

"BOBS" SPEAKS OUT PLAINLY ON THE DANGER TO ENGLAND

Britain's Supremacy at Sea Would be Lost if a Hostile Landing Could Not be Repulsed ---Land Force Must be Increased

HOME ARMY MUST BE A MILLION MEN.

London, Nov. 23.—Speaking in the House of Lords to-night Field Marshal Lord Roberts expressed the conviction that the lack of a military force sufficient to make hopeless the attempt to an invasion would, in all probability be the cause of the loss to Great Britain's supremacy at sea. In a studied speech he pointed out the comparative ease with which Germany could land an army on the shores of England. Under the present conditions England would be forced, he said, to submit to most humiliating demands. He disclaimed all hostility to or fear of Germany, but he declared that the defense of the islands required immediate attention. There should be an army so strong in numbers and efficiency that the most formidable of foreign nations would hesitate to make a landing in England. He had ascertained, the speaker continued, that vessels capable of accommodating 200,000 men were available in the northern ports of Germany and that as a result of the new German service law, 200,000 men could be collected in the districts of the nearest port without any trouble. The great German steamship lines were in constant practice in embarking and disembarking, and as the railroads were owned by the state all preliminaries, up to the actual despatch of troops, could be carried out with the utmost secrecy. Germany was perfectly aware, the Field Marshal went on, that it would be essential for her transports to evade the British fleet and she could easily attract attention by small raids while the main disembarkation was proceeding undisturbed. "It would be folly," declared Lord Roberts, "to shut our eyes to these possibilities, however, much peace is desired. The startling events in the near east have brought home to the most careless observer that nothing could save that country which is not prepared to protect itself. If Great Britain continues to neglect the most ordinary precautions, she may some day find herself in the hands of the invader and forced to submit to the most humiliating conditions. This danger is daily becoming more threatening. Within a decade, Germany has created the greatest sea power that ever existed, except Great Britain's, and at the present moment, it is formidable. Measures are being taken to increase that power. It is calculated that there are 30,000 Germans in employment in Great Britain. They are trained soldiers and if a German force once landed on these shores they would be ready to help."

Lord Roberts contended that it was not absolutely essential for a nation to command the sea in order to carry out an invasion. A temporary local command would suffice and this was perfectly understood in Germany. The main temptation to the invasion of Great Britain was the want of a home army which ought to consist of a million men.

Across the narrow sea, were 60,000,000 Germans, who by perseverance, industry, sound education and military training had made themselves a great nation. They required outposts for their commerce and population. It was Great Britain's business, continued Lord Roberts, to find out in what way the great increase in Germany's sea power was likely to affect her and to adopt measures necessary for her own defence. The navy under present conditions, was fettered in home waters and without military force sufficient to render an invasion hopeless. Great Britain's military weakness would in all probability be the cause of the loss of her naval supremacy.

Lord Roberts' speech caused a sensation in the House. The Earl of Crewe remarked on the seriousness of such statements in the present high-strung condition of Europe's nerves, saying he feared there might be regrettable consequences.

Lord Roberts' resolution to the effect "That the defense of the island necessitates the immediate attention of the government to make provision for such a strong and efficient army that the most formidable foreign nation will hesitate before making an attempt at landing," was adopted by a vote of 74 to 32.

Three of the civic committees convened at the City Hall last evening, the Health, Waterworks and Market Committees. The attendance was large in each case and a considerable volume of business was disposed of. The Health Committee was the first of the three to meet under the chairmanship of W. Messervy, those assisting being His Worship the Mayor, Sir J. Geo. Garneau, Aldermen Cummings, Matte, Hogan, Dinan and Samson, members of the Committee, and Aldermen Pouliot, Lemay, Norreau, Campbell, Lantier, Kerret, Cannon, Paquet, Huard and Letourneau.

The major portion of the session was devoted to the consideration of the complaints received regarding the prevalence of obnoxious odors in the vicinity of St. Nicholas street, which have occasioned the residents of the locality not a little annoyance and expense within the last few months.

One of the principal sufferers, a Mr. Peland, was heard in person, and explained that during the milder months he was able to leave his windows open and in that manner escaped serious inconvenience, but this being out of the question lately his family suffered as a result, and on one occasion in particular he had been obliged to remove his children to an hotel, after they had retired for the night, and as a result two of them were still under the care of a physician. He had had the Gas Company inspectors examine the premises and they had located no disorder. He had also called in plumbers who had taken every sanitary precaution, but still the nuisance existed.

