and held him up. He said he resisted them and before he knew it he was shot and they beat it. He slowly dragged himself to his feet and made for the hotel where help was sure to be, and then called for help. He did not know any of the three men, but thought they were strangers and suspicion centres around three strangers who landed in town for the fair, and who have since not been noticed. One was unusually short and another unusually tall. Whether they had anything to do with it remains for the detectives to say, for as mentioned before nobody saw the act or the men getting away on foot. A party in a car driving from the show was coming up towards the crossing when Silver staggered across the road, but he made no sign and they thought he was drunk and drove around and parked their car behind the hotel. Mr. D. J. Greig immediately took what action that could be for the time being. He phoned the Chief of Provincial Detectives, Dan Lorrain, who said that he would have men out this morning. A policeman from the department was posted where he could watch all who passed, in the hope that he might recognize somehugs known to the police, but the dark, rainy night and the jam on the street made it impossible to locate anyone. Silver is a young fellow of medium build and looks to be about 21 years of age. He comes from the old country and is a great War veteran. He has the reputation of being quiet and unassuming, and has been working for Mr. Forrester for some time. Why he should be held up is hard to say, for the chap did not appear to be of the kind that would have much money on him, and the impression is that the men were waiting for someone to come along when the street was vacant, and he happened to be the one. The wound appeared to be made by a small calibre gun, probably a .22. It went in deep. Dr. Levesque probing to some depth without striking anything. Silver was also bleeding about the face from a blow, or as a result of a fall. As his nose was scratched, it probably was the latter.

SHOOTING AFFRAY IN ORMSTOWN

The history of Huntingdon, Chateaugay and Beauharnois townships is that the first settler to get a deed for land on the English River was John Stewart. A few other settlers preceded him by about a year but he was among the first of the pioneers. From a diary and the history we learn that the trip across the Atlantic from Glasgow to Montreal took seven weeks and a day. It is chronicled that the brig in which he and his wife crossed was the Jean of Irvine, the first ship owned by the Allans, and on her James Allan shipped as cabin boy. The sturdy pioneer set to work at once and with help ratted lumber down the Chateaugay from Dewittville and up the English River where he built his home. His struggles were those of all early settlers but gradually from the bush was cut a farm and a sturdy family of seven was reared. John Stewart landed on the banks of the English river in June 1822 and on Friday night in the Town Hall at Howick, June 1922, about eighty of 130 Stewarts or relatives met to celebrate the 100th anniversary of the coming of the Stewarts to Canada. It is estimated there are about 80 direct blood relations, many of whom are still in this district. But all could not take up land and so in Ontario, Saskatchewan, Nova Scotia and other parts we find Stewarts in many cases holding prominent positions. Bishop Stewart, a son of John Stewart, was for years Mayor of St. Sacrement, loyal to his locality and an upright man. Andrew, William, John and Thomas and their sisters did honor to their parents and they and their descendants may feel as proud of their ancestors as their ancestors would have, had they been present to view the well dressed, well educated and talented gathering seated down to a tasteful banquet prepared in their honor. Three long tables had been erected in the hall and they were beautifully decorated, the Stewart tartan and Stewart china, which was over 100 years old being in evidence. Following the banquet, Rev. Ballantyne led in prayer. Rev. Williams gave a short review of the immigration of John Stewart and referred to his descendants, stating that some had come from New Brunswick, Saskatchewan, the English States, Niagara on the Lake and many from Montreal. Telegrams, expressing regret that they were unable to be present were received from Jane Stewart Brown, of Niagara and Chas. A. Stewart of Scott, Sask. Raymond Stewart spoke of olden times, referring to incidents of his boyhood. He remembered when his father brought the first self binder to the district. Herbert Stewart of Montreal made a most entertaining speech, claiming among other things that the Stewarts thought they could curl. John Stewart of Prince Albert contributed a song. P. W. McLagan, Mayor of Westmount, a relative of the Stewarts told of his experience in tracing his relatives. Mrs. H. L. Wood, Brookline, Mass. told of some old letters she had which were written in 1826. She was proud of her connection. Dr. F. S. Patch proved an interesting speaker and thought the only form of insanity which existed in the clan was that of chasing up and down the ice waving brooms and uttering uncouth sounds. His reference to the curling game caused much laughter. Rev. Ballantyne complimented all and stated there were now three farms held respectively by George Stewart on the homestead, W. J. Stewart on English River and Sid Stewart on Fertile Creek. He hoped all would remain for he believed that while the West might be the Canada of to-morrow, this was the Canada of to-day. He referred to W. H. Stewart who had been a purchasing agent for the British Government during the war. The hall was then cleared and a grand march organized, dancing followed and between dances songs and recitations kept things lively. It was a unique and notable gathering and no doubt the Stewarts feel grateful to George and those in Howick who managed the affair. It was not only a gathering of the Stewart clan but it marks a milestone in the history of English River and the settlement of the Dominion. Those present were: G. Whillans, Geo. G. Stewart, Rev. E. A. Ballantyne, J. R. Stewart, Mrs. John Keir (Jessie Stewart), Alex. B. Stewart, W. S. McMillan, Mrs. Herbert L. Wood (nee Elizabeth Stewart), Mrs. John T. Patch, (nee Margaret Stewart), Mrs. Hillyard Stewart, James Stewart, (Kingston), Mrs. G. W. G. Stewart, Rosebank, Howick; W. J. Stewart, Adamsville; I. M. Whillans, Howick; R. L. Ballantyne, Riverfield; R. W. McLagan, (Mayor of Westmount), Mr. and Mrs. P. Douglas Stewart, Montreal; Mrs. E. S. McMillan, Westmount; Mrs. Hugh McMillan, Albert Stewart, Montreal; Marlon S. Bryson, Howick; Julia A. Stewart, Montreal General Hospital; Beth W. Ross, Scotland; Mrs. Ethel Stewart, Howick; Margaret S. Stewart, Beauharnois; F. S. Patch, M. D., Montreal; Janet R. Stewart Crain, Niagara on the Lake; Carrie Stewart Beatty, Montreal; John A. Stewart, Prince Albert, John Watson Stewart, Howick; John Herbert Stewart, Margaret S. Stewart, Pearl Stewart Trueman, Robert Trueman, Leonard R. Trueman, Raymond Trueman, Montreal; Margaret A. Beatty, H. E. Beatty, J. Bruce Stewart, Montreal; Emily Stewart, Howick; Margaret Stewart Caruthers, Carolyn Roy, Margaret W. Stewart, John W. Keir, Howick, Capt. Geo. Shanks, Calcutta, India; M. R. Stewart, a Norman Stewart, Montreal; Stanley Waddell, Franklin Centre; Hugh McMillan, Westmount; Cora MacMillan, Montreal; Mrs. Jean Stewart, Carrington; Sid Stewart, Howick; Jean Paton Stewart, Jim Paton Stewart, James H. Stewart, Herbert H. Stewart, William Hillyard Stewart, Westmount; Mrs. W. E. Mowat (Mabel E. Stewart), Mrs. Herbert H. Stewart, Mrs. A. Norman Stewart (Grace Stewart), Alexander Bryson, Howick; Christina Stewart Widdell, Havelock; Shirley Waddell, Gordon Stewart, Howick, son of Geo. S. Stewart, Stewart Roy, Gerald Andrew Roy, Russell Stewart, Evelyn Stewart, Montreal; Louise J. Keir, Howick; Mabel V. C. Stewart, Elizabeth Stewart, Montreal; Raymond Stewart Trueman, Montreal; Robert Ed. Trueman.

THE STEWART CLAN CELEBRATE

Umbrella Handles.
Those who are intrigued by the attractive shape of a wooden umbrella handle and conclude that the tree simply "grew that way" will be surprised to learn that they are making a great mistake. Cultivating an umbrella handle is a slow and tedious process, often requiring three years of the most careful attention. At the end of the first year the young tree is cut quite short. From then on, the bark of the sprouts is cut and the wood is carved and twisted into all manner of fancy shapes and the tree, as it grows, swells and enlarges the design. Great care must be exercised lest the tree die from interruption of the flow of sap. After cutting each stick is dried carefully in the sun, and then steamed in a "vapor bath" until it is soft and pliable.

