SOLUTION TO COVID 19 RESET OF THE DNA CODE BY PHYSICS

Including 3 new laws of physics

If you are wondering what the connection between DNA code and teleportation is, I discovered in November 2020 that my invention of Jteleportation works with the DNA wave.

For the invention of the JvueAudio made in 2013 and which worked until June 2017, it resumed working in August 2020 after finding the problem with the electronic circuit. This invention makes it possible to see and hear people from the other dimension, our dead. But it turns out that this also allows the audio module to talk to them. Don't worry, you won't be able to speak directly with a deceased family member, because it is simply by code that the connection is made. Even today, this invention works constantly to help us in the design of Jteleportation Gate 1 and for JaDN.

The JvueAudio uses the frequency of 12.5 hz ($12.72 \text{ hz} + -11.76\%$) and a camera for its operation, and this camera does not have a brain, so hallucinations are not a problem of the brain. This is a phenomenon of physics and not of medicine. Medicine must understand to stop giving drugs for this phenomenon which is simply a sight of people living in the other dimension. Among several captures, the most important is the person in the fence of February 25, 2017. You have proof of life after death.

In the fall of 2016 until the beginning of 2017, I designed a rectangular pyramid with a former colleague from Nortel Networks, Mr. Christian Ménard, an electronics technician. This JcuBe is the prototype of the monoliths that magically sprouted on earth in 2020. This JcuBe has been used by people from the other dimension and have successfully made the monolith cross from their dimension to our dimension. This invention makes it possible to cross space-time.

To date, the invention of Jteleportation Gate 2 has been carried out on a few occasions. This door allows you to go to the other dimension and travel through time. I am currently in the final design of Gate 1 of the Jteleportation to open the space-time from the dimension where the dead live to our dimension. <http://www.janelle.international/theinvention.pdf>

This design is an Orion pyramid in operation with the magnetic field of the Samuel de Champlain tunnel and quartz treasure discovered between 2015 and 2017 in the city of Chambly in Quebec, Canada in application with Tesla's law, Hooke's law and the law of thermal flux. The underground measurement was taken in 2016 to validate the frequency and voltage. <http://www.tombeaudechamplain.ca>

On September 24, 2020, the Jteleportation module which is not yet invented is found in the province of Quebec, Canada.

https://youtu.be/63_tx1dTU3s

On April 23, 2021, the camera captures the minimal opening of space-time during the adjustment of the electronic circuit of door 1 of the Jteleportation.

We are with a planetary problem linked to covid 19. Apart from this virus, we still have cancer, diabetes, those who have poor training, a person who has had a car accident or the plague of the elderly in shelter.

In November 2020, I introduced you to deciphering the DNA code by physics. <http://www.janelle.international/DNAcode.pdf>

The frequencies to **reset our DNA code by physics** were found on April 16, 2021 in operation with the JvueAudio. This allows me to present to you these two new laws of physics developed by the application of the calculations of a pyramid and a triangle which leads to the invention of JaDN.

DOODY LAW

The value of the golden ratio comes from the following existing formula :

$$\frac{1 + (\text{square root of } 5)}{2} = 1.618033989$$

The square root of the golden ratio is equal to 1.27201965

f pyramid mirror (hz) = 12.72019649 hz

heart rate :

$$f \text{ heart DNA pyramid (hz)} = \frac{f \text{ pyramid mirror (hz)} (\text{golden square root})}{10^3}$$

$$f \text{ heart DNA pyramid (hz)} = \frac{12.72019649 \text{ (hz)} 1.27201965}{10^3}$$

$$= 0.01618033989 \text{ hz}$$

brain frequency :

$$f_{\text{cer DNA pyramid}} (\text{hz}) = \frac{f_{\text{pyramid mirror}} (\text{hz}) (\text{golden square root})}{10^2}$$

