

The Stanstead Journal.

VOL. LXVIII—No. 17.

ROCK ISLAND, (STANSTEAD) P. Q., THURSDAY, APRIL 24, 1913.

WHOLE No. 3506.

COOK BY WIRE

- 1 Turn the switch and let the Electric Glow drive away the spring chill.
- 2 Breakfast: Bacon and eggs from an Electric Grill, electric-percolated coffee and toast made on an Electric Toaster.
- 3 Clean up the house with the Vacuum Cleaner and sew on your motor-driven sewing machine while the maid does the family washing on an Electric Washer.
- 4 Prepare your lunch on your Electric Stove and Chafing Dish and enjoy it in the breeze of an Electric Fan.
- 5 Before you dress for the afternoon, make your hair beautiful by using an Electric Curler, and bring the natural roses to your cheeks with an Electric Vibrator.
- 6 Let the maid do your ironing with an Electric Iron, while you drive down town in your Electric Runabout. While you are there go in to our store and look over the large line of Electrical appliances.
- 7 When you return, sit down with the family to a steaming hot dinner; roast, vegetables and all—which you had placed in your Automatic Fireless Cooker before you left home for the afternoon.
- 8 Spend the evening at the Electric Theatres, and when you return, turn on the Electric Burglar Alarm and lie down to sweet Electric Dreams.

IS ALL THIS POSSIBLE IN YOUR HOME? WHY NOT?

If your house isn't wired tell us about it.

Sherbrooke Railway & Power Co.,
Rock Island, Quebec

NOTICE.

Owing to the remodeling of our studio, we cannot attend to any sittings until future notice. In a short time we shall have a neat and convenient studio and shall be better prepared to meet our customers' wants. Wait for us! Studio will not be closed.

J. J. PARKER.

TOWN TOPICS.

Girl wanted at Thayer's restaurant. Mrs. F. T. and Miss Edna Caswell went to Boston Monday.

The band will practice this evening at St. Joseph's Hall. Everybody welcome.

Mr. John U. Baxter and family have returned from Montreal and opened their home on Caswell Avenue.

Dr. Hight, chiropodist, is at the Rock Island House, where he will remain until tomorrow evening.

Mr. and Mrs. Wright Pomeroy have returned to Stanstead after spending the winter with their daughter in Hyde Park, Mass.

Mr. and Mrs. D. W. Davis went to Boston the middle of last week. Mr. Davis returned Thursday, Mrs. Davis remaining a few days.

Miss Marie Jeannette Tanner, a kindergarten teacher in the Edward VII school, Montreal, the guest of her sister, Miss Lea A. Tanner, at Stanstead College.

In the Centenary Methodist church the regular services will be held at 10.30 a. m. and 7 p. m.; Sunday school at noon. The pastor will preach. Visitors welcome.

Mr. E. H. Cosby is coaching local talent at Smith's Mills, and they will present on Thursday evening, May 1st, the laughable comedy Captain Rackett. "Ted" says the parts are all well taken and predicts a great success.

Reports from most parts of the outlying country indicate considerable improvement in road conditions during the past week. This cannot be said of the Granville section. A gentleman who drove through there the first of the week said the roads were "worse than ever."

The Stanstead South Congregational Church next Sunday: Morning sermon subject: "A New Creation;" evening, "The venture of Faith." Rev. H. F. Hallett, pastor. Sabbath school at noon. C. N. Hill, superintendent. Mrs. Charles W. Wells, soloist. Strangers and new-comers to the villages will find welcome at this church.

Mr. Charles W. Humphrey, aged 84 years, returned Friday from a week's visit with friends in Newport, Coventry, Orleans and Barton, which he thoroughly enjoyed. Speaking of old times the other day Mr. Humphrey told of being frightened by hearing Elder Miller preach of the "end of the world" in 1913, and also of boarding workmen who built the Barnston Academy when he was first married. Mrs. Humphrey was Sally Shorey; she died, in her 81st year, September, 1910, after 60 years and 3 months of married life.

TOWN TOPICS.

Seed Grain—200 bushels Barley and Oats, 15 bushels Peas, Oats and Vetches. A. H. Tiffin, Stanstead, Que.

The National Bank of Newport, an old-established, sound financial institution, is now paying 4 per cent interest on savings deposits.

The Mendelssohn Club of Newport will give a concert in Maple Avenue Hall, to-morrow evening, for the benefit of St. Joseph's Society.

Mr. Percy N. Salls spent Sunday in this place. He is doing substitute work for the Boston & Maine Railroad and is at present located at the Capelton station.

Used Upright Piano, small size, at Smith's Mills. We offer this instrument at a discount or will rent for summer. H. C. Wilson & Sons Ltd., Sherbrooke, Que.

Mr. Fred A. Taylor was still making sugar yesterday. This is the advantage of staying with and making the most of a proposition. Mr. Taylor believes in doing thoroughly anything he attempts—a good policy to tie in running a Vermont farm.

Tomorrow is Arbor Day in Vermont by proclamation of Gov. Fletcher. The citizens are invited to observe the day by planting trees and shrubs. We would amend the proclamation by recommending that at least three-fourths of the day be spent by the people pruning and caring for those already planted.

The links of the Sunnyside Golf Club are being put into proper shape for the season. The greens are being newly turfed and an effort will be made to keep them in good condition throughout the summer. Mr. George Rathbone has charge of the work. Secretary Short is devoting his spare time to the business affairs of the Club. A prosperous, pleasurable season is anticipated.

Mr. M. D. Bacon was a caller at the Journal office Tuesday. He has sold his farm known as the John Cass place, Cassville, and returned to Ayer's Cliff to reside. Mr. Bacon had an auction sale Saturday, when cows were sold as high as \$64. The farm contains 79½ acres and was sold to Mr. Archie A. Blair, a young man from Huntingdon, for \$2,000. Mr. Blair arrived at Cassville at the end of the week; Mrs. Blair and two children came Tuesday.

Another shuffle in the customs service is announced. Mr. W. J. Bruder, who has filled the position of deputy collector at Rock Island very acceptably during the past few weeks, has been recalled to Ottawa. His departure will be very much regretted. His successor is Mr. J. L. Rattey, who comes direct from the Customs Department at Ottawa. Mr. Rattey is a young man who has been in the service some three years. He won his spurs by merit, having passed the civil service examinations. Mr. Rattey will no doubt make an efficient officer, but he informs us that he is not likely to be long here—two or three weeks, he thought would be about the limit.

TOWN TOPICS.

Mr. L. A. C. Gale of Orange, Mass., was in town Tuesday.

Dr. W. A. Farwell of Sherbrooke was in town Tuesday.

Mr. Ora Blay, from Orleans, has accepted a position with W. M. Pike & Son.

Mr. C. E. Standish of Ayer's Cliff, butter and cheese inspector, was in town on Tuesday.

Mr. H. S. Putnam of St. Johnsbury, an expert automobile demonstrator, was in town Monday and Tuesday.

Mrs. Charles Carpenter, who has been ill for the last four weeks, is now improving, being able to sit up a portion of each day.

Special for this week—A full line of Ladies' Hand Bags and Gloves, also a large stock of Children's Hats, attractive and inexpensive. New Hats for Ladies arriving every few days. We are always pleased to show you our goods. H. M. Hepworth.

Mr. Henry Farrow of Stanstead, an employé of Butterfield & Co., was prostrated with appendicitis while at work Tuesday forenoon. He was taken to Sherbrooke by the afternoon train, accompanied by Dr. Ross, and underwent a successful operation at the Protestant Hospital the same night.

Derby Line will soon have the Tungsten lamps on all its streets and everything points to a great improvement over the arc type. The light is more pleasing to the eye, there is more of it and the diffusion is excellent. When driving the whole street is visible, the extreme shadows of the arc system are eliminated; no argument against the change has been presented, so far.

The old neighbors of Mr. and Mrs. George Clark surprised them in their new home at the top of the Plain hill, Wednesday evening, April 16th. There were in all about 25 visitors, as the old invited some of the new neighbors to join in the surprise and get acquainted with Mr. and Mrs. Clark. A very fine luncheon was brought in hampers by the visitors and it was an enjoyable occasion. Mr. and Mrs. Clark were presented with a handsome china tea service as a token of esteem by both the old and new neighbors.

Messrs. B. F. Butterfield, F. T. Caswell, Col. C. E. Nelson and T. F. O'Rourke attended the forward banquet given by the Newport Board of Trade Tuesday noon, to delegates from every town in the County of Orleans and many others who were interested in the organization of a Farm Bureau. The attendance was very large, the banquet was a great success. Newport business men and their good wives gave the visitors a hearty welcome. The speakers of the afternoon were, Mr. Merrill, principal of Lyndon Agricultural Institute, Mr. Martin, secretary of the State Board of Trade and Mr. Dodge of the agricultural department at Washington. A new and better day is dawning for the Vermont farm and the movement to secure experts in each county in the state is the important entering wedge.

TOWN TOPICS.

Mrs. Edward Audinwood is visiting in Shelburn Falls, Mass.

Mr. J. R. Ge nest of Sherbrooke was in town Thursday and Friday.

Mr. B. E. Converse of Barnston was in town Thursday and Friday.

Miss Robinson returned from Boston Sunday, after an absence of several weeks.

Mrs. (Dr.) A. G. Bugbee is very much better and was able to ride out the middle of the week.

Miss Josephine A. Roy left last Friday for a few weeks' vacation at her home in Barford, Que.

Mr. Charles R. Jenkins received his new 40 h. p. Velie touring car Monday. It is a very fine looking car.

The Helping Hand will meet with Mrs. Albert E. Lincoln, Saturday afternoon, April 26th, at 1 o'clock.

Wanted—A girl to do light house work and help take care of baby. No cooking nor washing. Mrs. B. F. Stewart.

Hon. M. F. Hackett, K. C., has moved his law office to the brick building formerly occupied by the Eastern Townships Bank.

The National Bank of Newport, an old-established, sound financial institution, is now paying 4 per cent interest on savings deposits.

"The Kleptomaniac" will be presented by some of the young people of Christ Church at the town hall, Stanstead, Friday evening, May 2nd.

The new electric sign on the Ames garage was the handiwork of the proprietor, George T. Ames, both construction and lettering. It is a good ad for his mechanical skill.

Engineer H. M. McIntosh is in town to place the grade staking for the new street to the Derby Line station and for the state work on the road leading to Holland from Derby Line.

Mr. R. Q. Hamilton, assistant engineer of the Boston and Maine Railroad, was in town yesterday, consulting with the village trustees regarding the starting point of the contemplated new road from the Derby Line freight station.

For some time back much scolding has been done about the condition of the Rock Island lock-up. It is neither attractive nor comfortable. But no man who conducts himself in a decent and orderly manner need ever fear being called upon to occupy it. There is some difference in opinion as to the corporation's obligation to provide attractive lodgings for those who disturb its peace. Some day the people will see the "joke" and do away with the cause of disorder, disgrace and expense. Then there will be little use for a lock-up.

The Annual meeting of the Epworth League of the Centenary Methodist Church was held on Wednesday evening, April 23rd. The pastor, Rev. T. A. Halpenny, B. A., presiding. Reports of the past year's work were presented by the various officers and these showed that the year just closing has been one of the most successful in the history of the League.

The following officers were elected for the coming year: Honorary President, Rev. T. A. Halpenny; President, Earle Beerworth. Convenor of Departments: Prayer Meeting and Look out, Miss Claudine Smith; Missionary, Miss Emma Farnsworth; Literary, Gordon McIntosh; Social, Miss M. Bowen. Recording Secretary, Fred Montie; Corresponding Secretary, Howard Tilton; Treasurer, Miss Margaret Stevens. Convenor of Floral Committee, Miss Ethel Montie. Pianist, Miss Chrissie McIntosh. After the election of officers refreshments were served and a very pleasant time spent.

Lewis Lavoie of Stanstead township came to grief at Rock Island Saturday night. Over intimacy with John Barleycorn had caused him to depart from the course of dignity and prudence, and while thus astray he seems to have become imbued with the spirit of the militant suffragettes. He had wasted much energy in oratorical combat and received the constable's advice to keep quiet. But his fighting blood had been aroused. A bang, a crash, and the flying of broken glass at the Pike store—then the disturbance was over. The offender was in the hands of Constable McNaney, and he spent Sunday as a guest of the corporation in the palatial city police station. Monday morning the prisoner was brought before Magistrate Telford upon the usual charge of being drunk and disorderly. The penalty was a fine of \$2 and costs amounting to all to \$10.50. Lavoie formerly lived in Van Buren, Maine, but has been working in Stanstead township for some time past.

The Roads Are Getting Good!

Is your auto ready for business? There's a drop in price of Tires—came just in time for your needs—it will help offset the price of gasoline. We have nearly \$3000.00 worth of the best Auto Tires on earth, THE GOODYEAR. We are selling them at the new low prices, furthermore we give the factory guarantee on these tires, and will make the adjustment right here. Do you realize what this means to you?

We also have that new FORD SPECIAL (2,500 mile guarantee) tire 30x3 at \$10.25 30x3½ at \$14.55

No other tire of same quality is offered at any such price

BLAZER, FORD CAR HORN

Best exhaust horn yet invented for the Ford. \$5.00 installed, or \$4.50 from stock. Don't buy substitutes.

FORD ACCESSORIES

One of the best lines in Vermont.

AUTO REPAIRING AND OVERHAULING

Best garage, equipment and men within fifty miles—one of the best in Vermont.

If you can't get in to see us, telephone 277-3 Newport, Vermont.

TRUE & BLANCHARD CO., NEWPORT, VT.

BRESETE CORNER.