SCALES FLANAGAN BUILDING; Jack Williams, the "Human Fly," Makes Wonderful Demonstration in Malone

Main street was packed with hundreds of automobiles and thousands of people in a mass covering the walks from the Hyde to the Thompson buildings Tuesday evening to see Jack Williams, known as "the human fly," scale the face of the seven-story Flanagan building. It was with great difficulty that courses were kept open by the police for passing cars. Williams was late in starting but finally came out wearing a white cotton suit and white sneakers. He made a speech stating that he took entire responsibility for accident, that he had been called a fakir and that he would prove whether he was a fakir or not. Then he announced that a collection would be taken, 25 per cent of which would go to the American Legion for the benefit of disabled soldiers, and called upon Legion men in the crowd to pass the hat. Williams started to climb at Rexford's barber sign and made his way slowly to the top of the southeastern face of the building by opening windows and climbing from one to the other. When he reached the coping that surrounded the building half way up he made another speech stating that he would give an exhibition at the Grand Theatre after the demonstration, and also on the merits of the Durant car as an advertising feature. The last lap over the cornice at the top had to be made by use of a rope from the upper window. Then Williams stood on his head on the cornice. It was really a wonderful demonstration of climbing ability and few in the crowd were disappointed.—Malone Farmer.

LEFEVRE-QUENNEVILLE WEDDING

On the 21st inst. St. Agnes Church was the scene of a very pretty wedding when Miss Sophie C. Quenneville was married to Armand J. Lefebvre. The bride looked charming in a pretty Alice Blue Canton crepe dress and squirrel fur. She carried a large bouquet of white roses. Her travelling suit was navy blue broad cloth with hat to match. Battman's Harmonized Mass was tastefully rendered. The soloists were Messrs. S. D. Popeck, James J. Lefebvre and Phil J. Lefebvre. Mr. S. D. Popeck at the organ. Dinner was served at the bride's home after which the happy couple left on the afternoon train for their honeymoon. On their return Mr. and Mrs. Lefebvre will reside in Montreal.

NO SYSTEM CAN BEAT BANK

Lord Rosslyn, and other frequenters of Monte Carlo, who are said to be racking their brains to invent a system to "break the bank," may as well save themselves the trouble, for as Blanc, founder of the gaming tables, once truly said: "Red wins some times, black often, but Blanc (white) always, and in defiance of every system human ingenuity can devise." "There never has been a system," the directors said to an interviewer not long ago, according to London answers, "which has given us a moment's anxiety—save one, and that one 'system' was the discovery of an old lady who had frequented the tables for years. She had worked out roulette certain numbers always followed each other. Thus, if the number 28 was certain to be next; and if zero was in the same position, it would surely follow. After checking her observations day after day, she began to play, and won—won in 300,000 francs, breaking the bank three times. The officials were in despair. M. Blanc was summoned from Paris, and, as a desperate resource, he persuaded the old lady to part with her secret for 70,000 francs down. "The secret was absurdly simple after all. The roulette wheel had become warped by the heat, and was not quite round, so that when spun from a certain point, it invariably stuck at a certain other point."

"Just Around the Corner"
Created by Cosmopolitan Productions
You who laughed and cried over "Humoresque"—well you know what human appeal may come from the lives in some humble street!—When their joys and sorrows of those lives creep close and become your own. You who will see "Just around the Corner" will laugh and cry again over another, different story of New York's great East Side. Over another mother, another son, two girls and a couple of men. No shimmering silks are here. No blaze of wealth. But struggle and frailty, fighting loyalty, infinite love! All the clattering, challenging, thrilling whirl of the world's Metropolis! A rare and happy hour awaits you—"Just Around the Corner."

NORMA TALMADGE
never so splendid as now—as the wife whose innocent past becomes the guilty present in Channing Pollock's great drama of devotion.
"The Sign on the Door"
What's behind the sign on the door.

RIVERFIELD

The concert given in Ormstown was not as largely attended as was expected but owing to the June examinations the school children were unable to attend. The receipts amounted to \$115. By request the concert will be repeated in Havelock on June 29th. Mr. and Mrs. Robert Carson spent the week end at Fairview Farm. The crops have improved wonderfully since the recent heavy rains and the farmers are wearing a broad grin once more. Evidently they are expecting a bumper crop this season. Mr. James McKell returned on Monday night from his trip to Winnipeg. Vacation days are here again. The school closing took place on Monday forenoon when a goodly number of visitors attended and were well repaid for their trip through the muddy roads by hearing a bright and varied program and a good demonstration of the children's work. Mr. Jimmie Fuller spent Sunday at the Manse. Miss Olive Curran has gone to her home in Ormstown to spend the summer months. A great improvement is noticed around the war memorial since the grounds have been cleaned up, grass sown and the guns bedded in cement. We have but one little plot to keep up so let us see to it that it never looks neglected. "Our boys" gave their all so we will gladly do what we can to keep their memory green and make the spot, which does them honor, one of beauty.

BEAUHARNOIS

The liquor store was broken into the other night and sixty cases of liquor were stolen. So far there has been no trace of it. The Mayor, Mr. Reay and Mr. Gendron visited the municipalities around Montreal last week, to see the filters which are in operation there and to try to find out which will be the best for our town. Owing to a child playing with matches and making a little fire for his amusement, the boat-house of his father was burnt to the ground. Fortunately it stood by itself and so did not endanger any other building and there were no boats in it at the time. There was to have been a Corpus Christi procession on Sunday and the altar was to have been erected on Mr. Thibaudeau's property, but the rain did not allow it to take place. The sudden death of Mr. Robert Wilson took place Sunday forenoon. He had not been in very good health for some time owing to heart trouble, but on Sunday he was feeling so well, he insisted on his daughter and sister going to church, but before their return he suddenly passed away. Mr. Wilson had been connected with the Standard Oil Company, New York as oil refiner, for a number of years, but had retired a few years ago. He leaves two daughters, Miss Wilson, who was living with him and Mrs. F. S. Reay of Beauharnois. Mrs. McIntosh, a sister, also resided with him. He was a brother of Mr. Jas. Wilson of J. W. Kilgour & Bro. Co. The funeral took place on Tuesday afternoon to the Presbyterian cemetery. Mrs. J. D. Anderson and daughters left for Cap-a-l'Aigle this week, where they will spend the summer. The Sunday School picnic was to have been held next Saturday but owing to the death of Mr. Wilson it was postponed, as the picnic has been held on Mr. Wilson's beautiful shore for a number of years, Mr. Wilson always taking a delight in being among the young people on such an occasion.

FISH MIGRATE PURE BRED STOCK IS SHOWN TO PAY

Animal Industry of the United States

Does pure-bred live stock pay? Much evidence has been accumulated to support the opinion that it does pay, and recently actual figures have been made available from a practical source to show its advantage compared to common stock. D. S. Burch of the Federal Bureau of Animal Industry of the United States went to 525 successful live stock producers owning about 25,000 head of breeding stock of different kinds, and from their figures has worked out a set of averages.

"The superiority, based on utility of pure-bred over common stock," he says, "is evident from the following figures."

Class	Superior earning power	Per cent.
Dairy cattle	47.8	
Swine	38.3	
Sheep	37.8	
Beef cattle	36.8	
Average for all farm classes	40.4	

Figures Conservative.
In explanation of the figures, Mr. Burch adds that "were obtained during the last part of 1921, in a period of marked depression in the live stock industry. Partly for that reason they are considered conservative, even though pointing to an unusually high value of pure-breds over common stock."

The 525 farmers had all used pure-bred sires for an average of nine years, and about 30 per cent of their female stock was pure bred. And when the sales of stock for breeding purposes were considered, in addition to the sales of animals and products for market, "the average reported increase in financial returns traceable to the use of pure bred sires was 49 per cent."

Lighthouse on a Mountain

Times indeed have changed. No longer can we think of lighthouses as rotting the sea shores for a scheme has been put under way for the construction of a lighthouse on the summit of Mont Atrique in France. It will be for the protection of airmen and will possess the most brilliant light on earth, seeing that it is estimated that the lantern will be of 1,000,000,000 candle-power. St. Catherine's Point Lighthouse, in the British Isles, has a 15,000,000 candle-power, whilst the United States is said to possess one of 60,000,000 candle-power at Navisink, New Jersey. What a single light of 1,000,000 candle-power is like may be better imagined than described.