Mr. C. E. A. Carr, General Manager of the Quebec Gas Co., to which plant the origin of the odors were attributed, and who, with Mr. Wallace, was present, in answer to His Worship stated that their tank had been syphoned about two weeks ago last Thursday, and the operation was not likely to be repeated for some time.

Mr. Peland, interposed further, declared that that would be about the last time his family had suffered from the gaseous odors, but since then, the disturbance was of a different nature, and in his opinion, emanated from the sewers.

Mr. Jeremiah Gallagher, Water Works Engineer, who had been previously heard before the Committee, and declared the drains in the vicinity to be in no way responsible, stated that if the sewers were faulty, every house in the vicinity would be affected and the odor would be permanent, which he understood was not the case. It was his opinion and experience that sanitary plumbing would obviate the disorder.

After further discussion it was decided that the Engineer should visit the locality in company with the Gas Company officials and endeavor to locate the trouble, and submit a report to the Committee. The other business was of a purely routine nature.

TORNADO SWEEPS THROUGH ARKANSAS

More than a Score of Lives Lost — Much Destruction of Property.

Little Rock, Ark., Nov. 23.—According to advices received up to midnight, meagre because of the remoteness of the region affected, more than a score of lives were lost and many persons were injured in a tornado which swept the northwestern part of Arkansas late yesterday, partly demolishing several towns and raising vast tracts of timber. The region reported storm swept is removed from both telegraph and railroads and details and confirmation of many of the reports are lacking. The tornado, approaching from the southwest, crossed the Arkansas River several miles north of the settlement of Pinney and proceeding in a north-easterly direction, swept through London, Waller ville, Jethro, Lodi, Lewisville, and Paterson and Berryville and outlying portions of Mulberry, laying waste the larger part of these places and destroying timber and crops throughout the intermediate country. At Pinney, it is said, twelve persons were killed and a number injured. Almost the entire settlement was demolished. At London ten persons are reported to have lost the lives while considerable damage occurred. Wallerville and Jethro are reported destroyed, several fatalities occurring in each place. Near Mulberry the death list is placed at five. At Berryville, Mrs. J. O. Hoskins was seriously hurt and several others sustained lesser injuries. A path one hundred yards wide was cut through the town, six buildings being torn from their foundations or unroofed. Here the property loss is estimated at about \$25,000. From outlying regions considerable damage to property is also reported, but no loss of life. At Lodi 3 buildings were destroyed and one person, a woman, was seriously injured.

ANTI-TUBERCULOSIS EXHIBITION

Visited by Premier Gouin—He Makes a Short Non-Committal Address.

(Special to the Chronicle.)

Montreal, November 23.—Premier Sir Lomer Gouin of this Province, with Hon. Rodolphe Roy, Provincial Secretary, visited the anti-tuberculosis exhibition to-day, and spent some time and the distinguished visitors were escorted to the platform, where the Premier was invited to make an address.

Sir Lomer spoke for a few minutes, and expressed his appreciation of the valuable work being done by the exhibition. It had been expected that the Premier would make some announcement with regard to definite aid to be given by the Provincial Government to the work of the Anti-Tuberculosis League. Sir Lomer, however, was very guarded in his utterances along this line, merely promising that he would do what he could to influence his Government to give all proper aid to the society. Hon. Mr. Roy also spoke along the same lines.

As a result of the foregoing remarks of the Premier it has been mentioned that a deputation from the Anti-Tuberculosis League shall wait upon him and other members of the Government to-morrow morning to urge that the Government make the present exhibition the nucleus of a trivial exhibit to visit Quebec, Three Rivers, and other sections of the province to educate the public against tuberculosis. In addition the deputation will urge upon the Premier the work to be performed by the Royal Commission on tuberculosis which he has promised, and offer any help they can give in defining the work of this commission, with the idea of ultimately securing through the commission further Government aid in their fight against the white plague.

MEETINGS OF THREE CIVIC COMMITTEES

Considerable Volume of Business Transacted—Some Important Matters Discussed.

Three of the civic committees convened at the City Hall last evening, the Health, Waterworks and Market Committees. The attendance was large in each case and a considerable volume of business was disposed of. The Health Committee was the first of the three to meet under the chairmanship of W. Messervy, those assisting being His Worship the Mayor, Sir J. Geo. Garneau, Aldermen Cummings, Matte, Hogan, Dinan and Samson, members of the Committee, and Aldermen Pouliot, Lemay, Norreau, Campbell, Lantier, Kerret, Cannon, Paquet, Huard and Letourneau.