$$f_{\text{cer DNA pyramid}} (\text{hz}) = \frac{12.72019649 (\text{hz}) 1.27201965}{10^2}$$

$$= 0.1618033989 \text{ hz}$$

GODBOUT LAW

The value of the golden ratio comes from the following existing formula :

$$\frac{1 + (\text{square root of } 5)}{2} = 1.618033989$$

The square root of the golden ratio is equal to 1.27201965

$$f_{\text{triangle mirror}} (\text{hz}) = 399.6167587 \text{ hz}$$

heart rate :

$$f_{\text{triangle DNA heart}} (\text{hz}) = \frac{f_{\text{triangle mirror}} (\text{hz}) (\text{golden square root})}{10^4}$$

$$f_{\text{triangle DNA heart}} (\text{hz}) = \frac{399.6167587 (\text{hz}) 1.27201965}{10^4}$$

$$= 0.05083203695 \text{ hz}$$

brain frequency :

$$f_{\text{cer DNA triangle}} (\text{hz}) = \frac{f_{\text{triangle mirror}} (\text{hz}) (\text{golden square root})}{10^3}$$

$$f_{\text{cer DNA triangle}} (\text{hz}) = \frac{399.6167587 (\text{hz}) 1.27201965}{10^3}$$

$$= 0.5083203695 \text{ hz}$$

The wave to the heart is a pulse wave while the wave to the brain is a sine wave. The brain frequency is 10x the value of the heart rate. The heart works at the medicine level by beats per minute. If we convert the frequency at the heart of Doody's law of 0.01618033989 hz into beats per minute we arrive at 0.97 BMP. If we convert the frequency at the heart of Godbout's law of 0.05083203695 hz into beats per minute we arrive at 3.05 BMP.

When you die, your heart stops and goes through the frequency of 0.05083203695 hz. This frequency has the effect of resetting your DNA code to your brain at the frequency of 0.5083203695 hz. But for some reason your entire body is generating itself in the other dimension of death. You found yourself alive again.

If you have already had an **imminent death**, the frequency of 0.5083203695 hz on your brain has the effect of resetting your DNA code and you find yourself in the dimension of death. But, your heart decides, instead of suddenly stopping, to go through the lower frequency of 0.0168033989 hz and at this moment the reset of your DNA code is interrupted in your brain at the frequency of 0.168033989 hz and you return to the life in our dimension.

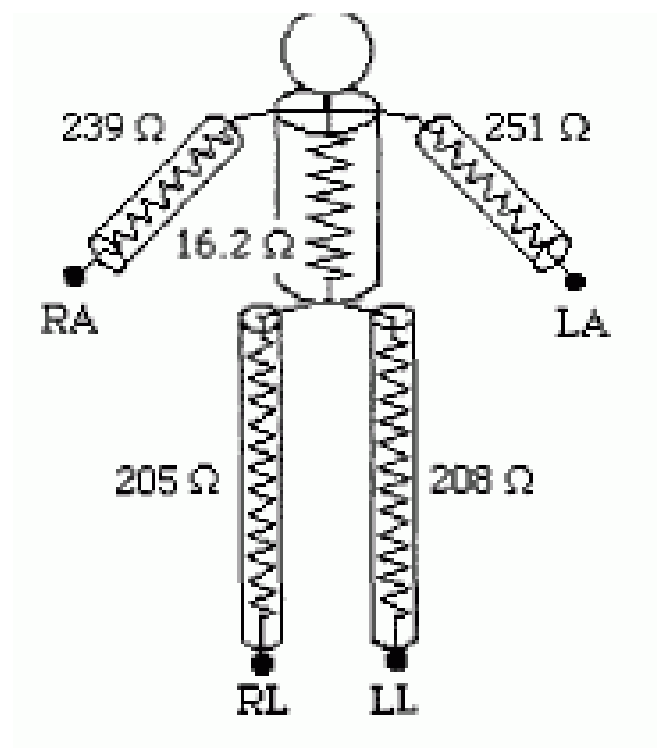

I suggest using the near-death method to reset our DNA code but forcing it to stay in our dimension using the brain frequency of 0.168033989 hz.

