DOOR SNAPS SHUT; WOMEN PRISONERS

Mother, Daughter and Friend Locked Up in a Building

POLICE TO THE RESCUE

Patrolman, After Helping Them Down a Ladder, Tumbles and is Seriously Hurt.

Buffalo, Jan. 30.—After assisting three women down a stepladder from the second story of a building at No. 312 Pearl street yesterday forenoon, Patrolman Steimel fell from the ladder to the stone walk. His right arm and hip were so badly hurt that he had to be taken home and last night it was said that he would be unable to be out for a few days. The names of the women were withheld from publication at their request. They accidentally locked themselves in the building, being detained in it about 1 1/4 hours.

Two of the women were mother and daughter. The third was another married woman. One of the business companies in the building is the Art Gas & Electric-Fixture Company. The women went to look at a gas lamp. After entering the street door into the main hallway, the door closed and a spring lock made the women prisoners. On finding that nobody was in the store, they started to leave and discovered their predicament. Nobody else was in any part of the building.

From 8:45 o'clock, when they went into the building, until about 10 o'clock, the women rapped on the windows at passersby and tried to attract somebody's notice. Nobody seemed to see or hear them in that time except one man speeding by on a wheel. The women waved to him and he smiled and waved back.

About 10 o'clock Charles A. Schnell, a clerk in a florist's store, saw the women and learned the situation. He telephoned to the Pearl street police station. Patrolmen Steimel and Eldredge responded. The long stepladder was borrowed from the Star Theatre. Steimel placed it against the front of the building, climbed up it and in through a window which one of the women unlocked for him. The window opened on the second-floor hall.

Patrolman Steimel went downstairs and found himself unable to unlock the street door. There was nothing to do but to climb down the stepladder and that course was taken. When all three were safely outside, the officer started to come down. In trying to close the window, he lost his balance. A small sign was within reach and he grabbed it to regain his balance. The sign broke under his weight and he toppled off sideways to the walk.

"The women live on the West Side," says the police report.

CAUGHT AT LAST.

Mount Holly, N.J., Jan. 30.—After being a fugitive from justice for ten years, John Williams, who was recently arrested in Atlantic City for assault on a young woman, has been identified as one of the negroes who murdered John Henke, of Burlington, N.J., in 1896. Thomas Cromwell was Williams' accomplice in this crime and both made their escape. Cromwell was afterwards tried and convicted at Lazona, Pa., for the murder of a man named Schmidt in June, 1901. Before his execution he confessed to the Henke murder and declared Williams was his accomplice. Williams escaped on a vessel to South America but returned five years later when the search for him had been abandoned. In 1901 he assaulted a white girl in Merchantville and again escaped. There was a reward of \$700 offered for his capture.

MR. PREFONTAINE'S ESTATE.

Montreal, Jan. 30.—A personal friend of the late Raymond Prefontaine says that it will be months before the Minister's affairs can be straightened out so as to allow of a close estimate of his wealth. Contrary to general opinion, Mr. Prefontaine was not wealthy, as wealth goes now-a-days. "When the estate is settled up," said the gentleman referred to, "it will be found that \$150,000 will more than cover all, which is mainly made up of real estate. Contrary, also, to the general impression, the late Minister had little or no money tied up in stocks, and while a keen politician and a man of undoubted capacity, he was not what might be called a good business man as far as his own personal affairs were concerned. In other words, considering his opportunities, he accumulated very little money, and again it must be remembered that no man could have been more free with what he did have. Mr. Prefontaine's hands were constantly in his pocket for the benefit of all who came to him in distress. He had made a marriage contract, and the widow and his children will benefit by his entire estate. (His life insurance, which amounted to a good many thousands, is sufficient to supply all the ready money required, so that there will be no necessity for making sacrifices in an immediate adjustment of his personal effects.)"

AWARDED A MEDAL IN THE CAUCASUS

Dr. Frank D. Adams of McGill University Honored by London Geological Society.

Montreal, Que., Jan. 30.—Dr. Frank D. Adams, Professor of Geology in McGill University, has been awarded the Lyell medal by the Geological Society of London, England. The medal which was founded by the great geologist, Sir Charles Lyell, Bart., F.R.S., is given annually (or from time to time) as a mark of honorary distinction and as an expression on the part of the governing body of the society, that the medalist, who may be of any country, has deserved well of science. Dr. Adams is the second Canadian to receive this honor, the medal having been awarded to Sir William Dawson in 1881. Other geologists who have received it include such distinguished men as Sir John Evans, Dr. W. Boyd Carpenter, Professor Seeley, Professor W. Boyd Dawkins, Dr. Joseph Leidy and Dr. Hanscousch. Dr. Adams has also received a further grant of \$1,500 from the Carnegie institution of Washington, for the prosecution of his researches on the flow of rocks.

LAKE NAVIGATION

Cleveland, Ohio, Jan. 30.—The steamship Frank B. Squires arrived here to-day from Buffalo, which port she left yesterday afternoon. The trip was made in 14 hours. This is the second big vessel to come from Buffalo to Cleveland this month. Navigation on Lake Erie in January almost is unprecedented, but it has been made possible this winter by the excessive mild weather.

U. S. STEEL DIVIDEND.

New York, Jan. 30.—The directors of the United States Steel Corporation at their meeting to-day declared the regular quarterly dividend of 12 1/2 cents on the preferred stock. The earnings for the quarter ended Dec. 31st last were \$25,278,688, an increase of \$13,819,951 as compared with the same quarter a year ago. The unfilled orders on hand Dec. 21st last of 7,605,086 tons, an increase of 3,008,583, exceed all records of the Corporation.

FREDERICK'S ACCESSION.

Copenhagen, Jan. 30.—The new king, Frederick the Eighth, now reigns over Denmark. His accession has been hailed with all appropriate enthusiasm and ceremony, but sorrow for the death of Christian is the predominant sentiment. The overwhelming grief of the immediate members of this remarkable united family is reflected in every home in Copenhagen. Throughout the earlier part of the day the lugubrious tolling of bells, the booming of minute guns, the universal evidences of mourning and the stagnation of business, even amid the acclamations for the new king, told strongly of the deep feeling of the people of Denmark. In a chamber of the Amalienborg Palace the body of the king lies in the modest bed in which he breathed his last. The dead monarch's features are unchanged and are composed as if in a sleep other than that of death. Following the wishes of King Christian, the funeral will be attended with little ceremonial. The body will not actually lie in state, but prior to the entombment, which is expected to take place in about a fortnight, it will be visited by the chiefs of state. To-day the members of the family watched in the death chamber continually. An enormous number of magnificent wreaths are coming in from every direction. The Duchess of Cumberland, daughter of King Christian, arrived late last evening. Her sorrow was very great and it was with difficulty that she was removed from the bedside where she had knelt for fully an hour in prayer. The burial will take place in the Cathedral of Roskilde, beside Queen Louise, in the chapel of Frederick the Fifth. King Haakon of Norway, Queen Alexandra of England and King George of Greece are expected in a few days. It is announced that Emperor William will be in attendance at the funeral.

ARMY OF A MILLION

Lord Roberts Says That Should Be the British Standard.

London, Jan. 29.—With the opening of the new parliamentary regime Field-Marshal Lord Roberts renews his campaign of warning to the country regarding the inadequacy of its defenses. Addressing the members of the Liverpool Chamber of Commerce to-night, he again affirmed that the nation was as absolutely unprepared for war as it was in 1899. He urged the adoption of a million men as the military standard, half of which would be needed for the defence of India and the other half to fit the nation to maintain an European struggle. Lord Roberts said he heard of the renewal of the Anglo-Japanese alliance with enthusiasm, but he reminded his audience that national conditions and national necessities were subject to change, and that the alliance only applied to Asia, and not to Europe, where the danger was greater.

TWINS SEPARATED

Extraordinary Operation Is Performed By a Prague Surgeon.

Vienna, January 30.—The Bohemian twins are twins no longer. Professor Kukulka, of Prague University, has successfully separated these twins, which have been exhibited all over the world. Their names were Rosa and Josefa Blazek. They are the daughters of a Bohemian farmer and were born in 1878. Though united physically they have always displayed distinct individualism. One could sleep while the other read a book or played the violin. In childhood they were often at variance. If Josefa wanted to go one way and Rosa would not agree Rosa, who was the stronger, invariably lifted her sister off the ground and carried her kicking in the desired direction. Prof. Kukulka says that the sisters have furnished one of the most remarkable anomalies in the history of surgical science, being joined at the hips, but having a separate and distinct existence from the waist upward, also two pairs of lungs. Before undertaking the more serious parts of this surgical divorce of the Bohemian twins a minor operation was submitted to by Rosa, with the result that while her temperature increased by six degrees, that of her sister remained stationary. This led to the conclusion that the twins enjoyed independent constitutions, and the physician no longer hesitated to go forward with their work. However, their theories had already been reinforced by inquiries in which it was found that a few years ago Rosa had scarlet and typhoid fever without her sister suffering in health in the least.

ABOUT PNEUMONIA

New York Doctor has New Theory to Account for Contagion and Presents Proofs.

New York, Jan. 30.—Pneumonia is due to mice, and not to the weather, according to Dr. E. Palier of this city. The microbe causing pneumonia, he says, is found in the mouths of nearly all healthy individuals, but does not acquire dangerous virulence until it passes through a susceptible animal like the house mouse. He has proved his theory, he says, by experiments. "Let us consider," said Dr. Palier, "how mice cause pneumonia. In the months of December, January, February and March there are usually many mice in houses, especially where plumbing is defective and which are in a generally poor sanitary condition. "Mice, as is well known, work themselves under sinks, and hence are mostly abundant in houses where the plumbing is not open, where there are many nooks and corners around the sink. In trying to obtain mice for experiments I learned from many persons that they are more abundant in the house in the winter and early spring. Young mice seem to be especially abundant in the month of March. "Now, young mice are particularly susceptible to the pneumonia bacillus. The young mice come into the rooms to look for food, and they can easily get inoculated with human sputum. Then they spread the virulent bacillus which they have developed, and these virulent bacilli may cause pneumonia in man either by inhalation or by inoculation through some abraded surface." Dr. Palier tells The Medical Record he has found two young dead mice which showed many virulent pneumonia bacilli in poorly ventilated rooms. Dr. Palier says, the virulent bacilli from infected mice multiply abundantly, and greatly increase the danger of pneumonia to the human beings in the house. "These germs from mice," Dr. Palier says, "lose their virulence after a time. Thus a person may breathe in germs whose virulence is well-nigh exhausted, and so have a mild case of pneumonia. And vice-versa." Dr. Palier says he does not believe that pneumonia is spread by kissing. Nor does he believe that it is due to changes in the weather. Furthermore, the disease is not due to depression. Persons apparently in good health may suddenly develop pneumonia, whereas others who are very weak may not get it. It is expected the new theory will raise the price of house cats.