TWINS MARRY TWINS—TWIN ATTENDANTS

Toronto, June 15.—Twin brothers are to marry twin sisters here next Tuesday, and the flower girls are twins, too.

Licenses were issued this afternoon for the marriage of Alfred B. McClocklin and Miss Katie B. Henderson, and Albert C. McClocklin and Miss S. Henderson. The flower girls are the daughters of Mrs. F. G. McConkey.

DIVORCE COSTS REDUCED

Ottawa, June 16.—(By Canadian Press).—To render less expensive and expedite divorce proceedings is the object of an amendment introduced in the Senate yesterday by Senator Proudfoot, chairman of the Divorce Committee. If this proposal is accepted the advertising cost will be considerably reduced, and divorce bills would be placed on a similar basis to that of other private bills.

TO HOLD SPELLING BEE

Four Cash Prizes Will Be Awarded At Syracuse State Fair

A statewide spelling bee will be held at the State Fair at Syracuse, Sept. 11 to 16. The contestants will be the winners of the contests held in the various counties of New York State, each county being entitled to one representative, according to the New York State Department of Education. Each county winner who appears in the State contest will receive his railroad fare to and from Syracuse and admission to the State Fair grounds. Four cash prizes are awarded of \$20, \$15, \$10 and \$5. The spelling bee will occupy one day, and on the following day the contestants will be taken on a sightseeing trip about the fair grounds.

HIS GLORY EARNESTLY EARNED

It will be surprising for most people to learn from a Paris dispatch that royalties are still paid on the books of Alexandre Dumas, and that 50 per cent of this money must go to the heirs of Auguste Maquet because of the essential part played by him in the production of those deathless romances.

It long has been known, of course, to many—to everybody who has read the literary annals of Dumas' time—that he had help in his work, and it has been more than suspected that to some of the books called his he contributed little more than his name. That none of them were wholly his—that half the proceeds belong by right to a veiled assistant—gives something of a shock to most of his innumerable admirers.

They need not be worried—need not mitigate their wonder at the mulatto's achievements. What Maquet did, and his heirs claim no more, was to provide the historical bones for Dumas to clothe with the reddest of blood. His glory, therefore, was fully earned, and he had quite as much right to utilize the knowledge of a learned historian, which Maquet was, as to gather his facts from published books, as do writers of other such stories.

HARNESS

The prices now are the same as before the war, it is a good time to buy because I sell at cost price. Don't miss this luck, my prices are cheaper than factory prices.

LOOK AT THIS

- Good heavy team harness \$40.
- heavy express harness \$40.
- brass trimmings \$40.
- heavy express harness X C trimmings \$25.
- heavy buggy harness \$22.
- nickel trimmings \$19.
- double light harness \$35.
- nickel trimmings \$35.
- Halter \$1. collar \$4. buggy bridles \$4. team bridles \$2. whip 25c. good double lines \$5. single lines \$2. hame strap 25c. sweat collar pad 70c. if you pay more than these prices you lose money.

I have got a big stock of furniture to sell. Also carpet, oilcloth, stoves, side-board, bed room set, parlor set, 2 new sewing machines (one Singer and one New Williams, half price), clock, kitchen cabinet, extension table, washing machine, wringer, silver-ware 2 good ovens, also 2 houses to let and one for sale, newly finished with bath and water closet, 1 large lot, 100 ft. square, with garden and stable.

Good bargains for the man who wants one.

Silo Lumber

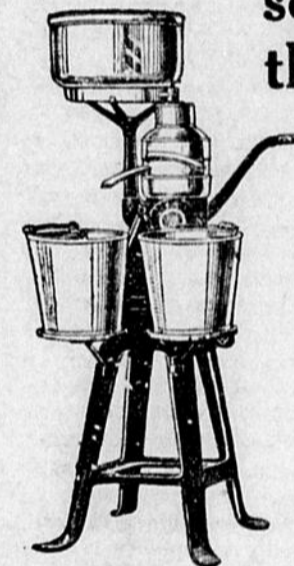

I am opening a Lumber Yard on Lake Street and will handle all kinds of lumber both rough and dressed.

A specialty made of Silo Plank.

J. R. Tully

Huntingdon, Que. Phone 146

I want to show you the cream separator with all the trouble left out

"Goerlike Sixty"

SELF-BALANCING BOWL
SELF-ALIGNING SPINDLE
FEWER DISCS—ALL INTER-CHANGEABLE
LIGHTER RUNNING
CLOSER SKIMMING
LONGER LIFE.

It has only half the discs that other cream separators require, and they're all the same—interchangeable! Think what a difference that makes in cleaning!

It turns easier than any other machine. No complicated gearing—just two gears and two spirals. The power is delivered direct.

The spindle is self-aligning. The bowl balances itself by gyroscopic action. It hangs loosely on the spindle, with ninety per cent of its weight below point of contact. Compact—sanitary—easy to clean. The Gilson oils itself automatically. The whole machine can be taken apart without special tools.

Authorities everywhere, as well as farmers, praise the new Gilson Cream Separator for its close skimming—it does get ALL the butter-fat.

If you're figuring on a new cream separator—if your old machine is showing signs of wear—if you're tired of a heavy running outfit that takes a lot of time to clean and wastes a lot of your butter-fat—let me show you the Gilson. A size for your needs. Terms to suit you.

HUGH STOWELL

"The Gilson Man"

GILSON FARM EQUIPMENT
DOMINANT IN QUALITY & SERVICE

Save Unnecessary Expense in Telephoning

"He's not in his office just now!"

How often have you put in a call for — say Mr. Brown of the Robinson Machine Company — and when connection was made, learned that he was out?

Because you asked for Mr. Brown, it cost you — because of the extra service we rendered — about 20% more than if you had asked simply for the Robinson Machine Company.

The majority of Long Distance users find that if they put in a call for a firm — not for an individual — at the lower Station-to-Station rate, they can always get in touch at once with the particular person they prefer to talk with, or with a deputy who will answer the purpose.

Our gain will come when you appreciate the speed and economy of Station-to-Station service. After 8.30 P.M. the evening rate on Station-to-Station calls is only about one-half the day rate.

Every Bell Telephone is a Long Distance Station

WILLARD STORAGE BATTERY

Having signed a contract with the Willard Storage Battery of Canada Ltd., I am in a position to supply every automotor owner with a still better battery or the regular wood separator battery, on very short notice.

I am also in a position to do all kinds of repair work, on all makes of storage batteries.

If you need a new battery or an old one repaired, ask for my prices before placing your order.

Isaie Quenneville, Valleyfield

Macdonald College 2 000% Profit

The Macdonald College Announcement of 1922-23 is now out. It sets forth the assistance offered by the College to the farming community of the Province of Quebec. This assistance includes, in addition to the free winter short-courses, free tuition to the sons and daughters of farmers of the Province of Quebec:

(a) In the School of Agriculture, in the first and second year classes, where other residents of Canada \$50 and non-residents of Canada \$100 per session. The Provincial Government grants \$7 per month of attendance to students in the School of Agriculture belonging to the Province of Quebec employed in studying according to the time tables.

(b) In the School for Teachers, all students of the Province of Quebec benefit by the free tuition privileges. Bursaries also, ranging from \$50 to \$100 are allowed, under certain conditions, to all students of the Province of Quebec likewise travelling expenses.

(c) In the School of Household Science, where, for one and two-year courses, other residents of Canada pay \$100 and non-residents Canada \$125 per session, and, for the short courses, other residents of Canada pay \$25 and students from outside of Canada pay \$50 for the course. The Provincial Government also grants to daughters, etc., of farmers of the Province of Quebec in the junior and senior years, a bursary ranging from \$20, but not exceeding \$50 each.

In connection with all of these regular courses, board and lodging is provided at the rate of \$6.50 per week; single rooms \$8.00.

Visitors to the College from the farming community of Quebec are always welcome, from 9 a. m. until 5 p. m., excepting on Sundays. Saturday afternoons and public holidays.

The services of the Macdonald College demonstrators to Quebec Women's Institutes are offered to women of the farming community of the Province of Quebec, to assist in organizing Women's Institutes and co-operative societies in their various localities, in planning and arranging for meetings, and in giving lectures and demonstrations on the homemaker's problems. A circulating library is in operation at the college consisting of bulletins, pamphlets, and magazine clippings which may be used in preparing programmes for institute meetings. Any institute member may have the literature requested on condition that it is not removed from the folder in which it is sent out, and that it is returned in the same envelope within two weeks. Papers will not be prepared, but questions will be answered and information sent, upon application, to those preparing papers. The women of rural communities are urged to take advantage of this offer of the demonstrators' services and to do their utmost to extend the work of the institutes, by their organization in their own localities and by sending to the demonstrators the names and addresses of women of other districts who would be interested in promoting such work.