If we take the frequency of 0.1618033989 hz and place it on the forehead by means of a pacifier with a low voltage to be at the same level as that of the brain wave with a sine wave, we will create a reset of our DNA code by physics. The frequency will be placed on the probe. You have to turn on for a while and close the frequency generator as when you do it to restart your cell when it has a problem. At this time of this reset, your body will find itself in our same dimension but without any disease, malformation or incapacity. This method will **reset our DNA code and say goodbye to covid 19**.

The Delta wave in the brain is of the order of frequencies up to 4 hz like that of 0.1618033989 hz and that of 0.5083203695 hz. This wave is normal for very young children but characterizes some brain damage or deep sleep.

DELTA	THETA	ALPHA	BETA	GAMMA
Inférieure à 4Hz	4 à 8 Hz	8 à 13 Hz	13 à 35 Hz	Supérieure à 35Hz
Sommeil profond	Somnolence	Relaxation	Une attention à son maximum	Excitation
				

A change in medicine as we know it is by applying physics and getting back to basics to fully understand who we are and how we function. We are made up of resistors, logic gates and electronic waves. I suggest that you implement the invention of JaDN for the good of humanity and it will not be me who will do it right now, I will let medicine and electronics companies do it by the death method imminent on a person who is at the end of their life.

If we take the relationship between the heart frequency of the triangle DNA and the heart frequency of the pyramid DNA, we end up with the value of Pi at 3.141592653589793. It is the same principle for that of the brain. If we take the relationship between the brain frequency of the DNA of the triangle and the brain frequency of the DNA of the pyramid, we end up with the value of Pi at 3.141592653589793. This now allows us to develop another law of physics, namely Doucet law with two new formulas of Pi.

DOUCET LAW

The relationship between the frequency of the triangle DNA heart and the frequency of the DNA pyramid heart arrives at 3.141592653589793, ie the value of Pi. This allows us to define a new formula for Pi.

$$\text{Pi} = \frac{\text{f triangle DNA heart (hz)}}{\text{f heart DNA pyramid (hz)}} = 3,141592653589793$$

$$\text{Pi} = \frac{0.05083203695 \text{ hz}}{0.01618033989 \text{ hz}} = 3,141592653589793$$

The relationship between the frequency of the DNA triangle brain and the frequency of the DNA pyramid brain arrives at 3.141592653589793, which is the value of Pi. This allows us to define a new formula for Pi.

$$\text{Pi} = \frac{\text{f cer DNA triangle (hz)}}{\text{f cer DNA pyramid (hz)}} = 3,141592653589793$$

$$\text{Pi} = \frac{0.5083203695 \text{ hz}}{0.1618033989 \text{ hz}} = 3,141592653589793$$

The 4 frequencies of the heart and the brain included in the law of Doody and Godbout are the property of Sébastien Janelle. You will not be charged for the invention of JaDN but on the other hand you must pay the rights of use for the 4 frequencies of the law of Doody and Godbout for marketing purposes. You have no right to patent that uses any of its 4 Doody and Godbout law frequencies. For marketing test purposes, you are not required to pay user fees. "You" applies to government, hospital, drug company, company, individual and others (all). A request and payment of user fees must be made to Sébastien Janelle. The price of user rights varies depending on the extent of the marketing. The selling price of your product must be under \$ 80 CAD (in Canadian dollars). An annual inflation of 5% can be added to each year following the year 2021. Your marketing product which uses one of the 4 frequencies of the law of Doody and Godbout, after having paid the rights of use, must obligatorily have on the outer packaging and on the product the JaDN logo fully available on the following link www.janelle.international/JaDN as well as the second logo fully on the outer packaging available on the following link www.janelle.international/Janelle
