MAN KILLED ON HIGHWAY NEAR GEORGETOWN

Car Runs Over Him and Breaks Both Arms, Neck And Fractures Skull

KILLED INSTANTLY

Was Member of Road Gang Sweeping Highway

Struck and instantly killed by an automobile was the fate of Camille Schank, 23, who was killed while working on the road near the North Georgetown church on Monday. The car that struck him was a Buick car from Malone in which two priests were riding. The accident happened just opposite the home of Mrs. Robt. Anderson between 9 and 10 o'clock in the forenoon. Schank was one of a gang of men scraping and brushing the highway in order that the road might be oiled. The car was bound for Montreal and on approaching the gang the horn was blown. According to the evidence given at the inquest all the men moved aside with the exception of the victim. He looked up and towards the car, but either failed to realize his danger, or on seeing the car so close to him, got excited and moved the other way, or became powerless to move. In any event the car struck him. He seized the fender and was pulled along. Brakes were applied, but the car was brought to a halt. He had been run over. Both arms were broken, his scalp fractured and the neck broken. He never spoke a word and was dead shortly after. The Reverend Fathers administered the last rites of the church. Doctors Levesque and Hunter of Ormatown were summoned, but on their arrival all hope had been abandoned and preparations were made for an inquest. Dr. Savage of Ste. Philomena was phoned for and arrived at the scene about noon in the afternoon after making enquiries he empanelled a jury of six French-speaking men and called for the evidence. Men on the gang stated that it was with difficulty that automobile horns were to be heard. The ringing of the horns against the dust and the high wind that blew that day all helped to make it impossible to hear the approach of cars. Some stated that they thought the car was running too fast in such a spot where men were working, and placed the speed at 30 miles an hour. On the other hand a party of ladies who were coming behind were positive that the car was running at a moderate speed of less than 20 miles. After hearing all the evidence the jury decided that the accident was one of those misfortunes that will happen and returned a verdict of accidental death.

The deceased was a French-Canadian farmer coming from near Cairnside. Although only 23 years of age he was married and had three small children, the eldest of which is under four years of age. He had a small farm on which he worked with his parents and had just come onto the road work to make a little money to carry him through the winter season. He was reported to be rather hard of hearing and to slow thinking.

2000 AT STREET DANCE

Last Wednesday night the town of Chateaugay held its first annual street dance when over 2000 people took part. The Moose Bank from Malone supplied the music and the pavement, from the crossing where the cement road to Boyd's Lines intersects, to well past the business centre, was the floor. Everyone had good time and the Chateaugay Record reports that the event will be repeated next year.

HUNTINGDON

HEAD ENGINEER DEFENDS GRAVEL ROAD WORK

Explains to Council Why Government Is Graveling Local Roads

CARS BEING COUNTED

Basis To Be On Traffic Conditions

At the August meetings of several councils in the District resolutions were passed, or opposition voiced to some of the work now being done by the Quebec Road Department. The Gleaner got into touch with Mr. Fraser, who has charge of the road work in the northern part of the province and asked Mr. Fraser to state the view of the Department. He kindly consented to do so and his letter follows.

Mr. Fraser was in Huntingdon on Monday and went into further explanations regarding roads in his province. He stated that as there were over 50,000 miles of roads in Quebec it would be impossible to macadamize all. If this were done the cost would be at least \$500,000,000. So the roads department had decided to pick out the main roads and to put them over with gravel. In explanation of the \$200 a mile maintenance cost he stated that this did not begin to cover the cost to the Department for the municipalities naturally passed their worst stretches of roads over to the government and the first rearing and oiling were expensive. On the other hand it gave the Department an opportunity to see that the roads were properly cared for and he anticipated a far better class of road in the future than in the past. Asked as to the period for retaining these roads under the \$200 a mile system, Mr. Fraser stated that the roads would be held under the jurisdiction of the Department until it decided otherwise and that the assessment of the above rate had been carefully figured before in order that the carrying capacity of each municipality might be properly gauged.

Mr. Fraser also stated that a census was being taken of the traffic on each of the main roads and he expected to be able to show accurate figures for each road in the district this fall. His present estimate was that even the Malone-Cauchawaga highway was not carrying 30% of the traffic which it could stand.

In regard to the graveling of roads, Mr. Fraser looked upon them as being more economical than any other type at the present time. Cement roads cost in the neighborhood of \$30,000 a mile, and except where absolutely necessary no such road was being laid. For the interest on the investment done, new gravel surfacing could be laid each year and some would be left over. As to the quality of gravel, he found it excellent, and this prompted him to say, "There are many people who think gravel can be judged by the way it packs. The faster the better in his estimation, yet the reverse is the case. A gravel surfacing packs quickly and contains too much clay and that only makes a lousy road in dry weather and a very slippery road in wet weather. Indeed the slower the binding goes on the better class of road you will ultimately have."

In regard to the dust nuisance Mr. Fraser thought there would be little trouble. If it were found necessary the Government would treat the surface with a moisture preservative that had been used with success in other parts of the continent. An application of this twice a year had shown that the dust could be entirely eliminated.

Mr. Fraser's letter

The Huntingdon Gleaner, Huntingdon, P. Q.

FRANKLIN CENTRE

We were favored with a number of showers on Sunday, which have done considerable good to the corn and potato crops.

Mr. Lawrence Towne, who is engaged in the carpenter business in Utica, N. Y., had the misfortune to meet with an accident, losing one of his fingers.

Mr. Jos. Beaudin has rented his butter factory to a U. S. A. firm.

Mrs. La Mance from Florida and Mrs. Henry Wilson from Athol-st. held a meeting in the Methodist Church on Wednesday, for the purpose of organizing a W. C. T. U. Society. A number of ladies were present. Mrs. B. Johnson was elected President, Miss E. Carson Secretary and Mrs. W. Dunn Treasurer. The next meeting will be held Friday afternoon at 2.30 at the home of Mrs. B. Johnson. Mr. Wilson will again be present to direct the meeting and get the Society commenced on a solid basis.

Sorry to report Mrs. Sproull is not gaining very speedily.

Rev. and Mrs. Bunn attended the picnic held at Sylvester's Point by the Rennie Church Sunday School. All report a most enjoyable time.

Mr. and Mrs. Wm. Churchill and son Aaron, spent Sunday the guests of Mr. and Mrs. Geo. Brooks.

Mrs. Morton and daughter from Montreal were the guests of Mr. and Mrs. Merritt Adams over the week end.

Miss Hazel Dickenson spent a few days visiting her friend, Miss Violet Wood.

Mr. and Mrs. Wm. Hanna, accompanied by Mr. and Mrs. Thos. Hanna of Ormatown took in the Valleyfield Exhibition Thursday.

Mr. Andrew McGerrigle of Ormatown was the week end guest of Mr. Floyd Stevenson.

Mr. and Mrs. Henry Blair, Mr. Albert Blair, Mr. and Mrs. Willard Blair and son Howard motored to Huntingdon and called on Mr. and Mrs. Fred Moore. While there they saw the new Case threshing mill in operation which the Moore Bros. recently purchased.

Mr. W. H. Trainer has again resumed the work on the side road leading down from the Frontier. It is generally reported that Mr. Trainer is superintending a number of other jobs on the road.

Mrs. Geo. Adams of Rockburn was here last week.

Mrs. Geardy Mourtou and daughter Ivory are visiting friends here now.

Service will be held in the Congregational church Sunday evening, AUG. 26th, at 7.30 by the Rev. Galen Craik.

During the war 4,618 priests or France died or were killed. In consequence there is a great shortage at the present time and it is estimated that there is now one priest in France for every 1,061 persons.

FRUIT CROP WILL BE BELOW NORMAL SIZE

Report For Province Not As Large As Other Years—Fruit Growers to Meet

40 PER CENT CROP

Government Estimates Crop At 60 p.c. Under Last Year

The total apple crop in the Province of Quebec is now estimated at approximately 40 per cent of that of last year. Unfortunately during early June a very severe fall storm visited the St. Hilaire and Rougemont Districts causing very material damage to the apple crop. The spread of apple scab has not as yet been serious but the railroad worm will cause considerable injury. La Trappe—The total apple crop is 200 per cent better than 1922, wealthies 500 per cent better, Fameuse, McIntosh, Milwaukee equal, Alexander, Wolf River, Duchess, Scotts Winter 50 per cent better, Golden Russet 25 per cent better than 1922. Chateaugay—None of the varieties in this district are showing a full crop. Early varieties as a rule will be very light. Fameuse and McIntosh 4 per cent of last year. Wealthy 30 per cent. The fruit is of good quality and little scab reported. Hemmingford—The total crop is estimated at 35 per cent to 40 per cent of 1922. Duchess and other early varieties light. Alex. under very light. Wealthy fair to good, late varieties fair to medium. Scab on apples serious. Apple Maggot promises to be serious in some orchards. Abbotford—The total crop is estimated at 30 per cent of 1922. Orchards generally free from scab, but Curcino and some damage particularly in the variety. McIntosh, Fameuse and other varieties fair. Rougemont and St. Hilaire—On July 4th this district suffered a severe hail storm doing considerable damage to the crop which at that time was only estimated at 25 per cent of the previous year. The total crop is now a complete failure as the fruit remaining on the trees is very seriously damaged.