Mr. L. N. Taylor is still at his old stand and is turning out his usual quota of fine motor boats. A visit to his shop is worth while. During the winter he has built a fine boat for Mr. N. L. Bond of Baltimore and another for Mr. A. N. Mackie of Munich, N. J.; also fine ones for the Montreal Motor Boat Show, besides others. The one now under construction is a 45 foot cruiser for the St. Lawrence Bridge Co. of Montreal. It will be used on the St. Lawrence River at the Quebec bridge. It is provided with two 30 horse power Fairbanks engines and is strongly constructed for working purposes.

Mr. David Jackson has sold his house and will soon dispose of his movables at auction. He will emigrate to Alberta in the near future.

The present bad state of the road between this place and North Hatley has awakened the municipal authorities to the fact that some grading is badly needed and it is expected that the work will be commenced soon.

Mrs. P. O'Connell has 10 ewe sheep which have produced 21 lambs, one prolific mother 3 lambs. Mrs. O'Connell thinks it pays to pay to keep sheep. Who beats this record?

Mr. Robt. Bennett is building a wall under his house and making other repairs. Mr. Chester Tope of Waterville is doing the work.

Master Oliver Leonard of Coaticook is helping his uncle, Mr. H. W. Bresette, to do his spring's work.

Mr. and Mrs. Wm. Gallagher are visiting friends at High Forest, Que.

Miss Claudine Smith of Stanstead was the guest of friends here the first of the week.

Mr. Charles Spriggins of Montreal was in town the week-end.

Mr. E. H. Kerby is spending a few days at the home of Mr. P. H. Wilson. Mrs. E. White is visiting relatives in South Stukely.

Mrs. Ida Campbell spent a few days last week visiting in Sherbrooke.

Mr. J. Sinnamon, who has been sick for the past year, is now able to resume his work.

C. W. Bennett of Rock Island spent the first part of the week with friends in town.

BROWN'S HILL.

Mr. and Mrs. L. Clifford of Ayer's Cliff, were guests of Mr. and Mrs. H. G. Vaughan on Monday.

Miss Jennie P. Dunn is home from Fitch Bay, where she has been working for Mrs. P. F. Remick.

Mr. S. A. Gustin and Master Jack Gustin were at the Three Villages on Monday last.

Miss S. M. Ayer is home from Ruiters' Corner, where she has been caring for Mrs. Wilder Brown. We are glad to know that Mrs. Brown has fully recovered from her recent illness.

Mr. and Mrs. G. L. Temple were Sunday guests of her parents, Mr. and Mrs. C. R. Brown.

Miss McKinnon of McConnell was a recent guest of her friend, Miss McKay.

Mr. E. E. Temple was one of the fortunate ones to receive the \$100 Fenian Raid Grant from the Government.

GRIFFIN.

Mr. A. P. Davis spent the past week at Clarencetown, being called there for the funeral of his uncle, Mr. James Miller.

Mr. W. H. Brevoort was the guest of her sister, Mrs. Charles Edson, Massawippi, for two days the past week.

Mr. and Mrs. Carl Lane of Smith's Mills spent Sunday with her parents here.

The usual church of England service here Sunday, April 27th, at 3 p. m. Rev. C. R. Eardley Wilnot, M. A., Rector. All are welcome.

NORTH HATLEY.

The regular bi-monthly meeting of the Ladies' Society of the Universalist Church meets this week Wednesday at the home of Mrs. E. LeBaron. The dinner will be served from 12.30 until one thirty.

Miss Alice Wadleigh, who has been ill three or four weeks, is improving but slowly. At this writing she has so far recovered as to be able to sit up some each day.

The ladies of the Universalist church gave Mrs. David Jackson a "Warewell" last Thursday as a testimonial of their regret that she and Mr. Jackson are soon to leave North Hatley for the West. Their household goods were sold to-day and next Tuesday they are to start for Wainwright, Alberta. Many regrets will attend their departure.

Special prizes have become quite a feature in the Sunday school of the Universalist church. Last year there were two. This year there are four, with the possibility of a fifth. Mr. James B. Reed of Reed's Crossing offers a special prize to class No. 3 for the best attendance through the year and Mrs. Charlotte Taylor this year is to give two prizes, one to the beginners and another to class No. 2. Mr. W. E. LeBaron offers a special prize to class No. 4 for the highest average attendance. This makes in all four special prizes, in addition to the prize buttons now in use for more than two years on the Leslie A. Taylor foundation.

Rev. E. E. Marggraf was at Ayer's Cliff Friday afternoon officiating at the funeral of the late Mr. Loriston W. Chilson, who departed this life last Wednesday. The remains were taken to Massawippi and burial was made in the family lot of the village cemetery.

Reports have it that the outlook for a busy season for the summer at North Hatley is more than likely. Already some of the earlier visitors have arrived. The Connaught Inn sees a most promising outlook and other hostilities of the village are in receipt of numerous applications.

Mr. and Mrs. Charles Jackson arrived from Raleigh, N. C. some days ago and since reaching home Mr. Jackson has been slightly indisposed. Mr. Ashlie Jackson and Mrs. Jackson reached home Tuesday morning from the same city.

The parsonage of the Universalist church has been undergoing extensive repairs and alterations. The work is now about completed and the fine property of the church is in perfect repair. Mrs. E. E. Marggraf is spending a holiday at Bellows Falls, Vt.

SMITH'S MILLS.

We are glad to say Mr. C. A. Jenkins is on the gain.

Mrs. Wilder Brown is also gaining. Miss Susie Ayer, who has been caring for Mrs. W. Brown, has been calling on friends in the place the past week.

Miss Lena Reed, who finished work in the glove factory at Beebe a short time ago, is now visiting friends in Richford, Vt.

Miss Hattie Reed of Rock Island spent Sunday with her parents here.

Mrs. M. M. Longway was the guest of relatives and friends in Newport, Vt., a few days recently.

Mrs. Helen Curtis of Newport, Vt., spent the week-end at the home of Mrs. M. M. Longway.

Mr. and Mrs. Guy Longway, who have bought the farm of Mr. John Elliott of Griffin, will take possession about May 5th. Mr. Longway, who has been employed in C. L. Jenkins's store for the past eight years, will be much missed by his friends here.

Mrs. Kate d'Etchegey of Beebe is visiting her brother James and sister Margaret O'Leary in this place.

The National Bank of Newport, an old-established, sound financial institution, is now paying 4 per cent interest on savings deposits.

GEORGEVILLE.

Mr. and Mrs. F. J. McGowan have returned to West Derby. Mr. McGowan intends to start for Saskatoon the 22nd.

Miss Susie McGowan has returned from a visit to her sister, Mrs. Heath, in Mount Kisco, N. Y.

Messrs. F. Mathias, M. L. Williams and W. A. Murray of Montreal were in town for the week-end.

Dr. Keyes has been quite ill for the past week, but is some better. Dr. Bowen was called to see him.

We were sorry to hear of the death of Mr. Oliver Hutchins, an old and respected resident of this place. He died on Friday, after an illness of only three days, at the home of his son Harry at West Derby. He leaves to mourn his loss his wife, two sons and two daughters. The sympathy of all is extended to them in their bereavement.

The lake was all cleared of ice on Saturday. The steamer Anthemis will soon be running again to the joy of all.

Mr. and Mrs. J. E. Davidson attended the funeral of O. H. Hutchins at Derby Sunday.

Mrs. Christie is ill again.

Mr. Clarence Vaughan started for the Canadian West on Tuesday.

The National Bank of Newport, an old-established, sound financial institution, is now paying 4 per cent interest on savings deposits.

BEEBE.

Intended for last week.

Mrs. Wm. Huse entertained the Book and Thimble Club last Tuesday. Papers were read by Mrs. H. H. Twombly, Mrs. Lyman House, and Miss Maud Gage, on Woman's Suffrage.

Mrs. E. M. Beerwort gave a "Habeant" reading. Lunch was served and a pleasant afternoon spent, with two new members for the Club, bringing the total up to nineteen. Mrs. Lyman House will entertain the Club Tuesday, April 29th. It is hoped there will be a good attendance.

Percy Pierce, from South Paris, Maine, is visiting his brother, Fred Pierce.

Mrs. Kate d'Etchegoyen has gone to Smith's Mills for a few weeks.

Charles Haselton is to have an auction Saturday, April 26.

Mrs. Charles Hildreth has gone to Newport to visit her daughter, Mrs. Tom Camp.

John Feltus of Springfield, Mass., arrived Tuesday for a few days, stay at the home of his brothers, Josiah Feltus.

Charles Hazeltine of Lowell, Mass., has been a recent visitor at the home of H. House.

Miss Helen Beebe has gone to Boston for a visit with friends.

The Ladies Aid meeting at Henry Bigelow's last Friday was a pleasant occasion. Over fifty were present and \$8.50 was realized. The annual business meeting will be held Friday, April 25, in the church parlors at which time members are requested to be present.

The Ladies Aid society, at the last meeting, voted to hold a bazaar and rummage sale some time in October, therefore they will be pleased with any donations given them.

Mrs. J. D. McFadyen of Stanstead College was a guest at Henry Bigelow's last Friday and attended the Aid meeting.

Mrs. G. W. Fisher had the misfortune to cut one hand and wrist quite badly by pushing through a light of glass in the door, as she attempted to close it.

R. F. McDonald of the Canadian Bank of Commerce left here Saturday to go to another bank.

Josiah Feltus is at home for a visit.

Miss Lena Reed has finished work in the glove factory and returned to Smith's Mills.

We are glad to report Mrs. Edwin Foss as gaining.

Francis Pocock is sick, but a little better.

Charles C. Rand and little boy of Derby Line visited his sister, Mrs. D. F. Moranville.

D. F. Moranville was at Fitch Bay one day this week.

Mrs. Richard Gardyne received the sad news of the death of a brother-in-law, Andrew Gardyne in a Minneapolis hospital, April 2nd. He was 74 years of age.

The National Bank of Newport, an old-established, sound financial institution, is now paying 4 per cent interest on savings deposits.

DUFFERIN AVENUE.

Miss Alice Whitecher of Barnston has been visiting at Hillside Farm for a few days.

Mrs. J. A. Peasley and Miss Alice Whitecher visited at H. H. Smith's on Monday.

Thomas Alden Peasley entertained a number of his little friends in the sugar bush on the twelfth.

Miss Agnes Smith, who is at home for the spring vacation, spent a few days at Ayer's Cliff the first of the week.

Miss Veda Chamberlain of Ayer's Cliff spent the week-end at H. H. Smith's.

The National Bank of Newport, an old-established, sound financial institution, is now paying 4 per cent interest on savings deposits.

GRANITEVILLE.

Rev. P. S. Dobson of Stanstead College is expected to occupy the pulpit here on Sunday next, April 27th.

Mr. Alex Hamilton of Barre, Vt., arrived here on Saturday to visit his home over Sunday, returning on Monday.

Mr. Homer Taplin of Lowell, Mass., is visiting relatives at Lineboro and North Derby, Vt., for a few days.

Mrs. B. Meigs of Beebe, Mrs. Fred Cowens of Rock Island and Mr. and Mrs. Gilbert of Rock Island spent Saturday and Sunday with their parents, Mr. and Mrs. Walter Keniston.

Mrs. M. C. Reynolds, who has spent several weeks with her parents, Mr. and Mrs. J. C. Bullis, at Beebe, on account of sickness, returned home the first of the week very much improved in health.

Mrs. Geo. Bullock of Stanstead visited at the home of her nephew, Mr. and Mrs. Arthur Bullock, on Sunday.

The roads still continue to be in an awful condition.

Housecleaning seems to be the order of the day.

Mr. C. D. Haselton and family moved to Beebe Junction on Saturday. We are very sorry to have them leave Graniteville.

Mr. James Brodie is away on a business trip.

Mrs. J. D. Scott spent Sunday with her sister, Mrs. E. P. Davis at Lineboro, April 20th being the birthday of both ladies.

Mrs. Louisa Bullock of Marlinton visited at the home of Mr. and Mrs. Arthur Bullock a few days last week.

The school teacher visited friends in Boynton Saturday and Sunday.

The National Bank of Newport, an old-established, sound financial institution, is now paying 4 per cent interest on savings deposits.

EAST BOLTON.

Mr. Geo. Cunningham of Magog was in town recently.

B. Chamberlain, V. S., of Magog was in town on Wednesday.

Miss Edith Wing of Haverhill, Mass., is spending a three weeks vacation at her home.

Mrs. Ezra Ball is slowly improving from her illness.

Mr. W. R. Ball was in Montreal over the week-end.

Mrs. J. A. Patterson spent a few days at Millington with her mother, who has been very ill.

Mr. F. Patch and Miss E. Bryant of Millington spent Thursday evening at J. M. Bryant's.

Mr. W. E. Ewens of Eastman was the guest of his brother, Mr. Fred Ewens, on Sunday.

Mr. J. R. Aitken opened his cheese factory for the coming season on Monday.

Mrs. D. J. Covey visited Mrs. T. A. Vaughan in Magog recently.

Mrs. J. T. Taylor returned home from Sweetburg Hospital last week, much improved in health.

The National Bank of Newport, an old-established, sound financial institution, is now paying 4 per cent interest on savings deposits.

VERMONT ITEMS.

James Hoyt observed his ninety-eighth birthday anniversary April 1 at his home in Sharon.

The work of packing and boxing of young trees for shipping has begun at the Charles Donner state forest in Sharon.

Dr. S. W. F. Hamilton of Newport recently took the dental surgery examination for the United States army at Fort Slocum, N. Y.

The National Bank of Newport, an old-established, sound financial institution, is now paying 4 per cent interest on savings deposits.

Mrs. Hannah Holt observed the 100th anniversary of her birth April 12 at her home in Woodstock where she lives with her granddaughter, Mrs. Otis Waite.

The Rev. L. E. Peabody of Morrisville began April 20th his pastorate of the Advent Christian church at St. Johnsbury. The only church in the part of the town known as Paddock's Village.