In the School of Agriculture the two-year course formerly given has been discontinued. A winter course in agriculture is offered, extending from Nov. 1st. to Mar. 15th., affording opportunity of studying agriculture with as little interference as possible with farm operations. It is designed to give the greatest amount of information and training in live stock, horticulture, farm machinery, poultry, dairying, etc., in the least possible time. For the four-year course leading to the McGill University degree of Bachelor of Science in agriculture, designed for the training of specialists in agronomy, animal husbandry, entomology, horticulture and plant pathology, candidates will require to produce a school leaving certificate. Postgraduate work can be taken at Macdonald College. The degrees offered are M. S. A., M. Sc. and Ph. D.

In the School of Household Science, candidates for admission to the institution administration course must have completed grade XI of the Province of Quebec (University matriculation), or its equivalent. Candidates for admission to the Homemaker course must have completed Grade VII, or its equivalent.

MULTIPLE 'PHONE CONVERSATIONS

Paris, June 16.—The French postal department is at present experimenting with a telephonic improvement enabling multiple conversations simultaneously without any interference, one with the other.

TENDERS FOR ROADS.

Sealed tenders will be received by me up to 7 p.m., July 3rd, 1922, for the macadamizing of two pieces of the Plank Road in the Parish of St. Barbe. The southern portion consists of 6,654 feet, and the northern of 5,540 feet. Specifications may be seen at my office in St. Barbe. The lowest or any tender not necessarily accepted. O. MARCHAND, Sec.-Treas. Parish of St. Barbe June 20th, 1922.

2 000% Profit

Claimed to be Made on Importations.

In the United States Senate last week the Republicans had a display to prove their contention that higher tariff walls were necessary. With their arguments that workmen need the additional protection and that the allegations of the Senator who claimed that the departmental stores were ruining industries we need not be concerned. The display was illuminating chiefly because it showed the marked difference between the manufacturer's price and the retail price in the United States after importation. Each of the Senators who were interested in the display carried into the Senate one article. The cuckoo clock attracted the most attention, and Senator Williams, whose plain talks a few months ago were most interesting, nearly killed the German bird by letting the clock fall to the floor.

Senator McCumber picked up the cuckoo clock and held it up so the other Senators could see it.

"This cuckoo clock," he said, "I take first. In Europe it cost 94 cents. Over here it retails for \$22, a profit of 2,240 per cent. And they object to paying a small part of that profit to the Government!"

"Are you going to give the names of these profiteers to Mr. Daugherty?" Senator Caraway asked.

"It would seem to me," interrupted Senator Walsh of Montana, "that this is not a matter to be carried with a tariff, but something to be handled by the Department of Justice."

Senator McCumber did not answer, but asked to be permitted to continue without interruption.

"Here is," he resumed, "a pearl necklace imported from France for \$12.35. It is purchased at retail from the importer for \$150. I do not know whether they throw in the box or not."

The Senator showed kitchen table knives which cost abroad 2 cts. each and were sold at retail for 30 cents each, and a barber's clipper imported for 13 cents and retailed for 85 cents, leaving a profit of 555 per cent.

"Here is a little watch," he went on. "The foreign cost was \$12.20 a dozen. They are retailed at \$65 a dozen. The proposed Senate duty on that is high. It is 130 per cent but after taking the 130 per cent, we are still leaving the importer 715 per cent, and that ought to satisfy him.

"Here is a pair of lady's gloves. The foreign cost of this pair of gloves was 2 1/2 cents. The retail price is \$2.

"Now, I have here a razor. This razor was imported at a cost of 21 cents and it was sold for \$5. The duty on it is 35 cents each and 15 per cent ad valorem. The spread is 2,281 per cent.

"Here is a very interesting article. It is a curling iron. That was imported and I presume it was sold by the retailer and the importer, who is the retailer, at what he considered a very low price. It was imported for 9.6 cents and it was sold for \$1.39. That in percentage was 1,348 per cent.

"Here is an English-made straw hat. They always make good articles there. This is a nobby little hat. It came in at the invoice price of 69 cents. It was sold for \$4."

Science and the Future

Milk to be Brought From South America.

A writer on financial and natural resources who is recognized as an authority is Floyd Parsons. Mr. Parsons has just written an article which is printed in the current issue of the World's Work, which contains a great deal which will be of interest and value to all who can procure the magazine. Among other expectations which Mr. Parsons expects to see fulfilled in the not too distant future, will be the breaking up of milk so that it may be transported thousands of miles and then brought together and sold.

Parts of article follow. We have nearly one half of all the probable coal in the world, and we produce normally 60 per cent. of the world's petroleum, 45 per cent. of the world's output of iron ore, 70 per cent. of the world's copper, 58 per cent. of the world's cotton crop, about 40 per cent. of the world's annual cut of timber, and more wheat, and corn, and potatoes than any other nation on earth, which indicates plainly that we hold an enviable lead in the production of life's chief essentials.

But again we must look at the other side of the picture. Great Britain controls in gold, nickel, tin, tungsten, and asbestos. The United States is also deficient in graphite, manganese, potash, and platinum. We grow no rubber, and it is easy to imagine what would happen to our motor industry, which has now become a necessary part of our transportation system, if we should be cut off from the sources of supply in South America and the Far East. It is probable our oil supplies will be pretty well exhausted in twenty years, and there is reason to believe that in the near future, the nation that controls the oil of the world will control the commerce of the world.

In this day of progress, no nation can maintain the lead industrially unless it is chemically independent. Here in the United States, while the chemical industry ranks second in all of our business in the matter of total capital invested in manufacturing, the production of the finer chemicals has been left largely to foreign hands. More than one third of our total investment in chemical plants is tied up in the manufacture of gas. One fourth as much is invested in the business of refining petroleum. Less than 7 per cent of the total value of the nation's so-called chemical products comes from the production of the finished article, such as a refined camphor, synthetic oils, perfumery bases, photographic chemicals, and the salts of the inner metals. In the year preceding the commencement of the World War the United States imported 5,500 different kinds of chemicals. The value of these imports was more than \$100,000,000 greater than the entire value of all of our domestic manufactures in chemical plants that same year. Surely we should no longer be content with a huge output of only the coarser chemicals. It is foolish to sell Europe enormous supplies of a crude product netting us a small profit, and then purchase from the foreigners at a much larger profit to them the finished articles made from our own raw materials.

The United States uses 1,000,000 pounds of camphor annually for medical purposes, but Japan controls the world's camphor supply, which it draws from the island of Formosa. Aside from its use for medicine, camphor is employed largely in the manufacture of celluloid. Japan not only fixes the price of camphor, but decides just how much we may have each year. In other words, the rate of development of certain of our industries that use camphor is dependent on the good-will of a foreign nation. Here is where science comes in. Aside from being satisfied with a prominent effort to raise camphor trees in several of our Southern states, our chemists are making progress in the development of a method to secure camphor from turpentine by a new synthetic process.

But the great work of the chemist, the engineer, and the research scientist in the immediate future lies in our two most important fields—food and fuel. Without food we cannot live. Without fuel we cannot progress. Considerably more than one half of the nation's total effort is devoted to producing food and manufacturing energy of one kind or another. The prices of these two basic commodities depend on the efficiency of the processes employed, and the cost of practically everything else that we use or consume is based on the prices of food and fuel.

Most of us drink milk, and if we don't get the liquid within a day or two after it has been milked from the cow, we find it spoiled. Now it is proposed that we go to South America and the far ends of the earth, where milk can be

bought cheap, and there so process this milk that the fluid is divided into its component parts, shipped to us here in safety from spoilage; then the parts are again united, and we drink the milk with safety and with relish. In other words, we propose to make it possible to break the milk down and box it as we would the parts of a great machine and later assemble the parts, again creating the original article. The chemist has learned and is trying to teach us that fat is fat, whether it comes from a cotton seed, a coconut, a peanut, or a cow. We are asked to view milk as a food rather than a beverage. Of the 87 billion pounds of milk produced in the United States each year, only 43 per cent goes direct to the consumer as a whole milk. A small part of the remainder is evaporated and put up in cans, converted into cheese or manufactured into ice cream. But 37 per cent of this total milk supply remains as skimmed milk which is either fed to stock or thrown away. The farmer claims that the milk thus utilized goes to man indirectly as food, but science has discovered that the digestive organs of animals are constructed to assimilate many forms of food which the human system cannot use. Therefore, with thousands of children in this country suffering from under-nutrition, why should we feed even skimmed milk to animals when humans need it so badly and animals can eat other things.