Mr. Peter Reid, the energetic Secretary of the Quebec Pomological and Fruit Growing Society, has issued the call to the summer meeting which is to be held at Abbotford on Aug. 28th and 30th. A large number of good speakers have been obtained, among them being Robert Brodie, Cyrille Vaillancourt, Dr. Dickson, P. J. Carey, Prof. Bunting, L. E. Burrows and Prof. Macoun.

FRANKLIN CENTRE

Next a visit was made to the Chazy Central Rural School which institution that cost over one million dollars to build and which replaces all the little red schools for an area of 5 miles around Chazy. This is one of the finest institutions of its kind to be found. It is a splendidly equipped school. Here children are taught from the Kindergarten to the Graduating Class in High School how to be better practical and useful citizens. Each teacher is a specialist and teaches only one subject, but he must be in the subject. Each subject is taught in a room so built and decorated as to give atmosphere to the subject. For instance, French and Latin are taught in the Cicero room which is a room decorated in purely Roman style. English is taught in the Shakespeare room—a room entirely built in keeping with the Shakespearean period. A beautiful, light, spacious room, finished in white, is used for teaching cooking and efficient buying. It would take ages to describe it well. In order that his community and his country may be a better place to live in.

All the tillable land is drained. The barley field recently cut, did not show a crack in it from drought; on the contrary it had a flexible feel under the tread.

Of the breed of cattle kept on the farm, Belgians and Percherons are found in the stalls. Holsteins supply the milk for the farm, while Shorthorns make up the herd of beef cattle. In swine, Yorkshires and Chester Whites are kept and in sheep, Southdowns and Dorset horns. The farm has often taken the championship at Chicago with car lots of Southdowns and individuals in the horse and cattle classes.

This huge establishment is managed by Mr. C. E. Hamilton, who with efficient foremen is making this farm a paying proposition.

This farm has been deluged by so many visitors in the past that it has been found necessary to discontinue receiving people at the farm. Consequently those who were fortunate enough to be in the party on the 16th saw a great many things that they might not have seen otherwise. The party returned home by the light of the moon, doubtless tired, but feeling that the trip was greatly worth while. Possibly another crop could be planned in early November, when the stock would all be in and the school in operation.

There are over 28,000 accredited herds in the United States, including upward of 600,000 cattle. There are 30 counties sufficiently clear of tuberculosis to warrant the shipping of cattle in interstate traffic without being tested.

Indication of the steady increase in the number of beekeepers and colonies of bees is afforded by the fact that though the honey flow is only about two-thirds that of last season, the total output of honey in British Columbia will be as large as that of last year.

BIG CROWD GO ON TRIP TO THE MINER FARM

Farmers' Clubs Inspect 14,000 Acre Farm at Chazy

125 IN PARTY

Million Dollar School Inspected Besides the Farm

On Thursday the 16th, 125 farmers of Huntingdon and Ormatown, accompanied by Blonfin, B.S.A. agronomist for Huntingdon Co., to Chazy, N. Y. to visit "Heart's Delight Farm," owned and operated by Mr. W. H. Miner.

As had been previously agreed upon, cars met at Moose, N. Y., from this point they proceeded on together until a cool, shady place was found and here the inner man was cared for.

After lunch and a brief rest, the party went on to the Farm, and reported to the office. Here two guides were met and the inspection began.

Heart's Delight Farm is a farm of 14,000 acres owned by Mr. Wm. L. Miner. Mr. Miner as a boy was raised on a farm which is to-day the nucleus of his present large estate. Fortune smiled upon him and he came back to the old farm, and acquired surrounding lands so that to-day he has one of the finest estates that one could hope to visit.

The party first visited the stables and other buildings that make up the establishment. From them the party travelled through the game preserve where buffalo, deer, antelope and other wild animals are kept.

As they travelled over to the North farm. Here we saw a field of 180 acres of wheat; another field 30 acres in size was planted to beans, while a second crop of alfalfa was being cut on a 125 acre field. Finally we reached a 100 acre field of barley that was being threshed in the field. Here we had the pleasure of meeting Mr. Miner himself, who gave us much interesting information about his farm. The threshers were turning out grain at the rate of 6 bushels per minute. One machine was operated by electricity, the other by steam. This field of barley was yielding an average of 50 bushels per acre.

Next a visit was made to the Chazy Central Rural School which institution that cost over one million dollars to build and which replaces all the little red schools for an area of 5 miles around Chazy. This is one of the finest institutions of its kind to be found. It is a splendidly equipped school. Here children are taught from the Kindergarten to the Graduating Class in High School how to be better practical and useful citizens. Each teacher is a specialist and teaches only one subject, but he must be in the subject. Each subject is taught in a room so built and decorated as to give atmosphere to the subject. For instance, French and Latin are taught in the Cicero room which is a room decorated in purely Roman style. Indication of the steady increase in the number of beekeepers and colonies of bees is afforded by the fact that though the honey flow is only about two-thirds that of last season, the total output of honey in British Columbia will be as large as that of last year.

CAR SLIDES OFF MARBLE HILL

Car Slides Through Railing And Down To Water Edge

NONE HURT

Only Two Punctured Tires Result of Spectacular Accident

A remarkable escape from death was witnessed by Emerson McNair of Huntingdon on Sunday. Mr. McNair was driving along the Howick road leading from Boyd's Lines to Chateaugay. Just as he topped the big hill leading down over the Marble Hill he noticed a car in trouble. The car had coasted down one side, but when approaching the other side the gears apparently would not catch and it started to slip back. Efforts to stop it failed and it gained momentum as it slid down the smooth cement road. Finally it crashed through the two inch railing and slid down into the river. Just as it reached the bottom it struck a large stone, which turned it completely around and there it stopped. Investigation showed that apart from dinges caused by breaking thru the rail, the only injuries suffered were two punctured tires. The car was a Dodge and was occupied by three persons, a man and a lady. How a fatal accident was avoided is a mystery for the bank is both long and steep.

\$5000 RACE HORSE DROPS

Winner of Race at Ogdensburg Fair Drops Dead

A valuable trotter, Clara Brown, owned by David Stearns of Plattsburgh, dropped dead soon after winning a race at the Ogdensburg fair. A post mortem examination which was made by Dr. Cowie of Ogdensburg, disclosed that the horse died as the result of a ruptured artery near the heart. The horse was very fast and was valued at \$5,000. Mr. Stearns' loss is partially covered by insurance.

ICE AS "DRY GOODS"

(From the Westminster Gazette)

The ice which which we temper our summer heat was a luxury unknown to our not very distant forefathers. The first person to think of importing ice in summer brought over a cargo of 300 tons in 1822, but hardly found the experiment successful. The Customs officials were puzzled to know under what classification to levy duty upon the cargo, and by the time they had decided to charge it up as "dry goods" almost the whole consignment had melted.

A. MCFARLANE WINS OATS COMPETITION

Result of Howick Farmers' Club Competition Out

The standing Oat Competition held under the auspices of the Howick Farmers' Club has been announced and the first prize is won by Albert McFarlane with 81 points to his credit. Samuel Reddick was only one half a point behind in second place. The judging was done by Messrs. A. Craig and T. E. Robertson. The prizes were \$6, \$5, \$4, \$3, \$2, \$1. The standing by points follow:

Albert McFarlane 81 pts.; Sam. Reddick 80½; Jas. A. Cullen 80; R. O. Holmes 76; Wallace Templeton 75; A. Allen 74; W. W. Orr 72½; Albert Nussey 67; J. W. Logan 64½; Jas. Carson 63½; Dan McCaig 62; Wm. Wylie 61; D. Glen 54.

ST. MARTINE

A mighty good rain commenced Monday night, very light, just to lay the dust but from eight o'clock Tuesday morning it fell good and hard, by intervals the whole day and evening. This will be a great help for the grass, buckwheat, corn and late potatoes.

M. W. Laberge and Desrosiers are still out buying hay at \$10 to \$12 a ton to be delivered when called for.

A carload of coal (Chestnut) was delivered on Monday. The stove coal is slow coming.

J. A. Marcell, when working on the show ground last week fell off a scaffold and hurt his right hip. He only lost one day and is almost O. K. now.

N. Y. OFFICERS MAKE HAUL

Eleven Cars and 12,000 Quarts Taken Within 30 Minutes

Eleven cars and 12,000 quarts of beer is some seizure to make, especially when all are taken within half an hour. Such was the big record hung up in Northern New York Sunday morning when Prohibition officers made the seizures on the highways of Clinton county, near Chazy. The first car was sighted about 5 a.m., and as the cars were proceeding in sections of fours, the three sections were picked up without much trouble. Some of the drivers escaped, but six men were arrested. The cars were towed to Malone, while specimens of the booze were kept and the balance destroyed on the spot. The cars comprised a Buick touring, a Dodge Bros. touring, an Oldsmobile touring, a Peerless, a Packard, a Cadillac, an Oldsmobile coupe and a Ford. The cavalcade when it drew into Malone on Monday presented quite an imposing sight.

It is stated that over 200 Prohibition Enforcement Officers are now posted along the neighboring border.

The Field Secretary of Ohio Guernsey Breeders is arranging for the sale of breeding stock on the installment plan. The arrangements are being made through co-operation with local banks. Purchasers are to pay a third to a half down and then pay the balance in instalments through local banks.