Dr. E. A. Bishop, formerly principal of Montpelier Seminary who has been in Vermont for the past two weeks, has returned to his home in Sevierville Tenn., where he is president at Murphy College. Doctor Bishop came north on a business trip.

Orleans county court adjourned April 16th after session a five week's. There was no criminal work for the jury this term. Of the three criminal cases signed for trial, one was continued and two were disposed of by a plea of guilty.

Frank R. Wells and sister, Mrs. H. Nelson Jackson, of Burlington, have gone to Philadelphia to inspect models for the proposed monument to be placed on the battlefield at Gettysburg in honor of the officers and men of the First Vermont cavalry.

The Vermont grand bodies of Odd Fellows will hold their annual meeting in Burlington from May 13 to 16, inclusive. The grand bodies of the order last convened in Burlington in 1910. Headquarters and lodge sessions will be in the rooms of the local chapters.

VERMONT ITEMS.

Alva Burroughs, who had been at the home of L. D. Farr of Morgan for a year or more, has suddenly disappeared. Nothing has been seen or heard of him since early Friday morning, April 11. Raymond Todd, who was working for Ona Hall, was missed the same day and no trace of him has been found.

Alonzo Wood, a native of Burlington, and for the past 60 years an Adirondack guide, is dead in a Utica hospital. He was born in 1834 and after reaching the age of 15 years gave his entire time to piloting parties through the Adirondack wilds. During his long career he took care of many important personages, and was one of the most popular guides in the region.

Edward J. Harrington, of Burlington, tried an interesting experiment in keeping apples in cold storage last winter. Mr. Harrington packed a half bushel of fairly good apples in excelsior in a box five feet deep in his garden. This was in November. He dug up the box April 2 and found all the fruit, with the exception of 15 or 20, in excellent shape, and hard, and of as good flavor as when picked.

A syndicate composed of Windsor and New York parties proposes to build a \$150,000 hotel on the banks of the Connecticut river, nearly opposite Harlakenden, the summer home of President Wilson. The site is about one and one-half miles north of Windsor village and commands a view of the Connecticut valley, both north and south. The hotel is to have about 100 rooms and 50 private baths. It is to be built in two sections of 50 rooms each, so that one section can be run as a winter resort. The hotel is near the railroad and river, and will have about 50 acres of ground.

The Vermont library commission reports an increase in the number of towns which are to have public library facilities through acceptance of the state's offer of free books, so that now there are only 56 towns. Vermont which have no library. Inasmuch as there are 246 towns in the state, the balance is on the right side. The majority of library towns constantly is growing larger. If the efforts of the commission are continued, it will not be many years before Vermont can boast of being the banner state of the Union in this respect, or at least on a par with the most progressive states.

Windsor May Become Summer Capital.

E. S. Smithers of the White House executive office force has been in Windsor looking for a house to be used for the executive offices when President Wilson takes up his summer residence at Harlakenden house in Cornish, N. H.

Among the places visited was a residence of Abbott Weston, a large mansion in the center of the town, which was once the home of E. W. Stoughton, former United States minister to Russia.

Other homes visited were those of Gilbert F. Davis on State st., conveniently near the post-office, the business sections, and railway and telegraph stations; the Jones home at Buena Vista, on the outskirts of the town; the property of the Windsor Farms Co., about a mile up the Connecticut river. The Taylor farmhouse, near the Windsor Farms Co. property, was examined with regard to its advantages as a possible residence for Secretary Tumulty.

The Cornish home of A. E. Lang, of Toledo, Ohio, was looked over as a possible location for the executive offices or for the use of Secretary Tumulty. Mr. Smithers was accompanied by a representative of a telegraph company who made plans for wire service for the correspondents who will accompany the President.

Educational Progress in Vermont.

[Burlington Free Press.] Vermont is plainly enjoying an educational awakening. With two bodies of distinguished men engaged in the task of solving the problem, one taking a survey of the whole situation while the other is devoting attention in particular to our public schools there can be no question about the Green Mountain state's position in the front rank of educational progress among the states at this time.

The state board of education has been at work only a few months, and yet the published announcement of the secretary, Representative H. D. Ryder of Bellows Falls, shows that distinct progress has been made. Superintendents of schools must possess far higher qualifications than formerly were required. They must not only have a college degree or a normal course following a four years' course in a secondary school but they must also have had two years of actual teaching experience, evidence of knowledge of the history of education and school administration and methods of teaching.

Teachers in high schools must also possess particular qualifications in addition to those hitherto held requisite, and other measures have been taken to assure better educational work in Vermont's public schools.

That this work is attracting widespread attention at home as well as abroad is evidenced by the letters received and the comment of the press.

WHETHER for a silo, a milk-house, or a million bushel grain elevator, concrete is the most economical building material in use today.

Concrete never requires repairs, and the saving in repair-expense alone makes the greater economy of using concrete more apparent every day. The cost of other building materials is constantly increasing. The cost of concrete is being reduced.

Canada Cement

which Canadian farmers use, with their own sand, stone and gravel to make concrete, is the only ingredient you have to buy. We have, by reason of our large output and scientific methods, been able to bring the price of "Canada" Cement so low that it is within the reach of everyone.

An increase in demand results in a greater economy of production, and when conditions have warranted it, we have, from time to time, shared this saving with the consumer by reducing the price of Canada Cement. This demand will continue to increase—as fast as farmers learn of concrete's superiority over other materials.

When you buy cement, see that you get "Canada" Cement; by so doing you will assure the complete success of all your concrete work.

Send a post card for our book "What the Farmer Can do With Concrete." It is free.

There is a Canada Cement dealer in your neighborhood.

Canada Cement Company Limited - Montreal

KATHAN & HOPKINS

THE "GOOD QUALITY" STORE

The Winter is breaking and Spring is with us, and everybody is buying general supplies to bridge over the Sugar Season and the two or three weeks of bad roads.

OUR DRESS GOODS DEPARTMENT

is full of fresh stock. We always lead in Linens, and just now we are showing the best line in our history: BUTCHER LINENS, TABLE LINENS, NAPKINS, DOILIES, COVERS, SCARFS, RUNNERS, HANDKERCHIEFS, WAISTS AND DRESS LINENS, BED LINENS.

We have a great variety of Embroidered Linens. You will find what your seeking in this department.

We have also been the SILK STORE of the section. See our line now in Black and Colors. Here is where "Good Quality" counts. We have Taffeta, Tamalene and Surah.

We have a full stock of Embroideries, Fancy Ribbons for Hand Bags, a Beautiful line for 25 cents.

DOMESTICS, PERCALES AND FLANNELETTES in full Stock and many Bargains. Splendid Line of Cashmeres in Black and Colors.

LADIES' FURNISHINGS

We have everything needed in Underwear for Women, Misses and Children in Union and 2-piece Suits. Night Robes, Sweaters, Handkerchiefs, Collars, Ties, Toilet Articles, Aviation Caps and Toques. We have a great variety of Corsets. In Hosiery we are in a position to fit your wants in a big range of prices in Woman's Misses' and Children's. A full line of Automobile Hoods.

We carry the celebrated FOWNES' GLOVES and MITTENS, in all Glove Leathers, in Silk and Fur-lined.

We have a splendid line of Ladies' Rain Coats

MEN'S FURNISHINGS

Here we have an interesting selection. In Underwear, we carry for our best The Wolsey, an imported all-wool and full regular made, and Pen-Angle. Work and Dress Shirts, Collars, Ties, Gloves, Mittens, Rubbers and Slippers.

The best Flannelette Nightgown we ever saw for \$1.00, and the best Cravenetted, Flannel-lined, big Collar, Working Coat we ever saw for \$2.50. In Men's Stockings, we have the line. Full line of Pajamas.

NEXT to a Vacuum Cleaner stands the Famous Bissell Carpet Sweeper and we buy enough of these at the time to own them right and you get the benefit.

OUR GROCERY DEPARTMENT

All the Season's Fruits, both whole and dried. Confectionery in bulk and in fancy boxes, a full line of Loney's Goods in Chocolates and Bon Bons, Canned Goods and a large line of Jar Goods, Farinaceous Goods, Olives and Olive Oil, Teas and Coffees. The Chase & Sanborn "Standard" Java. The finest Blend sold. The "Good Quality" Java at 28 cents.

This is the time to buy your

GARDEN AND FIELD SEEDS

We have those that are absolutely pure, having passed the Government test. What is the use of sowing imperfect seed? Timothy, Red Top, Red, White and Alskey Clovers, Alfalfa, Vetches, Red Fife and Russian Wheat, Banner Oats, Barley, Sanford, Red Cob, Sweet and Pop Corn, etc.

We have the Flour stock of the section, Royal Household, Five Roses, Quaker, by car load or bag, and we are always stocked with Sugar in the same way—By the Car or bag.

Come to us for your

ENGINE BARGAINS.

1 Olds Gasoline Engine, 35 h. p., almost new, run about a year, also 1 Leonard Steam Engine, 18 h. p., in good repairs, and boiler, 28 h. p. Am- celsing to put in larger power and will offer these together or separately at a bargain. WM. M. HASLTON, Beebe Junction, Que.

FOR SALE.

One 6 h. p. International Gasoline Engine, nearly new and in perfect condition. Complete with batteries, belt, pulleys, counter- shaft and a 30 gallon galvanized storage tank. Also for sale, separately, a 100 gallon iron Gasoline storage tank. Will be sold cheap. Apply to THE CROWN MFG. CO. LTD., Rock Island, Que.

PUBLIC NOTICE

Public Notice is hereby given that any one traveling on the sidewalks of main or side streets of this municipality with teams will be prosecuted to the full extent of the law. Per order of the council. C. I. MOULTON, Sec'y Treas. Stanstead Place, April 9, 1913.

EFFECTIVE METHOD OF ERADICATING THE APHIS AND BARK LICE OF VARIOUS KINDS

Injurious Little Insects Safely Housed Underneath Scales, Adhering to Bark of Fruit Trees May Be Dislodged by Application of Lye and Soapsuds

Well Kept Orchard.

No codling moth in this orchard. It was sprayed at exactly the right time. The worms hatch out just as the blossoms form and seek a hiding place in the blossom end of the apple. Spraying must be done just before the blossoms fall and before the calyx closes so that the poison will run down into the blossom and kill the worm. No use to spray after the buds have closed.

(By N. M. EDGERTON.)

Early spring is the time to get in effective work against the aphis and bark lice of various kinds. These are safely housed underneath the scales to be found adhering to the bark of fruit trees.

An effective way of getting rid of these is to wash the trunk and larger branches with a strong solution of lye or soapsuds. The application must be made before the buds begin to swell, or the trees will be injured by such strong washes.

This is the time, too, to apply the remedies for the scab of the apple and curl leaf of the peach. Spray thoroughly with copper sulphate while the wood is dormant, using one pound of sulphate to 15 gallons of water for the apple and one pound to 25 gallons for the peach. It is absolutely necessary that these applications be made before there is any swelling of the buds. In the case of the scab, subsequent sprayings with the Bordeaux will be found necessary; the first to be applied after the appearance of the first leaves and before the blossoms open, the second after the blossoms fall.

Two or three more applications at intervals of two or three weeks may be necessary. Arsenites for leaf-eating insects and for the apple worm may be applied with the Bordeaux.

Going at a fruit tree with saw and ax, hammer-and-tongs fashion, is decidedly wrong. The removal of a large amount of top at any one time throws the top and root system out of balance. Nature seeks to remedy this condition by sending out numerous water sprouts.

It is better to remove a small amount of growth each season. The tree will then be able to maintain an even balance between its top and root system, and a large share of the energy that is wasted in the large limbs removed by the former practice will

go toward building up a strong, symmetrical top.

Stormy days are the times for making up small fruit boxes and crates. If allowed to lie many weeks, however, they lose their fresh appearance, which is not a good thing.

Poultry confined to a small area in the orchard will destroy the pupae of the apple maggot.

A fruit tree in every fence corner would look better than weeds.

Is your orchard full of weeds and other litter, to provide a snug home for mice?

Beware of the irresponsible tree agent. Stick to the nursery firms that are known to be honest and have a reputation to sustain.

When the professional tree butcher comes along with his saws and hooks and axes tell him to go. These fellows ruin thousands of trees every year because they are ignorant of the correct principles of pruning.

A "dope" made of one part strychnine, one-third of one part borax, one part sirup and ten parts of water will knock out mice and rabbits. Sprinkle it over small sprouts and put them in the runway.

Among small fruits there is nothing the equal of the strawberry as a money-getter. Results in yields that would seem to the uninitiated visionary are possible where conditions are at all favorable.

It is none the less true, also, that yields from strawberry culture will vary with the seasons in greater extremes than any of the other small fruits. It is not every variety of strawberry that is equally at home on all soils and under every condition. The variety that is best adapted to the soil of my farm may not be the best variety for my neighbor's farm. In this respect the strawberry is a particular sort of plant.

TREATING SHEEP SCAB

Dip Made of Tobacco or Coal Tar Is Preferred.

Warm Water Is Better Than Cold, as Former Cuts Grease and Allows Solution to Get to All Parts of Animal's Skin.

Dipping in a reliable dip is the proper treatment for sheep afflicted with sheep scab.

Use a dip made of lime and sulphur, tobacco and sulphur, or one of the coal tar dips.

Remove all sediment from the lime and sulphur dip, as it injured the wool.

Tobacco dips should never be boiled.

For a general dip a tobacco or coal tar preparation is to be preferred to lime and sulphur, as a lime and sulphur dip has little effect in destroying the sheep tick or louse.

A fresh solution should be used for the second dipping. This is absolutely essential if the lime and sulphur or the tobacco and sulphur are to be used.