The major portion of the session was devoted to the consideration of the complaints received regarding the prevalence of obnoxious odors in the vicinity of St. Nicholas street, which have occasioned the residents of the locality not a little annoyance and expense within the last few months.

One of the principal sufferers, a Mr. Peland, was heard in person, and explained that during the milder months he was able to leave his windows open and in that manner escaped serious inconvenience, but this being out of the question lately his family suffered as a result, and on one occasion in particular he had been obliged to remove his children to an hotel, after they had retired for the night, and as a result two of them were still under the care of a physician. He had had the Gas Company inspectors examine the premises and they had located no disorder. He had also called in plumbers who had taken every sanitary precaution, but still the nuisance existed.

Mr. C. E. A. Carr, General Manager of the Quebec Gas Co., to which plant the origin of the odors were attributed, and who, with Mr. Wallace, was present, in answer to His Worship stated that their tank had been syphoned about two weeks ago last Thursday, and the operation was not likely to be repeated for some time.

Mr. Peland, interposed further, declared that that would be about the last time his family had suffered from the gaseous odors, but since then, the disturbance was of a different nature, and in his opinion, emanated from the sewers.

Mr. Jeremiah Gallagher, Water Works Engineer, who had been previously heard before the Committee, and declared the drains in the vicinity to be in no way responsible, stated that if the sewers were faulty, every house in the vicinity would be affected and the odor would be permanent, which he understood was not the case. It was his opinion and experience that sanitary plumbing would obviate the disorder.

After further discussion it was decided that the Engineer should visit the locality in company with the Gas Company officials and endeavor to locate the trouble, and submit a report to the Committee. The other business was of a purely routine nature.

WATERWORKS COMMITTEE.

The awarding of a tender for 500 feet of red rubber hose, for scouring purposes, at \$1.05 per foot, to the Gutta Percha Rubber Co., was perhaps the most important action of the Waterworks Committee, over which Alderman Lemay presided. There was a second tender from the Canadian Rubber Co., but that of the Gutta Percha people being, in the opinion of the Engineer, the most satisfactory, that company was awarded the contract.

A letter was read from the Canadian Pacific Railway Co., informing the Committee that the Company proposed erecting an emergency 60,000 gallon water tank on their property on Crown street, and requesting that it be connected to the city water main, a meter placed and a rate fixed. A rate of 25 cents per thousand gallons was decided upon.

The Board of Trade's petition regarding the water pressure drew from the Mayor the remark that a second pipe was the only real remedy.

Mr. Gallagher remarked that the domestic and fire pressures were being confounded, and stated that the Chief of the Fire Brigade was at present presenting a series of tests to ascertain the fire pressure, the result of which would be published immediately the tests are concluded.

Those present included His Worship the Mayor, Ald. Lemay, Cummings, Letourneau, Norreau, Lantier, Paquet, Jobin, Dinan and Huard, members, and Aldermen Pouliot, Hopyan, Samson, Campbell, Matte, St. Pierre and Verret.

MARKET COMMITTEE.

The session of the Market Committee was the most protracted of the evening and it was going to midnight when the Committee rose.

Alderman Huard presided, and there were present besides His Worship, Aldermen Campbell, Hogan, Letourneau, Cannon, Samson, Paquet and Matte, members of the Committee, and Aldermen Cummings, Lemay, Pouliot, Lantier, St. Pierre, Dinan, Verret and Jobin.

There were two petitions before the Committee, one from a Mr. Lortie, complaining against those holding only a butcher's license being allowed to trade as hucksters without a second license, which is called for by law. The second from those Clerks of the Markets, who have acquired the revenue privileges, complaining against the evasion of the tax by farmers who use the market places claiming that they have customers for their wares, and against those who sell cold wood from door to door.

According to the City Solicitor, it was for the clerks to take the initiative in the latter case, and with regard to the former His Worship stated that the law would be enforced.

FATAL SMASH-UP OF TWO TRAINS

Three Men Instantly Killed—Valuable Property Destroyed—A Brakeman's Error.