Lately we have learned much about vitamins, and practically all of the water-soluble vitamins and half of the fat-soluble vitamins remain in the skimmed product. If we must skim a large part of our milk, it is up to the chemist to show us how to get fat from vegetables, and put it into the skimmed milk so that the resulting product again becomes profitable. There is a limit to the number of cows we can raise in the United States. At present we are short 6,000,000 of these animals. On the other hand, there is practically no limit to the amount of fat producing vegetables we can grow. This is only one of hundreds of problems of waste that must occupy the mind of chemists right now.

Out on the Pacific Coast, some of the owners of large ranches have installed mechanical feeding plants. In one instance a scheme has been developed whereby 5,000 hogs can be fed in an hour. A system of paddles in motion keeps the feed stirred so that some of the hogs don't get the fat while some get the lean.

Before long, American bamboo will be supplying the demand for fancy fish poles, canes, barrel hoops, phonograph needles, and furniture. A few years ago, our fruit growers were obliged to sell their cull lemons and oranges for \$5 a ton. Now the annual output from the former lemon waste is 1,500,000 pounds of citric acid, 500,000 pounds of citrate of lime, and 50,000 pounds of lemon oil. The waste oranges are turned into 6,000,000 pounds of marmalades and jellies. Tomato-seed waste amounts to thousands of tons each year. Now we find that these seeds can be processed at small expense and made to yield an edible oil comparable with other oils of commerce. It cost \$250,000 to introduce durum wheat into this country, and already the average value of this product totals \$50,000,000 annually.

In a few years many kinds of farm waste will be converted successfully into liquid of manufactured in large quantities from "black-strap" molasses, but now we find that it is possible to obtain 150 pounds of potash from each ton of this low-grade molasses. In addition to the liquid fuel. During the war the price of potash averaged as high as \$1,000 a ton. Federal chemists have found it possible to obtain gas by the distillation of wheat, oat, and rye straws. It is not too much to expect that one day straw gas and gas made from corn stalks, corn-cobs, and other vegetable matter will be used by farmers to supply light and heat for their homes, power for their stationary engines, and fuel for their tractors and motor cars. Fifty pounds of straw will produce 300 cubic feet of gas—an amount sufficient to drive a light roadster fifteen miles. The next step in this experimental work will be the perfection of a method of reducing the gas to liquid form so that it may be carried conveniently as a motor fuel.

Corn-cobs in millions of tons go to waste every year. Now a noted chemist shows us a way to eliminate this loss. Furfural, a colorless volatile oil with an aromatic odor, which heretofore has been obtained almost entirely from the distillation of bran with dilute sulphuric acid, can be obtained from corn-cobs. This oil may have profitable commercial possibilities in the manufacture of dyes. Combined with dimethylaniline, it can be used in making a green dyestuff corresponding to malachite green. A

deep and fast black dye has been made by combining corn-cob furfural with sulphur and there is a possibility that other colors may be produced from the same source. Cellulose made from corn-cobs may be treated and used in the manufacture of films. It can also be made to serve as a filler for phonograph records and for sound-proofing between partitions.

In no other field is there a greater opportunity for the application of technical intelligence than in agriculture. A recent survey showed that the loss to farm crops in the United States annually through insect disease amounts to \$1,100,000, and this figure does not include the damage done to our forests, to products in storage, and to domestic animals. The peach-tree borers for a decade have done \$6,000,000 damage a year, and \$2,000,000 a year has been spent in fighting them. A short time ago it was discovered that this pest could be overcome by sprinkling fine crystals of para-dichlorobenzene on the soil around the base of the infected peach tree, and then adding a covering of earth to hold the gas. The substance is highly volatile and forms a gas when the soil is between 74 and 80 degrees Fahrenheit. The gas is five times heavier than air and sinks down through the soil and destroys the borers. Dozens of other schemes just as effective are now being perfected for the use of our farmers. If all the wheat now destroyed annually by pests could be saved and made into flour, it would add approximately 29,463,700 bushels to the yearly output of the nation.

The United States must do more fertilizing if our agriculture is to hold a world place. Prior to the war Germany was using 188 pounds of fertilizer on each acre. Great Britain was using 162 pounds per acre, but here in the United States, only about 40 pounds of fertilizer is used for each acre of cultivated land. In 1913 a survey was made of the eight countries producing the largest quantities of potatoes per acre, and United States stood the last on the list. Belgium produced 300 bushels an acre while the United States produced only 92 bushels an acre. Practically the same is true of our other crops. All such facts go to prove that there is urgent need in America for a greater supply of nitrogen. If we tackle the problem in the right way, we can get this nitrogen by simply stopping the burning of raw coal. In taking such a step we will not only deal a hard blow at our high-cost-of-living problem, but we will have taken the longest possible step toward the solution of a shameful coal muddle which for years has cast doubt on our boasted high degree of national intelligence.

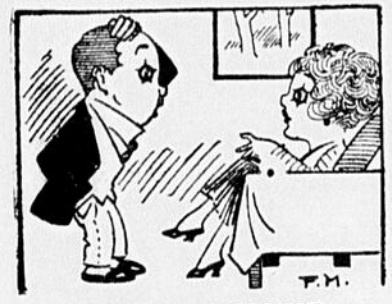

LITERARY COMMENT

"What is your favorite novel?" "Jack the Giant Killer," replied Miss Cayenne. "That is only a fairy tale." "Which is my reason for liking it. Nobody is going to get you into an argument about it by saying: 'How true to life the characters are!' and 'Isn't the philosophy a wonderful revelation of the human soul!'"

Unmistakable Signal. "There must be trouble across the street!" said the stranger in Crimson Gulch.

"What makes you think so?" inquired Three-fingered Sam. "I just heard a pistol shot." "Don't let it skeer you. The boys are tired of poker and are learnin' to play bridge whist. That's Plute Pete's way of signalin' fur trumps."

Hubby—What did you do with all those unpaid bills. Wifey—I saw they were beginning to worry you, dear, so I destroyed them.

FARM MACHINERY

If you intend buying a new Thresher why not buy a White Challenge self feeder. Will thresh 1200 bushels a day without blowing any out, also rebuilt threshers and tractors. 1 Case tractor 9 x 18 H. P. \$600. 1 Avery tractor 12 x 24 H. P. \$1100. 12 H. P. Fairbank Morse gas engine \$250. White steam tractors up to 35 H. P. boilers and saw mills. Province of Quebec Municipality of the County of Huntingdon.

BY-LAW NO. 68 To the Inhabitants of the Municipality of Godmanchester.

PUBLIC NOTICE is hereby given by R. S. Feeny, Secretary Treasurer, that the Council of this Municipality at their regular session on the fourteenth day of June instant, has passed a By-law whereof the following is a true copy:

BY-LAW NO. 68

A Regular Session of the Municipal Council of the County of Huntingdon was held in the County Building in the Town of Huntingdon, on Wednesday the fourteenth day of June, nineteen hundred and twenty-two in accordance with the provisions of the Municipal Code of the Province of Quebec, at which session were present the Warden, R. T. Brownlee and Councillors Lefevre, Caza, Gardiner, Stewart, Perry, Goldie, Blair, Purcell and De Repentigny.

Notice of motion having been given at the last regular session it is ordered and resolved by by-law of this Council as follows:—

A by-law laying a rate to raise money to defray the expenses of the administration of the Municipality of the County of Huntingdon for the current year.

And whereas it became necessary to raise said money by direct taxation, it is therefore enacted:

That a rate of 3/4 mills on the dollar shall be and is hereby laid and imposed for the purpose aforesaid on all the taxable property of said Municipality of the County of Huntingdon, according to the valuation thereof, set forth in the valuation established by this Council at their regular session by this Council at their regular session held in September, 1920.