Co-operative fertilizer orders for fall delivery in Ohio have reached 100 cars. On spring deliveries co-operators have received rebates aggregating nearly \$26,000.

Canadian Immigration

The Hon. Mr. Robb, who has been Minister of Trade and Commerce in the present Ottawa administration since its formation, was on Friday appointed to the newly formed portfolio of Immigration. This portfolio had existed during the life of the former government, but had been merged in that of Interior when Mackenzie King took control. For the purpose of economy it had been thought that it was not necessary to have a minister devote all his time to this one department, but recent months have shown the necessity, hence the change.

During the time which has elapsed since the war ended, no question on the American continent has been as freely argued as the pros and cons of immigration. We have seen the United States pass from the open door policy to the limited quotas, with predictions of still smaller admittances to be ordered by the coming Congress. In Canada capitalists, industrialists, railwaymen and various other organizations have repeatedly been demanding that more settlers be admitted, while at Ottawa, and in many other parts of the Dominion individuals have deplored the invitation to more to come until the present financial stringency has been passed. In this condition lies the worst of the trouble. No unanimity of opinion appears to exist in the minds of any section on the subject, and in consequence little has been done either one way or the other, but conditions have become more acute and something had to be done, so to Mr. Robb has been given the responsibility.

The present harvest season has shown a lamentable state of affairs in the East. Hundreds of farmers have been unable to get competent farm help, even at \$4.00 a day. The aggravation of this condition each year has made it necessary to purchase all forms of labor-eliminating machinery, and this being expensive, and has curtailed the general buying power of the farming communities. The same number of employees that a mill might employ would supply the wants of the farms of a county, but when this help will only work in the industrial centres, it means a heavier cost of production for foods, and decreased cultivated areas. This summer within the immediate vicinity of Huntingdon are several farms where the farmer alone had to harvest all the hay crop. Will that same farmer sow the same amount of land next year? He will not. And this means that much less food to be placed on the market. Multiply this conditions throughout the concessions, parishes and counties of the province of Quebec alone and an annual loss of millions of dollars will be felt in a few years unless the condition is rectified. That such correction is to be undertaken by the Government is fairly apparent, for Mr. Robb has proven himself to be a most capable and popular minister of Trade and Commerce, and his removal to another office must signify that the Cabinet consider a tried man is necessary to undertake this work of immigration which is the centre of interest throughout the Dominion. About the populating of the Dominion there lies an importance far beyond the rule of things ten years ago. The Dominion Government has become so emeshed in the business of Canada, and particularly in the railroads that the solution of the one problem tends to solve the others as well.

The Cost of Automobiles

Not so much in the press, but frequently in conversations among people travelling, is the remark made that the auto is responsible in part for the bad financial position among the people of Canada and the United States. There are many who believe that the motor car is being abused, that it is being put to uses for which it was never intended. In the minds of the inventors the idea was to make a mechanically driven vehicle that would transport travellers faster and more economically than a horse. Time passed and the popularity of the auto reached its present dimensions. Railways now complain that it has cut into their business to an alarming extent, while the annual time spent in holidaying must have increased tenfold since the automobile reached its present state of perfection. As a demonstration of what the cars of one state cost the Department of Public Works of the State of Nebraska has compiled some estimates for the present year. According to newspaper reports of these figures, it is estimated that for gasoline, oil, insurance, depreciation and interest on investment, the 2,000,000 people of that state will this year pay the sum of \$135,000,000. Of this two million of population about 200,000 live in cities, the remaining nine-tenths are in rural centres or districts, so a comparison is made of the production of crops in the State to show where the money comes from. Kansas is a great corn growing state and it is estimated that the present crop will sell for seventy million dollars. Another crop, which is the second principal grain crop of the state, is wheat and this will bring another 18 millions. It will therefore be seen, if the figures are accurate, that the whole proceeds of the two main crops do not cover more than two-thirds the cost of running automobiles.

No invention has done more to improve the rural life of the United States and Canada than the automobile. It has increased the community spirit; it has brought the farm home closer to the social life of the towns and has eliminated many of the lonely aspects of the rural life of yesterday. But the urban dweller, the villager or the farmer, who permits himself to waste time or money in his automobile is a liability to himself and to his community. It will be through properly appreciating the uses of the car, the reasonable time of service that it should give and the ways in which it will pay for itself that the greatest benefit to the country can be obtained. Through proper care and use, the life of the car will be lengthened, the depreciation reduced, and less capital required to supply the needs. It will also tend to bring down that bugbear of the dealers—the disposal of used cars. The pleasure uses of automobiles seem to be overdone while the commercial uses are not nearly appreciated. In this latter type of utility the greatest hope for the future is to be entertained.

UNIFORMED COP TO BE ON ROAD

Mr. Philips Has Been Requested to Name Traffic Policeman in Huntingdon

Quebec, August 21—It was announced today that in a further attempt to check speeding on highways and roads in this province, a number of motorcycles have been purchased by the provincial revenue branch, and will be utilized within a few weeks by a number of speed officers, who are now in training for their new duties. The main object in view, it is said, is to allow these officials to warn visiting motorists, and prevent them from violating the Quebec motor vehicle regulations. At the present time the law can only be enforced as far as residents of the Province of Quebec are concerned. In other words, it is rather difficult and very expensive to get after the violators of the law except in very serious cases.

FARMERS AND BANKS

Nearly four thousand persons designated as farmers, ranchers and wheat growers in Canada were registered as shareholders in Canadian chartered banks in 1922. The number of farmer shareholders, by province, was as follows: Alberta 216; British Columbia 93; Manitoba 830; New Brunswick 65; Nova Scotia 245; Ontario 1,188; Prince Edward Island 38; Quebec 465; and Saskatchewan 747. A total of 18,873 farmers paid income tax to the federal treasury in the year 1922, and of all the provinces, Saskatchewan last year had the greatest number of tax-paying farmers with a total of 6,560. Ontario came next with 6,138 and Manitoba third with 3,458. The total for the other provinces were: Alberta 1,638; British Columbia 640; New Brunswick 48; Nova Scotia 198; Prince Edward Island 40; Quebec 150 and Yukon 3.

HEAD ENGINEER DEFENDS GRAVEL ROAD WORK

Continued from Page 1
matter of road maintenance were only a question of satisfying the needs of traffic, no matter at what cost, I admit it might be stupid to resort to gravel resurfacing as a method of maintaining waterbound macadam in the township of Hinchinbrook as well as in any other municipality of the Province. But as gravel resurfacing and future maintenance as gravel roads will evidently be less expensive than waterbound macadam resurfacing and the future maintenance as such in the case of the township of Hinchinbrook and all the other municipalities where proper local gravels are available, I believe that it would be stupid to stick to waterbound macadam

just because the present improved road is waterbound macadam. Apart from that, gravel surfaces will give entire satisfaction to the traffic that the roads of Hinchinbrook or Godmanchester or any other municipality in your district will be called upon to bear. As a proof of this, I only want to call your attention to the fact that in some of the most advanced states of the United States where they have the proper local gravel available they maintain most of their roads with gravel. Let us take for instance the state of Michigan. Mr. C. C. Dillman, Maintenance Engineer of that state, and Herschel C. Smith, Assistant Professor of Highway Engineering at the University of Michigan, said in a lecture delivered at the Eighth Annual Conference on Highway Engineering held at the University of Michigan from February 13 to 17th, 1922: "We have a great gravel mileage in the state. In fact, of the approved mileage in the state, 68 per cent is gravel, so the matter is really of considerable consequence."

"The gravel road at the present time comprises about 68 per cent of the total mileage of our state highways which have been improved. The abundance of material scattered throughout Michigan satisfactory for use of this type of surface makes it very desirable that a means be worked out whereby the gravel road can continue to be satisfactorily used up to an economical limit of traffic."

Now, what is the traffic on those Michigan roads? Here is what Professor Smith said about one of them, the Truck Line Highway No. 13, in Kalamazoo County: "The actual count covering seven days in as many separate weeks within the time of the test, showed an average of 1,526 vehicles per 24 hour day, with a daily average of 32 trucks over two tons. I could give you a good many other examples like that from the United States."

Now let us come back to our Province of Quebec. One of our most travelled highways, the Sorel-Dorchester Line Highway, has been improved with gravel since 1914, is still maintained as a gravel road, has stood the heaviest traffic of all our highways, has given and still gives entire satisfaction to the travelling public and is still in good condition. We have here the best example of what a good gravel road can do. Everybody can see it and it is the best argument in favor of gravel roads. Traffic counts taken in 1922 showed an average daily traffic of 1253 vehicles per day. It is safe to say that said traffic has increased by at least 50 per cent since that time.

Now, as a conclusion, if a gravel surface is less expensive to maintain than a waterbound macadam and if it gives satisfaction to the public, that uses it, why then should we stick to the maintenance of the waterbound macadam as a waterbound macadam?

All we ask from the people interested in good roads in the county of Huntingdon is to wait till the end of the season, when our gravel resurfacing will be finished, packed and put in good shape, before making up their opinion as to the value of our road maintenance policy.

Yours very truly,
Alex. Fraser

HOWICK FARMERS' CLUB SEE THE WONDERS OF MONTREAL HARBOR

Trip Made Around the Harbor As Guests of the Montreal Harbor Commission A Great Success—14 Miles of Docks—Cold Storage Plant Inspected.