Mix the dip well in the vat.

It is better to use warm water than cold water in dipping sheep, as warm water cuts the grease and allows the dip to get to all parts of the skin of the animal.

The correct temperature for a dip is from 100 to 105 degrees Fahrenheit.

Sheep can be dipped in the winter if warm days are selected for that purpose.

If the sheep are badly afflicted with scab, the thick scabs should be softened previous to the dipping of the sheep by pouring some of the dip on these places and rubbing them with some smooth instrument, or the scabs

Badly Affected With Scabies.

can be softened while the sheep are being dipped, by rubbing the thick scabs with a brush. Care should be taken, however, not to draw blood, as on coagulation it will protect the mite from the dip.

Lambs do not need to be dipped for so long a time as older sheep, as their wool is short. They are also more delicate in constitution, hence cannot stand the dipping as well as older sheep.

Always water sheep before dipping, otherwise they may drink the dip which is sometimes found in little puddles in the dripping pens.

Each sheep should be held in the dip from two to three minutes, and the head quickly immersed once or twice just before the sheep leaves the vat.

A sheep in moderate length of wool and allowed to drip thoroughly after being dipped will carry away from two to three quarts of the dip. A sheep after being shorn will carry away about a quart of the dip.

The question should not be, how many sheep can be dipped in a day, but how well can they be dipped.

If scabby sheep are taken direct from a pasture and dipped, they should not be returned to that place for a period of 30 days. Heavy rains are said, however, to disinfect open fields. If the sheep have been housed in buildings prior to the dipping, these buildings should be disinfected before the sheep are returned to them.

Purchase no proprietary dips except those having the approval of your state agricultural department. Use all proprietary dips exactly according to directions.

Best Crop Farm.

The boys and girls of the farm interested in farm life and agriculture mean more to the country than profitable crops of wheat, oats and live stock. If the young people are interested in farm life it means they will take charge of the work of the farm and become useful and valuable citizens. They have no desire to move to town and lose themselves in the city. They recognize the beautiful side as well as the profitable side of farm life. Too much attention cannot be given to the boys and girls. They should be made partners with mother and father, and their every question relative to plant and animal life answered. In this way they will see deeper than the surface, and will take pride in the work they are doing.

Growing Table Vegetables.

Plant several kinds of beans to determine which succeeds best in your soil.

Plant an abundance of beets to allow for greens.

Sweet corn planted every two weeks will give a long succession.

Start cucumber seeds in the house or a cold frame.

To Clean Plumage.

The plumage of a white fowl can be cleaned of stain by washing with a clean white or transparent soap that is free from much alkali. Make a strong lather and use your hand and a soft hair brush. Stroke the feathers downward from the head to the tail.

WORLD OWES DEBT TO WOMAN

Fostering of Agriculture Has Been From the Beginning of Time in Female Hands.

Agriculture today depends chiefly upon the work of the primeval woman. We are indebted to the nomad's wife for the greatest of all economic services. She tamed the young of the more tamable animals, gave them to her savage husband, and made of him the more civil herdsman who for ages followed his flocks after the manner of Jacob and Lot and Job. This fertile wife of the nomad became the wife of farmers, and she made a farmer of her son by placing in his hand the precious seed of the grains, the present basis of agriculture, the bread of man, and the concentrated food of all our domestic animals.

Where did this ancient mother get these precious seeds? In many cases we do not know, and cannot even guess. She found some plant with one or two rich seeds, planted them, and then generation after generation her descendants picked over their little grain patches, selecting seeds to be preserved from the harvest festival to the next spring planting festival, which we now call Easter. By this process running on through unknown generations of men, the plants became so changed by the artificial application of Darwin's law of selection that now no botanist dares suggest what plant or plants were the wild forebears of some of the present grains from which the world today obtains its bread.

We are indebted to this cave or tent dwelling woman. But shall we accept her work as final? Can science do no better than follow along the path she laid out? The fact that agricultural science is today doing little more than this is one of the pathetic illustrations of the smallness of our view.—Prof. J. Russell Smith, in Harper's Magazine.

IN HOUSES OF CORNSTALK

Primitive Dwelling Places That Are Occupied by the Poorest Class of Egyptian Peasants.

On the outskirts of Alexandria we passed numerous groups of Bedouins, camping by the side of the Mahmoudieh canal. Out in the fields men and women, dressed alike in the loose cotton gown of the country, were busily at work. The fields were dotted with curious doorless structures made of cornstalks. They are used as temporary homes at certain seasons of the year, as, for instance, when the crops are being gathered.

Later on I entered one, and found it to be not more than five feet square; one could not stand upright inside. The place contained nothing but a few jars and cooking utensils. In the winter the occupants wrap themselves up in their clothes at night, covering the heads also, but leaving the feet bare. The hut I saw was occupied by a man and his son. These people, of course, are the fellahs—the peasants—the pure Egyptian of the poorest class.—Christian Herald.

13,000 Miles of Silver.

The greatest money count in the history of the United States is now on. Every piece of money in the country's billion-bulging treasury must be handled and each security fingered. A corps of men—the most expert money counters in the world—will work at the task day and night, but it will take them sixty days to finish it. There are 156,708,960 silver dollars alone in this vast sum. Much of the coin counting is done by weighing, but there is an ingenious machine which digests silver dollars, quarters and halves and counts them as fast as a man can turn the handle. If the silver dollars were stacked one on top of another, they would tower 835 miles high. If they could be laid in a continuous line, each touching the other, the silver hoard would stretch out for a distance of 13,000 miles.—Robert D. Heintz in Leslie's.

A DESIRABLE UP-STAIRS TENEMENT—in the Gates Block, Stanstead Place, Que., of 7 rooms will be for rental to a good tenant, on May 1st, 1913. Apply to H. B. Gates, on the premises. 0417

EXCELLENT METHOD OF MANAGING THE BEES

Fine Location for Apiary, as the Trees Protect It From the Sun.

Mrs. Lillian Bowman of Neillville, Wis., gives her method of managing bees in the Metropolitan Farm Journal, as follows:

My experience as to earning money in several different ways impresses me that beekeeping is the least work and gives the best income.

Since being married, six years ago, I have tried experiments in several ways, among which are gardening, dairying, raising chickens and keeping bees, all begun on a small scale, beginning with one cow, a dozen chickens, one swarm of bees, etc. Within four years my bees had increased to over 20 swarms—good, strong colonies.

They will increase faster, if they are allowed, with less clear profit; for

each colony, large or small, needs a hive, and, of course, the small colonies will not make much surplus honey, and thus do not pay for their homes. These I rob of their queens and put them with other colonies. Each colony in the spring is worth from \$7 to \$10, according to the strength and breed. Each will throw out one large swarm which will make on an average 75 pounds of surplus honey, which sells at from 8 to 13 cents a pound, the expense being about \$1.50 for a hive and place to store honey, etc. Now for the work part: They have to be watched patiently during the swarming season in order to keep the new swarms from going away; then it is necessary to go and hive them.

A GOOD ROADS SUGGESTION.

Considerable publicity is being given to the suggestion of a "good roads day" for the Eastern Townships, which, according to the Sherbrooke Record, was originally made by a "prominent farmer."

It is proposed to fix a date, early in May, when the proprietors in every road division in the Townships will turn out for one day's repair work on the roads. The principal argument advanced in favor of the scheme is that the regular road work cannot be undertaken so early in the year, and, as a matter of fact, is not usually begun until well along in June.

The plan suggested is a good one—if all proprietors will cooperate. But not all of the farmers in this section have yet become reconciled to the "money tax." There has been much complaint of inefficiency. Some taxpayers claim that their money has not been wisely spent, and others have hinted at "graft." The statement has frequently been made that the roads are now in worse condition than they were under the old system of statutory labor.

The "prominent farmer's" suggestion is, in a way, a reversion to the system which has been discarded by most municipalities which count themselves progressive. It will, we fear, be considered as an evidence of the failure of the "money tax" system at the vital moment. It is "up to" the exponents of that system to prove its superiority at all times.

Why not start the regular road work early in May? Delay is mostly a matter of habit.

It is only natural to expect that the average farmer, if asked to turn out and fix the roads at the vital moment will object to paying for "machine" work later on.

"COVER UP THE WELL."

This brief extract is taken from "John Barleycorn," Jack London's powerful "story," in the Saturday Evening Post.

"One who has been burned by fire, must preach about the fire. I was only a human boy, taking the path in the world that men—took men whom I admired; big strong men. And the way was open. It was like an uncovered well in a yard where children play. It is of small use to tell the brave little boys toddling their way along into knowledge of life that they must not play near an uncovered well. They will play near it. Any parents know that a certain percentage of them, the liveliest and most daring, will fall into the well. The thing to do—we all know it—is to cover up the well."

The case is the same with John Barleycorn. All the no-saying and no-preaching in the world will fail, in the main, to keep men and boys, growing to manhood, away from John Barleycorn when John Barleycorn is everywhere accessible, and tempting. The only rational thing for the twentieth century folks to do is to cover up the well; to leave to past centuries all barbarisms, not least among them—John Barleycorn."

The "story" tells of the adventures of a young man, and how he fell into drinking ways. It shows up the evil thereof most truly and painfully.

PASTOR MILLER INSTALLED

Interesting Service in which Three Denominations Took Part

The service of recognition and installation of Rev. Clifford Lore Miller as pastor of the First Universalist Church, Derby Line, was held Thursday evening, April 17, at the Church. An organ prelude by Mrs. B. F. Butterfield was followed by invocation and scriptural reading by Rev. T. A. Halpenney of the Centenary Methodist Church. The sermon of the occasion was by Rev. Benjamin F. Butler of the Universalist Church, St. Johnsbury, Vt. This address was based upon a clause from the 28th verse of the 2nd chapter of Joel: "Your old men shall dream dreams, your young men shall see visions." It was an interesting and helpful presentation of the "New church," as the speaker termed the church of the present and future. All accomplishment in any field of endeavor must be preceded by dreams and the seeing of visions. Through these mediums come the apprehension of all leaders of thought and work. The visionless life must necessarily be resultless. The speaker found conclusive proof of his contention in the lives of many historical figures, of whom Jesus was chief. There was an entire absence of doctrinal discussion or claim. The address was a strong appeal to the men and women of the church to cooperate with their young pastor in an uplifting work in the community. This was the speaker's definition of the mission of the militant church of Christ. The prayer of installation was by Mr. Butler. The address to the parish and welcome to fellowship was by Rev. E. E. Marggraf of North Hatley. The speaker's definition of the preacher as a teacher and his claim that the pastor went in and out before his people and communities as a teacher of morality and truth was fresh and stable. Mr. Marggraf's was a very practical talk. That portion of it in which he welcomed Mr. Miller to the two Universalist associations was pregnant with good will and helpfulness. Owing to the absence of Rev. H. F. Hallett, pastor of the Congregational Church, Gen. Butterfield gave the address of welcome from the community to Mr. Miller. This address aroused the pride of resident hearers as the speaker referred to some non-resident estimates of the pull-together spirit in the villages. The musical program was most excellent. Miss Foss sang a solo and the choir an anthem, Mrs. Butterfield presiding at the organ. The whole service was one of uplift and a promoter of neighborliness and cooperation. It must have been a source of encouragement to the new pastor.

UNIVERSALIST NOTES.

Sabbath worship at 10.45 a. m. Sermon, "A brief Survey of Universalism." The pastor has found considerable demand for a series of sermons on our history and belief. Other topics will be John Murray, Hosea Ballou, The Divinity of Christ, Universalist Belief Concerning Hell and Lost Souls and A. General Statement of Our Doctrine.

The Junior Circle will meet with Mrs. Eugene Laythe next Wednesday. The pastor wishes to take this opportunity to thank the choir and those who assisted so kindly at the installation service.

Sunday school at noon.

THE U. S. TARIFF.

Bradstreet's, Toronto, April 22 says: "Canada touches the United States for three thousand miles. The proposed tariff reform in the United States affects this country as it does no other. Every phase of trade is interested. The lumber and pulp industries of Canada will no doubt benefit because, while we have untold wealth of pulp wood and timber forests, United States is sorely wanting. Live stock, produce and dairy farmers in Canada will prosper by the proposed reduction of duty, as a wider, higher market is being opened to them. Canadian wheat growers will not be affected materially, but barley producers will find a profitable market which they have not had recently. Canadian cheese and butter manufacturers will rather suffer by the reduction clause, as our limited production of milk and cream will go free into the United States, that is to foreign manufacturers."

Under reciprocity the Canadian butter and cheese makers would have shared in the general prosperity, as their "finished product" as well as the "raw material" would have been admitted to the markets of the United States, duty free.

It is stated that the construction programme of the Canadian Pacific Railway in Western Canada this year will amount to \$50,000. This includes the tunnel at Rogers Pass, much double-tracking, terminals at various points, many large bridges, and irrigation work.

One hundred executions are reported to have followed an unsuccessful attempt to assassinate General Li Yuen-Heng, Vice-President of the Chinese Republic.

Eastern Townships College of Music Students' Recital.

The recital given by the students at the Eastern Townships College of Music, on Friday evening, April 18th, was certainly worth hearing. The citizens were conspicuous by their absence, which we believe was a mistake. The enterprises and endeavors of our churches, schools and library are of vital importance to the life of our community. Our citizens should be ever loyal in their support of these institutions.

The programme presented was particularly interesting as an educational demonstration of the work being done by the College of Music; and its arrangement, as well as the selection of numbers, rendered it of genuine interest from beginning to end.