That the said assessment shall be paid over to the Secretary Treasurer of the said Council by the said local Municipalities on or before the first day of October next, nineteen hundred and twenty-two.

Enacted at the Town of Huntingdon this fourteenth day of June, nineteen hundred and twenty-two. (Signed) R. T. Brownlee

R. S. Feeny, Warden

Secretary Treasurer, M. C. C. H. Given at the Town of Huntingdon this nineteenth day of June, 1922.

R. S. Feeny, Secretary Treasurer M. C. C. H.

Price reasonably. For further particulars apply to R. E. HUSK, Glenelm, Que.

Ancestor Was Hanged

Descendant Asks Chunk of Galloway Tree.

Middletown, Conn., June 16—They wacked down a cottonwood tree in the church park as Goshen the other day, and Charles T. Smith, of Elizabeth, N.J., wants a two-pound chunk of it. He has a reason.

It is history that Claudius Smith, revolutionary brigand, was hanged from the tree. The Mr. Smith, of Elizabeth, who says he is a descendant of this same Claudius, has written village president, Percy V. D. Gott, of Goshen, that a piece of the cottonwood will therefore be highly appreciated and valued by him.

LICENSE PLATE HELD TOO CHEAP

New York Motorists Think They Mar Appearance of Cars.

Many owners of motor cars registered in New York State are complaining of the registration plates which they are obliged to carry. They insist that these plates mar the appearance of their cars and could be much improved by the expenditure of a little more money than at present.

During 1921 there were 779,344 cars registered in New York State that paid a total of \$10,288,858 in registration fees, or an average of \$13.20 each, yet the motorist in 1922 is obliged to get along with plates that cost about 17 cents a pair and are, to say the least anything but good to look at, either on or off a car.

Copper Plates Proposed.

A movement has been started in Arizona to have the 1923 license plates for motor vehicles made of copper instead of sheetiron. While it is estimated that a pair of plates of the former metal will cost 16 cents more than a pair of sheetiron plates, nevertheless those behind the movement feel that the extra cost is warranted if it will procure more durable and attractive registration numbers.

There are some, too, who urge that the copper plates could be used for two years by inserting into the plate, as formerly was done in California, a small disc with a design indicative of the registration year. The ease with which such discs are counterfeited, however, has discouraged such a course.

British Columbia has adopted a system of permanent plates with the year number only changing. This was to allow a close supervision of cars, and better protection to motorists in case of theft.

The most important thing to note however, in connection with the movement, is the desire for plates which, from the standpoint of workmanship, strength and attractiveness, comfort with these same qualities which inhere in the average American motor vehicle.

Something along this line is surely desirable in New York state, where the motor vehicle registration plates are anything but attractive in design, and all too often the workmanship of them is very poor.

All but 300,000 pairs of the 1922 New York State registration plates were manufactured by the State Prison Department at a cost of 17 1/4 cents a pair. The 300,000 in question were manufactured under contract by a private concern for 15 1/4 cents a pair. It is possible, therefore, that quality has been sacrificed for price.

Ornate Plates Desirable.

When it is realized that the 779,344 motor vehicles registered in New York state in 1922 paid a total of \$10,288,858 in special fees into the State Treasury, it would seem that a little more money per pair could be paid for registration plates which would be an ornament to a motor vehicle, and not an eyesore.

Massachusetts is a little more liberal in its expenditures for plates, where the State Prison at Charlestown manufactures them at a cost ranging from 18 to 24 cents a pair, according to the size of the plate, for motor vehicles and 12 cents a pair for motorcycles.

It is expected an appeal will be made to the proper authorities with a view to having for 1923 a plate that will be commensurate with the grade of products owned by motorists and the amount of money paid by them to the state.

THE W. C. T. U. CELEBRATES 25th ANNIVERSARY

To commemorate the twenty-fifth anniversary of the W. C. T. U. of Huntingdon, Mrs. Sellar and the Misses Macfarlane arranged a meeting on the Sellar lawn. Unfortunately the weather was unfavorable to gathering out of doors so the party adjourned to the house.

Mrs. T. W. Kelly gave a résumé of the work of the union since organization and stated that their union was organized in May 1897 by Miss Dougal of Montreal and the meetings were first held in the Stevenson Hall. Mrs. Malcolm McNaughton was elected President but was obliged at the end of the first year to retire owing to poor health. Mrs. McNaughton was succeeded by Mrs. W. A. Dunsmore, who held office from 1898 until 1907 when Mrs. T. W. Kelly was elected to the position and has held office continuously from that time.

The Union entertained the Provincial Convention in 1904 and again in 1912 and have entertained the County Convention several times. On two occasions the Union served dinner at the Fair, realizing over \$1000. During the war by a series of teas \$80 was raised for the Red Cross work. In 1909 through the efforts of the W. C. T. U. a by-law prohibiting the issuing of licenses was passed and came into effect in 1910. It may be said without contradiction that the W. C. T. U. has been the one strong

force for temperance in Huntingdon. They have always been on the job and have been untiring in their efforts to promote the welfare of the community in this regard.

Mrs. T. W. Kelly was made a life member by the other members of the Union. They were favored by having Mrs. H. Wilson, of Athelstan, County President, present who made the presentation of the life certificate and pin to Mrs. Kelly and also made a neat and appropriate address. The certificate and pin were suitably acknowledged by Mrs. Kelly.

Among the visitors present were Mrs. Stewart of Cowanville and Mrs. Tryon.

A bountiful supper served on the veranda and a social hour brought to a close the twenty-fifth anniversary of the Huntingdon W. C. T. U.

Pale Pink Hair is Our Favorite

London paper: The bridemaids wore frocks of powder blue georgette trimmed with girdles and sprays of pale pink roses, with hair to match.

The circulation of the Gleaner is 2,500 weekly.

Your First Car

As you picture it after asking the Advice of Motoring Friends.

It will be above all a light car, to keep down gasoline and oil bills, and quite heavy for the sake of easy riding. It will be enclosed and open to all the good, fresh air and will be quite small, seating eight. The color will be quiet, either burnt orange or canary with purple running gear. The engine will have four, six and eight cylinders cooled with water and air. It will be a cheap car, costing about \$7,000

SERIES OF RALLIES BY CONSERVATIVES

Arthur Sauve to Tour Province During July and August

A series of meetings for the months of July and August have been organized by the provincial Conservative party. Mr. Arthur Sauve, accompanied by a number of his lieutenants, will make a tour of the province in the course of the next two months. The list so far provides for meetings at Longueuil, county of Chambly; Saint-Clet, county of Montcalm; Lachute, Argenteuil; Pontiac; Ste. Scholastique; Two Mountains; Hull, Hull county; Ste. Ursule or Louiseville, Maskinonge; Shawinigan, St. Maurice; Three Rivers; Sherbrooke; Portneuf Quebec county; Montmagny; St. Jean Port Joli; L'Islet; La Prairie, Compton; St. Ours or Sorel, Riche lieu.

Mr. Sauve will be accompanied at these meetings by his colleagues in the Legislature, and other well-known Conservatives, including Hon. E. L. Patenaude, J. Sylvestre, K.C., and L. P. Bernard.

The first meeting will be at Longueuil at 2 p.m., Dominion Day.

Organization work is now fairly well under way. The various clubs in the city, such as the Lafontaine-Morin, Cartier and Chapleau will

Mr. J. Maurice Grondin, journalist, has been appointed private secretary to Mr. Sauve.

Ups and Downs in Milking.

"Makes me feel like a clown—"
"Because, when I've made her give up,
I'm derved if she'll give down!"

DRIVING AT TWILIGHT

Twilight period is the worst time of day for driving an automobile, since at this hour it is too light to derive any great benefit from the lamps and too dark to see clearly the road ahead.

HOWICK

Mrs. H. Wood of Boston and Mrs. J. S. Patch are guests of their brother, Mr. G. G. Stewart.

Mrs. F. Munro of Paris, Ont., is the guest of her parents, Mr. and Mrs. J. A. Logan.

Mr. James Stewart of Kingston is visiting relatives here.

Miss Wilson has returned to her home in Shawville to spend her vacation.

Mrs. Scott of Montreal is visiting her sister, Mrs. Thos. Irving.

Miss Withun, accompanied by Mrs. May Anderson and son Stuart, has gone to her home in Hanover, Ont.