A trip, far out of the ordinary, was enjoyed by the Howick Farmers' Club last Thursday, when a tour of the Montreal Harbor was made as the guests of the Harbor Commission. The day was perfect for such a trip, cool and bright, and Deputy Harbor Master Perrault himself took charge of the party.

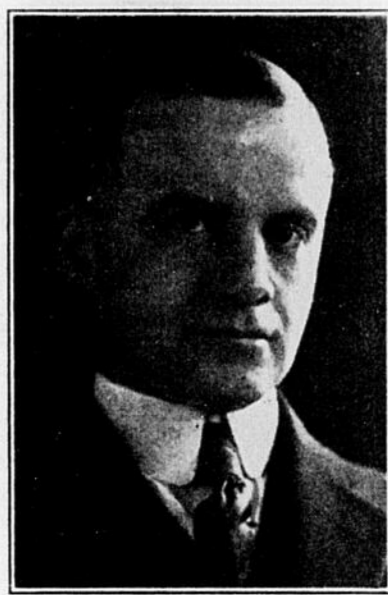

The invitation had been extended to the Club through the good efforts of the Rev. R. L. Ballantyne, and with the club members were Dr. Whillans, President Sangster, the Directors and Secretary of the Ormstown Show and R. W. Sellar of Huntingdon, making a party of 35 in all.

At 11 a. m. the cars had pulled in to the quay at the foot of McGill Street and the new Harbor Commission yacht "Gayalma" was boarded. This boat was the subject of considerable debate last session in Ottawa when her purchase price was discussed. This was the second official trip around the Montreal Harbor and the crowd were quite satisfied that it was an ideal boat for such a trip.

The extent of the Montreal Harbor was a revelation when examined from the water. It cannot be appreciated from the street, but as the "Gayalma" slowly steamed along and Captain Perrault explained that at the present moment 43 ocean-going steamers were lying in the docks, the hazy understanding of the Montreal

too large for the great Lakes business, so there they lie waiting for better days. In Montreal there are six of these, but the excursionists were informed the United States had several hundreds tied up for the same reason.

Now the open country is approaching and Dominion Park is at the distance, but before it is reached the big dry dock and manufacturing plant of the Vickers Company is passed. At the present time the plant is engaged in building ships of a different type for the government—seaplanes, the Company having a contract for \$800,000 worth.

CAPTAIN D. J. PERRAULT
Deputy Harbor Master Who Entertained the Howick Farmers' Club on Their Trip Around Montreal Harbor

Longue Pointe is reached and the turn is made and as the boat steams up against the current, the impression gained on the downward trip is heightened. Grain is king in Montreal Harbor. Elevator after elevator is passed and Captain Perrault is pleased to tell of two great elevators now being erected by the Harbor Commission. One that was seen under construction was started in the month of June and is now over 50 feet high. It will hold 2,000,000 bushels of wheat when completed, and is to be ready for the opening of navigation in the spring, and it is only one of many. Grain spouts for loading and unloading the grain boats, transferring the cargoes from Lake to Ocean-going carriers were on practically every quay. It was explained that more facilities were going to be installed to increase the speed of handling, and that Montreal would remain in the van of the great grain-handling harbors of the world.

Visit Cold Storage
After the boat trip the party made a trip to the Montreal Cold Storage where they were welcomed by Mr. Franklin, manager of the plant. Walking from his office to the main warehousing floor, Mr. Franklin explained that the size of the building, 440 feet long and 115 feet wide, permitted 12 refrigerator cars to be loaded in the building simultaneously. At the same time 12 others were on the siding outside, and connected by a device that made it possible for the management to haul them in and haul others out at any time without the services of a switching engine being required. In this way they had 36 cars at their disposal with one trip of an engine.

This building was constructed a year ago, and is the largest cold storage plant in North America. It cost \$2,500,000 and is owned and operated in conjunction with the Harbor Commission. The contents are placed there by private individuals, the management of the plant, themselves doing no such business. Mr. Franklin immediately led the party to the upper floors of the building—it is ten storeys high. On the first big floor that he showed the crowd around, were

stacks of bags, which came from Oregon, which the Rev. Ballantyne could not identify by smell—they were full of hops. These were done up in big bales and were kept at a moderate temperature. On another space in the open were big bales of cotton, kept there because the building was dry and fireproof.

M. P. FENNEL
Executive Head of Montreal Harbor

Rapidly the crowd passed through rooms in which were kept fruits of various kinds, principally tropical varieties. The temperature varied in each according to the kinds stored. Each floor was divided into a series of rooms or compartments. One heavy door locked the compartment while another door inside helped retain the temperature. Outside each door, elevator and passageway, are rolled metal shields. These shields are automatically released and close down over their gaps as soon as the temperature changes five degrees in a minute. Sprinkling systems overhead also automatically watch for fires and should one break out at any spot, faucets automatically are released, and as these are only ten feet apart, Mr. Franklin stated any fire could be kept within the ten foot radius.

Coming to the floors where the produce of the farms is kept, the interest, already keen, increased. A trip to an iceberg of a room showed frozen mutton, veal, beef, etc. Here the temperature is kept at around zero, and to anyone who desires a cool spot in summer that compartment is recommended. It gave a weird feeling to rap the flank of a calf and hear the blow rebound as off a board, and then walk out into the warm air.

The cheese rooms were entered and Mr. Franklin took an opportunity to expound on the cheese business in general. He stated that the room was kept at one or two points above the freezing point, as this gave the cheese a chance to cure properly. A higher temperature caused too rapid curing; a low temperature was just as bad. He depreciated the present practice in many factories of sending cheese to the market when not properly cured. Some factory men thought they were being sharp in doing this and were paid for shrinkages, but such was not the case. The stuff was now sent to storage to properly cure and was then graded. Of Canadian cheese in general he was proud of. It was the best in the world, but there were things about it that required

better attention, and curing was one of them. Taking the crowd in to another room he showed them a pile that was a curiosity, New Zealand cheese. This cheese was brought into Montreal last spring before the Canadian crop came along, and was now nearly all sold. Instead of the Canadian boxes, it is crated in pairs with a solid wooden head at each end. The head is a solid piece of wood and the side pieces are spaced a little apart to give the cheeses a chance to cure. The whole is held together by means of nails and wire lashings. Comparing these to the Canadian boxes, Mr. Franklin declared himself as inclined to favor the New Zealand method. It was more substantial. There was more chance for better curing. It was more economical in floor space, and from practical experience he knew that shipments landed in far better shape than he could imagine the ordinary Canadian box would be after traveling a similar distance, and suffering from the same amount of handling. He then elaborated on the lack of proper fitting in the Canadian boxes. When export shipments were made to the Old Country the race was established by a cubic foot basis, so that waste space could not be tolerated, and in three rooms in the building men were busy cutting down boxes, so as to properly fit the cheese. It was an expensive work and much of it could have been avoided by a little more care.

Another room of interest was filled with butter. This is kept at a good deal lower temperature than cheese and great care has to be taken to keep the air clean and sweet. Outside various boxes were being opened up for the inspectors to come along and test them. A.

G. McMILLAN TO BE CATTLE JUDGE

Prominent Breeder Selected to Judge at Great American Show

The National Dairy Exposition to be held at Syracuse from Oct. 5th to 13th is to have one Canadian Judge among the cattle judges, Mr. Gilbert McMILLAN, of Huntingdon, having been selected. His fellow judge on the Ayreshires will be Prof. Klidde of Ames, Iowa.

INTERNATIONAL INDIAN FAIR

Indians of Both Countries To Compete in Fair at Hogansburg

An International Indian Fair, in which the Indians of the Canadian reservations will join with the farmers and residents of the St. Regis Mohawk reservation, will be held at Hogansburg Thursday and Friday, August 30th and 31st. Dairy cattle, horses and farm products will be exhibited, with other exhibits designed to show the advancement which is being made in agriculture on the reservations on both sides of the line. A fine band has been engaged to furnish music both days and a midway full of attractions will be a feature of the fair. Chief Moses White is president of the Association under whose auspices the fair will be given and is leaving nothing undone to make the event a success.

ORMSTOWN

TOWN COUNCIL ADOPTS FIRE PRECAUTIONS

By-Law Passed Requiring Household to Have Buckets and Ladders

At a council meeting on Monday night two by-laws were passed by the council. One was for the purpose of setting the rate of taxation for the year at 17 mills. The other was a fire protection by-law.

The fire protection by-law was passed on the recommendation of the Quebec Fire Commissioner who sent this week a check of \$2500 to cover the Town's share of the cost of the fire engine and other equipment recently purchased and installed by the council. At the same time Mr. John advised the Secretary, W. K. Philips, that he had a further sum of \$620 which would be paid over on the Council carrying out the balance of the Fire Commissioner's recommendations. He also stated that the Government would give a grant of \$720 if the council should decide to install a fire alarm system.

The new by-law calls for every householder or occupant to keep five fire buckets or other suitable receptacles about his house. Also that each house have a ladder which would reach to the roof and another that would reach to the top of the building. It is further provided that it shall be a punishable offense for anyone to have open lights about a barn, etc., or to smoke about a stable within the limits of the town. Provision is made for the erection of chimneys and for the proper distance from wood work, etc. Every chimney must be swept and fixed in the manner in which they are to be stored. A fine of \$40 can be assessed against anyone driving a horse or car over a fire hose. The by-law is to come into force in 20 days.