TO REDUCE RATES ON CORN.

Chicago, Jan. 30.—Announcement was made to-day by the Wabash Railroad that commencing on February 1st the road would put into effect a carload rate for export corn of 23 cents a hundred from the Missouri River to Boston and New York and of 22 cents to Philadelphia through Chicago and St. Louis with transit privileges. These figures will include the cost of loading on vessels. For general months the rate has been 27 cents with an added loading charge. Eastern roads have heretofore refused to join with western roads on dividing the difference between the local rate and export rate. The step taken by the Wabash, it is believed, will result in the eastern roads meeting the Wabash rates.

REQUIRE FOR KING CHRISTIAN.

St. Petersburg, Jan. 30.—A requiem for King Christian was celebrated at Tsarskoe-Selo, to-day. It was attended by the Emperor and Empress and court functionaries.

PLOT TO KILL OFFICIALS.

Riga, Jan. 30.—The police have discovered a plot to kill General Sologub, Governor-General of the Baltic provinces, and several high civil and military officials. Many arrests have been made.

DEATH OF A POET.

New York, Jan. 30.—Paul Dresser, a song writer, whose "Banks of the Wabash" and "The Blue and Grey," brought his name into public notice, died to-day at the home of his sister in this city. Mr. Dresser was born 47 years ago in Terre-Haute, Ind.

KING EDWARD RECOVERS.

London, Jan. 29.—King Edward, who, since the accident in November last, when he fractured his ankle, has been spending most of his time at country homes, will come to London to-morrow. It is learned that the injury to his ankle was more serious than reported at the time. It has required almost continuous rest and the most careful treatment, but His Majesty now has almost entirely recovered. His health otherwise is excellent. He pursues an active outdoor life as much as possible even while suffering from his injured ankle he continues shooting from a pony cart or automobile.

GAYNOR AND GREENE.

Savannah, Ga., Jan. 30.—Rapid progress was made in the federal court to-day in the case of Greene and Gaynor, charged with alleged conspiracy against the Government. J. W. O. Sterley, of Savannah, and Geo. W. Marlor, of New York, were the chief witnesses. Mr. Marlor will be cross-examined to-morrow. Mr. Sterley testified concerning the payment by Captain O. M. Carter to Greene and Gaynor of two checks, one for \$345,000 and the other for \$230,000. The testimony of Mr. Marlor related to the cashing of checks at the sub-treasury in New York, by John F. Gaynor.

A BRUTAL NEGRO.

Atlanta, Ga., Jan. 30.—Mrs. Nina May Dupree, 20 years old, who lives at the home of W. H. Grogan, a prosperous farmer, about six miles from Atlanta was assaulted to-day by a negro who cut her throat and left her in a dying condition from loss of blood and nervous excitement. The negro escaped. A posse of more than a hundred citizens with track hounds is after the negro to-night and if he is caught he will in all probability be summarily lynched. The assault occurred some time between 1 and 4 o'clock this afternoon. The girl was found by Grogan and his wife at 4 o'clock in the dining room in a pool of blood.

THE RUSSIAN NOBILITY.

Moscow, Jan. 30.—The main resolutions adopted by the National Congress of marshals of the nobility are a demand for strong power using sensible means to suppress the revolution and protect the peaceful population from violence and the immediate announcement by the Emperor of the date of the convocation of the National Assembly no later than April 25th. A strong stand is made against the separatist movement. In regard to the Agrarian question, in which the nobles, as large land owners, are greatly interested, the Congress demands a declaration of the inviolability of the private property recommending the sale of unoccupied government lands on easy terms, and the facilitation of credit to enable the peasants to buy private holdings. It is said that 60,000 peasants have signed petitions addressed to the Emperor asking him to satisfy their land hunger. The petitions have been sent to the Department of Agriculture.

SWEEPING REDUCTION IN HIGH-GRADE FURNITURE

Slightly Damaged Goods Selling Away Below Cost.

A GAIN we offer to our patrons a furniture bargain such as is met with only after a destructive fire. This elegant stock comprises all styles of furniture, from the plain chaste designs so appropriate for the modest dwelling, to the handsomely embellished styles capable of beautifying a mansion.

We have just completed the task of stock-taking, and have laid aside all the furniture which was in any way damaged by fire or water, for a grand final sacrifice. Most of these pieces are but slightly scorched and in many cases this is scarcely noticeable. We will make one grand sweep of it on **WEDNESDAY** and **THURSDAY**, and we are looking forward to a phenomenal two days of brisk business.

The Prices Below Will Speak for Themselves :

Sideboards.

9 only, Sideboards of different designs, slightly damaged, but very little polishing will render them as good as new. Regular prices \$16.00 to \$45.00, you may have your choice at from.....\$11.00 to \$35.00

Roll Top Desks.

3 only, Roll Top Desks, suitable for office or library, splendid condition, originally priced at \$18.00 \$21.00, you may have your choice while they last, from.....\$11.50 to \$15.50

125 only, Verandah Chairs, Arm-chairs and Rockers, painted red or green, you will have plenty of use for these Chairs next summer. The regular prices were \$1.75 to \$2.50, your choice.....50c. to \$1.50

Rocking Chairs

50 only, Straight Rockers, useful for sewing or darning, well made and very serviceable, regular prices 75c. to \$2.00, slightly damaged but in good condition, your choice for from.....50c. to \$1.50

Dressers and Washstands.

8 only, Dressers and Washstands, suitable for use with an iron bed, very striking designs, regularly priced at from \$25.00 to \$30.00. If you are wise you will take your choice before they are all gone. Prices.....\$20.00 to \$35.00

Bedroom Suites

12 only Complete Bedroom Suites, comprising Bed, Dressers and Washstand, very handsome designs, ranging in prices from \$40.00 to \$75.00, your choice while they last.....22.00 to \$45.00

Dining-Room Chairs

150 only, Dining Room Chairs, a large and varied assortment ranging in price all the way from 30c. to \$5.00, your choice of the lot, while they last, from.....20c. to \$3.00

Special Bargains in the Hosiery Department.

THE following special items in hosiery will interest you, especially as the prices have been cut almost in two. Hosiery, to be perfectly comfortable, must fit every line of the foot, the quality must be considered too, as the slightest imperfection in the wool is apt to cause much discomfort. We can heartily recommend the following lines for comfort, wear and solid satisfaction.

Overstockings for Boys and Girls

10 dozen pairs of Misses and Boys' Woolen Ribbed Overstockings, double heels, finest English wool, regularly priced at 45c. per pair, special price per pair.....32c.

Ladies' Woollen Hose

25 dozen pairs, Ladies' plain Black Woollen Hose with double heels and toes, very warm and comfortable, regular price 30c. per pair, special price per pair.....19c.

Misses' Cashmere Hose

5 dozen pairs, Misses' all-Wool, white Cashmere Ribbed Hose, sizes 7 and 7-12 only, regularly priced at 30c. and 35c. per pair, special price per pair.....19c.

Children's Colored Hose

50 dozen Children's Colored Woollen Hose, made of fine Scotch Wool, colors white, pink, light blue, scarlet, cardinal and tan, sizes 3 to 6 1/2. Special prices.....15c. to 32c.

Black Darning Wool

100 dozen skeins Black Darning Wool, good serviceable quality, regular price 4c. per skein, specially priced for quick selling at.....2 skeins for 5c.

Kitchen Utensils

For long, satisfactory service in spite of the general wear and tear of kitchen use, there is nothing better than Enamel ware, and for a handsome appearance as well as a long term of service, the nickeled coffee pot is well to the front. Below are a number of special snaps in Enamel and Nickel.

A Few Basement Specials, Bargains Every One Of Them.

Crockery and Glassware.

Just a word about these goods before plunging into the list of prices. These were originally marked at a very close price and were very excellent value. You may judge for yourself as to the wisdom of grasping this opportunity.

Biscuit Jars, regular \$1.50 values, specially reduced to.....50c.
Japanese China Jardinieres, large size, regular \$2.25 values, specially reduced to.....\$1.89
Glass Epergnes, various shades, regular 75c. values, specially reduced to.....50c.

Glass Epergnes, very handsome, regular \$1.25 values, specially reduced to.....30c.
Four piece pressed glass table sets, regular \$1.25 values, specially reduced to.....90c.
Same in cheaper quality, regular 50c. values, specially reduced to.....30c.

Puritan Soap

The well-known "Puritan" Laundry Soap, one dozen 25c bars.....

Stove Polish

The famous "Bright Light" Stove Polish, regular 10c. Special price.....6c

SUCCESSFUL WINTER NAVIGATION OF ST. LAWRENCE

EVENTFUL VOYAGE OF THE ICE-BREAKER MONTCALM

Enthusiastic Reception by the Entire Population on Her Arrival at Seven Islands with Medical Supplies.

NORTH SHORE POWER CO'S GREAT PROSPECTS

SHOWING STEAM SHOVEL LOCOMOTIVE AND FLAT CAR.