Mr. Clifford Watson of the Bank of Commerce staff is spending his vacation at Omenee, Ont.

CAMPAIGN AGAINST PROFANITY

Delegation Waits on Premier Regarding Language in Taverns.

On Saturday morning a delegation composed of Rev. George Lebel, Adrien Derosiers, Bruno Charbonneau, J. A. Desjardins and A. Grenon, waited on the Provincial Premier in Montreal. Their request was that the government take more stringent steps to stop the use of profane language in the taverns and other public places in the province. Especially they desired that the Liquor Commission be instructed to see that the law regarding obscene is obeyed. The Premier gave them hearty support and stated that the government would do its best.

As a result of the campaign cards are being placed in all prominent places stating that blasphemy, improper conduct, etc are prohibited and that the law provides a penalty of a \$50 fine or not more than six months' imprisonment.

INCREASED INDEMNITIES FOR PUREBREDS

Parliament Increases Indemnity In Accreditation Work.

Many dairy stockmen have been worried considerably over the fact that the government was reducing the indemnity paid for stock found to be tubercular. The intention was to reduce the maximum from \$250 to \$200 which would mean \$150 to be the maximum for a pure bred cow. Last week the matter was again discussed in the House at Ottawa, and the claim of the dairymen was admitted and the indemnity increased. The debate was short, the Minister of Agriculture being in charge.

Hon. William R. Matherwell (Minister of Agriculture): When this Bill was under consideration by the committee last week, the committee seemed to agree with the schedule of indemnities, with the exception of that relating to pure-bred cattle. Since then I have looked up the list of pure-bred cattle, as compared with the list before the war, and I feel that I would be justified in agreeing to the representations made by a number of hon. members in the committee, with respect to this indemnity of \$150, and in moving that this indemnity be raised to \$200. The former indemnity, at the high water mark, was \$250. The proposal in the bill was to make it \$150; my suggestion is to make it a straight \$200 for pure-bred cattle, and, if it is agreeable, I will move the amendment.

Mr. Sales: I would second the amendment.

Mr. Matherwell: A number of hon. members are particularly interested in this matter, and seem to be all agreeable to this. I, therefore, move that the words "One hundred and fifty dollars" in line 18, section 1, be struck out, and the words "Two hundred dollars" be substituted therefore.

Amendment agreed to.

Mr. Kullner: I wish to call attention to what I consider an unfair basis of valuation for cattle. Evidently the question whether an animal is pure-bred is the only thing that determines the valuation of a cow. I think a hand-milked cow, especially one that has a production record, should receive some special consideration in the valuation, and if the valuation of a pure-bred cow is increased to \$200, I would suggest that milch cows be raised to \$125, especially in the West. In British Columbia the average price of milch cows, according to the report from the Government, is \$85, whereas in Alberta it is \$48, in Saskatchewan \$49 and in Ontario \$59. The only source we have for obtaining milch cows in Alberta is from Ontario, and a \$59 cow in Ontario, after paying the cost of freight and so on, is only a \$49 cow in Alberta. I therefore request that the Government raise the price of a milch cow to \$125 in the Province of Ontario Bill, as amended, reported, read the third time and passed.

—This week many loads of machinery have been coming in over the railways for O'Connor Bros. Among the stuff unloaded was a new crusher which is being assembled at St. Agnes.

There will be a booth of useful and fancy articles for sale.

Mrs. D. W. Sutherland, President.
Mrs. A. W. Vass, Vice President.

- DANCE -

O'Connor Hall

FRIDAY, June 30th

This is our Dominion Day Dance, but owing to July 1st falling on a Saturday we are giving the Dance one night earlier.

Huntingdon Moonlight Serenaders.

Mullarney & Holland

Dry Goods, Hosiery and Notions

Coats, Suits and Underwear

We are making some very attractive prices on Suits, Coats and Silk Dresses, odd lots to clean up. Try a pair of our Corsets, none better.

Canadian Money at Par.
31 East Main Street

HUNTINGDON

—The Boy Scouts are out to make a name for themselves and are going to try for a thorough training. On Saturday Sgt. Tatem was engaged and has taken them on hand and will teach the youngsters all the rudiments of Scout and military drill. Sgt. Tatem will also train the school cadets in the fall.

—A meeting of those interested in the Choral singing was held in the County Building this week. It was decided to proceed with a thorough scheme of organization and for that purpose a committee was appointed to prepare for the fall work, which will be ended by a concert. The committee is Mrs. H. R. Graham, Mrs. W. A. Hunter, Miss E. M. Sellar, Mr. J. R. Oney and Dr. Douglas. \$15 was voted to Chateaugay Lodge for the use of their rooms for practice.

—A start has been made in the digging of the foundation for the new registry office. The men are quickly clearing away the earth so that the work may proceed quickly.

—On Monday and Tuesday evenings the feature film "Over the Hill" was shown in O'Connor Hall. The picture has been a big feature during the past year and took some nerve to undertake here. The results were quite satisfying to those concerned, good crowds turning out both nights. The story was improved by the music which was under the direction of Mr. J. B. McMillan and Dr. Douglas.

—Sunday morning the services in the Methodist Church were taken by Mr. Kelloway, Revd. Mr. Nelson being in Kensington.

—Word has just been received that Miss Viola Lucas has graduated as a nurse from the Montreal Western hospital with honors. Miss Lucas has the distinction of coming second in her year.

—Frankly some people's idea of pleasure don't coincide. For instance a young fellow's idea of a fine pleasure trip is to motor half way across the continent on a motor cycle and has started. The last word received from him said he was passing through the state of Pennsylvania.

—The first car demonstrating the principle of hard rubber wheels on pleasure motors passed through Huntingdon on Wednesday. The wheels are all hard rubber, with springs behind.

—We are frequently told that Canadians are insular and don't know their world geography any too well. We grant the fact, but there are others. For instance a certain popular book of facts is published in London annually. It contains historical facts since the world began, hints on gardening, a dictionary and chief of all, a gazetteer of the world. Looking up Huntingdon is it seen that the town has a population of 1413 and is in the province of Quebec near the Caughnawaga Indian reserve.

—Sunday evening Front street was treated to a display of driving on slippery streets which ended as expected—the wrecking of the car. It was a Ford driven by Gordon Jarvis. When about opposite Ganeroff's store a front tire blew out twisting the car in towards the river bank. On the wheel being thrown the other way the rear skipped and threw the car against a lumber pile. As a result Dick Gibbons was slapped up against the lumber and had his collar bone and arm broken, besides suffering bruises etc. The other occupants escaped injury. The car was considerably wrecked.

—Friday evening rain started and before it quit Monday morning over two inches of water had fallen. The land is now saturated and a hot spell would rapidly push the crops along. In the mountains the rain was much heavier as the river showed. On Sunday it left its banks at low spots and flooded the fields. On the American side many roads were washed out and culverts damaged.

—Miss Evelyn Purcell, pupil of Miss E. M. Sellar, has successfully passed her examinations in Grammar of Music (Div. III) and Piano-forte (Higher Division), before the Associated Board of the Royal Academy and Royal College of Music.

—The lady curlers did not strike the best of weather for their card party and dance on Friday night. The rain started to drizzle about 6 o'clock and got heavier as the evening advanced. However it did not keep the crowd away and a good turnout resulted. The prize winners of the 500 were Mrs. F. H. Hunter and Mr. James Lorden. The dance was styled a "Gingham" dance and prizes were awarded for the best costumes. These were won by Miss Madeline Lachance and Miss Hazel Cappiello for the ladies and Messrs Charles Dempsey and Mr. Donovan for the gentlemen.

—The customs officers added another car to their string of seizures last evening when about ten p. m. they seized a Chevrolet near the lower bridge in Huntingdon. It was loaded with several cases of booze and was owned by an American. The charge under which it was seized was using it for commercial purposes.