CHATEAUGAY CREEPING UP

Wins League Game From Brainardville—Dupree Allows Only One Hit

Friday afternoon Chateaugay won an easy game from Brainardville on the Chateaugay diamond. The one and only Bill Dupree was present and displayed his assortment of curves, near curves and speed. As a result he has the honor of a win, and the Cooke hadn't popped a single behind second in the sixth inning he would have had a no hit game to his credit. Bellows started for Brainardville with Thurber catching him. He threw average good ball until the fifth when Chateaugay took away the 1 to 0 lead. He declined to go in again in the sixth so Big Dave was moved from first. The sixth passed easily, but in the eighth with two on and one down Englisha hurt the top of the backstop when he tried to cut Rouvelie on at the plate and Duffy also scored. The final score was 7 to 1 for Chateaugay.

Batteries: Chateaugay, Dupree and Fay; Brainardville, Bellows Roberts and Thurber.

LEAGUE GOSSIP

This afternoon Ellenburg is to play in Huntingdon and Chateaugay in Brainardville. This game is an important one in the league standing for on Friday Chateaugay won from Brainardville and this put them into second place. Next Tuesday Brainardville goes to Ellenburg while on Wednesday Huntingdon goes to Chateaugay. This should be a game worth going miles to see for both teams have made an even break in the four games this season and there are only two more left. The last two games went 12 innings each. Huntingdon winning in Chateaugay and Chateaugay in Huntingdon. The management of the Chateaugay team have announced that they intend putting the strongest team in the field that has yet worn the Chateaugay colors. Huntingdon will have their usual strong team with Bush in the box and backed by fast infield and outfield.

The League standing is:

	won	lost	P.C.
Huntingdon	8	4	.667
Chateaugay	8	5	.615
Brainardville	7	6	.538
Ellenburg	1	9	.100

Vessels of galvanized iron are not suitable for containing food materials, as many of these have solvent properties on the metal.

HOWICK FARMERS' CLUB SEE THE WONDERS OF MONTREAL HARBOR

Continued from Page 4
According to their testing results of these boxes the grades of the various shipments would be established.

The vast size of such a building is hard to appreciate until some little remark about some well known product is made. This happened when the door to a room was opened and the casual remark made that in there were 1,300,000 dozen eggs! The temperature in this room is kept close to the freezing point, but above it. In addition great care has to be taken of the humidity of the room. If it gets too dry the water would evaporate out of the egg, and if it gets too damp, a mould would gather on the shell. Eggs were also very sensitive to smells, so the air in the chamber was so arranged that it could be sucked out and replaced by new air within seven minutes. Provision is also made for the frequent washing of the air.

Rooms of fish, fowls, beef, etc., were pointed out and Mr. Franklin explained how great an advantage the plant was proving to the farmers and the consumers. It was stabilizing the prices, and so kept it that bad breaks in the flush season could not occur, while in the short season the consumers were able to get what they needed. He explained his attitude towards the handling of the food markets, and the gambling that existed to a certain extent, by a story. Some men in California decided to go in to the fig growing business and planted orchards. The trees grew alright, blossomed, but never bore fruit. The U. S. Department at Washington was called in and they sent an expert to inspect the trees. He looked them over and went

Chief St. Denis who hails from Malone and is well known to Huntingdon and Valleyfield baseball fans, may go up further next year. A dispatch in the Montreal Star on Monday stated that the Chief was being watched by the Chicago White Sox and that it was expected that he would be purchased from the Quebec club this fall.

back and reported they were nice trees, that they blossomed alright, were fig trees and should bear fruit but they didn't. An Entomologist was then sent and he looked over the ground. He came back and reported that there were no bugs around the grove: that should interfere with the production of fruit, but suggested that he be sent to the Mediterranean to study the business. He went and was away several months. On his return he brought a number of bugs he had found there and released them in the California groves. These bugs, flying from blossom to blossom, pollinated the flowers and from them on great crops of figs resulted. "Is the food market the gambler is the bug that keeps things moving," said Mr. Franklin.

Again on another floor, he spoke on the prospects for the future in new lines of activities. He was looking down over a space where 30,000 barrels of apples had been stored last season, and which had been kept to the great satisfaction of the dealers. He said that there was no reason why small fruits, such as blueberries, raspberries, strawberries, etc. should not be kept in cold storage and placed on the market during the winter time. From experience the men present probably knew that once frozen fruit would rot and rot rather quickly, but he was satisfied from tests he had made, that properly frozen fruit, kept at a uniform temperature during the storing season, could be put on the market during the winter time. By this he did not mean that frozen strawberries for instance could be served with cream, but for shortbread, cakes, etc. they would be ideal and would retain a better flavor than preserved ones.

Coming back to the spot where they started from, all shook hands with their host and left with the cordial invitation to return again. Outside just before they loaded into the cars for the home trip, Mr. Ballantyne voiced the appreciation of all for the great kindness and consideration of Captain Perrault in devoting his time to explaining the wonders of the Montreal Harbor and of the great work that was being done there.

Captain Perrault in saying "Good-bye" expressed the regrets of Mr. Fennell because his duties of the day had prohibited him from being with the party. He was pleased to be able to show them the great improvements that had been made to the harbor, many of which were instituted during the years when the Hon. Mr. Ballantyne was the Canadian Minister of Marine.

The Fretful Cow Gives Little Milk

A hungry cow is always fretful. She wanders all over the dried-up pastures looking for food. A fretful cow cannot make milk.

Feed your herd Schumacher Feed when grass is poor. It is a sustaining feed that is helping hundreds of dairy herds to give more milk. Cows eat Schumacher greedily, digesting every scrap. Schumacher-fed cows are contented, well-nourished cows. They produce more and richer milk. Schumacher Feed will bring hogs along to market at an early age. It produces good sound flesh.

SCHUMACHER FEED

Write us regarding your hog and dairy problems. Our Live Stock Service Department can help you. Its advice is free.

SAD DROWNING ACCIDENT OF YOUNG MAN

In Fit of Despondency H. A. Fitzsimmonds Takes His Life

The body of Harold A. Fitzsimmonds, 28 years of age, a patient at the Protestant Hospital, Verdun, who was drowned in the river opposite the hospital last Wednesday morning, was recovered at 6 o'clock. The drowning occurred at 8 o'clock in the morning, shortly after the patients had finished breakfast. Fitzsimmonds was seen running down towards the river by another patient, who notified an attendant. The attendant followed in pursuit, but before he could come up to him Fitzsimmonds had entered the water and was wading out towards the middle of the river. Calling to the patient to stop, the attendant plunged in after him. His shouts were of no avail, and when he was about two hundred yards from shore the attendant saw Fitzsimmonds disappear beneath the surface. He did not come up again. The Verdun police were notified and Constables Caron and Klem, after searching all afternoon, found the body in the evening. Fitzsimmonds, whose home was at Huntingdon, had only been a patient at the hospital since the middle of last April. Of late he had appeared very depressed, and had been heard to say that some day he would throw himself into the river.

ARRESTED 40 TIMES BY HIS BETTER HALF

Montreal Police Court Case Produces Talkative Wife

(Montreal Gazette)
 "How many times has your wife had you arrested during your 25 years of wedded bliss?" asked Leonce Plante Friday afternoon of his client, Tom Coleman, 65 years of age, charged with non-support.
 "I have a record that will beat that of any other man in Montreal," answered Coleman, "she had me arrested about 40 times—starting soon after we were married, and even when I was hurt and had to go around on crutches."
 "It's a lie," shouted his spouse, aged 60, from the well of the court.
 "Order, order," shouted the court.
 But Mrs. Coleman was not to be stopped. In the witness box and out of it she kept up a running fire of questions, comment and denunciation of her husband, his lawyer and a woman who, she said, was now the recipient of her husband's affections. He had never supported her, she said, and would do everything he could to get out of his obligations.
 Coleman had a different story. He had always tried to do his best, but Mrs. Coleman made him lose every job he got, by denouncing him and the "other woman" before his fellow workers. He was not earning anything now, he said, and was being supported by a daughter.
 Mrs. Coleman again affirmed aloud in picturesque language that her husband was not telling the truth.
 "Mrs. Coleman," interposed the judge, "you talk so much that I am astonished your husband was ever able to live with you at all. You won't let him give his evidence; you interrupt his lawyer, and I can hardly get a word in myself."
 "Well, your honor," began the woman.
 "I will take the case under advisement and give judgment next week," said Judge Enright. "He looks like a peaceful man."
 "But you don't have to live with him," came back Mrs. Coleman, while the court rocked with laughter. A faint ripple of applause was heard. Several people clapped their hands.
 The case was struck off the roll for the day.

FORT COVINGTON

Miss Jane McElwain of Bombay spent the week end with Mrs. C. Murphy.
 The Franklin Medicine Show which has been here the past two weeks, had a crowded house each night. They go from here to Burke, N.Y. for two weeks.

Mrs. Sara Bushy won the chest of silverware which was given away at the show Saturday evening, for the one out of six ladies who could drive six balls straight into a block of wood the quickest.

Mrs. Bashaw, Sr. fell at her home and broke her arm.
 Mr. and Mrs. Abe Pillings of Burke were callers at the American House Monday.