An interesting, episodic, and altogether unique trip was made by the *Montcalm* to Seven Islands last week, in which it was clearly demonstrated that to a certain extent, winter navigation under certain conditions, is feasible. The good ship *Montcalm*, has been described in the columns of the *Chronicle* before, but in order to furnish a complete account of the voyage, it will be necessary to retrace our steps, and repeat here, some of its history. To which, through the kindness of Mr. J. A. Pettit, Chief Engineer, we are enabled to add to the narrative, much information which will be new to our readers. To the bridge which safely carries us over, one must be ever grateful. To the ship which gave zest and exciting interest to a winter excursion, through icebergs, snow, and other impediments, thanks are due. The *Montcalm* is staunch and true, and by her faithfulness to duty, and under good direction, she enabled her efficient and watchful commander, Capt. Belanger, a veteran sailor of veteran sailors, to keep his contract with the Marine and Fisheries Department of Canada, to penetrate the hidden mysteries of the River and Gulf of St. Lawrence in January, and to give, what Mark Twain describes as a view of the "Steroid Scenery" of Quebec, on water and land. A series of mot-

hydraulic engine, having a large steam cylinder at the bottom and a crushing cylinder of oil and water at the top, and is controlled by suitable levers fixed alongside starting levers in front of engine, with intermediate stop valves close at hand, and bridge telegraphs fixed in between. The main condensers are of cast iron, rectangular type running the full length of engine bed plate and foundation. They have ample cooling surface, and so being able to get any vacuum desired. The cooling water is supplied by two sets of ten inch centrifugal pumps. The air pump, feed pumps and bilge pumps are worked by levers, geared to medium pressure engine, Crossheads. The two tandem shafts are a thirteen and a quarter inches diameter, and run eight large bearings with white metal strips. The tail shafts have gun metal bearings, and carry four-bladed propellers at the outer end. These propellers are of the loose-blade type, made of very tough cast steel, bolted on a very massive cast steel boss, having rim two inch steel studs with brass box nuts to each blade. The tail nuts are protected by a brass cone bolted and isolated on to the boss over same, with propellers revolving right and left hand, and are 12 feet 6 inches in diameter and the pitch variable from 23 out 6 to 23, 6.

pneumatic ash ejector, which discharges all the ashes freely from the ship. The boilers consist of four large Babcock and Wilcox patent water tube type, of the exact type as supplied to the British Admiralty. They are grouped back to back, forming two stokeholds. Each boiler is a twenty-four footer, or elements wide and 16 rows of tubes high, with 3 feet 6 by 14 1/2 steam and water drum on top, and 16 feet 1 by 7 1/2 inches square mudrum at the bottom, each header being ripped into same. The first two rows of tubes from the bottom are of 3 1/2 x 16 dia. x 7-10 long, and the seven rest of the rows upwards are of 1 1/2 x 16 diameter by 7 feet 10 inches long, the whole giving a total heating surface of 3,200 square feet, equaling 12,800 square feet for the four boilers. The furnaces in each boiler consist of one large grate surface,

by 10 by 10 inches stroke. At the after end of the ship there is a hauling capstan by same makers, cylinders 6 inches diameter by 10 inches stroke. We left Quebec at 7.15 a.m. on Friday morning, carrying on board Mr. Thomas Meany, Captain Boulton, and several members of the Quebec and Montreal Press. The trip was, for the time of year, very enjoyable and interesting, and the deck was frequently visited by the astonished sight-seers. The *Montcalm* succeeded in cutting her way through to her destination, without any trouble or mishap. On the way down the route taken was by the North Shore. The return was made by the South Shore on account of the strong southerly wind, which shoved the ice to the north. Capt. Belanger, who has had an experience of 31 years on the Gulf, gives it as his opinion that that in the region why such a small quantity of

were narrow belts of batture ice, from one to three feet in thickness, an hour after passing Isle aux Rommes, the vessel got into a heavy ice belt, and nearly stopped, but eventually rose to it, and got through. Capt. Belanger mentioned to Capt. Boulton that he thinks that an unusual quantity of batture ice had been liberated, thus accounting for the heaviness of the ice, considering the mildness of the winter. Capt. Boulton thinks that the *Montcalm* could on an emergency, visit any part of the Gulf, at any time, in the winter. Aboard of *Bie*, at 5.30 p.m. there was heavy ice. Soon after passing *Bie*, the *Montcalm* shaped her course for Point des Monts, where she arrived at half-past eleven. Between these places and nearer to Point des Monts, the ice was unusually heavy. On Saturday morning at 3.40, having run down our distance by the

SOME OF THE CONCRETE BUILDINGS UNDER CONSTRUCTION.

a little. There are only four of them, and they appear to answer all the demands required by the drivers. "Hok," means "Go to the right." "Hara," means "Go to the left." "Haw," means "Stop." "Housa," means "Go ahead."

One enthusiastic gentleman, who lives near Seven Islands, and was delighted with the *Montcalm's* performance, ventured the opinion, that winter navigation was possible, with a steamer, systemized as the *Montcalm* is, but not by the regular liners and other conditions. To arrive at a sure result, he added, it would be absolutely necessary to have breakwaters at *Bie* or some intermediate point. Tadoussac, Brandy Pats, if he continued, we had the stations, in stormy weather, when heavy snow storms prevail, anchorage is difficult without a station, on the way down from Quebec. A word of praise must be added to these remarks. Steward Lefevre was most assiduous for the comfort of the passengers.

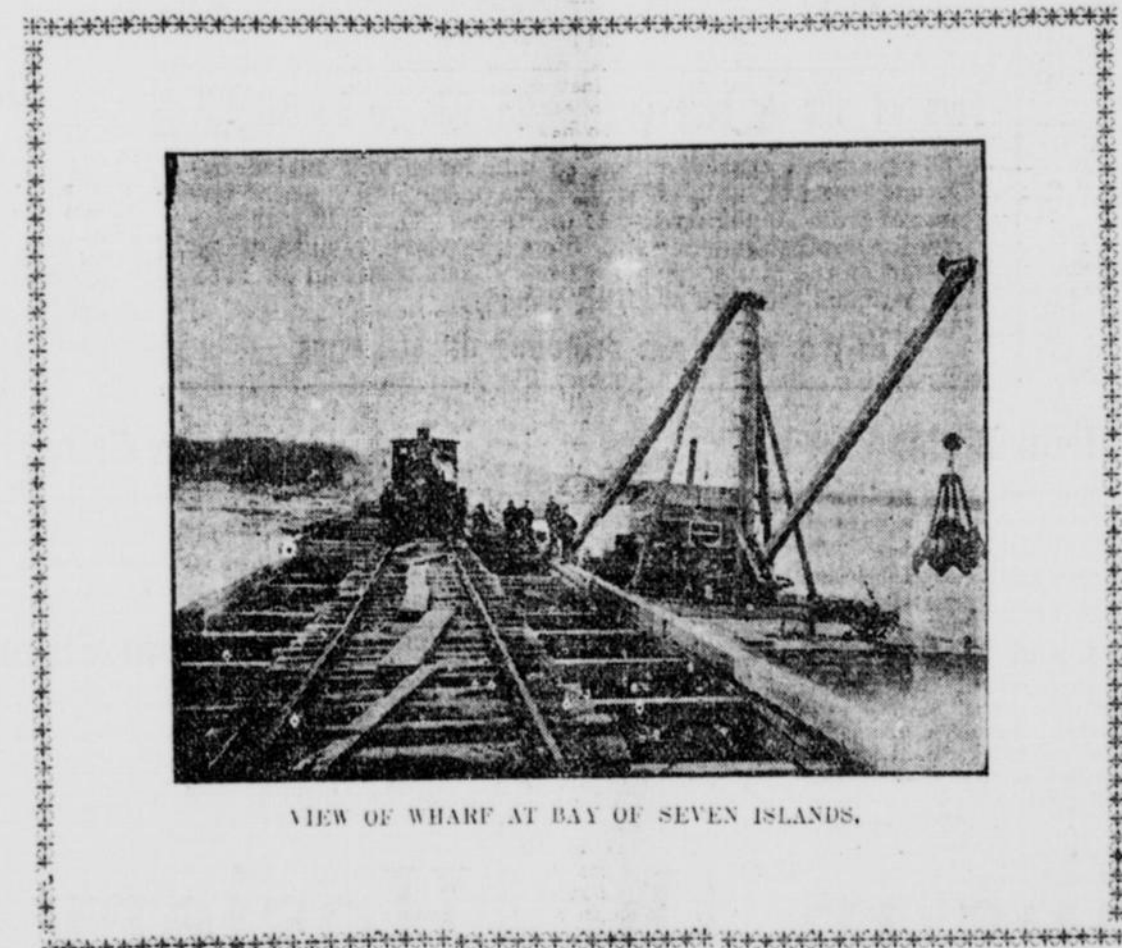

North Shore Power, Railway & Navigation Co., incorporated by Special Act of the Dominion Parliament, 15 May, 1902, with headquarters in Quebec City, offices at Toronto and New York, and works at Clarke City, Bay of Seven Islands, on the North Shore, Gulf of St. Lawrence, ply general stores, hotels, boarding houses, and neat appearing cottages. As the company possesses one thousand miles of 4 1/2 gals timber limits and as two millions of dollars will have been invested in this enterprise before the expiry of 1906, it may safely be assumed that the industry will be permanent in character and of lasting value to the Province of Quebec. The ideal part of Seven Islands which is practically land locked—and eight miles long by width of four miles—will be used for shipping this company's product to the various European ports. The harbor of Seven Islands affords absolute shelter to vessels, and modern up-to-date steamers of the largest draft can enter without postuous weather, as the channels are very wide and the water very deep. The Dominion Government recognizing the value of the magnificent port has under construction a very fine wharf alongside at which steamers drawing thirty feet of water may berth, and that this wharf will be continuously utilized may be gathered by the fact that one thousand tons of freight will daily be shipped by the North Shore Power Co. alone. Additional to the works completed and under way, the company's plans include the construction of a large box shock factory and various other enterprises, which will involve

VIEW OF STE. MARGUERITE RIVER AT POINT WHERE COMPANY IS DEVELOPING WATER POWER.

ing pictures, in fact, under difficulties. The *Montcalm* is 245 feet long, beam 60 1/2 feet, moulded depth 15 1/2 feet. She is fitted with one inch steel plates from bottom to above ice line. There are two sets of three cranks triple expansion engines, 23 1/2, 38, 64 by 42 inch stroke, working at a pressure of 220 pounds per square inch, indicating a collective horse-power of 1,000. The cylinders being supported at the back ends by three massive cast iron columns, cast in with the main condensers, and in the front there are six strong steel iron columns, to each set of engines. Cranks are set in angles of 120 degrees, which are also interchangeable, being of the built-up type, having couplings at each end. Diameter of the crank pins and shaft is 12 1/2 inches, and made of the best milled steel. Main shaft thrust blocks of four collars each, faced with white metal liners. Each collar is cast hollow to allow a water service to circulate through them. They are also adjustable by large fore and aft nuts on each side. The valve motion for working the slide valves is the double radial bar type, having adjustable slip-pers top and bottom. Each valve motion has a separate grade of expansion link, varying a cut-off from a half to three-quarters stroke. The reversing of the valves and engines is done by a Weir's patent steam and