Peterboro, Ont., Nov. 23.—As the result of a head on collision, which occurred early this morning between two freight trains at Sandbanks, a siding four miles west of Pontypool, Edward Findlay, engineer, Hookvale, West Toronto; Albert Conroy, aged 19, brakeman, residing at 99 Dundas street, West Toronto, and James Sweet, fireman, 27 McMurray avenue, West Toronto, are dead. Brakeman W. G. Reed, who is claimed to have been responsible for the disaster is missing. A freight train from West Toronto was going east in two sections, the first being in charge of Conductor E. Knapp, West Toronto. He received orders giving a regularly scheduled westbound freight train right of track over him with the additional information that it would be an hour late. Conductor Knapp worked his train as far as Sandbanks and went in to let the Montreal passenger train pass him and after the passenger train passed held his train there to await the westbound freight. His front end brakeman W. C. Reed, it is claimed, forgot, or did not know about the westbound train, and thinking that they would follow the passenger train at the end of the twenty minutes block, went and opened the switch and returned to the engine to be ready to leave. He was standing talking to the engineer when suddenly the westbound train drawn by two engines, came out of the darkness and plunged into the standing train. The three engines were completely demolished and the right of way for nearly a quarter of a mile was blocked with damaged cars. The three men that were killed were all on the double header. Engineer Findlay and Fireman Sweet, on the leading engine, and Brakeman Conroy on the second engine. The leading engine, No. 115, was completely demolished only the boiler remaining, and it was in this mess that the bodies of Findlay and Sweet were found. Conroy was relieving the fireman and was ground to pieces between the boiler and the tender. Engineer Dorricott and Fireman Taylor, of the second engine, were put through the windows of the cab and escaped comparatively uninjured. The engine of the eastbound train was less damaged and the crew escaped uninjured. The loss to rolling stock and contents will total \$100,000. Dr. Eastwood, the local coroner, has empaneled a jury and will hold an inquest into the death of Conroy. Supt. McNelly, who came out with the wrecking crew, said he had no information to give Brakeman Reed, who it is claimed is the responsible party has disappeared.

"I saw him at the caboose going back to Barketon Junction shortly after the wreck, but I have not seen him since," said Conductor Knapp of the waiting train. "He told me he took it for granted we were going to follow the passenger train, which we let by from the west, after the usual twenty minutes interval and opened the switch, not thinking of the oncoming westbound freight. After opening the switch I think he came back to the engine to wait. I did not see him before the wreck to tell him anything. He saw the engine's orders and instructions or should have seen them."

LAY DELEGATES STILL FOR DEAN FARTHING

Sixty-Seven Out of 100 Favor His Election as Bishop of Montreal.

(Special to Chronicle.)

Montreal, Nov. 23.—Over 100 lay delegates to the Montreal Diocesan Synod met to-night to discuss the question of a successor to Bishop Carmichael. After discussion a ballot was taken in which 67 votes were cast for Dean Farthing and 20 for Dean Evans. This makes it evident that the trend of lay feeling has not changed appreciably since the last meeting of the Synod, a month ago, when Dean Farthing had the majority by a substantial number in the three lay ballots. No new candidates were named this evening. The proceedings of the Synod open to-morrow with service in Christ Church Cathedral. There is indication that the election of a bishop will be one of the most protracted in the history of the Montreal See.

Another question which was discussed at great length was the practice of the habitants and traders of making a market place of the yards of their stopping places, especially at Christmas and Easter time, to the detriment of the market revenues and also to the disadvantage of the frequenters of the regular market places. This matter was brought before the attention of the Committee by a petition from the prominent butchers of the city. The law will be rigidly enforced in this respect and the wardkeepers advised by the Chief of Police that they will be brought to account should they transgress the law in allowing their premises to be used for the purpose.

The practice of wholesale dealers and others of selling short weight butter without the proper marks was also brought before the attention of the Committee, but after some deliberation was deferred, as was the debate on the licensing of pedlars, owing to the advancing hour.

PAQUET COMPANY LIMITED

26 SHOPPING DAYS FROM NOW UNTIL 26 CHRISTMAS

Santa Claus Is Very Rapidly Approaching Quebec

WE left Santa Claus digging his airship out of a snow drift, and bewailing his lack of gasoline. His message to-day is much brighter and will be good news to the little girls and boys.

En Route, Nov. 23rd, 1908
To The Little Girls and Boys, care The Paquet Co.