Mr. A. Butler of Michigan spent a few days the guest of Mr. and Mrs. Ben Derochie.
 Miss Amazella Derochie visited friends in Helena, N. Y. the past week.

Mrs. W. D. Creighton and Mrs. J. McQueen spent five days the past week in Montreal.
 Mr. and Mrs. Ray Colter who spent two weeks in Dundee returned to their home in Boston on Saturday.

Mrs. Dan Grant returned home from a visit to Troy, N. Y.
 Mrs. Banane and daughter Marion of Potsdam, N. Y. are guests of her mother, Mrs. Ed. Tallman.

Mrs. Joe Barney has gone to Boston to make her home with her daughters who reside there.
 Mrs. Joe Barney sold the blacksmith and wheelwright shop belonging to her late husband to Mr. Charles Mahew.

Mrs. McCartney returned from a trip to Canandaigua, N. Y.
 Mr. Walter Brown of Huntingdon visited friends in town Sunday.

Mrs. Messrs. Thos. and Chas. Lowe, Dan Grant and Thos. Fraser, attended Ogdensburg Fair Saturday.
 Mr. O. C. Harrington of North Bangor, N.Y. was a caller in town on Saturday.

Mrs. Wm. J. Finland and daughter Betty of New York are visiting her parents Mr. and Mrs. John Hebert.
 Miss Anita Brushey of Montreal is visiting her sister-in-law Mrs. Ed. Brushey.

Mr. John Laycock of New York has again returned to the Condemned Prison.
 Rev. J. L. Desjardins and Mr. and Mrs. Paul Prud'homme returned on Friday from a visit with relatives in Montreal.

Mr. and Mrs. Sam Miller and daughter Kathleen, and Mrs. W. J. Messrs. Thos. and Chas. Lowe, Dan Grant and Thos. Fraser, returned on Friday from a visit with relatives in Montreal.

Mr. and Mrs. Geo. Gorrow and his sister, Mrs. Finland motored to Honeck, Ont. and visited relatives. Mrs. C. Turcot returned with them and is the guest of Mr. and Mrs. John Hebert.

Mr. and Mrs. W. S. H. Keefe and family of this town and Dr. Coulter and family of Malone are in camp at Hopkin's Point.
 Mr. George Peck has returned to work in the condensary.

Customs Officer Martin Holden of Ogdensburg spent the week end with his parents Mr. and Mrs. David Holden.

Mr. A. H. McNair and son Merton attended Valleyfield Fair.
 Mr. and Mrs. Bert Wright of Poughkeepsie, N. Y. spent a few days with friends in town the past week.

Rev. F. J. and Mrs. Fulton returned home from their annual vacation.
 Mrs. J. C. Elliott left Wednesday for Mooers, N. Y. where she will visit friends and relatives.

Mr. Harry Storm had a valuable horse stolen from the pasture on Monday night and on Wednesday it was found in a livery barn at Huntingdon.

"Send me telegrams and send them collect," said Mayor Rolph, speaking into the microphone as he opened a new radio broadcasting station at San Francisco.
 "Come on, everybody, I want to find out how far my voice is carrying." He found out. By the next day the telegraph tolls had exceeded \$3,000. By now he may wish that he hadn't spoken so loud.

MURDERER OF F. Y. YOUNG CAPTURED

Man Formerly Worked For Mr. Young—Makes Escape And is Still at Large

The murderer, or at least the man suspected of murdering F. Y. McFee of Arlington, Wash. was captured but escaped. Relatives of the late Mr. McFee in the Hemmingford district have received various newspapers from the Coast and in the Courier-Times of Sedro Woolley, Wash., the following report of the arrest and subsequent escape of the alleged slayer is given.

The capture of a man thought to be the leader of the gang which held up and killed Finney McFee, and his escape from the officers in Idaho, are new developments of the McFee case, but the most striking feature is that the man, W. C. Bates of Bellingham, who was arrested and who, according to officers, is said to have admitted his complicity was for some time employed by the Lyman Timber company, and lived at Hamilton, where he was well known by McFee and others of the company.

The theory is advanced that perhaps Bates, it were he who fired the shots, recognized McFee and was afraid that McFee might recognize him, and accordingly shot him. Bates lived at Hamilton for some time, marrying a school teacher there. He has been in Bellingham for the past year or two.

Bates was on parole from the Montana penitentiary, where he has quite a crime record.
 Two years ago several cars were held up on the Chucanut Drive by the same suitcase ruse employed in the Arlington road holdup, and officers have kept watch of Bates and his wife. Bates was traced by officers in Bellingham, who learned that his wife planned to meet him in Idaho. When she left Monday, other officers in Snohomish county were notified.

They took the trail and he was caught by the Snohomish county sheriff at Ball Creek camp, Idaho. He escaped a short time later by leaping down a flume, and posses are still searching for him. Officers say that he remarked to them: "I guess you know all about it." Two watches found in his possession are said to have been identified as property of the motorists held up at the same time as McFee was murdered.

Mr. A. H. McNair and son Merton attended Valleyfield Fair.
 Mr. and Mrs. Bert Wright of Poughkeepsie, N. Y. spent a few days with friends in town the past week.

Rev. F. J. and Mrs. Fulton returned home from their annual vacation.
 Mrs. J. C. Elliott left Wednesday for Mooers, N. Y. where she will visit friends and relatives.

Mr. Harry Storm had a valuable horse stolen from the pasture on Monday night and on Wednesday it was found in a livery barn at Huntingdon.

CIRCUS TRAIN CUTS OFF BOTH HANDS OF BOY

Bernard Show Train on N. Y. C. Wounds 13 Year Old Lad

Sunday afternoon a special train passed through Huntingdon, consisting of the equipment of the Bernard Shows. The train of the equipment was a long one and as the animals could be seen in the animal cars, crowds gathered wherever the train stopped. Near Montreal in doing this a 13 year old boy, James Martin, had both his hands cut off. The accident happened on the C. P. R. tracks near the Cote St. Luke road. He was taken to the Windsor Station on an inbound train and removed to the Montreal General Hospital, where his condition is regarded as serious. The train which ran over young Martin is a New York Central special used by the Bernard Greater Shows, and was en route to Three Rivers from the United States. According to information obtained by officials at the Windsor Station the victim had been standing on the tracks attempting to obtain a view of the circus animals while the train was halted near Cote St. Luke road. It is thought that when the train started suddenly the Martin boy became confused, and in moving away tripped and fell under the wheels of the cars. The circus train was immediately stopped, and assistance given to the injured boy. A Montreal bound train from Quebec was signalled to stop, and the victim carried aboard and taken into the city. Late that night young Martin was reported to be in a dangerous condition.

The Poland-China pig appears to have originated in Southwest Ohio, U.S.A. about 1816, though the name was not established until 1872.

C. J. Tucker of Leo's Summit, Missouri, reports the recent sale of the five-gaited saddle mare "Daughterly Dare to B. R. Meyer of California for \$7,000.

R. R. NESS ON Q. COUNCIL OF AGRICULTURE

Named to Fill Vacancy Caused by Death of Father

In succession to the place on the board of the Quebec Council of Agriculture of his father, the late Robert Ness, Mr. R. R. Ness has been appointed. Throughout the Province, and especially in the French press the appointment is commented on with much favor.

The brilliant head—a band of blue, tipped with red—is the mark by which you can always distinguish a MAPLE LEAF MATCH.

This distinctive head means to you that the matches are sure and safe—always dependable—non-poisonous, no glow, the kind that won't gnaw—stronger and longer, different and better.

Look for the head—a band of blue, tipped with red. It is the symbol of match excellence.

HUNTINGDON

It was announced this week that the three day Chataqua Club will be held in Huntingdon under the auspices of the Curling Club will be in O'Connor Hall on Friday, Saturday and Monday, Oct. 12, 13, 15.

Sunday Dr. Maclean, who has spent the past six weeks in Nova Scotia, conducted services in St. Andrew's Church. At the organ was Mr. Harry Colcomb, organist of the First Presbyterian Church, Montreal. Mr. Colcomb, who is spending his vacation with relatives at Port Lewis, delighted all with his playing.

Dr. Clouston, who accompanied Mrs. Stevens to her home at Rome, N. Y. returned on Friday. He stated that Mrs. Stevens, despite the tiresomeness of the trip, had successfully made the journey without further injury to herself.

Principal MacMillan has a group of Boy Scouts at the Lake this week. They are returning home to-day.

On Thursday last the main part of Chateaugay street was swept and oiled. It was closed for traffic until Saturday morning.

Messrs. John Hunter & Sons have the foundations laid for their two new houses just off Henderson street. Stone, etc., necessary for the foundation work have been drawn to the lot of the Misses Bell at the west end of the town.

At a meeting of the directors of the Agricultural Society held on Saturday night the tender of the Huntingdon Methodist Church for the Fair Dinner was accepted.

Construction work is being carried on at both the New York Central and Grand Trunk stations. At the N.Y.C. new foundations are being placed under the building and at the Grand Trunk a cement step is being built along the passenger track.

A slight frost was felt on Thursday morning last. Reports of cucumber leaves being touched have come in, but at no point was the frost severe enough to do much damage.

Another strong wind swept over the district on Sunday doing some damage to crops, but no serious injuries were reported. The local Bell Telephone exchange had seven rural lines put out of commission by the wind.