The auxiliary machinery consists of very powerful duplex feed pump, suitable for feeding the boilers, also a duplex 6 inch single cylinder pressure pump, two sets of dynamos with direct acting engines, one capable of an output of sixty-five volts, the other having an output of 110 amperes at sixty-five volts. Also a six inch centrifugal pump with direct acting engine for ballast trimming of the ship. Also a small duplex sanitary pump for supplying water for closets and baths. A fifteen ton Weir's patent evaporator for auxiliary supply to the boilers. Weir's feed heater and a Rankin's feed filter, two sets of four feet six inch fans with direct acting high-speed engines, each fan delivering 14,000 cubic feet of air per minute, down to the stokeholds. A very powerful double cylinder, horizontal steering engine by Alex. McLaughlin, makers, controlled from the pilot house on the ship's bridge. There is also fitted on the rudder head a very powerful hand steering gear consisting of a double right and left handed screw, with nuts sliding on guide rods, geared with powerful arms to crankpins on rudder head. The back end of the screw is supported by a strong bracket bolted down to the deck, the gear being operated by a large hand wheel. Also a Scow hydro-

VIEW OF WHARF AT BAY OF SEVEN ISLANDS.

with four firing doors, and the grate area is 57 1/2 square feet, ranking a total of 349 square feet for the four boilers. Suitable casing doors on each side of the boiler are fitted for cleaning of the soot accumulating on the tubes. The front doors are made to swing open, and the back ones to take down. Handhole and plugged fittings opposite every tube at each end, for cleaning, examining and renewing tubes as required. The main steam pipes from the stop valves, on the top of the drums, are made with very large expansion bands. The auxiliary pipes also have the same and lead to an And's reducing valve, and the pressure is reduced to 75 pounds per square inch, for the auxiliary engines. All the boilers are well stayed in the ship, drum ends being stayed together by angles and flat plates, bolted to ship's frames. The fore and aft staying is done with ramming stays on top of drums at each end, from angles or stokehold bulkheads with inch and a half wrought iron stays made with stretching screws, and from drum to the inside, with 1/2 inch wire rope also having stretching screws and locked nuts. All the stays are set up tight, when all the boilers are fully expanded under pressure. The whole boiler installation has one large funnel with inside diameter 8 feet 9 and 29 feet 6 high, above furnace bars. All four boilers are tested to 400 pounds to the square inch with water pressure, and the safety valves are set to a working pressure of 205 pounds per square inch. The coal bunker capacity, for supplying the boilers is 425 tons, and the bunkers are situated forward of the forward stokehold, trimmed into same through two water tight bulkhead doors. The deck machinery consists of a powerful winch on the foremast head made by Messrs. Emerson, Watts & Thompson, Greenhead, Newcastle-on-Tyne, having well-logs of 9 inches diameter by 11 inches stroke, a very powerful winch on the main hatch made by Messrs. Clark, Chapman & Co., Gateshead, Newcastle-on-Tyne, having cylinders of 7 1/2 inches diameter by 12 inches stroke. Another winch is situated at the after hatch, by same maker, having cylinders 6 1/2

log is met with on the South Shore, the weather was mild for the time of year, but there was much smoke and such a hazy sky that it was difficult, sometimes, to see the marks, and the compasses were put to almost constant use. Between Point du Monts and Seven Islands, on the way down, a heavy snow storm set in, obscuring all lights. Here the vessel lay to, and awaited daylight before proceeding to her destination. The trip down was made in twenty hours and a half, the *Montcalm* averaging 14 knots an hour. On the way up, the ship anchored off Rimouski, on account of the darkness and smoke, nothing being visible. She got underway at half past six, and arrived in Quebec 6.20 p.m. Coming back, the voyage was uneventful. To Capt. L. G. Boulton, R.N., retired, who came to Canada last July, and was for many years surveying the River and Gulf of St. Lawrence, the Great Lakes, and Newfoundland and Labrador, and accompanied the expedition, on the kind invitation of Commodore J. E. Gregory, and the Marine and Fisheries Department, we are indebted for valuable information regarding the various classes of ice through which the *Montcalm* so successfully passed, during her voyage of 300 miles. Pure blue ice, one foot thick, was encountered in the neighborhood of St. Laurent. To Wolf Rock, there was open water from St. Jean. At the time of leaving Quebec, the ship had commenced ice from Crane Island to the Pillars, was patchy and heavy in places. At the Traverse the ice was heavy and extended from shore to shore. At 11.45 a.m. Goose Cape was reached, and the ice was thick and close, but the *Montcalm* was equal to cope with it. The batture ice, judging from occasional pieces turned over by the ship, must transport a great deal of material from the shallow banks out to deeper water. There was open water along the North Shore, from Goose Cape to Cape S. Imen. At 1.23 p.m., between Hare Island and the North Shore, got into close and heavy ice, the heaviest yet. This was avoided on the return trip by taking the Southern route. Aboard of the entrance to the Saguenay, the ice was in patches but very heavy. After passing Red Island, there

log to Seven Islands the vessel stopped and awaited daylight. She proceeded on her way at 6.15 and arrived at Seven Islands at 10 o'clock, after cutting her way through fourteen inches of solid blue ice. For the first time in its history, the people of Seven Islands saw a vessel arrive in front of their port in the winter. The event brought out nearly the whole population with their Eskimo dogs, and sledges. The boat was cheered to the echo and the people turned out in great style to express their joy and surprise at man's triumph over nature. All sorts and conditions of costumes were worn, which added a rugged picturesque to the animated spectacle. Hundreds of flags were flying on both shores, and the *Montcalm* was fairly inundated with visitors, and all indulged in hearty hand shakes. Everyone congratulated Capt. Belanger on the ship and tact with which he performed his strenuous duty. One of the most striking sights was the two or three hundred Eskimo dogs, harnessed in teams of from three to eight, which surrounded the steamer and seemed to enjoy the incident fully as much as their masters. Though not very large canines, they are capable of carrying heavy loads and the train-boys were well backed up with bags of potatoes, boxes and general merchandise for the *Montcalm's* considerable freight, as well as one mail bag, and medical supplies for the diphtheria patients. The diphtheria scare has been exaggerated, there being not more than fourteen persons presently affected by the dread disease and they are rigorously quarantined. The Eskimo dogs are rapid travellers. They are ferocious beasts, and would charm the heart of good old Dr. Watts, for they carry out to the letter his famous line, "Let dogs delight to bark and bite." They are always snarling and fighting among themselves. Hardly one of them escaped wounds, as the marks and blood on them, from their hands to their legs, showed. It takes two or three years to train these canines and they are much used to transport both passengers and goods. They obey their masters very well, and these commands given in the Esquimaut tongue, interested the Quebec visitors not

TERMINAL AT BAY OF SEVEN ISLANDS.

THE CLASS OF LIVE STOCK BROUGHT IN FOR USE OF COMPANY'S EMPLOYEES.

Province of Quebec. The company is composed of:— President—James Clarke, publisher, New York. 1st Vice-President, Wm. Clarke, contractor, Toronto. Secy.—Treas. and Resident Director—Thomas Menney, Quebec. Director—George Clarke, publisher, New York; John Clarke, contractor, Toronto. Under the Supervision of Engineers—Ross and Holgate, Montreal; Geo. F. Hardy, New York, and General Manager, F. W. Spicer. Construction operations commenced in the spring of 1902 and since that time the company has completed and equipped with full complements of rolling stock, standard gauge, steam railway, nine miles in length, saw mill, machine shops, pulp storehouses, pulp preparing rooms, and sundry other extensive structures necessary to the successful conduct of the company's business. The permanent buildings are nearly all of concrete construction. The immense pulp mill capable of turning out 250 tons of dry mechanical pulp per day will be in operation during the current year and the company has developed the magnificent water power on the St. Marguerite River to the extent of twenty thousand horse power for the purpose of running this great plant. Seven hundred workmen find employment at Clarke City and the company has built for the convenience of its em-

an outlay of five millions of dollars. The officers of the company hold firmly to the belief that in the grand march of Canadian progress Clarke City and the bay of Seven Islands will be in the front rank. The Quebec Steam Whaling Co. successfully conducted a rather extensive whaling during the navigation season of 1905 and as other industries will be started next spring the residents of the growing village of Seven Islands are enthusiastic regarding the bright prospects of the immediate district. During the construction period, on account of the inability to use a full force of workmen during the winter months the population of Clarke City varies from 250 to 1,250. The railway is operated for the use of the North Shore Power, Railway & Navigation Co., exclusively. Besides this, the railway carries the provisions and winter supplies for the Indians on their hunting and trapping expeditions which are conducted on a large scale. Among the fur-bearing animals secured by the Indians may be mentioned the rare black, and silver foxes. One of the latter was recently sold for \$1,200. Others brought from \$200 to \$500. The resources of the company are unlimited. Indeed the industry is in its infancy and it is impossible to over-estimate its future prospects. (Continued on Seventh Page.)

DOGS HARNESS'ED READY FOR TRIP.

IN AND ABOUT TOWN

ELOQUENT ADDRESS SCHOOL MATTERS

Hon. Speaker Weir Spoke on Parliamentary Procedure at Y. M. C. A.

A very interesting meeting was held at the Y.M.C.A. last evening, when an address was delivered on the subject of "Parliamentary Procedure" by the Hon. W. A. Weir, Speaker of the House of Assembly.

Very important business came before the Protestant Committee of the Council of Public Instruction which assembled for its regular quarterly meeting at the Parliament Buildings yesterday.

At the conclusion of his address the honorable gentleman was greeted with an enthusiastic outburst of applause, and a very hearty vote of thanks was tendered him on motion of Mr. W. H. Wiers.

ALL DAY OUTING. The Imperial Daughters of the Empire intend to have an all day outing at Kent House, Montmorency Falls, on Wednesday, 7th February.

ELECTION OF THE OFFICERS. Of the Master Printers' Association of Quebec.

On the 30th inst., the Master Printers' Association of Quebec proceeded to the election of its officers for the year 1906.

NEPTUNE QUICK LUNCH. Soup, steak, fried potatoes, cold chicken, etc. "Amontillado Sherry."

LATE SERGT. THEBERGE. Yesterday morning detachments of the city police, Provincial police and the firemen escorted the remains of the late Sergt. A. Theberge.

Q. A. A. R. BINK. Bear in mind that the band plays on the Q. A. A. Skating Rink every evening from 8 to 10 o'clock.

CATHOLIC SCHOOL COMMISSIONERS. At a meeting of the Roman Catholic Board of School Commissioners held at the sacristy of St. Roch's Church, under the chairmanship of Cure Gauvreau.

4 Spoonfuls of Grape-Nuts WITH CREAM. For the cereal part of a Breakfast will add tone and vigor to the mental machinery all day.

Mr. and Mrs. Jules Gingras wish, through the newspapers, to thank all those who sympathized with them or who sent any offerings or floral tributes on the occasion of the death of their beloved son, Garret Randolph.