The opening number, Encore, by de Saxy, was performed by the orchestra with precision and finish. "O, for a Breath of the Morelands," by Whelpley, received a most creditable interpretation by Frank Hallett. This young man has responded well to instruction. Frances Mack read "Unexpected Guests" with ease and naturalness. The fourth number, Mendelssohn's "Rondo Capriccioso," received a very full and careful interpretation by Bernice Elliot. The violin solo, "Perpetual Motion," by Bohm, was rendered by Gladys Howard with good spirit and careful bowing. Gladys Swanson has a clear, true soprano voice, and sang Harley's "Sweetest Flower that Blows" and Bishop's "Love has Eyes" in a very commendable manner. Her intonation was true, and she manifested very careful and efficient training. Dorothy Flint's reading of Barrett's "The Sign of the Cross" was very effective. There was no doubt of her personal belief in the spirit of the number. Possibly it was too heavy work for an amateur. One of the particularly fine numbers of the evening was Brahms's Rhapsodie Op. 79, No. 1, performed by Carroll Brainerd. This young man has a pleasing manner at the piano, giving the impression of much reserve power. One feels that he has undertaken nothing beyond his ability. There is soul in his interpretation, and delicacy of technique that is delightful. Two charming numbers—(a) "Salut d'Amour," by Edgar, and (b) "Rezeda," by Friml, were exceptionally well played by Miss Beatrice Webb. She is to complete her course in violin this year, and we have watched with pleasure and satisfaction her development in the art of music during the past five years. Fred Montle sang better than ever. The lower notes in the Armorer's Song were a bit beyond his register. His singing of the "Banjo Song," by Homer, was cleverly done. Marguerite Holding's reading, "The Hazing of Valiant," was splendidly done, and was a credit to herself and teacher. The final Chorus, "The Soldiers' Chorus," from Faust, brought the programme to a close. It was sung spiritedly, and the ensemble was good.

YOUR SUMMER VACATION.

A most interesting and well printed publication has just been issued by the Grand Trunk Railway System, dealing with the attractions of the well-known Algonquin National Park of Ontario, and copies may be had from any of their City Ticket Offices.

The territory dealt with is a thoroughly universal vacation one, combining high altitude (2000 ft.), pure air, unspoiled forest, beautiful lakes, splendid fishing, much wild game, hotel or camp life, in close touch with civilization or entirely apart from it and satisfying alike to novice and veteran.

Included in this publication is a description of the "Nominigan Camp" situated on Smoke Lake, the centre of one of the finest fishing grounds in Canada, and which will be open for the first time this year with accommodation for 60 people. This idea of a log cabin camp is an innovation in Canada, but one that has become most popular and attractive to a large number of summer playground seekers in the Rangeley Lakes, Maine. Good hotel accommodation is offered at the "Highland Inn" and the rates are most reasonable.

The publication is well written and the map that accompanies same gives one a good idea of the 2,500,000 acres that are found within the Park Baunda ries.

Taft to Speak at Montreal.

Former President Taft has accepted an invitation to read a paper on a subject to be announced later at the annual meeting of the American bar association at Montreal in September. Chief Justice White of the supreme court of the United States will preside at the session of the association and Viscount Haldane, the lord high chancellor of Great Britain, will make the annual address. Chief Justice White, the highest officer of American courts, will introduce Viscount Haldane, who occupies a similar position in England. Senator Elihu Root of New York will preside at the annual banquet September 3.

The National Bank of Newport, an oldestablished, sound financial institution, is now paying 4 per cent interest on savings deposits.

BORN.

SMITH—At Apple Grove, Que., Apr. 16 h, 1913, a son to Mr. and Mrs. Vernon Smith.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
Address: F. J. CHENEY & CO., Toledo, O.
Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

TO

To Close out his Stock

I have decided to retire from the GENERAL STORE BUSINESS. It is quite unnecessary that I should explain my reasons for this change, as all know that I am interested in manufacturing and wish to devote all my energies to it.

All the goods in my store will be sold at cost or less from now on. Below are some examples of what my prices are to be, for I mean just what I say:

Seeded Raisins, 4 pound packages for	- - -	25c.
1913 Garden and Flower Seeds,	- - -	2c. a paper
21 pounds of Granulated Sugar,	- - -	\$1.00
A fine line of Corset Covers at	- - -	18c.
Senour's Floor Paints in 1 qt. Cans and 2 qt. Pails,	\$1.60 per gallon	
Men's Wool Work Pants, a good one, sold everywhere for \$1.75 and		
\$2.00, my closing price,	- - -	\$1.25
Heavy Work Shoe for Men with Tap, look at this	- - -	\$1.19
Pen-Angle Balbriggan Underwear, 1913 Goods, for 39c. a piece and I have a full assortment of sizes.		
Priestley's Dress Fabrics in Serges, etc., 65c. is the regular price, I will sell at	- - -	40c.

Come in and stock up for the year at cost or less. Don't be late in coming, for this is a bona fide sale and I have the Goods.

BEEBE.
Mrs. Luther House is to have an
auction Tuesday, May 1st, at one
o'clock.

Remember the auction at 1 p. m.
Saturday, April 28th, at the farm
recently vacated by Charles Haselton.
The Book and Thimble Club will
meet with Mrs. Lyman House Tuesday,
April 29th. A fine program is being
arranged for the occasion. It is hoped
that all the members will be present.

Mrs. Elmer Orcutt of Derby was
a week-end guest at the house of Mr.
and Mrs. Geo. Twombly and also
visited other relatives.

Mrs. Wm. Scrogie and little son and
sister, little Miss Shirlee Lunderville,
have gone to Boston. Shirlee is ex-
pecting to remain there for a time
with her uncle, Moses Lunderville.
Charles Thayer has moved to Fitch
Bay.

Mrs. Wm. Johnston, who recently
went to Cookshire, has returned here
for a short stay.

Mr. and Mrs. A. H. Whybrow are
entertaining a new boarder, a little
girl born Sunday, April 20th.

Sidney Pocock is enlarging his glove
factory by putting on an addition to
the building. He will then employ
more help.

The annual business meeting of the
Ladies Aid, will be held in the parlors
of the Methodist Church Friday, April
25th at 3 p. m. at which time it is hoped
that all members will be present, as
officers are to be elected for the ensu-
ing year.

Mr. M. D. Bacon of Ayer's Cliff was
a caller on friends here Tuesday.

Mrs. A. Lula Bigelow of Lyndonville,
Vt., is to be at Mrs. Alex. Blair's
Wednesday and Thursday, April 23rd
and 24th, with new spring millinery.

Other Beebe items on second page.

COATICOOK.

The funeral of Rev. Father Seguin,
who died on Saturday last, was largely
attended on Tuesday morning. The
church was filled to its full capacity.
Father Seguin was a very active man,
and will be missed in this town.

Mr. Erastus Buckland passed away
Saturday evening after a long illness.
The funeral took place at his home in
Baldwin Street, Rev. M. Viezer officiat-
ing. Mr. Buckland was born in
Barnston where he resided till with-
in a few years, since which he has
been a resident of this town.

The Rev. Mr. Bourke, of Montreal
preached an excellent sermon at the
Methodist church on Sunday, and gave
a lecture at the church anniversary
the following evening.

BOYNTON.

The ladies of the Missionary Auxil-
iary were very pleasantly entertained
by Mrs. A. C. Parkhill last Thursday.
The next meeting will be held at the
home of Mrs. Newton Quimby on
Tuesday afternoon, April 29th, from 2
until 5 o'clock.

Mrs. Alba Huckins has returned to
her home here after spending several
weeks with her sister, Mrs. Levi
Cramer, at St. Johnsbury.

Mrs. W. E. Davis and son of New-
port were guests of her sister, Mrs. A.
C. Parkhill, over Sunday.

Mrs. Wellman Brown is visiting
relatives in Boston and Lowell, Mass.

WAY'S MILLS.

Mrs. Delia Clifford has returned
home after visiting her son, Edward
Clifford at Heathton.

Mr. and Mrs. Fannie Daniels spent
Saturday in Coaticook.

Mrs. Susan Hall has returned to her
home in Suncook, N. H., after spend-
ing a few days with her brother, Geo.
Dustin.

Mr. J. L. Converse has purchased a
new pasteurizer and has contracted
the summer's cream to Hood & Co.,
Boston, Mass.

MASSAWIPPI.

Mr. Loriston Chilson, who died last
week at the home of his sister, Mrs.
Fred Pierce, Ayer's Cliff, was interred
in the family lot here. He was born
here about the year 1840. His parents
were of the old stock—Oils Chilson
and Prusia Reed, and his grandparents
were Samuel Reed and Prusia Hitch-
cock, who were early settlers of Hatley
Township, coming from Connecticut
and of English origin.

Quite a long time ago deceased
went to Martinville to reside with
Mr. and Mrs. Pierce. He will be well
remembered by many as mail carrier
between Martinville and Compton
Village. Subsequently he lived at
Boynton, and of late years at Ayer's
Cliff. The loss of eyesight was his
grievous misfortune, and much sym-
pathy was always extended towards
him. His sister, Mrs. Pierce, was his
tender and watchful companion, and
will miss his cheerful presence.

He was very brave in his trouble and
as active as his condition would allow.
His death was sudden; although he
had been in failing health, he was up
and about until the last, when he
passed to the "seeing life beyond"

warning, just laying the burden down.
Monday Mr. and Mrs. T. Rowell of
Sherbrooke and Mr. and Mrs. H. Abbot
of Abbott's Corner were guests of
their sister, Mrs. C. Peck, for a
birthday visit. Some other members
of the family were unable to attend.

Mr. A. Smith and Mr. E. Lord were
at Danville a couple of days last week
on business.

Mr. C. Young and Mr. Voisard of
this town have recently purchased
automobiles, the first a Reo, the latter
an Overland. They are now taking
instructions in operating the cars.

The roads are fast drying up and if
the people would "take a day" and fix
up the bad places it would be a fine
scheme.

The Government Engineer passed
through here last week looking over
the two proposed routes for a highway
from Sherbrooke to Derby Line—one
the straight route the other the crook-
ed one.

The Church roof is about completed.
Mr. Gardner and Mr. Stebbins have
done the work in a thorough manner.

Mr. Marcell Frappied has leased his
farm to Mr. George Young, and leaves
this week for the West, to take up
land adjoining that of his stepson, Mr.
Leon Badger. His family will not go
at present. Mrs. Frappied will go to
Leominster, Mass., to spend some
months with a sister, and the daugh-
ters intend to remain in Sherbrooke.

The section men were called out
Sunday to remove a pole and wires
which had been blown across the
railroad track.

Mrs. B. H. Kezar has been some-
what ill of late with throat trouble,
being confined to the house.

Mr. James Reburn made a flying
visit here over Sunday when he was
a guest at the home of his brother, Mr.
G. Reburn. The former is superin-
tendent of Green Farms, owned by
Mr. Bedford of the Standard Oil Co.,
and located in the State of Connecti-
cut. He has a responsible position as
well as a remunerative one.

Saturday evening our young people
gathered at Hillcrest for a few hours
of amusement.

Mr. George Colt has been visiting at
Mr. S. Colt's of late.

Mrs. Oils Shurtleff of Coaticook is
visiting her parents, Mr. and Mrs. M.
Harvey.

CRYSTAL LAKE.

The community was saddened on
Saturday, April 12th, to learn of the
passing of Mrs. Henry Dustin. Death
was due to injuries received on March
24th, when an electric bolt entered
the Dustin home. Deceased was ren-
dered unconscious and was removed
to the home of Mr. Wm. Minor, where
she was tenderly cared for. She
leaves a husband and seven children
(one having died since the mother's
death) besides numerous other rela-
tives and friends to mourn her loss.

Deceased has been a resident of
this place but a few years, and had
won the respect of all who knew her.
Prayers were held Monday morning
at Mr. Wm. Minor's. Funeral at the
Ayer's Cliff Congregational Church,
Rev. Churchill Moore officiating. In-
terment in Ayer's Cliff cemetery.

The one year old daughter of Mr.
Henry Dustin died of diphtheria on
Wednesday, April 16th. Interment
in Ayer's Cliff cemetery.

Miss Ethel Minor has been quite ill,
but is better at present writing.

Miss Pearl Copland was the week-
end guest of Miss Eva Bachelder,
Pleasant Heights. She was also a
recent guest at the home of Mr. J. R.
Wells, Oliver.

FAIRFAX.

Mrs. E. Brown and Mrs. L. Bent
have returned from Boston.

Mrs. V. McFadzean was a guest at
Mr. C. Lincoln's recently.

Mail boxes have arrived. Mr. C.
Crook has his up.

Mr. Edgar Chadsey is at the home
of his parents.

Farmers have started their spring
plowing.

Wedding bells in the near future.

Miss Gertrude Crook is in Sher-
brooke this week.

AYER'S CLIFF.

St. George's Guild will meet with
Mrs. Geo. Davis, School St., on Thurs-
day, May 1st. Everybody cordially
invited.

About 90 people attended the La-
dies Aid social on Thursday evening of
this week at Mr. E. G. Davidson's
and a pleasant evening was spent.
Proceeds \$15.25. Next regular meet-
ing, Tuesday, May 6th, at the home of
Mrs. S. Emery.

Word was heard on Tuesday of the
sudden death of Mr. Sterling Rose in
Montreal. Mr. Rose, who had many
friends here, was a former resident of
this village, and the son of Rev. Ed-
win Rose, who was for several years
pastor of the Congregational Church
here. He was a favorite among old
and young, and the news was received
with much sadness.

Mrs. Sampson and Mrs. S. S. Wor-
then were in Sherbrooke on Wednes-
day.

Mr. A. G. Clough was in Montreal
on business the early part of the
week.

Mrs. A. E. Fish is visiting friends in
Montreal.

Mrs. Eaton of St. Johnsbury was a
recent guest of Mrs. A. L. Pierce.

Mrs. H. Edson and Mrs. A. A. Drew
visited Mrs. O. Bean in North Hatley
on Saturday.