Dr. Maclean, who returned home on Friday evening, states that the farmers in Nova Scotia have been suffering from a different trouble to those around here. Down there, while the crops are excellent, the continued heavy rains have made it almost impossible for the crops to be properly harvested.

The Doctor attended the celebration at Pictou in connection with the landing of the "Hector" and remarked that into this town of 3000 cars after car drove until over 30,000 visitors had arrived for the event. The traffic was so dense that sailors on the warships in the harbor were sent for miles out into the country to direct the steady stream of traffic. The result was an admirably handled road traffic, without congestion or serious accidents.

The Academy buildings are being put into order for the opening of the fall term. Among other improvements that are being added are showers for the boys.

Mr. and Mrs. Allan Cooper of Los Angeles, Cal. and children arrived here last week end to visit with Mr. and Mrs. J. B. Crook, Jr. Mr. and Mrs. Thos. Crook, Jr. of Valleyfield spent a few days at the home of Mrs. George A. McCracken.

Miss Eva McCracken, who has been visiting her sister Mrs. Thos. Crook, Jr. of Valleyfield for the past two weeks, has returned home.

Miss Marjorie Clouston, who has been a stenographer in Mr. W. F. Stephen's office, has accepted a position with the Sun Life Assurance Co. and left for Montreal on Tuesday.

Mrs. J. C. Kidney of Montreal returned home Sunday after visiting a few weeks at the home of relatives in Huntingdon.

Mr. and Mrs. C. Vallie, and sons, Earle and Roy of Montreal spent their vacation at the home of Mr. H. S. Stuart, Laguerre, and were callers at the home of relatives in Huntingdon.

Miss Rose left on Friday for Chicago where she intends visiting her brother.

Mr. and Mrs. Erle Burrows and Mr. William McMillan of Montreal are spending a vacation in Huntingdon.

Mr. and Mrs. Lenny of Montreal are visiting at the home of Mrs. Geo. Blachford.

Mr. and Mrs. George White of Southern Pines, North Carolina, are visiting at the home of Mrs. Stone.

Rev. Mr. Penrose occupied the pulpit of the Methodist Church on Sunday morning, Rev. J. I. Hughes preaching at Kensington.

Mr. and Mrs. Howes of Montreal are visiting Mr. and Mrs. Kidd.

Miss Haines of Montreal is visiting Mrs. A. Munro.

Mr. A. McLean of Montreal who was in town for a few days last week has returned home.

A few young men left Monday on the second harvester's excursion to the West.

Mr. and Mrs. C. W. Thomas left this week on a vacation to Buffalo and other American points. On their way home they will stop on for the Toronto Exhibition.

Mr. and Mrs. E. T. Corkill and son motored from Toronto and are guests at the home of Rev. J. I. and Mrs. Hughes.

Mrs. Linstead of Verun is visiting friends in town.

Mr. and Mrs. D. B. Cunningham of New York are visiting Mr. Wm. Cunningham.

A very enjoyable lawn social was given by the ladies of Elgin Church on August 17th at Mr. George L. Black's. The weather, though cool, was in other respects ideal. After supper, in the absence of the Rev. Mr. Moffatt, who is taking his vacation, the Rev. Mr. Penrose acted as chairman. His address together with his witty remarks helped to make a very interesting program. Solos were rendered by Miss Eva Candlish, Messrs. Salter, David L. Brown and Fred J. Donnell. Excellent music was furnished during the evening by Misses Coy and Helen MacFarlane, accompanied by Earl Wilson on the drum. A vote of thanks was extended to Mr. and Mrs. Black for the pleasant evening spent at their home. Proceeds from social, \$118.

Miss Eva Lewis left on Sunday to stay a week in Lacolle with her sister, Mrs. Rosebough, before returning to her home in Springfield, Mass.

Some uncharitable remarks were made against the management of the road work on Friday. About one o'clock the tar tank passed, laying a splendid coat of tar from the bridge east almost a quarter of a mile and no sand was thrown on it, until just at six o'clock in the evening. All afternoon, automobiles and vehicles of every description were obliged to go through this sticky, slippery mess, which destroyed everything which came in contact with it, and was dangerous as well. A number of cars were seen to skid on it, and one, driven by a woman went across the ditch by Mr. Owen's house, and tore up several feet of the wire fence. Fortunately no one was hurt, and the only injury to the car was that caused by the tar sticking to it.

There was not a very large audience on Thursday evening to hear the address given by Mrs. La Mance, lecturer for the W.C.T.U. Those who were fortunate in being present heard a very interesting and instructive talk on the vital subject of prohibition. Mrs. La Mance outlined the progress of the work in various States of the Union, and prophesied great results along the same lines in the near future for Canada. She also told of what the various kinds of liquor are composed, and the chief ingredient in each is some sort of grain which is rotted, and therefore poisonous. Mrs. Peter Arthur occupied the chair in her usual capable manner. Miss Irene Holiday was organist and a solo was sung by Mr. Basil Deconde of Montreal. Two new members were added to the local Union.

Mrs. Donnelly of Montreal visited Mrs. McBride for a few days last week.

Mr. Davidson spent the week end in Dewittville, his wife and family returning home with him on Monday.

On Tuesday afternoon Mrs. Pavier entertained to tea, Mrs. Gilbert, Mrs. Owens, Miss Naughton and Mrs. Martha McArthur.

WHY RAILWAY TIES ARE BLACK

No doubt the question has arisen in the minds of many as to why the ties, piled beside the railway tracks, ready for installation in the roadbed, are black instead of their natural wood color. The black appearance results from the treatment with creosote oil, the object of which is to prevent decay and thus lengthen the service life of the ties. In the Forest Products Laboratories of the Forestry Branch of the Department of the Interior, where extensive research work on the preservative treatment of timber has been conducted, it has been found that the decay of wood is due entirely to the action of low forms of plant life known as wood-destroying fungi. These fungi utilize the wood substance as food, destroying it in the process. The creosote oil, which is forced deeply into the wood by powerful pumps, poisons the food supply of the fungal plants and thereby protects the wood.

As properly creosoted ties in a well-made track will last twice as long as untreated ones, it is to be expected that they will soon be in general use on all Canadian railways.

Mr. and Mrs. Allan Cooper of Los Angeles, Cal. and children arrived here last week end to visit with Mr. and Mrs. J. B. Crook, Jr. Mr. and Mrs. Thos. Crook, Jr. of Valleyfield spent a few days at the home of Mrs. George A. McCracken.

Miss Eva McCracken, who has been visiting her sister Mrs. Thos. Crook, Jr. of Valleyfield for the past two weeks, has returned home.

Miss Marjorie Clouston, who has been a stenographer in Mr. W. F. Stephen's office, has accepted a position with the Sun Life Assurance Co. and left for Montreal on Tuesday.

Mrs. J. C. Kidney of Montreal returned home Sunday after visiting a few weeks at the home of relatives in Huntingdon.

Mr. and Mrs. C. Vallie, and sons, Earle and Roy of Montreal spent their vacation at the home of Mr. H. S. Stuart, Laguerre, and were callers at the home of relatives in Huntingdon.

Miss Rose left on Friday for Chicago where she intends visiting her brother.

Mr. and Mrs. Erle Burrows and Mr. William McMillan of Montreal are spending a vacation in Huntingdon.

Mr. and Mrs. Lenny of Montreal are visiting at the home of Mrs. Geo. Blachford.

Mr. and Mrs. George White of Southern Pines, North Carolina, are visiting at the home of Mrs. Stone.

Rev. Mr. Penrose occupied the pulpit of the Methodist Church on Sunday morning, Rev. J. I. Hughes preaching at Kensington.

Mr. and Mrs. Howes of Montreal are visiting Mr. and Mrs. Kidd.

Miss Haines of Montreal is visiting Mrs. A. Munro.

Mr. A. McLean of Montreal who was in town for a few days last week has returned home.

A few young men left Monday on the second harvester's excursion to the West.

FRANKLIN FACTORY HAS BEEN LEASED

New York City Concern Rented Mr. Beaudin's Creamery

The Beaudin Factory at Franklin Centre is well known for the excellent butter that Mr. Beaudin makes, but there is a possibility that little butter will be procurable from this source after the first of September, for Mr. Beaudin has rented it for a term of five years to the Hazlett Dairy Products Co., of New York City. Mr. Beaudin has been retained as manager by the Company.

HOWICK

Miss Jean Anderson of Atholton was the guest of Miss Emma Reid for a couple of days.

The Misses Martha and Christena Cameron have returned home from Bury where they spent several weeks.

Mr. Trueman spent the week end with Mr. and Mrs. J. Kerr, returning to Montreal Sunday afternoon with Mrs. Trueman and two sons.

Miss Dorothy McTeer spent a few days with her friends, Misses Beth and Jean Kerr at "Sunny Brae Farm."

Dr. and Mrs. Shanks have returned from Erie Penn. and Detroit where they visited their niece and nephew.

Mr. George Hay and son Russel spent Saturday in the city.

Mrs. Watson has returned home, after spending the past week in Montreal.

Mrs. Galbraith and Miss Crowley of Montreal were week end guests at Mr. and Mrs. R. Kerr's. Mrs. Galbraith is remaining for the week.

Mr. Jamison of Chateaugay Basin is visiting Mr. and Mrs. James Kerr at "Sunny Brae."