MAYOR OF LORETTE. Mr. Aurel Gauvin, farmer, has been re-elected Mayor of Ancienne Lorette for the second time.

INCREASED OFFICE ROOM. The C. P. R. Company has leased additional office room in the R. & O. Navigation Co.'s building, Dalhousie street. This looks like business.

ILLEGAL LIQUOR SELLING. In the Police Court yesterday a local grocer was fined \$30 and costs for allowing liquor which he sold to be drunk on his premises.

LEVIS MUNICIPAL COUNCIL. At the last meeting of the Levis Municipal Council, the chairmen of the different committees were appointed as follows: Finance, Mr. J. Fortin; Police, Mr. Elzear Vailloux; Fire, J. N. Laine; Water, Mr. A. Lamontagne; Markets and Grounds, Mr. Achille Carrier; Ferry, Mr. Jos. Gosselin; Health, Mr. Eus. Belleau; Regulations, Mr. Ls. Begin.

WON FIRST PRIZE. At the fancy dress carnival given at Arsenault's rink last night, the first prize for gentlemen's comic costume was awarded to Alb. Nolan, who attended as a representative of Bode's Gum Co.

OBITUARY. The many friends of Mr. Geo. Van Felson will deeply sympathize with him for the heavy loss which he has sustained through the death of his wife, whose passing away was announced in our obituary column yesterday.

SUCCESSFUL EUCHRE. The members of the Quebec Hunt Club gave another successful euchre at their handsome club house, St. Foye Road, last evening, when about eighty members were present.

TO INVESTIGATE MERCER. New York, Jan. 20.—The resolution for an investigation of a merger by which for elevated, surface and subway traffic in Manhattan and the Bronx was recently placed under the control of the Interborough Metropolitan Company was introduced in the Board of Aldermen of this city today.

PRETTY MONTREAL GIRL SAVED BY PE-RU-NA

SUFFERED DREADFULLY WITH PELVIC CATARRH.

ONE BOTTLE OF PE-RU-NA BROUGHT LONG-SOUGHT RELIEF.

An English Woman's Letter. Miss Nellie South, late of Manchester, Eng., writes from 88 Prince Arthur St., Montreal, Can., as follows: "Peruna has made a wonderful change in my life. It has brought me health and happiness."

MISS NELLIE SOUTH.

Other living physician. He makes these cures simply by prescribing Peruna. We have on file thousands of testimonials from grateful women like the one given above.

Conclusion that a woman entirely free from catarrhal affection of these organs would not be subject to female diseases. He, therefore, began using Peruna for these cases and found it so admirably adapted to their permanent cure that Peruna has now become the most reliable remedy for female diseases ever known.

Address Dr. S. B. Hartman, President of The Hartman Sanitarium, Columbus, O. All correspondence held strictly confidential.

20 LBS. OF BEEF FOR \$1.00

Table listing various meats and their prices: Mince Meat, 3 lbs. for 25c; Sausage, 3 lbs. for 25c; Ham small per lb. for 15c; Ham large per lb. for 11c; Bacon per lb. for 12c; Rolled Bacon per lb. for 11c; Fresh Pork for 10c; Eggs per doz. for 22c; Fresh Creamery Butter for 25c.

LATEST SPORTING NEWS

A RUSSIAN RACER CHAMPIONS YOUNG

Thoroughbred to Meet Best In Some Classes of Sport on the American Turf. Boys are Title Holders.

From the land of the Czar comes Flis, a 3-year-old chestnut horse by Saraband-Julotte II. to do battle with the thoroughbreds of this country. He is the first Russian race horse to come out of the wild steppes of his land and try conclusions with the champions of this hemisphere, says the New York World.

This Russian invasion of the American turf was totally unexpected by horsemen of this country. It reverses the usual order of affairs. Heretofore American thoroughbreds and jockeys invaded the land of the Romanoffs bent on securing the rubles of that country. Most of these men and horses had lost prestige in Yankee-land, and for that reason were in search of pastures new to accomplish what they could not do here—earn a livelihood.

But Flis is not a "has been." He is a good race horse, that last season won five races before his owner Frank Friebie, shipped him to New York. The recent advent of Flis caused a stir among the turfmen who make Sheepshead Bay their headquarters. The Russian-bred horse was a novelty and his stall, located in a stable near the head of the Futurity course of the Coney Island Jockey Club, has been visited by many lovers of the thoroughbred. They found a long, rangy, blood-like chestnut horse, with near fore and off hind leg white from the coronet to the ankle. He has a white stripe down his face almost to the nostrils.

For a horse that had completed a five weeks' trip by rail and ship Flis looked unusually well. He did seem a trifle light in flesh, but that is not to be wondered at considering his trying journey. If it were not for the fact that he is a horse of unusually sweet disposition and even temperament he would never have been able to undergo the ordeal.

He was placed in a car at Moscow during the times when howling mobs were rioting through the streets, burning and pillaging. The Russian peasants, mad for the loss of blood and booty, swarmed around his car at various times and places, and only the fact that he was the property of an American saved his life. Bombs were exploded near his car and bullets sang around it.

Several times the car barely escaped being thrown from the rails, and many times it was sidetracked and left in a wilderness. Despite all the disturbances the horse contentedly munched his hay and ate his oats and bran. In all the long journey he did not miss a meal.

Frank Friebie, the owner, accompanied Flis through all those perils, and, with a stable hand, looked after his welfare. The last part of the trip from Warsaw, to Hamburg was the worst part of the journey, but the gallant thoroughbred took the many delays as a matter of course, and when he went on board the ship he acted like a 2-year-old, and playfully kicked up his heels.

He was 19 days aboard ship before the decks, but all during this time he was as quiet as though in a box stall and slept as soundly as though entire quiet reigned.

That Friebie brought a good race horse with him was made evident by his record. He won races in Russia as a 2, 3 and 4 year old. Walter S. Vosburgh, the official handicapper of the Jockey Club, one of the most careful students of form in the country, looked up his career and was so impressed with his past performances that he allotted him 115 pounds in the Brighton handicap.

This allotment of weight proves conclusively that Flis is regarded officially as a high-class horse and among the so-called "top sawyers" of the East. Flis has been entered in all the big turf features of the season, and unless he goes seriously amiss his owner is confident he will more than repay him for the \$500 it cost to ship the horse from Russia to America.

FIGHT IS OFF. Ottawa, Jan. 30.—The Allan-Lynch bout, scheduled for Hull, has been declared off.

A HOCKEY CHALLENGE. We the Star Hockey team hereby challenge the Sarsfield to a friendly game of hockey on the Cove Rink. CAPT. STAR HOCKEY TEAM.

MONTREAL AND WANDERERS. The Montreal and Wanderer teams for to-night's game in Montreal will probably be: Wanderers—Defence, Menard, Strachan and Rod Kennedy; forwards, Lester Patrick, Ernie Johnson, Glass and Blatchford. Montreal—Defence, Brophy, Meldrum and Horsfall; forwards, Coulson, Sargent, Small and Mason.

NATIONALS DEFEAT MONTAGNARD. Six straight was the score by which the Nationals defeated the Montagnards in a one sided game in the Montreal Stadium Monday night. Had it not been for the good work of Wright, Doran and Kent, who were on the defence end of the Montagnard team, the Nationals would have won out with a bigger score. About 500 witnessed the game.

The Wornout Nerves, The Weak Heart, The Tired Brain, The Wasted Strength.

What a multitude of women there are who feel that these words exactly suit their case. From early morning until late at night they have been on the go, year in and year out, attending to the daily household duties, looking after the wants of her children and spending the rest of her time attending to social and church work. It is no wonder then that sooner or later there comes a general collapse and palpitating of the heart becomes weak and palpitating, the nerves become unstrung, the brain feels in a whirl half the time and the usual force of vitality is lacking.

MILBURN'S HEART AND NERVE PILLS. They are the women's friend in every sense of the word. They will strengthen the weak heart, tone up the shaky, starved nerves, make the brain clear, and restore the lost vitality.

Where to Have The Best Good Times

Nowhere in all the world are so many places and conditions ideal for good times as in

California

The trip can be made profitable, too,—let us tell you how. It cannot but be pleasurable,—let us tell you why.

Union Pacific and Southern Pacific Overland Limited is three meals the shortest way to San Francisco, via Omaha. That means both time and money saved.

Hotel CECIL

LONDON, England. Largest and most magnificent Hotel in Europe. MODERATE CHARGES.

Quebec Harness Manufacturing Co. 145 NOTRE DAME DES ANGES, QUEBEC.

Merchants and buyers of Harness, before placing their orders for Harness, etc., are invited to pay a visit to our Factory and view the conditions under which our goods are made.

LAST OCCASION A REDUCTION OF 10 PER CENT IT IS THE LAST ADVANTAGE OF THE SEASON.

Mr. George E. Breton, merchant-tailor at No. 198 St. John Street, offers a reduction of 10 per cent on the balance of the winter stock, comprising cloth and natural fur overcoats, tweed for suits, etc., and also underclothing such as drawers and undershirts.

GO TO THE STORE WHERE THE LATEST STYLES ARE TO BE FOUND. GEO. E. BRETON, 198 JOHN STREET

SUCCESSFUL WINTER NAVIGATION OF ST. LAWRENCE

(Continued from Fourth Page)

prospects which mean so much for the people living on the North Shore. The company devotes a large part of its attention to the welfare and comfort of its employees. The camps are kept in thorough order. Great care is taken to provide the inmates with good food supplies, leaving to the men nothing to be desired. All foods are carefully inspected by competent officials before being sent to the camps, and their quality has never been objected to. Medical attendance is provided, and the employees will shortly be placed on an insurance footing. Very few accidents, considering the large number of persons engaged on the works, have occurred, great care being taken by the company to prevent them, and to lessen their danger. In the near future, it is the intention of the company to employ at some of their establishments women and children, which will add extensively to the incomes of the inhabitants. The wages paid are extremely liberal, the common laborers are paid \$1.80 a day of twelve hours. Brakemen, firemen and mill hands receive the same amount; conductors \$2.40; engineers and carpenters \$3. The clerks get from \$50 to \$100 a month, and the superintendents' and officers' salaries range from \$2,500 to \$10,000 a year.

will then become one of the greatest winter ports in all Canada. The sooner, therefore, in the interests of the Province, that this gigantic undertaking is commenced, the better it will be for the people of the Dominion in general. Its possibilities are enormous, for it means the opening up of large agricultural, lumbering, fishing, mining and other industries and the development of our immense water powers. Every river that it will traverse, on account of the great water sheds, and constant supply of water which they yield, will add to the richness of the wealth of the country. The Manicougan river alone gives, to quote the Government statistics, one million horse-power, which being utilized is simply running to waste, which is almost criminal.