A meeting of the L. T. L. was held
at the schoolhouse on Friday, when
Mrs. F. A. Johnston gave a very in-
teresting talk.

Mrs. E. Morrill of Sherbrooke, who
is about leaving to visit her daughter
in Saskatoon, visited Mrs. H. N.
Wheeler this week.

Mr. M. H. Johnston and Miss J.
Johnston from Lennoxville visited
their brother here for the week-end.

Mr. Heath from Waterville visited
at Mr. H. G. Buck's this week.

Miss Veda Chamberlain spent the
week-end in Stanstead.

Mrs. G. W. Woodard is entertaining
"Grandma" Fish for a few days.

Mr. D. F. Davis has returned to his
home here, much improved in health.
Mr. Bacon is moving this week to
his home on Tyler St.

Mr. Stickland, who is having an
auction of household goods on Friday,
will make his home in Lennoxville.
He will be missed by many friends
here.

The funeral occurred on Friday
April 18th, of Mr. Loriston Chilson,
notice of whose death was given last
week. He was a son of the late Oils
and Prusia Chilson and was born at
Massawippi 73 years ago. Though of
frail health, and for the past seven
years entirely without sight, yet he
was uncomplaining, patient, and
cheerful at all times, and uncon-
sciously taught many a lesson of con-
tentment and unselfishness to those
more favored. He will be missed by
many friends and neighbors, but the
most of all by the sister, Mrs. A. L.
Pierce, with whom he has for thirty-
seven years made his home and who
has cared lovingly for him. The funeral
was conducted by Undertaker
Audinwood of Stanstead at the home
here, the interment being at Mass-
awippi. Rev. E. E. Margraf of North
Hatley officiated, deceased having
been for many years a member of the
Universalist church. The Congrega-
tional choir sang two requested
hymns. Flowers were sent in by
neighbors and friends, as well as by
the W. C. T. U. and Ladies Aid. The
bearers were Messrs. H. Badger, H. G.
Buck, G. Bowen and C. H. Libby.

The National Bank of Newport, an
old-established, sound financial insti-
tution, is now paying 4 per cent in-
terest on savings deposits.

CURRIERS.

The sugar season is over, and with
all the unfavorable weather the sea-
son has been an average one in
quantity, the quality somewhat impaired
by rain-water.

Master Lawrence Taylor is recover-
ing from measles.

Mr. R. H. Stone was at Channell on
Sunday.

Mr. Ratcliff and Mr. F. F. Porter
have had la grippe.

Mr. James Bowen and Mr. W. H.
Bowen were at Barre, Vt., last week.

Miss Maggie Stone has bought a
home in Magh and gone there to re-
side.

Mr. Wm. Pearson has moved into
J. Champeau's house.

APPLE GROVE.

Mrs. T. Blake and Mrs. Georga A.
Harvey have been quite ill with bad
colds the past week.

A baby boy was born to Mr. and
Mrs. Vernon Smith on Wednesday
last.

Mr. Frank Harvey had the misfor-
tune to sprain his ankle quite badly.

Mrs. Eugene Moulton, Harold
and Marter Russell Moulton of Rock Island
visited her parents, Mr. and Mrs.
William Bissell, recently.

CARD OF THANKS.

We wish to extend our heartfelt
thanks to all the friends and neigh-
bors who assisted us in the sickness,
death and burial of our wife and
mother. Especially would we thank
Mrs. Wm. Minor for taking the sick
ones into her home; also the Ayer's
Cliff choir and those who sent the
beautiful flowers.

HENRY DUSTIN AND FAMILY.

GO TO RALPH J. HUNT'S FOR YOUR BATHROOM and HEATING PLANT FOR YOUR NEW HOME

ROOFING, Cornice and Steel Ceilings furnished and put on right.
Water Conductors of Galvanized Steel are the correct thing for
your NEW HOME, and it is a good idea to substitute them for the old
Wooden Contraptions of yesterday. Come in and let me figure on the
piping and plumbing.

I am gradually adding a good stock of GENERAL HARDWARE.
I have a good line of CARPENTER'S TOOLS.

Doubtless you remember my line of NO. 1 ENAMEL WARE? I
only buy the best grade. It costs more. Not how cheap but How Good
is my idea of Enamel Ware. You can't afford to buy any other grade.

I have a fresh stock NICKEL WARE. This is Handsome and
Durable. It is plated on a COPPER BASE.

As the grass on your lawn begins to show green, thoughts revert
to the condition of the

LAWN MOWER, I HAVE A NICE LINE

Warm, sunny days brings the Iceman to the door and the Refri-
gerator is cleaned and made ready. Don't you need a new one? I
have a good line.

The Blue Flame Oil Stove with the Look in Oven
is the comfortable, economical Range for warm weather. I have the
line.

RALPH J. HUNT

models, all colors. Priced at \$5.00.

GIRLS' DRESSES

Something new for the girls in wash suits. Norfolk blouse and
separate skirt, both plain and plaided, are shown. Priced \$1.25 and
\$1.50, sizes 6 to 12 years.

MILLINERY DEPARTMENT

Those wishing hats for Sunday would do well to get their orders in
the first of the week as we have been unable to get out all the orders
the past two weeks.

CARPET SIZE RUGS

Our purchases this spring have crowded our department beyond its
capacity. The reason for this large purchase was the fact that one
of the largest New York rug dealers found themselves over-loaded.
The extreme high price of rugs this spring stopped their usual sales
and they simply cut the prices to a figure that unloaded their entire
stock and by extreme good fortune this store was represented at the
opening of the sale. Enough rugs were selected to last us several
seasons if marked at the present high prices, but we have marked
them at prices that we feel will sell them all this season.

Five Frame Body Brussels Rugs are being sold in all the city stores
at \$31.00 to \$32.50. Our price is \$25.00.

Every Rug in our stock is marked at as low a price. \$10.00 buys a
good Tapestry Rug, 9x12 size. Extra large sizes and all the smaller
sizes are carried in stock.

Ladies' Home Journal Patterns
are the best

The Style Book at 5c. is the best value
of any book published to day. Good
Dressing, free, is better than many
fashion books that you buy. If you
cannot come to the store for a copy of
Good Dressing send a one cent stamp
to pay postage and have it mailed to
you, 12 cents pays a year's subscrip-
tion.

Constipation

is an enemy within the camp. It will undermine the strongest constitution and ruin the most vigorous health. It leads to indigestion, biliousness, impure blood, bad complexion, sick headaches, and is one of the most frequent causes of appendicitis. To neglect it is slow suicide. Dr. Morse's Indian Root Pills positively cure Constipation. They are entirely vegetable in composition and do not sicken, weaken or gripe. Preserve your health by taking

Dr. Morse's

Indian Root Pills

SOME HELPS FOR THE LAND HUNGRY MAN

Milk flow may be kept up during dry seasons when pastures fail by the use of crops such as sorghum, millet, rye and other crops of this nature sown at short intervals earlier in the season.

(By W. J. SPILLMAN, Chief of United States Bureau of Farm Management.)

Near the larger cities it would probably be better to grow some of the more perishable truck crops and to keep one horse for marketing purposes, but in most country places the system as outlined here would be more satisfactory and would require only two horses.

In addition to four cows and two horses the owner of such a farm could keep one or two brood sows and fifty hens.

Assuming that the farmer understands his business and is on a soil and in a region adapted to the type of farming here outlined, it ought to be possible on such a farm to secure an income somewhat as follows: The five acres of potatoes ought to produce five hundred bushels at least, and if the man is a good potato grower the field can be made to average more than two hundred bushels.

One ought to average at least fifty cents a bushel for the potatoes. This would make \$250 for this field. The three acres of cabbage ought to produce \$300, and the two acres of onions ought to produce \$300. The onions require a good deal more work than the other crops, hence, the smaller acreage of them. After the farm is started the farmer must be guided by his experience, and it might prove wise to put the entire five acres in onions, provided labor is available.

If the four cows kept are good ones—and the farmer is not justified in keeping any other kind—one of them ought to furnish dairy produce for the family, and the other three, if properly managed, ought to produce seventy-five dollars worth of dairy products apiece a year, making two hundred and twenty-five dollars income from the dairy.

It ought to be possible to produce twelve pigs to sell at an average price of fifteen dollars each, making one

hundred and eighty dollars from this source. The fifty hens ought to produce what eggs and poultry the farmer needs and furnish fifty dollars worth of material for sale. Adding these sums together gives us one thousand three hundred and five dollars as a possible income from such a system of farming.

From this income all the expenses of running the farm and of the family living must be paid; but with half an acre of garden, an acre and a half of orchard, and with all the potatoes, cabbage and onions the family can consume, with hogs for meat, and with the eggs and poultry the family living ought not to cost more than two or three hundred dollars for things bought.

The city man must not get the idea that he can start in a system of this kind without experience and make a success of it from the start. It will mean a lot of very hard work, hard living and hard study for two or three years, and of these three things study is the most important. On the other hand, the man who thoroughly understands his business can increase the income here estimated very materially.

One other very important consideration in connection with a farm of this kind: It is assumed that it is near enough to a town or city to permit the farmer when he is carrying his potatoes, cabbage and onions to market, to bring back with him on each trip a load of manure for use on the farm.

Where this can be done such a farm could be made highly fertile. The places to put manure in such a system would be just after the potatoes, just before either of the corn crops, and in the fall of the year manure could be put on the clover field which was used for pasture during the summer. This field should then be plowed late in the fall in preparation for potatoes the next year.

(Copyright, 1913, by C. M. Shultz.)

POISONS FOUND IN SOME PLANTS

Bundles of Oxalate Crystals Are Offensive to Rabbits and Snails.

(By MYRLA IRONS.)

The part played by the powerful chemical substances secreted in the various parts of many plants is imperfectly understood. Free prussic acid in some plants was the remarkable discovery made not long ago, and now Professor Peche has concluded that in the cherry laurel this poison is stored in various tissues as a reserve plant food. Other German biologists have been seeking to prove that various plant poisons give protection against enemies. Results have been obtained by Prof. W. Peyer tending to show that the various acids, oils, alkaloids, glucosides, and other chemicals of plants are poisonous or offensive to rabbits, snails, insects, and other creatures. In the pastures the plants yielding medicinal oils are avoided by both grazing and wild animals. The acid bearing plants such as are used for human food as salads, are poisonous to snails and slugs, and are protected nearly as effectually against rabbits. Beans, peas and lentils contain some unknown poison that causes rabbits and mice to refuse the seeds until the active principle has been removed by several washings. An acid product of seedling roots—such as maize, oats and rye—repels snails, as do hairy stalks and sticky surfaces, and plants having bundles of calcium oxalate crystals are offensive or poisonous not only to rabbits and snails but even to man.

Important Industry.

Few people realize how many thousands of people are engaged in the raising of pigeons, both for the market and the show room. It is an important branch of the poultry industry, and is becoming more and more popular each year.

Profit in Pork.

While pork can sometimes be made at a profit when corn is supplemented with nothing but a concentrated feed, still it is not wise to use concentrated supplements alone.

Profitable Crops.

When clover can be grown at all, profitable crops can be grown, and the land kept up by clover and lime.

STRANGE FACTS ABOUT FLOWERS

Every Single Plant Has Some Peculiarity—Some of Them Can Be Seen.

Violets open at three or four a. m., closing about eleven or twelve; some wild roses about four and five a. m.; night shade, about six in the morning; buttercups and lilies are open by seven a. m. Early openers close at noon. Among others, the evening moth flowers open about six p. m. Cactus grandiflora begins opening at nine or ten in the evening, closing at midnight. The majority of flowers, however, are open from nine in the morning until six in the evening.

Wheat flowers last only about fifteen or twenty minutes—just long enough for their pollen to be carried by the passing wind—then their day is past. The hibiscus and calandrinia remain open for only three or four hours; but foxgloves last six days and some orchids from thirty to eighty days.

Every single flower we look at has some little peculiarity of its own. Some of them we can see, but not understand, even by thorough examination. There are orchids which throw their insect visitors into a shower bath of water, so they have to get out, by reason of their wet wings, up a certain path, where they touch the pollen masses and stigma. There are other orchids which throw the pollen masses at the insect.

The yucca is a lily-like plant, resembling the aloe, and a particular sort of moth lives wholly upon it.

When the flower opens, this moth proceeds to knead up a ball of pollen and inside places an egg, then thrusts the ball down into the ovary of the flower.

There a grub develops from the egg and eats the pollen, and some of the pollen fertilizes the young seed. If yuccas died out the moth would be exterminated, and if the moths were destroyed no yuccas would ever set their seed.

(Copyright, 1913, by C. M. Shultz.)

Scraps for Poultry.

Bran or middlings and beef scraps should be kept in receptacles to which the fowls have access at all times.

Good Combination.

Good seed, good cultivation, good common sense are a pretty good combination if good crops are desired.

ORE TRAMPLED INTO PUDDLES

Economical, Though Somewhat Primitive Methods Used at Many Mines Throughout Mexico.

It was at Pachuca, Mexico, that the patio system of separating silver had its origin. This system is still followed extensively at the silver mines throughout Mexico. The ore is crushed and worked down to a state of puddle. It is then spread out to a depth of two or three feet over the paved floor of the courtyard, or patio. To this mass sulphate of copper is added in powder, about fifteen pounds of sulphate to three thousand pounds of puddle. This is trodden into the puddle by horses. Several gangs of old, worn-out horses or mules, about twelve in a gang, are seen in various parts of the patio, being driven round in circles to tread in the sulphate.