Brainardsville v Huntingdon

Last year Brainardsville played good ball and this year they are paying better, which about explains the score on Tuesday when Huntingdon played a league fixture in the American town. It was 11 to 3, and while it would not have been so one-sided if the locals had played their best, still Roberts was pitching too good to beat. The game started well for Huntingdon Ross getting first on a dropped throw, making second on an error. He completed the round on a bad throw to the plate. In the second inning two more were added when Kelly and McIntyre were both walked. This ended the Huntingdon scoring. Brainardsville chalked their first runs in the second, when with two down Knight doubled and Foran and Thurber singled. From then to the fifth no scoring was done. In that inning Brainardsville stepped into the lead with two runs. The inning looked bad for Huntingdon, the bags being full and only one down when Knight drove a line drive close to the pitcher's box, Bush reached out and stabbed it doubling O'Connell at third. The eighth was a bad inning for Huntingdon, Brainardsville adding four more runs to their score making the final result 11 to 3. Some good playing was mixed up with the errors, Ross and Kelly in the outfield accepted all their chances cleanly while Cook on third was a stumbling block for short infield grounders from the locals.

There is no doubt but that the game here on the 1st of July will be a good one. With the harder playing field Huntingdon should be able to reverse the score.

The teams were:
 Huntingdon: Bush p, Elder c, Martin 1b, Simpson 2b, O'Connor ss, McIntyre 3b, Kelly lf, Stark cf, Ross rf.

Brainardsville: Roberts p, Thurber, Bigby 1b, O'Donnell 2b, Cook 3b, Martin ss, Knight lf, Meagher cf, Foran rf.

Score by innings:
 Huntingdon 120000000—3
 Brainardsville 02002124X—11

Chateaugay v. Burke
 Burke demonstrated that their team was tightening up into excellent shape last week when Chateaugay visited them. While Chateaugay won 3 to 0, it was a good game with only one of the scores being an earned run. Keefe and Dow were in action for Chateaugay and worked well together. Mastin was in the box for Burke with Wheeler catching. Burke is well placed with pitchers having no less than three to depend on.

The Chateaugay Valley League will have to play indoor baseball next winter if the weather doesn't give it a better break, for there are already four postponed games. A meeting was called for Monday evening to set new dates, but owing to a misunderstanding a full Executive was not on hand.

International League.	Won	Lost
Brainardsville	3	0
Chateaugay	2	1
Huntingdon	2	2
Burke	1	2
Ellenburg	0	3

Seen in Piccadilly.
 A rough little pony in a coster's cart stood near a mansion in Piccadilly on a chilly morning. A pile of logs for firewood was being unloaded and the pony was enjoying the warmth of a somewhat unusual loin-cloth flung over his back. It consisted of a handsome edging of fur attached to a musquash coat, which was seen to belong to a woman who was shifting the wood who was countless while she worked. So the little rough pony was sharing what was known a year ago as "munition overalls"—because these handsome fur coats were the sign and signature of the girl munition workers, whose sudden enormously increased incomes enabled them to realize the ambitions of their life—a fur coat as good as you please. And very handsome they were, and very well they became the owners—and very contented the pony looked.

Baseball

Huntingdon v Ellenburg

The game on the Fair Grounds on Friday was not very interesting for it was obvious from the first inning that Huntingdon had the better team, and Bush after a bad spasm in the third when he walked two men held the Ellenburg batters down without trouble. The opportunity of practicing showed its effect, the Huntingdon team fielding their positions far more cleanly than they did at Burke, while at the bat they hit freely and hard. In the first inning by a sequence of errors Huntingdon scored three runs and kept increasing the lead until by the beginning of the sixth the score stood 12 to 1 in favor of Huntingdon. In that inning Coolidge went in and held Huntingdon scoreless for the balance of the game, in fact he retired the batters in order except in the eighth when Adams dropped a throw that would otherwise retired Stark. The teams were:

Ellenburg: R. Hobbs and Coolidge p, Giles c, Adams 1b, Delong and Hobbs 2b, Coolidge and Hobbs 3b, Hobbs and Douval ss, Cashman lf, Boyea cf, and Atkins rf.

Huntingdon: Bush p, Elder c, Rowat 1b, Simpson 2b, McIntyre 3b, O'Connor ss, Ross lf, Stark cf, and Martin rf.

Score by innings:
 Ellenburg 001000000—1
 Huntingdon 30342000X—12

Umpire L. W. Sellar.

PIONEER MERCHANTS.

Montreal Marks Centenary of Founding of Board of Trade.

Montreal does well to honor the memory of its pioneer merchants in celebrating the centenary of the founding of its Board of Trade. The city owes much to the foresight and energy of the business men who have capitalized the fortunate location of the city at the head (for the time being only, perhaps) of deep-water navigation. Ever since adventurous spirits organized the Northwest Company of Montreal, and traded into the great Western wilderness as a formidable rival of the Hudson Bay Co., the city has progressed on strong commercial lines. Early fortune had their foundation in the fur trade, united with the business capacity and creative imagination of its early Scottish citizens.

Only a few months before the Committee of Trade, which preceded the Board of Trade, took form in April, 1822, the first sod had been turned by John Richardson, a leading merchant, for the digging of the Lachine Canal, which was to afford water communication with the Upper Lakes. This canal was completed in four years, but it has required enlargement several times since. The same Richardson presided at the meeting at which the Committee of Trade was organized. It is an interesting coincidence that the body was formed following the close of a great war, which also had left the country in a chaotic shape, requiring years to remedy. One paragraph in the report of the first meeting observes:

"It was not only Canadian commerce which was embarrassed at that time, for the return of peace in 1815 and the resumption of specie payments in England in 1819 necessarily caused readjustments in all branches of trade."
 It was pointed out by resolution that "the embarrassments of Canadian commerce can no longer be averted or even delayed by the solitary exertions of individuals, or by the occasional hasty and inadequate deliberations of public meetings, and that the present alarming crisis demands the establishment of a standing Committee of Merchants, to be authorized by their constituents to watch over the general interests of the trade of the country."

The Huntingdon Gleaner is published weekly on Thursday by Leslie W. Sellar, residing in the town of Huntingdon, Que., and printed at his office in the Broad Building, Chateaugay street, in the said town. Subscription \$1.50 per year; U. S. subscribers \$2. Papers discontinued when the time for which they have been paid expires. No exception to this rule so that subscribers who desire to continue receiving the paper should renew before their subscription has expired as denoted on the address label. In changing address be sure to give name of former post office.

Rats Need Balanced Diet

Stuffed Rodents Used to Show Value of Milk.

Four stuffed rats, mounted by the Smithsonian Institution, which had been fed during their earthly existence on four different diets, are the most unusual if not the most impressive evidence of the valuable qualities of milk. Because they ate the same foods that man eats and mature rapidly, rats are generally used for feeding experiments.

In experimenting with these animals, the Department of Agriculture found that the lack of milk in their diet produced a most marked effect in them, so as rats on a poor diet could not stand travelling around the country to let people see how they looked as compared with those having been properly fed, the department decided to have them stuffed. This work has been done so accurately by the Smithsonian Institution that the stuffed rats do not vary in size from their measurements when living.

These four rats were fed on the staple diet of the poorer people of some sections of the United States. Rat No. 1 had grits, sweet potato, salt pork and collards to eat. Though he had the green collards he did not get all the vitamins he needed and the experiment ended with his death.

Rat No. 2 was fed on a similar diet except that he was given a little milk which amounted to 8 per cent of his diet. He was not as rugged as he should have been, but he was fairly healthy. Rat No. 3 had a similar diet but in addition was fed all the whole milk he needed, and his picture shows he was a fine husky rat.

What diet does to rats, it is likely to do to children, which means that children should be given an abundance or about a quart of whole milk a day, not the skim milk from which father has been given the cream for his coffee. The cream contains some of the essential growth-stimulating vitamins.

NOTICE

The Montreal Presbyterian of the W. M. S. will meet in St. Andrew's Church on Friday 23rd inst.

A meeting of the Executive will be held in the Annex on arrival of a. m. train from Montreal. Afternoon meeting at 2.30. Evening meeting at 8 o'clock. Miss McGregor, Field Secretary will speak at both sessions. All cordially invited.

Picnic Notice

FARMERS' BASKET PICNIC
 This annual picnic will be held JULY 1st, 1922 in Greig's grove Cairnside, Que. Members of Parliament of the district and other prominent men will be invited to take part in the program. Pipe Major Gray will furnish music and the Laurie family will entertain with the following dances, Reel of Tulloch, Shean Trews, Sword Dance, Gellum Calum, Highland Fling and Irish Jig. They are worth seeing. Tea and sugar provided free. Refreshments will be sold on the grounds. Come early and enjoy the day. A tug of war between the different sections of the district for a trophy to be competed for annually.