The construction of the Quebec Bridge will afford connection with no fewer than eight railroads, viz.: the Intercolonial, the Quebec Central, Grand Trunk, Canadian Pacific, Quebec & Lake St. John, the Great Northern, Grand Trunk Pacific, the Quebec Railway, Light & Power Company, and the prospective Quebec & Lake Huron Railway which is not comprised in this list. These connections will mean that the port of Quebec will be materially benefited, during the summer months, while the winter business will secure an outlet at the coming great winter port at Seven Islands. We may here say that in this last named region big game exists, while the number of game birds and native fowls abound in incalculable quantities, thus affording tempting opportunities for the sportsmen. The salmon, sea, brook, and lake trout fishing will draw large numbers of fishermen from the United States and

INDIANS GOING UP STE. MAR GUERITE TO HUNT AND TRAP.

other sources of giving employment to thousands of people. A special electrical process for the treatment of the iron ore and sand will soon be in operation, the results of which mean much for the additional prosperity of the company as well as those who supply the labor, both scientific and ordinary. All of these industries will materially add to the work of transportation by land and water to the various markets of the world. The company draws its supplies largely from Quebec, while the machinery used is brought from various countries throughout the globe.

Canada on this side of the Atlantic, while those of the British Isles, France and other European countries will liberally contribute their quota of anglers on the look out for new waters to conquer. Of course such commercial fish or haddock and cod will open up a fresh field of industry, for they abound in very great quantities. A short time ago, the Hon. Charles Fitzpatrick, in the House of Commons, in an important speech, dwelt on the fact that the location of the port of Seven Islands, afforded ample accommodation for the erection of a dry-dock and graving dock, and the equipment of a wrecking steamer, which owing to the situation of Seven Islands in the Gulf of St. Lawrence afforded ready opportunity for granting assistance to vessels in distress, coming into the gulf by any entrance.

The directors of the North Shore Power Company form the same board as the Quebec, Saguenay & Gulf of St. Lawrence Railway Company, which latter company has secured a charter from the Dominion Parliament for the construction of a standard gauge railway from Quebec to Seven Islands. The preliminary surveys of this line show approximately a road of some 375 miles. For the first 200 miles of this road, the Federal Parliament has voted the usual cash subsidy. The company is now in treaty with our Provincial Government for a land grant, which when obtained will result in the construction of this very important and much needed line. The construction of this road means the building of large terminals, at Quebec and Seven Islands. Seven Islands

The Dominion Government has completed a very expensive system which will be erected next spring, at Caron Island, which will afford additional means of safety for the marine and ships. The output of North Shore Power Co. will necessitate the continuous use of four steamers of six thousand tons burden each. These vessels will ply between the Bay of Seven Islands and American, English, German and French ports. These steamers will cost from \$250,000 to \$300,000 each and will be built on the latest freight carrying models, adding greater value to the shipping trade of Canada, and especially to that of the Province of Quebec. These vessels will receive return freights, which will be distributed at the Bay of Seven Islands, and transported either by water or by the Quebec, Saguenay and Gulf of St. Lawrence Railway, to the various centres of population, throughout the Dominion. These return cargoes will consist, mainly of coal, French wines and general merchandize.

DROGGED TO HER FEARFUL DEATH
Boston Woman's Horse was Frightened by Auto.
WOULD NOT PULL UP

Chauffeur was Warned to Reduce Speed But Refused to Pay Any Attention.

Saint Augustin, Fla., Jan. 30.—The carelessness of a chauffeur whose identity has not yet been ascertained, caused the death of Miss Drew of Boston and the shock of losing his daughter may kill her invalid father.

The woman was riding a spirited horse on St. George street when an automobile, approaching at a great speed, frightened the horse. Miss Drew called on the chauffeur to slow down, but the man paid no attention to her and went whizzing past at a terrific pace.

The frightened horse whirled and reared down the street. Miss Drew was thrown, but her foot caught in the stirrup and she was dragged for several blocks before the horse was stopped,

She was afterward removed to a hospital, where it was found that her skull had been fractured and both arms and legs broken. She lived for some hours after the accident.

Miss Drew and her father came here from Boston. Mr. Drew is an invalid who comes to this place every year for the benefit of his health.

BAD CONDUCT OF COSSACKS.

Gomel, Jan. 29.—A battalion of infantry and a machine gun company have arrived to restore order in this city and in the surrounding country where the peasants have risen and are committing excesses. Much complaint is made of the conduct of the Cossacks of the garrison during the recent rioting. It is said that they took the part of the mobs, prevented the firemen from extinguishing a fire and even drove off the policemen who were protecting the fire hose. The fire was not extinguished until after the arrival of firemen from Moghileff.

A GUARANTEED CURE FOR PILES.
Itching, Blind, Bleeding, Protruding Piles. Druggists are authorized to refund money if PAZO OINTMENT fails to cure in 6 to 14 days. 50c.

CITY OF QUEBEC.

CITY HALL, Quebec, 5th January, 1906.

MUNICIPAL ELECTIONS.

Municipal Elections for all the Wards of the City of Quebec.

PUBLIC NOTICE is hereby given that pursuant to the Act 51-52 Vict., ch. 78, as amended by subsequent Statute, the nomination of a Candidate for Candidates for the offices of Aldermen for each of the seats Nos. 1, 2 and 3, in each of the wards, for all the Wards of the City of Quebec, will take place on MONDAY, the twelfth day of February next, 1906, being the second Monday of February, 1906, between the hours of TWELVE of the clock in the forenoon and FOUR of the clock in the afternoon, at the office of the City Clerk, in the City Hall; all requisitions for candidates must be in writing and signed by six or more electors duly qualified as such; such requisitions shall specify, by the number of the seat, for which particular seat the candidate is nominated. Such requisitions shall further contain a written consent to the said nomination, which consent shall be signed by each candidate or in his absence by a person who declares that he is thereto authorized by him. Such requisitions shall also be accompanied by a solemn declaration, made by the candidate or by another person, attesting that the candidate is the proprietor of the immovable or immovables to be described in the solemn declaration, and that said immovable or immovables are worth the sum of two thousand dollars, over and above the rents, hypothec or charges upon the said immovable or immovables. Such requisition shall also be accompanied by a certificate from the City Treasurer establishing that the candidate is not indebted to the said city for assessments, taxes or any dues whatsoever or for any other reason. And in case there should be more than one candidate for the office of Aldermen for each of the seats, Nos. 1, 2 and 3, in each Ward, nominated for any of the said Wards, the voting shall take place on MONDAY, the nineteenth day of FEBRUARY next, 1906, being the Third Monday of the month of February, 1906, between nine o'clock in the morning and five o'clock in the afternoon, in each and every Ward, where there shall be more than one candidate for said office of Aldermen for each of the seats Nos. 1, 2 and 3, in each Ward respectively, there shall be a "Poll House" for each two hundred electors for the election of an Alderman for seat No. 1, or for seats Nos. 2 and 3. A person who is qualified to vote for Alderman for seat No. 1, and for Aldermen for seats Nos. 2 and 3, shall, however, only count as one elector.

H. J. J. B. CHOUINARD,
City Clerk.

MANUFACTURERS OF ALL KINDS FISH NETTINGS, COD TRAPS, COD SEINES, CAPLIN SEINES, HERRING NETS, ETC

.... ALL MADE FROM OUR OWN

Gold Medal Twines.

Fishermen of Quebec Province can be supplied with our manufactures through their Quebec Mercants, or by application at our office in Boston or New York. We would particularly call attention to the fact that for over sixty years we have been and are still the Largest Makers of Fish Nets, Twines, etc., in America on Europe; that our goods have always stood at the head; that our prices are satisfactory.

That whenever and wherever we have exhibited our manufactures in Competition with all others either at the London Fishery Exhibition, in 1883, at Chicago, in 1894, or at Paris, in 1900, (the Grand Prix and two Gold Medals) we have always received the HIGHEST AWARDS.

We would announce that at the recent Pan-American Exhibition, at Buffalo, we were awarded the only Gold Medal for the excellence and superiority of our manufactures.

SHIPPING NEWS

DOMINION LINE. Steamer Turcoman arrived at Portland at 3 p.m., Sunday, January 29th. Steamer Welshman arrived at Portland at 1 a.m., Monday, January 29th.

NAVIGATION LAWS.

London, Jan. 30.-The Canadian Associated Press learns that in replying to an enquiry from the Australian Government Lord Elgin stated that it is the intention of the Cabinet to consult the Governments of the colonies on the question of holding a conference on navigation laws.

A BAD COLLISION.

New York, Jan. 30.-The Times says: The Belgian freight steamer Calderon has a hole in her port bow almost big enough for a horse and wagon to go through, fourteen freight cars all loaded with shingles are in the bottom of New York Bay and a New York, New Haven & Hartford Railroad float is ashore on the northern side of Governors' Island as the result of a collision in which the Calderon, a tug and two floats figured yesterday. The accident happened off the Battery and was due to the inability of the tug to get out of the way of the big freighter in time to prevent the smash up. The lone man who was on board the float when the Calderon crashed into it was rescued by the crew of the tug Fred B. Dazell, the craft that was guiding the Calderon out.

Wood's Phosphorine.

The Great English Remedy. A positive cure for all forms of Sexual Weakness, Mental and Nervous Debility, Impotency, Stricture, Gleet, etc. of Abuse or Excess, all of which lead to Consumption, Infertility, Insanity and an early grave. ANNUAL MEETING BOARD OF TRADE

Mr. George E. Amyot Elected President for Ensuing Year COUNCIL'S ANNUAL REPORT

Want Q. & L. St. John Railway Placed Under Dominion Railway Commission-The Montcalm's Doings will be Considered.

There was a very large attendance of members at the 65th annual general meeting which was held at the Board Rooms, St. Paul street, yesterday afternoon, for the election of officers for the ensuing year and the transaction of general business.

The annual report of the Council to the Board was presented. In the course of last year, the Council has given its attention to many questions of paramount interest to the commercial and industrial development of the city and port of Quebec.

The following officers were elected by acclamation: President-Mr. Geo. E. Amyot. 1st Vice-President-Major T. S. Hethington.

2nd Vice-President-Dr. Ed. Morin. Treasurer-Mr. E. E. B. Rattray. Auditors-Messrs. L. A. Carrier and Arthur E. Scott.