On the next day six per cent. of common salt is added and in two more days one hundred per cent. of pure quicksilver, or as much as the assay of the ore shows is required. This mass is then trodden up by horses for fifteen days. It is then wheeled to a large tank through which passes a rapid stream of water. This washes away the clay, leaving the silver and quicksilver. This residuum is poured into cone-shaped canes bags through which most of the quicksilver runs out, and what remains with the silver is passed off with the vapor by means of heated retorts. None of the quicksilver is lost, and even the vapor is brought by cold water to its original state and used again and again. The quicksilver soon rots the hoofs of the horses and the mules, but the Mexicans themselves do not seem to be much the worse for it even though they wade around in the puddle for days at a time.—Harper's Weekly.

Can't Beat the Smokers.

Local tailors are receiving orders from their customers that at least one asbestos pocket be placed in every suit and every overcoat they make, as a result of the new "no smoking" rule of the Philadelphia Rapid Transit Company.

A widely known Walnut street tailor placed a large order for asbestos today, and when asked if he had been employed to make an asbestos suit he explained:

"Why, some of my customers are bringing back their overcoats to have the asbestos pocket fixed. They want the pocket as a saving in cigar bills. There is no danger to the clothes, as there is a little flap on the asbestos pocket that makes it partially airtight, and the cigar, without air, goes out almost as soon as it is placed in the pocket. It smokes very little, and there is no danger that the conductor will attempt to put off the passenger with the asbestos pocket."

The tailor said he got the idea of the asbestos pocket from a wealthy business man who pays 50 cents apiece for his cigars, and objects to throwing away 45 cents' worth because the traction company says he must.—Philadelphia Correspondence New York Tribune.

Apple Tree Holds Record.

An apple tree growing in the Walla Walla Valley, Washington, holds the fruit-yield record. It produced nearly 200 bushels of apples last season, thus breaking its own record of 126½ boxes in 1907, the highest production, we are assured, from a single tree known anywhere in the world. This tree bore 70 boxes in 1906, 42 boxes in 1908 and 45 boxes in 1909. More than 500 barrels of fruit have been picked from it since it came into bearing in the spring of 1871.

The tree was grown without irrigation from a seedling planted in 1866. It is forty-two feet in height and its branches spread fifty-seven feet from tip to tip. The trunk is seven feet in circumference at the base and measures six feet six inches just below the first limb, which is four feet from the ground and measures four feet seven inches. The tree is sound and healthy despite the fact that it has produced fruit every season for nearly forty years.—New York Press.

Letters of Two Kings Found.

It is said that a most curious discovery has been made at Apsley house, Hyde Park Corner, the town house of the Dukes of Wellington.

In the cellars there has been found all the private and state correspondence of George III and George IV. These documents, covering a vital period of over 60 years, must include Napoleonic references of great interest.

The letters, etc., have been removed to Windsor, and are now being sorted by the king's librarian.

According to one of these documents the Iron Duke's name was never Wellesley. The family name was Colley, and his grandfather was adopted by an Irishman named Wellesley.

Sure of a Job.

It was a new kind of recommendation for a servant, but very effective. The old employer said nothing about her accomplishments as cook, waitress, laundress or chambermaid. What she wrote was:

"She is as strong as a man and twice as brave. Three times while in our employ she captured burglars single-handed, and held them until the police arrived, and saved hundreds of dollars' worth of silver and jewelry."

All the manager of the employment agency had to do when that girl needed a situation was to read that letter out loud and there ensued a wild scramble among his customers for the strong-armed maid.

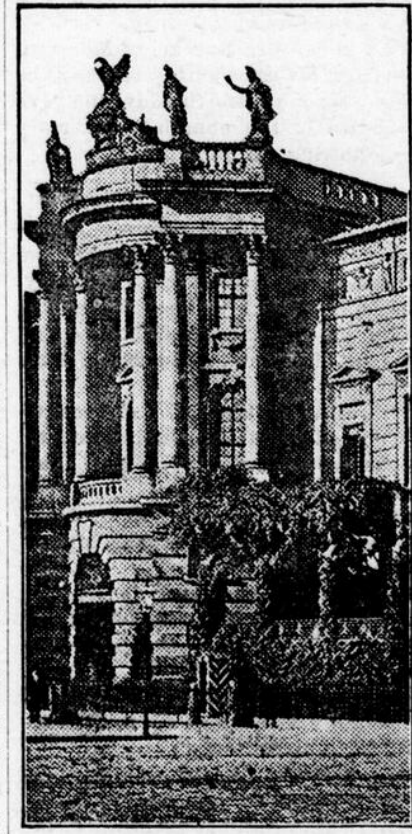

BERLIN'S WEST END

Comforts That May Be Had in Kurfurstendamm.

Section of Germany's Capital as Seen in 1912—Hotels, Cafes and Business Buildings All Have Modern Equipment.

Berlin.—Our European guide books are of little help if we wish to study the pulsating life of a modern city. There is in this respect hardly any difference between the English Murray, the French Joanne or the Baedeker made in Germany. They wish to give us a full list of the old established, hallmarked sights to which frequent allusions may be found in classical literature or modern fiction, but omit to take notice of the latest actualities. We are still directed by them to the Friedrichstrasse as the center of Berlin life. Such it was more than twenty years ago. As late as ten years ago the whirlpool of modern life was to be found at the Potsdamer platz, comparable to Piccadilly Circus in London. Nowadays it has shifted farther west to the long and broad avenue called Kurfurstendamm, says a Berlin correspondent. There we are in the "New West," the up-to-date part of the most modern of all European cities. Modern is also the accommodation the visitor may now find there. The "Boarding Place" that has just been opened is neither a hotel of the accustomed style nor a boarding house, but something between the two. If you ask for a room, a plan is handed to you, from which you see what accommodation there is, with prices inserted. If you want lodging for a week, a fortnight, a month, a year, the scale goes considerably down in proportion to the length of your stay. But with your furnished room you get also the comfort of dining rooms, an elegant cafe, a first-class restaurant of the German beer garden style, and all those conveniences of an American hotel for reading, writing and passing the time. It is a big building, containing 500 bedrooms, besides the lavishly spacious suites for general use and the halls for festivities.

It is astonishing how quickly fashionable society has moved into these quarters. Already now these outskirts of the city have developed a life of their own. Kurfurstendamm is now for Berlin life what the Fosse is

Front of Imperial Palace at Berlin.

for Vienna or the "Stroeg" between Kongens to Nytorv for Copenhagen, the promenade of the stylish part of the population. Here we find also that bohemian element and a great deal of that extravagance of high life for which Paris is famous. Of course the shops followed their best customers.

ENGLISHMAN AS A PROPHET

Sends Sealed Parchment to Historical Association, to Be Opened After 100 Years.

New York.—One of the unusual offerings at the annual exposition of the Modern Historical Records association here is a sealed parchment sent to the association by Frederick Harrison, English historian and economist. The trustees of the organization are directed to watch over the envelope and see that it remains unopened for at least 100 years.

It is understood that the inclosure is in the nature of a prophecy, based on a study of present conditions.

Five forms of "permanent records" are being preserved by the association—terra cotta tablets, photographic records made of indestructible clay, photographic positives on glass, parchments and portrait busts.

Most Valuable Cat in U. S.

Boston.—The most valuable cat ever brought to the United States arrived on the steamship Cambrian. The cat's name is Don Dal and it occupied a silken basket in the best stateroom on the ship. It is a Chinchilla and was consigned to Mrs. George B. Brayton of Brighton.

MOTHERHOOD SUGGESTIONS

Advice to Expectant Mothers

The experience of Motherhood is a trying one to most women and marks distinctly an epoch in their lives. Not one woman in a hundred is prepared or understands how to properly care for herself. Of course nearly every woman nowadays has medical treatment at such times, but many approach the experience with an organism unfitted for the trial of strength, and when it is over her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of children, and indeed child-birth under the right conditions need be no hazard to health or beauty. The unexplainable thing is that, with all the evidence of shattered nerves and broken health resulting from an unprepared condition, and with ample time in which to prepare, women will persist in going blindly to the trial.

Every woman at this time should rely upon Lydia E. Pinkham's Vegetable Compound, a most valuable tonic and invigorator of the female organism.

In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

After Childbirth

The depression and the sense of utter nerve fatigue experienced by women blots out interest in everything. The first step towards recovery lies in rebuilding the worn out nerve fibres, which can best be done with Lecithin, the form of Phosphorus required for nerve repair.

Asaya-Neural

contains Lecithin (concentrated from thousands of eggs) and makes possible this cure.

It feeds the nerves, induces sleep, quickens the appetite, aids digestion, and soon restores full nerve vitality. The beneficial effects are evident almost from the first dose.

16 oz. bottle, 40 days' treatment, \$1.50. Obtain from the local agents.

OLD FENNO HOUSE

Structure Erected in New England 208 Years Ago.

First Settler of Canton Astonished the Natives by Putting a Second Story Upon the Dwelling—Structure is Still Standing.

Canton.—The Fenno house, on Farm street, Canton, is one of the venerable old dwelling houses of New England whose age is fully authenticated by documentary evidence as well as by family tradition. This rather small structure, two stories in height, painted red, and upon whose sides are still the original clapboards of 1704, was built 208 years ago by that John Fenno who was the original Stoughton, now Canton, settler of that name.

It was John Fenno's father, also John Fenno, who was a resident of Old Dorchester, who purchased the Roger Clapp farm in 1694. This original Clapp property, which was a part of the lands of the Ponkapog tribe of Indians, contained 500 acres, and John Fenno bought the whole area for 100 pounds, or at the rate of five acres per pound. Upon this land, before a road of any description ran alongside of it or through it, the second John Fenno built this 1704 house, and he astonished the natives by putting a second story, a then unheard of luxury, to his new home. In this house there were born nine children who, with the wife and mother, who was Rachel Newcomb of Braintree, constituted the original family which lived on the premises. This second John Fenno died in 1711, and he was succeeded by Isaac, his son, who was born—in the same old house—in 1699. Isaac Fenno was twice married. His first wife was Hannah Puffer, who in 1731, died at the age of twenty-one and left a son and a daughter, Elizabeth—Mrs. Matthew Buck—and a junior Isaac. The second wife was Mary Niles of Canton, and she became the mother of three daughters. The son, Isaac, by the first wife, married Mary Davenport of Canton in 1754, and he made his home in the same old house, with his father, the first Isaac. But young Isaac was killed by falling from "a steeple of a meeting house" in October, 1762. Two sons were the fruits of this marriage of Isaac, the younger, with Mary Davenport, and both of them, Enoch and Elijah, became Revolutionary soldiers. Elijah was the son of a soldier veteran who maintained the family line in the old house, for Elijah and his wife, Abigail Smith, became the parents of five children who were all doubtless

rocked to sleep in the same old ancestral cradle which is still a part of the original furniture of the place. Among the five children of Elijah Fenno was Jesse, who was born in 1785. But Jesse, when he reached man's estate, while he chose to remain on the family farm, built for himself a new house in 1810, near the old red homestead, and which is today the abode of the descendants in the seventh generation of the original 1704 John Fenno. So far as known this 1704 house has not been regularly tenanted, at least by the Fennos, for a great many years.

Altogether this old 1704 family shelter is an interesting house for the inspection of antiquarians and all other persons whose attention might be attracted by the venerable landmark.

HAS BIGGEST SEISMOGRAPH

United States Installs a Delicately Adjusted Instrument at New York Museum.

New York.—The largest and most delicately adjusted seismograph in the United States has just been installed in the museum of natural history here. The instrument was made in Germany and presented to the New York Academy of Science by its president, Emerson McMillan. The needle is so sensitive that blasting operations in some parts of New York city have affected it in marked fashion, while one interesting series of undulations is believed to have been caused by sea waves striking on the rocky coast of Rhode Island and Massachusetts.

Even a heavy windstorm sometimes produces a slight variation in the needle's course.

Potatoes Would Soar.

Chicago.—Should the railroads be permitted to advance their rates the price of potatoes will go up according to a protest made to the Interstate commerce commission by Chicago commission merchants.

"Aigrettes" Are Tails of Roosters.

Washington.—A government bulletin declares that many of the fancy feathers that pass for "aigrettes" are nothing more than the tails of roosters.

Explained.

"What is this civil service business that they are always talking about?" asked the Boob. "What good does it do?"

"It's like this," replied the Cheerful Idiot. "If you have a job and you are not under civil service, they can fire you any time they want to. But if they have a job under civil service they can't fire you unless they want to."—Cincinnati Enquirer.

Hired to Stick.

The jury, after long deliberation, seemed unable to agree in a perfectly clear case. The judge, thoroughly exasperated at the delay, said:

"I discharge this jury."
One sensitive juror, indignant at what he considered a rebuke, faced the judge.

"You can't discharge me," he said with a tone of conviction.

"And why not?" inquired the judge in surprise.

"Because," announced the juror, pointing to the lawyer for the defense, "I was hired by that man there!"—Ladies' Home Journal.

Explained.

"What is this civil service business that they are always talking about?" asked the Boob. "What good does it do?"

"It's like this," replied the Cheerful Idiot. "If you have a job and you are not under civil service, they can fire you any time they want to. But if they have a job under civil service they can't fire you unless they want to."—Cincinnati Enquirer.

FOX LIVES UP TO ITS NAME

Many Are the Ruas Employed by Reynard in Making Successful Escapes From the Hounds.

The reputation of a north of England pack was suffering, and the huntsmen were baffled over and over again by a certain fox, which they always lost at exactly the same spot. He gave them a grand run to the side of the wood, and then disappeared, leaving no clue as to where he had holed.

At last the head huntsman hid himself before the meet at this particular place. As usual, Reynard worked off his old trick, and this is how he did it. By the side of the wood ran a rail fence, and he coolly mounted it, walked along the top for a short distance, jumped upon a large tree which was hollow half-way up, and, creeping inside, was safe. The hounds, of course, lost the scent when he left the ground.

As in this case, the two following instances were watched, and the fox tried his best move once too often.