Miss Alice Gordon spent the week end in Montreal.

Other Howick News on Page 8

COTTON AND CRIME

Two centuries ago the cornering of the Lancashire cotton trade—now being attempted, it is said, by a powerful syndicate—would scarcely have been worth the trouble involved, for, in those days the wearing of cotton fabrics was a crime. In order to foster the old-fashioned manufactures of linen and wool, the production and sale of cotton goods was forbidden under penalty, and not until 1735 was their use legally permitted in England. The raising of the ban, according to Sir Walter Besant, was "the first step in the elevation of the lower classes, for cotton fabrics could be easily washed. Then cleanliness of the body became possible, and with it, sweeter and comforts came cleanliness of other kinds."

A Jew's harp, a small musical instrument, derives its name, according to some authorities, from the French word jeu, meaning play, from the fact of its being considered a toy. More probably it was named in ironic allusion to the harp of David. The device is an old one, being mentioned in 1619 by Praetorius in his "Organographia" under the name of crambalum. In history, one of the first recorded "masters" of the tongue instrument was a grenadier of Frederick the Great, who played so well on the harps that he was demobilized and given a grant of money. Scheiber invented a combination Jew's harp of wider scope, and another man, Eulenstein, created a furore in London by his fine performance on sixteen harps tuned to various pitches.

LAWN SOCIAL

A Lawn Social under the auspices of the Rockburn Presbyterian Church will be held at the home of Mr. Fred Erskine on Tuesday Evening, Aug. 28. A good program will be given. Supper 35c. Ice Cream for sale.

KLOTHKLAD Suits for Boys

Hard, rough wear—that's where KLOTHKLAD Suits for boys stand out. They're made to withstand just that sort of thing—to wear better and last longer—under the most severe kind of service.

Double cloth (same inside as outside) at the wearspots—the seat, knees, elbows. Double cloth for double wear.

And in materials, style and tailoring KLOTHKLAD sets a new standard. Made with the same exacting care as Dad's clothes.

KLOTHKLAD—a name to remember next time your boy needs a suit.

To the inhabitants of the aforesaid municipality.
PUBLIC NOTICE is hereby given by C. E. Ewing, Secy.-Treas. of the aforesaid municipality that the Valuation Roll for the current year, has been completed and deposited in my office and that on Tuesday the fourth day of September now next at its usual hour and place of meeting, the municipal council will proceed to the examination, revision and homologation of the said Valuation Roll.
Given at Elgin aforesaid this fourth day of August nineteen hundred and twenty-three.
(Signed) C. E. Ewing,
Secy.-Treas.
A true copy,
C. E. Ewing, Secy.-Treas.

NEW ERIN
Mr. and Wilby Chartrand and family of Montreal spent a few days this week with Mr. and Mrs. A. Chartrand.
Miss Susan Douglass of Montreal spent the week end with her parents, Mr. and Mrs. B. Douglass.
Mrs. James McCallum of Huntingdon visited a few days this week at her brother's home, Mr. Walter J. Walsh.
Mrs. Henderson and daughter of Lindsay, Ont. are visiting Mrs. J. Sparrow.
Mrs. John Walsh and children were guests last Saturday of Mrs. J. R. Feeny.
Mr. T. Planché of New York arrived Sunday and will spend this week with relatives here.
Mr. and Mrs. Hooper of Montreal spent a few days recently at the home of Mr. Alfred Reid.
Mr. and Mrs. Chas. Humason of Powerscourt were visitors in this vicinity last week.

While the number of hogs on farms in the United States and Canada shows a considerable increase over 1914, the total for the whole world shows a decrease from 263,844,000 to 227,431,000.

MAIL CONTRACT
SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon, on Friday, the 21st September, 1923, for the conveyance of His Majesty's Mails, on a proposed Contract for four years, six times per week on the route, Dundee No. 1, Rural Route, from the 1st January, 1924 next.

Printed notices containing further information as to conditions of proposed Contract, may be seen and blank forms of Tender may be obtained at the Post Offices of Dundee & Fraser's Point, and at the office of the District Superintendent.
VICTOR GAUDET,
Acting District Superintendent.

CREAM EXPORTS TO STATES ARE MUCH BIGGER
Month of July Created a Record For Exports of Fresh Cream to the U.S.
BUTTER FIRM
Cold Storage Supplies Are Reported Large

In July 1923, Canada shipped to the United States 437,679 gallons of fresh cream, valued at \$695,946, as compared with 339,920 gallons in June, and 245,986 gallons in July of the preceding year. The figures for the twelve months, ending with July, are 2,089,587 gallons, valued at \$3,545,093, as compared with 1,830,055 gallons valued at \$2,708,068 in the previous twelve months. Exportation of fresh milk to the United States shows an increase, though not so great as in the case of cream. In the twelve months, ending with July, 1923, 1,402,458 gallons of milk were shipped at a value of \$292,333, as compared with 1,062,935 gallons at \$240,253 in the corresponding period of 1922.

During July the United States imported 13,000 pounds of Canadian butter, valued at \$12,646.

In Montreal this week the price of butter is holding firm under an ordinary good demand. Nothing is pressing the market, but under the fact that great storage supplies are being assembled some uneasiness exists. It is frequent street talk that at the present time unusually large amounts are being held by the speculators. Prices are being held around 33 1/2c.

Cheese is steady at 21 to 21 1/2c for Western. Eastern is 1/2c lower.
Wheat is a good feed for young chickens and laying hens, and may be fed with profit when the price is low.

RIVERFIELD
Miss Severs, returned missionary from India, assisted in the morning service in Riverfield church and gave a splendid address, telling of India and her work. She also spoke in Howick church at the evening service.
The eighth Saturday evening concert under the sponsorship of Mrs. J. Angel drew a large audience again. She was assisted in her program by an orchestra, also friends from Montreal and Beauharnois. Next Saturday evening's concert will be given by Mrs. Everett Orr and her committee.
Mr. and Mrs. Young and family have been spending some time with her uncle and aunt, Mr. and Miss Logan, "The Store."
Messrs. Webster and Kiddell spent Sunday at Fairview Cottage. Grain is mostly all cut and many are doing their threshing now.

HOWICK
Much needed rain fell in abundance in this vicinity on Tuesday, which will materially benefit root crops and pastures.
Miss Sever, sister of Mrs. James Angel, Riverfield, who for many years has been a missionary in India, addressed the Howick congregation on Sunday evening on the importance of mission work in that country. She extolled in eloquent language the character and disposition of the Hindus who have become Christians.
Another farmer on the Chateauguay river has been unable to meet his financial obligations and made an assignment. Mr. Alex. Steele's case is due as usual to the low prices for farm products and the high price of everything the farmer has to buy.

DUNDEE
A very successful ice cream social was held at Fraser's Point on Thursday evening, August 16th, under the auspices of the Women's Institute. About \$70 were netted which will be applied to the funds for the Community Hall.

ATHELSTAN
Miss Annie Elder of Regina is at present visiting relatives here.
Miss D. Campbell of Montreal, has been a recent guest at the home of Mr. William Grant.
Mrs. Lawrence Wilson and little daughter Blanche, of Brooklet, Mrs. Wallace Wilson and son Bernard, of Suffield, Conn. were guests of Mr. and Mrs. Alva Wilson last week.
Miss Katherine McIntosh who has been attending the summer classes at Macdonald College returned home last week.
Miss Grace Rowat is visiting friends in Montreal.
Mr. and Mrs. William Labarge of Worcester, Mass., recently visited his brother and family.
Mrs. H. Hawkins and children of Hemmingford are the guests of her parents, Mr. and Mrs. J. D. McIntosh.
Mrs. Alexander and little daughter, Bernice of Montreal, are at present visiting her sister, Mrs. Robert Gardner.

DUNDEE
Miss Ida Watson has been visiting friends in Elgin this past week.
Mrs. Martha of Newark, N. J., and Miss Himmelmann of Brooklyn, N. Y., who motored here are now the summer guests of Miss Jessie Lumsden.
Mr. Wells and family from St. Lambert, who bought Mr. Wm. Beattie's farm, are now nicely settled in their new home.

DUNDEE
Mr. and Mrs. Taylor of Manchester, N. H. are visiting at the home of Mrs. Taylor's mother and brother, Mrs. D. Fraser and Mr. Dan, Fraser.
Miss Barris of Lowell, Mass. is spending a couple of weeks at the home of Mrs. Jessie Vass and Miss E. Vass.
Mr. and Mrs. A. W. Vass, Miss E. Vass, Miss Anna Wylie and Miss Barris motored to Montreal Tuesday intending to return in a few days.
Mr. Donald Ferguson of Montreal spent the week end at the home of his mother, Mrs. Jessie Ferguson.
Mr. Watt Coulter of Winchester and Mr. Robt. Steven of Finch, Ont. spent the week end visiting at the home of Mr. R. G. Steven.
Mr. and Mrs. Donald McCleannan of Lancaster, Ont. were week end guests at the home of Mr. and Mrs. Wm. D. Fraser, Jr.

The trap rocks of New Jersey and the dolerites of Staten island are the strongest stones in the United States, their crushing resistance being 24,000 pounds to the cubic inch.
Mrs. X. Y. Z.—I understand that your practice is getting bigger. My patient has gained nearly two pounds in the last month.

The Real Flavour