The election of members of the Council resulted as follows: Messrs. P. J. Barin, Geo. Tanguay, V. Lemieux, O. W. Bedard, M. Joseph, W. A. Marsh, G. A. Vandry, N. Drouin, W. Power, M.P., D. A. Drolet, Ed. Picher, V. E. Beauvais.

The Board of Arbitration was re-elected as follows: Messrs. F. H. Andrews, Wm. Brodie, Naz. Fortier, Wm. Molson Macpherson, N. Rioux, Jos. Winfield, John T. Ross, Geo. T. Davie, Gaspard Lemoine, J. E. Martineau, J. G. Garnier, M. Joseph.

The following new members were elected to the Board: Messrs. J. M. McCarthy, J. F. Guay, L. Boivin, E. Caron, Arthur Pouliot, Arthur Gingham.

Mr. W. H. Wiggs asked if anything further had been heard in regard to the C.P.R.'s desire to acquire the Board Building. President Amyot replied that nothing further had been heard on the subject.

The question of the operations of the ice-breaker Montcalm above Quebec was also brought to the notice of the Board by Mr. Wiggs, who said the work performed by the boat was not alone a useless expenditure of money, but that it was detrimental to the harbor of Quebec and an obstruction to the winter service by the ferry steamers. He moved, seconded by Mr. Jos. Samson, that the Council take the matter up for consideration, the motion being carried unanimously.

Torpid Liver Cause of Fevers

THE SUREST WAY TO PREVENT DISEASE IS TO KEEP THE LIVER ACTIVE WITH DR. CHASE'S KIDNEY-LIVER PILLS

Too frequently an external cause for fever is looked for, when the real source of trouble is from within the body itself.

To begin with, the liver becomes torpid, sluggish and inactive, and poisonous matter is left in the blood to corrupt the whole system. The result is the overworking of the kidneys and the clogging up of the organs of excretion.

Food which should be digested is left to ferment and decay in the intestines, and inflammations and fevers are set up.

In such a condition the body is a regular hotbed of disease, and is most susceptible to any ailment of an infectious or contagious disease.

The best insurance against disease is the use of Dr. Chase's Kidney-Liver Pills to keep the liver active. This great medicine has a direct and specific action on the liver, and is wonderfully prompt and effective in awakening and invigorating this important filtering organ.

A healthy liver means pure blood, good digestion and the proper working of the bowels. A healthy liver ensures the onward passage of the food through the intestines and excretory organs, and so removes all chance of poisonous waste matter remaining in the body to produce pain, suffering and disease.

Mr. Louis Joseph Albert, St. Louis, L'Islet Co., Que., writes: "I am happy to have an opportunity of certifying to the merit of Dr. Chase's Kidney-Liver Pills. For three months I suffered from liver complaint, loss of appetite and inability to digest the food. I suffered from violent pains in the stomach and sides, smothering feelings and depressed spirits."

Reading about Dr. Chase's Kidney-Liver Pills I decided to try them and obtained considerable benefit from the very first box. I am now in splendid health and can say positively that I was cured by the use of Dr. Chase's Kidney-Liver Pills.

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, at all dealers, or Edmondson, Bates & Co., Toronto.

Quebec over those of Montreal. Mr. James Woods submits a statement showing the comparative charges on the cargoes of Quebec and Montreal, revealing in one instance a difference against Quebec of \$174.63 and in the other \$101.59.

Mr. Amyot reviewed the main points of the work done by the Council during the year, and the many important questions which had been taken up. In regard to the Board of Trade, he gave some figures showing the numerical growth of the body. In 1883, there were only 78 members, which were increased to 79 in the next year and 80 in the year following. By the year 1889 it had grown to 165, and there was a steady progress, with few exceptions, up to the date, it now numbering 307 members.

When the motion for the adoption of the report came up, Mr. A. J. Auger raised the question of complaints as to freight discrimination on the Quebec & Lake St. John Railway, correspondence in connection with which was embodied in the Council's report. He moved, seconded by Mr. J. J. MacRae, the following motion: "That the Quebec Board of Trade take the necessary steps to ask the Federal Government at Ottawa to amend the law of the Railway Commission whereby the Quebec & Lake St. John Railway will be placed under the Railway Commission; and also to petition the Provincial Government of Quebec to amend the charter of the Quebec & Lake St. John Railway so as to make this company amenable to the Railway Commission of Canada. This motion was adopted."

Mr. O. W. Bedard then moved, seconded by Mr. Ed. Morin: "That the report be adopted, and that the articles contained in it regarding railway rates, complaints of discrimination against the Quebec & Lake St. John Railway, the graving dock, and pulpwood, be taken up for consideration by the Council of the Board at its next meeting. This motion was also adopted."

Mr. E. E. B. Rattray then presented the Treasurer's report, which was adopted. The report shows that the revenue during the past year, including a balance of \$1,235.50 from last year, amounted to \$4,960.10. The expenditures reached the sum of \$3,218.97, leaving a balance of \$1,741.13.

The election of officers was then proceeded with, Lieut.-Col. R. A. Scott and Mr. Elz. Fortier being appointed scrutineers, with Messrs. J. A. Chabot and A. N. Drolet to assist them.

The following officers were elected by acclamation: President-Mr. Geo. E. Amyot. 1st Vice-President-Major T. S. Hethington.

2nd Vice-President-Dr. Ed. Morin. Treasurer-Mr. E. E. B. Rattray. Auditors-Messrs. L. A. Carrier and Arthur E. Scott.

The election of members of the Council resulted as follows: Messrs. P. J. Barin, Geo. Tanguay, V. Lemieux, O. W. Bedard, M. Joseph, W. A. Marsh, G. A. Vandry, N. Drouin, W. Power, M.P., D. A. Drolet, Ed. Picher, V. E. Beauvais.

The Board of Arbitration was re-elected as follows: Messrs. F. H. Andrews, Wm. Brodie, Naz. Fortier, Wm. Molson Macpherson, N. Rioux, Jos. Winfield, John T. Ross, Geo. T. Davie, Gaspard Lemoine, J. E. Martineau, J. G. Garnier, M. Joseph.

The following new members were elected to the Board: Messrs. J. M. McCarthy, J. F. Guay, L. Boivin, E. Caron, Arthur Pouliot, Arthur Gingham.

Mr. W. H. Wiggs asked if anything further had been heard in regard to the C.P.R.'s desire to acquire the Board Building. President Amyot replied that nothing further had been heard on the subject.

The question of the operations of the ice-breaker Montcalm above Quebec was also brought to the notice of the Board by Mr. Wiggs, who said the work performed by the boat was not alone a useless expenditure of money, but that it was detrimental to the harbor of Quebec and an obstruction to the winter service by the ferry steamers. He moved, seconded by Mr. Jos. Samson, that the Council take the matter up for consideration, the motion being carried unanimously.

INJUNCTION AGAINST PRINTERS.

New York, Jan. 29.-An injunction signed by Judge Gildersleeve, of the Supreme Court, was served on President McCormick, of the Typographical Union No. 6, to-night by the Butterick Publishing Company, restraining them from what was alleged as interference in the printing department of that company, in that the union had tried to persuade the men engaged there not to continue at work. The injunction restrains the members of the union from "making any requests, giving any advice or resorting to any species of persuasion, threats, intimidation, force or fraud which operates to overcome the exercise of the free will of any person connected with the plaintiff or its customers as employees or otherwise; from picketing the place of business of the plaintiff, or any of the places of business of this plaintiff; from doing business in said city or elsewhere."

In one of the documents accompanying the injunction is an allegation that the union had injured the business of the Butterick concern to the extent of about \$2,500 a week. President McCormick said that the union had been careful not to do anything in its overtures to the Butterick employees that would tend to hamper the work of their employers.

SOME TALL TALK.

Ottawa Journal: A team picked from the City League clubs would wipe anything in Canada off the face of the map, with the probable exception of the Stanley Cup holders and one of the western teams. The Ottawas will certainly never want for recruits so long as the City League is in existence. It might be remarked here, to contrast hockey conditions in the capital and elsewhere, that Ottawa has more leagues than Montreal has teams. In point of population, the great city down on the St. Lawrence is six times the size of Ottawa. Toronto has a bunch of Junior O.H.A. teams that would be easy pickings for members of our A.B.C. or Junior City League, while towns like Brockville, Cornwall, Kingston and Hamilton can hardly boast of more than one team. Two night games were played on the same night, one drawing 1,500 and the other, at another rink, drawing 1,000 spectators. If you are a hockey fanatic, come to Ottawa, and your appetite will be appeased in a short time.

BREAD is never better than the flour it is made of.

Often it is not nearly so good, but that is the fault of the bread-maker.

Without good flour, good bread is impossible, no matter how skillfully it is handed.

Now, good bread must be good to eat, as well as good to see or to taste. Good-to-eat bread is bread that nourishes.

Royal Household Flour

is supreme. It represents the best that is in the wheat, ground to a snowy whiteness and purified by electricity.

It produces bread that is light, easy to digest and best of all-nutritious. Ogilvie's Royal Household is to be had at all grocers.

TROUBLE HAS STARTED IN THE HAPPY FAMILY

A Liberal Member is Getting Inquisitive About Finances AND DISTURBS TREASURER

Who Wants to Get Him Out of the Party, but Member Demands Information.

Press Gallery, Legislative Assembly, Jan. 30, 1906.—There was quite a breeze in the House this afternoon between Hon. Mr. McCorkill on the one side and Mr. Perrault, the Liberal member for Chambly, on the other, and for over an hour the House listened attentively to the debate which was of a rather interesting nature, more so as it was caused by a motion of Mr. Perrault, who intends, apparently, probing into the public accounts. He informed the House that he had at least thirty more similar motions to bring forward this session and the House, and the public may look forward to some interesting debates, if the member for Chambly carries out his intention of bringing down all the motions before the House.

Hon. Mr. McCorkill announced that he would deliver his budget speech to-morrow afternoon. The usual number of petitions were presented and a few bills introduced. In answer to Mr. Langlois, Hon. Mr. Tessier said that in 1904-05 the Agricultural Department had spent \$18,750 for the improvement of rural roads and Hon. Mr. Roy, also in answer to Mr. Langlois, stated that the total amount paid by the Government in 1904-05 for subscriptions to newspapers, magazines and other publications could be found in the public accounts.