Number one was always lost just on the top of a hill, and it was proved that he did not descend the other side. On the hilltop there was a hollow, and he would run, with the hounds not far off, up the bank, and then quietly lay himself flat down in the bottom of this hollow. Right over him ran the hounds and galloped the horses. When they pulled up over the crest the scent was finished. After they had all passed him, foxy simply crept out and went back on his old track!

The other one used to trick the hounds at the top of a steep precipice, with a face of rock over which no hound would go—but Reynard did. He stretched out his legs and slid down the rock with his face to it, as a man would, until his hind legs rested on a narrow ledge. He let himself down carefully, walked along the ledge and entered a crevice at the end. From this place he apparently had no way of escape, for the rock was too steep to negotiate in either direction.

It was found, however, that he had a back door on the side of the hill—a tunnel running between the two openings. Had he entered the hole on the hillside he would have been caught, but his front door was safe, because no one could see it from the top of the precipice.—Exchange.

China Is Now Awake.

A water plant that has been feared as a pest is to be turned into a valuable commercial product of Indo-China, if anything comes of the suggestion to the Saigon Chamber of Commerce by M. Perrot, the French investigator. The plant, *Ecchoris crassipes*—popularly known as Luc Bink—invaded Cambodia ten years ago from Java or the Philippines, and has grown so rapidly as to fill ponds and lakes in a short time. A single stalk is reported to have spread over a water surface of 700 square yards in a few months. It has caused no little alarm as a menace to navigation, and a considerable sum seems to have been already expended in attempts to destroy it. Its strong fiber, however, has been found by M. Perrot to be useful for textile purposes. From 100 pounds of green stalks he obtained nine pounds of fiber, and a fifth-inch yarn or cord from this supported a weight of 100 pounds. The cord can be woven into matting or canvas. This can be dyed any color, and is suitable as a substitute for woven cane in furniture, but is expected to be especially valuable for rice sacks. Such sacks, equal to jute, can be made lighter than jute by treating with chrome alum.

Wilhelm's Idea of Golf.

The German emperor's knowledge of golf is by no means extensive. His generosity, however, made him lend a ready ear to the request of Sir Frank Lascelles for a grant of land for the purpose of a golf course.

"So you want ground for your golf club, sir Frank?" he said. "We haven't got nice grass meadows round Berlin like you have in England, but I'll give you a bit of the Grunewald."

Now, the grunewald is a pine forest near the capital, and a favorite Sunday resort of the people of Berlin. The ambassador thought it out for a moment, and then answered, somewhat doubtfully:

"Ah, sire, I am afraid there would be too many trees."

"Trees!" exclaimed his majesty. "All the better to keep the sun off when you are playing in the summer."

Hired to Stick.

The jury, after long deliberation, seemed unable to agree in a perfectly clear case. The judge, thoroughly exasperated at the delay, said:

"I discharge this jury."
One sensitive juror, indignant at what he considered a rebuke, faced the judge.

"You can't discharge me," he said with a tone of conviction.

"And why not?" inquired the judge in surprise.

"Because," announced the juror, pointing to the lawyer for the defense, "I was hired by that man there!"—Ladies' Home Journal.

Explained.

"What is this civil service business that they are always talking about?" asked the Boob. "What good does it do?"

"It's like this," replied the Cheerful Idiot. "If you have a job and you are not under civil service, they can fire you any time they want to. But if they have a job under civil service they can't fire you unless they want to."—Cincinnati Enquirer.

JABOT KEEPS ITS POPULARITY

New Styles Prettier Than Ever Before, and Are Sure to Be Very Much Worn.

A visit to the counters where dainty neck fixings are sold reveals that jabots and collars are lovelier than ever. Frills are no longer worn on the coat; they have been supplanted by the jabot and rabat collar.

A pretty jabot can be made of tulle or Brussels net cut in a strip twelve inches long by seven inches wide. On this embroider a dainty design with mercerized cotton. This can be more successfully executed if a piece of stiff paper is basted under the tulle. Whip-stitch an edging of valenciennes lace to the edge of the strip and baste the pleats in place. Finally press with a heated iron and bind the top with a bias strip of lawn.

If you do not embroider well, charming collars can be made of fine allover embroideries. Many of the loveliest designs are colored to represent the old colonial needlework. Select a pattern which fits well and arrange the strip of embroidery around the edge. Carefully miter the corners, so that the design matches perfectly. There is great satisfaction in making one's own collars, for they usually fit well and are of designs and materials to suit the personal taste.

It is an easy task to fashion a rabat collar of handkerchief linen bordered with Irish lace. Cut the collar and rabat from the linen, using a good pattern. Turn in a narrow hem and slip-stitch it neatly in place. To the outer edge of the collar and rabat whip-stitch an edging of Irish lace an inch and a half or two inches in width. Other collars are fashioned of black moire silk with a rabat of pleated cream-colored shadow lace.

PRETTY HOME-MADE EFFECT

Strings of Beads or Pearls May Be Put Together With Little Trouble and Almost No Time.

Beadwork is always fascinating and one cannot help admiring many pretty articles displayed in the shops. Skillful fingers can easily duplicate these at home with little trouble or expense.

A bandeau of pearls for the dance can be made by stringing the beads on fine wire. Measure the head from ear to ear and string two strands of pearls, making the front strand four beads longer than the back. Bring both strands together at the ends, thus shaping the bandeau.

Fill in the band with strands of beads forming a lattice-work design. To make two large flat ornaments for over the ears, cover button molds with net and sew pearls on the net, around and around, until the mold is entirely covered. From short strands of pearls form tassels and attach to the round ornaments.

Beads can be purchased at the needle-work department of any shop.

NEW SPRING GOWN.

Spring gown of flowered chiffon with broad belt of embroidered silk draped in shawl fashion.

Rainproof Furniture.

Now that we have adopted the delightful habit of eating out of doors, it has become more than ever necessary to discover some kind of furniture that may be left out. There is one kind that has been tested and proved good. It is rustic, but not too rustic. The wood is hickory, the shapes simple and comfortable, and the price reasonable. Adams' Bazar.

Derby Line Fruit Co.

JUMPED FROM WINDOW.

Skull Crushed, Death Instantaneous—Melancholia the Cause.

Last week THE JOURNAL made brief reference to the death of Samuel A. Collieson of West Somerville, Mass., an old-time resident of this place.

The tragic circumstances of his end are told in the following extract from Boston Herald-Traveler of April 16th: "Samuel A. Collieson, 53 years old, of West Somerville, a member of the West Somerville Congregational Church, committed suicide at 10 A. M. today by diving from the second story window of his home at 46 Wallace street, West Somerville. He was killed instantly his skull being crushed.

"A sudden and overpowering attack of melancholia is believed to have been responsible for the act, since Mr. Collieson had been suffering from a nervous breakdown for several months and had been under the care of his family physician, Dr. H. P. Makechne of West Somerville.

"Mrs. Collieson was at home at the time of the accident and is prostrated. "Dr. Makechne reported that he had called on Mr. Collieson early this morning, about two hours before the fatal act, and found him in fairly good spirits. Mr. Collieson talked to the physician about a trip he was planning to take to Bermuda next week with his brother, Clarence E. Collieson.

"Mr. Collieson was born in Derby Line, Vt., and moved to West Somerville in 1880. He and his brother were engaged in the leather business, with offices at 24 Union street, Boston. He is survived by his wife and one married son, Arthur S. Collieson, 23, of 48 Wallace street, West Somerville."

ITEMS OF INTEREST.

Twenty-five persons were hurt, nine dangerously, when a bolt of lightning entered the lobby of a hotel at Independence, La., on April 11th. Seventeen were unconscious for an hour.

The wife of Ernest Moschner, Fitchburg, Mass., on returning from work on April 14th found that her husband in a fit of temporary insanity had killed their four children and then sent a bullet into his own brain.

The Hon. Takahashi Nakamura, Japanese Consul-General in Canada for the past four years, has been appointed Consul-General at London, England, the highest post in the Japanese Imperial Consular Service.

Viscount Chinda, Japanese Ambassador to the United States, has been instructed by the Japanese Foreign Office to make formal representations at Washington in regard to the anti-Japanese legislation of the State of California.

Severe storms occurred in Britain and the continent on April 12th. In Belgium and Germany gardens, orchards, and vegetable fields were ruined in many districts, and the telegraph and telephone service was greatly interrupted.

The State of Texas is suing the Standard Oil interests for \$100,000,000 for alleged breach of the trust statutes of that State. It is claimed that the Standard Oil Trust still exists and operates through the Magnolia Petroleum Company.

An official report states that the birth rate in Paris in 1912 was the lowest since 1861. There was only one birth for every thirty families. Prohibitive rentals, raising the cost of living and discouraging marriage, are partly blamed for the condition.

Twenty passengers were killed and forty injured on the Mexican Central Railway through the derailment of a train which was speeding up to escape the rebels. The engineer thought it better to go slow for fear of running into the rebels, but he yielded to the demand of the passengers that he should make the fastest speed possible.

"Compared with the financial needs of Canada just now, \$25,000,000 would be like a crust of bread to a starving man," says Bradstreet's. "Yet this amount will be released shortly after the opening of navigation, when some 30,000,000 bushels of grain will come east, most of it destined for Europe. The banks are carrying this, and as they will be paid, that much money will be available for other enterprises."

The street railway strike in Buffalo, which completely paralyzed the car service for six days and caused great loss of business, was ended through the mediation of Mayor Fuhrmann. The company and the men agreed to negotiate over the question of wages and hours and, if they could not reach a settlement, to let a board of three arbitrators decide. Violent disturbances occurred during the strike and the troops were called out.

Montreal reports to Bradstreet's say that the effect of tight money and the consequent poor settlements are being felt by the wholesale trade. Roads have been unusually bad and orders from travelers have not been the best. Warm dry weather and the opening of navigation are looked forward to as bringers of expansion to trade. The latter will release money that is tied up in grain and merchandise. Money has not been eased yet, and urgent demand persists for commercial purposes.

HEALTH NOTICE.

To the Residents of Rock Island: The early approach of warmer weather brings to mind the need of vigilance in dealing with sanitary matters. If every individual will do his or her duty there need not be the slightest friction between the public and the authorities. Don't wait to be told what the law is. Do your duty by yourself and your fellow men.

Decaying vegetables should be removed from cellars. Clean up the basement and let the air in.

Empty privy vaults. Remove stable manure. Clean up the back yard.

Starve the fly! He is a carrier of disease; keep all filth away from him. If you don't he may kill some one.

No screens are necessary in some parts of Austro-Hungary because the fly is given nothing to live on. Help to make your place like Austro-Hungary.

E. D. Moulton
Amédée Seguin
Sanitary Committee.

Amendments to the Ontario License Act introduced by the Provincial Government provide for the opening of bars at 8 o'clock in the morning instead of 6 o'clock, prohibit the sale of bottles in bars and raise the shop license fee to the same as that for hotels.

GOETHE AND THE CHESTNUTS

Recent Find of Poet's Complaint Against an Annoyance That He Suffered.

Nothing is more annoying in autumn than to have near one's windows a chestnut tree, the natural target for the missiles of youth. Goethe, whose respect for the rights of property was only equalled by his love of law and order, suffered considerably from this annoyance. The Munich News has just lighted upon a complaint made by the poet to the corporation of Weimar during his stay in that city. He writes:

"At the edge of the field is a row of Spanish chestnut trees, and as soon as the chestnuts begin to ripen the children bombard the trees with stones without any concern for the passer by. Nor do they confine their attentions to the trees in the road. They throw cabbage and sticks at our fruit trees, so that the owners move about their own gardens in terror of their lives and begin to despair of ever garnering their crop of fruit. Worse still, this outrageous conduct goes on in the depths of winter when there is not a single fruit on the branches nor even a bird's nest to excite the young rascals' cupidty. Policemen Lenger, to whom I have shown some of the stones that fell on my lawn, will bear me out."

Goethe never acted precipitately. In this case he refrained from sending in his complaint immediately, and to add weight to his representations kept the letter back till new outrages had been committed, when he sent it with this postscript added:

"I may add that this is a matter of general interest, and I can prove it. As I was leaving my garden yesterday by the field gate to remonstrate with some sacrilegious young ruffians several peasants who were on their way home from working in their cabbage fields joined their voices to mine and told me that it was impossible to pass along this road, which is the only way to the fields, without incurring real danger."

SCHOOL CHILDREN NEED HELP

Figures Given by Expert Show Appalling Conditions Prevail Among the Younger Generation.

Dr. Thomas D. Wood, professor of physical education in the Teachers' college in Columbia university, makes the startling statement that three out of every four school children in America need medical attention!

"Of the 20,000,000 school children in this country," he says, "fully 75 per cent. need attention today for physical defects which prevent good health, little ailments that can be remedied."

This is the manner in which the professor classifies the troubles that affect these 20,000,000 school children, naming really 29,000,000, but this is because the 10,000,000 with bad teeth are among those that have other ailments:

"Four hundred thousand have organic heart disease; at least 1,000,000 have or have had tuberculosis; about 1,600,000 have spinal curvature; about 5,000,000 have defective vision; about 5,000,000 are suffering from malnutrition; over 6,000,000 have enlarged tonsils, adenoids, or enlarged cervical glands; over 10,000,000 have defective teeth which are interfering with health."

Egyptian Justice.

In ancient Egypt all court business was carried on in writing. In order that the decision might not be influenced by oratory or personal appeal. The laws lay before the judges upon a table, and the accused declared in writing how he had been injured, whereupon the defendant stated in writing what he had to say. Then came a rejoinder from each party to the case, after which the judges deliberated among themselves until they had hit upon the proper legal penalty for the party who had in the meantime been adjudged guilty. This point being reached the president of the judges touched with an image of Thamel, the "Goddess of Truth," the manuscript of the guilty pleader and the case was over.
