SECTION 2: CHARACTERISTICS OF ISSUES

2.1. GENERAL CHARACTERISTICS OF BONDS

1. SECURITIES ISSUED ON THE DOMESTIC MARKET

Unless otherwise indicated, the domestic securities are book-based and are available only through members of the Canadian Depository Securities Ltd clearing system (CDS).

2. SECURITIES ISSUED ON FOREIGN MARKETS

Unless otherwise indicated, the following terms and conditions apply to securities issued by Quebec on the US, European, Asian and Australian markets.

- As a general rule, these securities include provisions relating to tax status. These provisions are intended to guarantee that all payments of principal and interest will be made by Quebec without deduction of any taxes, duties, or other charges, present or future, withheld at source by Quebec and set by any government or other tax authority in Canada.

In the event that Quebec is required to pay such additional amounts as may be necessary to ensure that the holders receive the full amount due to them, Quebec may, upon giving notice, redeem the outstanding securities at their face value.

When the tax provisions of a particular security differ materially, in particular regarding the price at which Quebec may redeem such security, compared to the general description given above, such provisions are described in detail in the section relating to such security.

- The indicated amount outstanding is equal to the face value, unless otherwise indicated;
- The issue is the selling price excluding any accrued interest.
- Terms and conditions of payment: payment of principal and payment of interest, if any, are subject to the tax laws or regulations applicable in the country where they are solicited. They are made, free of charge, in the currency of the loan, upon presentation and surrender of the bonds or coupons, as the case may be, at the counter of a paying agent authorized by Quebec.
- Book-based system: when bonds are available only through members of an electronic clearing system, this feature is indicated.