Mr. Perrault started the ball rolling by moving for a copy of the Order-in-Council of 30th June, 1897, authorizing a temporary loan of \$700,000 with interest at 3 1/2 per cent. The member for Chambly began by thanking the Government for the prompt manner in which they had brought down the returns this session although he could not admit that they were explicit. The motion might not appear to be of a very important nature, but he had at least thirty similar motions to bring down before the end of the session. During the last five years he had not succeeded in obtaining all the information he wanted so as to show that the Province was not in a deplorable condition. There were things done in the Treasurer's department which may not have come to the knowledge of the Provincial Treasurer, but the department required to be reorganized and studied. A temporary loan had been contracted in 1897 at 3 1/2 and then changed to 4 1/2. What was the reason of that increase and who authorized it? It was true that the Provincial Auditor audited the accounts, but why not get outside auditors who were not paid salaries by the Government and who were continually under the control of the Government. He had no doubt that they were all good officials, but they were not in a position to be able to tell the Treasurer when his system was wrong.

Hon. Mr. McCorkill remarked that no doubt the House would feel pleased to hear the member for Chambly admitting that he was still a Liberal, but his motion was like a motion of want of confidence in the Government. He had not the slightest objection that Mr. Perrault should bring down all the motions he wanted as the Government had nothing to hide. It was all very well for Mr. Perrault to criticize in a general way, but why not specify his changes and he would give an immediate answer. As regards the auditors, he would inform Mr. Perrault that according to art. 776 and following of the Provincial Statutes, the auditors were under the control of the Treasury Board and not the Government.

Who ever heard of outside auditors being employed to audit Government accounts? What do they do in Ottawa and what is done in other provinces? Mr. Perrault was in favor of the reconstruction of the Treasury Department, and he could remember that about a year ago there had been some talk of reconstructing the department and that he had been slated for the Public Works Department, but he would not say who was mentioned in connection with the Treasury Department.

On behalf of the officials of the department he would say that he could not have a better staff and more reliable and always willing to give all necessary information. This motion relates more particularly to the special loan of 1897. This was a temporary loan for six months at 3 1/2. Well that loan was renewed at the same rate until 1900, when Hon. Mr. Marchand, owing to the state of the money market, had to agree to renew at 4 1/2, and it had continued at that rate until he (Mr. McCorkill) had succeeded in getting it at 4 per cent. He would go more fully into the matter to-morrow in the Budget Speech.

Mr. Perrault replied that the auditor could not change any system without consulting the Government. Now as to the question of being a Liberal he had been and was still a supporter of the Government, but if the Government did not bring on reforms were they bound to support it? No, it will bring on a general revolt and one of the first to revolt would probably be the member for St. Louis.

(Mr. Langlois), who cannot be satisfied with the answers, more or less accurate, which he received to his questions. He (Mr. Perrault) was there to get all information and he intended doing so as there was no opposition to get the information from the Government. Last session and on the previous one, the Provincial Treasurer had made promises to him which were never carried out, and last session he made them in such a manner as to cause him (Mr. Perrault) to be ridiculed. He advised the Treasurer not to be treading on dangerous ground.

selecting on certain papers, who

although opposed to the Government, and which were more Conservative than Liberal, were fixing up their reports so as to show that Mr. McCorkill had a surplus. What was the use of the Provincial Treasurer telling the House what Mr. Marchand did, what he wanted to know was what the present Treasurer was doing? He would render Mr. McCorkill a good service by advising him not to bring down his Budget Speech to-morrow afternoon, as was announced, but to delay it so as to have it revised as there was a difference of \$95,558 in the public accounts in the item for printing.

Hon. Mr. McCorkill remarked that although Mr. Perrault had gone through the accounts he must have misinterpreted them. He did not want any general statement. It was all very well to say that figures were wrong, but where are they wrong? That is what he (Mr. McCorkill) wanted to know. He had reduced the funded and unfunded debt last year by \$178,000 and had a surplus to show. The member for Chambly was opposing the Government.

Mr. Perrault—No. Hon. Mr. McCorkill—You are opposing the policy of the Provincial Treasurer.

Mr. Perrault—Yes. Hon. Mr. McCorkill—Well, Mr. Perrault had been here in the House since 1900 and why did he not make these statements before, but he now tells the Province that the Government has made a false statement in the Speech from the Throne. He hoped to convince reasonable men, but not the member for Chambly. They were paying 4 1/2 and now 4 per cent and he considered that good finance. Apparently, Mr. Perrault had some grudge against the Bank of Montreal and against the C.P.R., but he had no doubt that everybody would admit that the Bank of Montreal was a good institution to be backed up by, and it was not for Canadians, to whatever nationality they belonged, to go back on that institution. Since he (Mr. Perrault) had been in Parliament he had remained silent and now wanted to tell the Government their duty. His electors should have condemned him.

Speaker Weir announced that the motion was carried, but Mr. Perrault raised a question of privilege as the Provincial Treasurer had addressed the House twice while he had only spoken once. He remarked that all last session he was the only one to ask questions on the financial condition of the Province, but the Provincial Treasurer now denied that. The member for Chambly concluded by remarking that he would not be trampled upon by anybody, and in support of his arguments produced a number of statements to prove that the accounts were not accurate.

Hon. Speaker Weir remarked that it would be advisable for Mr. Perrault to keep within the limits of his motion. Mr. Perrault agreed to continue his arguments to-morrow afternoon after the Budget Speech except that the Provincial Treasurer will admit a deficit.

The House adjourned at 5 p.m. Among the petitions introduced today were four from Messrs. Alfred Hardy, Francois R. Lalonde, Ernest Boivin and Severin L. Perron. Messrs. W. C. McIntyre, E. A. Robert, James G. Ross and others are petitioning the House for amendments to the charter of the Imperial Trust Co. and empowering said company to receive money on deposit and allow interest on same and to issue letters of credit with other powers incidental thereto.

Mr. G. W. Stephens will ask the following questions to-morrow: How much has the city of Montreal contributed in taxes during the past year to the Province and what portion of the whole provincial taxation has Montreal paid during the same period?

What is the area contained in the forest reservation known as the Laurentide National Park, and what is its estimated value in timber? How many square miles of timber limits have been sold annually for the last ten years, and what has been the amount realized thereby?

How many square miles of timber limits has the Province of Quebec still to sell? How much revenue has been realized on the export of pulp wood during the fiscal year ending June 30, 1905?

How many rural schools are there in the Province of Quebec? How many children are attending elementary schools in Quebec?

How many boys and girls are receiving education under the head of superior education? How many pupils are attending night school? How many are attending school of arts?

ORGAN RECITAL.

The programme for the organ recital at Chalmers' Church last evening included selections from Handel, Pierre, Holms, Gilmant, Gigout, etc. Mr. Red's own "Cantata" was also included, and the performance closed with Weber's brilliant "Jubilee" overture. The vocalists were Mr. and Mrs. J. A. Pristally, whose musical culture and vocal charm are decided acquisitions to the talent of the Ancient Capital.

All bright housewives say it's best in every way. ELECTRO SILICON Silver Polish Its use by owners of valuable Plate for more than a quarter of a century is evidence of its superior merit. At grocers. Davis & Lawrence Co., Ltd., Agents, Montreal.

GROCCER GOT MONEY

But Had to Swim for It-- Incident of the Departure of the Dominion.

Halifax, N.S., Jan. 30.—The British battleship Dominion sailed on Saturday afternoon under sealed orders. Just as the ship hauled out into the stream an amusing incident occurred. James Clarke, a city grocer, who had delivered a supply of groceries to the ship, was unable to get a settlement with the ship's grocer before the gangway was hauled in. He refused to leave the ship without his money, and when the tally sailor paid up the battleship was a hundred yards from the shore. Clarke, however, was not deterred. He clambered down the torpedo net guards, jumped overboard and swam ashore, amid the cheers of the tars and the crowd on the pier.

MISS GLADYS DRURY WEDS.

Halifax, N.S., Jan. 30.—The wedding of W. M. Aitken and Miss Gladys Drury, daughter of Colonel Drury, C.B., officer commanding the Maritime Provinces, which took place in the Garrison Church yesterday evening, though very quiet, was the chief social event in Halifax for some time. Although she has spent but a short time in Halifax, Miss Drury is a great favorite socially; so also is Mr. Aitken. Among the wedding gifts, which have come from all parts of Canada, is one of fine and very beautiful Maltese lace bearing the card of Major-General Sir Charles and Lady Parsons. The Garrison Church was charmingly decorated for the ceremony. The bride wore a going-away gown of hunter's green cloth with coat of green corduroy, and green chiffon hat, and carried a bouquet of white roses. She was attended by her sister, Edith, the groomsmen was James A. Stairs, of New Glasgow, eldest son of the late John F. Stairs, S. Arnold Finley, of Montreal was one of the ushers. The ceremony was performed by Rev. Cannon Crawford, assisted by Rev. J. B. C. Murphy, garrison chaplain. After the ceremony a reception was given at the residence of Mrs. Crawford, aunt of the bride. Two hours after the wedding ceremony Mr. and Mrs. Aitken left by the night intercolonial express for a three months' tour, which will include visits to Cuba, Mexico and the continent of Europe.

A MOTHER'S DUTY

She Should Carefully Guard the Health of Her Growing Daughter-- Her Future Happiness Depends Upon the Change from Girlhood to Womanhood.

Every mother should watch with the greatest care the health of her growing daughter. She is a girl to-day—to-morrow a woman. The happy health of womanhood depends upon this vital change from girlhood. When nature makes new demands upon her blood supply, you must build up her blood with Dr. Williams' Pink Pills. Her system is unequal to that strain if her back aches, if she is pale or thin, dull-eyed or languid. Dr. Williams' Pink Pills will give her new, rich, red blood and tide her over the crisis. Dr. Williams' Pink Pills will make her development perfect and regular—they will make her a strong, happy, graceful woman. Miss Emerine Vilandre, St. Germain, Que., says: "While attending school my health began to give way. I suffered from headaches and dizziness, my appetite left me and I grew pale as a corpse. As the doctors did not help me any my father got me a supply of Dr. Williams' Pink Pills. Before I had used two boxes there was an improvement, and when I had taken a half dozen I was again in perfect health. I believe all weak girls will find new health if they take Dr. Williams' Pink Pills."

Thousands of growing girls, and thousands of women owe health and happiness to Dr. Williams' Pink Pills. They keep the blood rich and pure and regular. They banish headaches and sideaches and backaches, and they bring the rosy glow of perfect health to pale and sallow cheeks. But you must get the genuine with the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around each box. Sold by all medicine dealers or sent by mail at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.