My airship is doing better work than ever, although my supply of gasoline is completely exhausted. As you know, Necessity is the mother of Invention, and when I had used the last drop of gasoline you can believe that I was forced to do some hard thinking. After racking my brain for some time, all to no purpose, I selected a dainty little pair of Pearl Mounted Opera Glasses which I was taking to a little girl in Quebec, and scoured the horizon for some sign of life. I was fortunate enough to discover an Esquimaux camp some five miles to the west, and set out on foot to look for help. When I got there all the men in camp were sitting around a boufire drinking pain-killer which they had taken from a poor missionary who had been captured the day before. After setting the missionary free I took possession of the pain-killer and carried it back with me to the airship. As an experiment, I tried it in my engine instead of gasoline. To my great surprise it worked much better and did not burn up nearly so fast. So now there should be nothing to prevent me from reaching Quebec in a few days. You will hear from me again to-morrow.

Your old friend,
SANTA CLAUS."

Unique Bargain Offer In Ladies' Winter Cloakings

NOW this is a Bargain that should make a sensation. You will have to read it very carefully to grasp the full meaning, and when you see just what it will mean to you in money-saving, you will not loose much time in getting here to take advantage of it.

Our regular prices for Ladies' Cloakings are by far the lowest in Quebec, as we buy direct from the mills in quantities which are large enough to secure the lowest prices allowed to anyone. The result is that we can offer you:—

- \$1.00 Cloakings for 89c
- \$1.25 Cloakings for \$1.13
- \$1.50 Cloakings for \$1.39
- \$1.75 Cloakings for \$1.59
- \$2.25 Cloakings for \$1.99

For a short time only, every purchaser of 3 yds of Cloaking, or over, at the above prices will be given THE LAST YARD FOR 25c. It requires just 3 yards to make a Winter Coat. Figures out your saving, and you will find that in the regular way 3 yards at \$2.25 would cost you \$6.75 while this offer enables you to buy 2 yards at \$1.99 and one yard at 25c, making a total of \$4.23 and saving you exactly \$2.52 on your material. As this offer is bound to bring a tremendous response, we would urge you to come at once, as the offer may be withdrawn at any time.

One Thousand Yards of Rich Silk Velvet Worth \$1.00 for 39c a Yard

OUR Buyer secured an especially fortunate purchase of Beautiful Silk Velvet in a splendid range of colorings including Cardinal, Sultan, Garnet, Reseda, Moss, Bronze, Yellow, Violet, Drab and Royal. This magnificent material has never been sold at less than \$1.00 a yard and it is very doubtful if you could match it in Quebec at less than \$1.10. It compares perfectly with our own special \$1.00 Silk Velvet. This is just another example of our supremacy in the World's great markets. The purchase comprises one thousand yards and will be quickly taken up by the ladies of Quebec. On Sale in the Dress Goods Department at, per yd. 39c

Holiday Groceries In The Christmas Bazaar

ALREADY thousands of people have visited our immense Fourth Floor Christmas Bazaar. The universal opinion is that this is the greatest Christmas attraction this store has ever offered. Every resident of Quebec will be delighted with the values we offer in all sorts of plain and fancy groceries. The following list of prices will give you some idea of what you can save here on groceries.

- Filberts. 11c a lb.
- Peanuts. 10c a lb.
- Almonds. 13c a lb.
- California Raisins. 10c a package
- Table Raisins. 22c a package
- Figs in baskets. 13c a basket
- California Oranges. 25c a doz.
- Lemons. 25c a doz.
- Corn, 3 cans for. 22c
- Peas, 3 cans for. 20c
- Tomatoes, 3 cans for. 23c
- Chocolat Menier. 36c a lb.
- Fry's Chocolate. 28c a lb.
- Fry's Cocoa. 29c a lb.
- Jams, 7-lb. tin for. 25c
- Jelly Powder, 3 for. 20c

The Quebec Chronicle

COAL IN ALBERTA.

The Montreal Gazette of Saturday says:

"A great deal of interest has been felt in business circles for some time past with reference to a very important discovery of bituminous coal in Alberta. Enquiries made on the subject have elicited the following information from reliable sources:

The coal deposit in question is situated at a short distance (30 miles) from the located line of the Grand Trunk Pacific, now under construction, opposite to the Yellow Head Pass, and at less than 150 miles west of Edmonton. The vein in sight has the very unusual average thickness of 28 feet of pure coal, and occupies a terrace of cretaceous formation covering an area of about 35,000 acres. The quantity of coal in sight is estimated at over 800,000,000 tons. The coal measure is horizontal, is above the level of the water, and offers very unusual facilities for extraction, reducing the cost of working to a minimum. In point of quality, the analyses obtained show that this coal is bituminous, of the same grade as the coals of the 'Crow's Nest,' of Vancouver Island (Dunsmuir) and of Sydney (Nova Scotia). That is to say an industrial fuel of very great value. The purity of the vein is well illustrated by the following extract from the report of Mr. F. S. Landstreet, the well-known specialist expert of New York:

"I have been unable to find record of a deposit equal to it in these particulars." Several indications prove the existence of other veins on the property, both above and below the principal vein, and it is expected that at a depth of less than 40 feet three or four other workable veins will be found. The discovery of this magnificent deposit of coal was made more than two years ago, after many months of laborious and scientific search, and since that date the exact determination and location of the vein has been followed up and completed.

Mr. F. S. Landstreet, a celebrated coal mining expert of the United States, has been employed for a great part of last summer in the careful examination of this property. He reports it is one of the best that he has ever seen.

The property is controlled by an influential syndicate composed of a group of leading eastern business men, amongst whom are some important manufacturers of Quebec, associated with several gentlemen from Edmonton. The organization is now being completed of an important company, which, in addition to operating the mines, intends to build one or more railway lines to connect the coal deposits with the several railways converging at Edmonton. Proposals in this connection from financiers in London and New York are now under consideration.

Quebec people are largely interested in this important discovery and enquiry here elicited the following additional information: It is reported that one of the most important of the Canadian railways has made overtures with the view of acquiring exclusive control of this important supply of fuel, but it is difficult to obtain definite information on this point.

It is not necessary to point out the great importance of this discovery, not only for the rapidly increasing population of our magnificent Northwest Territory and for its growing industries, but also for the economical operation of its railways, for which a cheap and abundant supply of good fuel is indispensable. More than once the problem of fuel has been brought before the people of the Northwest in an acute manner, and we have not forgotten the terrible experience of the winter of 1906-07, when the inhabitants of the prairies were obliged to burn wheat to avoid perishing by cold.

The bituminous coal of the Crow's Nest is being drawn more and more towards the western United States, so that the Canadian Northwest is today depending almost entirely upon the lignite of Alberta. But it must be remembered that this lignite, on account of its fragile properties, cannot be stored, so that the production must be regulated by the demand and cannot anticipate it. Now the demand is greatest in the autumn and the winter, that is to say, at the very

time when the railways are busy handling the crops which must be carried eastward. Blockades of traffic frequently result, and, moreover, traffic in winter is very uncertain owing to the rigors of the climate. Consequently, in spite of the most praiseworthy efforts of the railways, the fuel situation in the west is often precarious. The railways themselves are often embarrassed by scarcity of fuel, because they are not allowed to use lignite, its use for locomotives being prohibited by the Railway Commission. The situation in future will, therefore, be greatly improved in consequence of this providential discovery, and it will be a great relief to the people of the Northwest that owing to the proximity, unlimited quantity and good quality of this new coal, it can be stored in quantities at different points all along the lines of the railways before the commencement of the grain traffic, and before the period of snow blockades.

The mineral, iron and industrial enterprises of the west will also find in the cheap fuel resulting from this new discovery a powerful factor of success, and millions of dollars now sent to Pennsylvania for coal will be profitably expended in operating coal mines in Canada. During the present year over a million tons of Pennsylvania coal were sent to the Northwest by water to Fort William, and thence by rail to Winnipeg and even as far west as Saskatoon. The new coal now discovered will be able by its low price, not only to supply the country west of Saskatoon, but also to drive the Pennsylvania coal out of the Winnipeg market.

The country is to be congratulated upon this new and valuable discovery, and it is to be hoped that its financial control will remain in Canada.

A QUICK CHANGE OF FRONT.

The announcement is made that as a result of the revelations of misdeed, fraud and dishonesty in the marine department before the commission at Quebec, the Dominion government is considering the question of making similar enquiry into all the other departments of the public service.

Up and down the country during the last Dominion campaign and in the columns of the Liberal press, opposition speakers and journals were denounced as a slanderband, as scandalmongers, as muck rakers for presuming to discuss and criticise the honorable conduct of the various departments of the government.

The elections are now over, and the Laurier government is virtually assured of another parliamentary term of power. Patriotism and the ordinary decencies of representative government will be permitted to have an innings. How far this concession is due to the strenuous campaign of the alleged slanderband the public can judge.

On the floor of Parliament, in committee, in the Grit press and on Grit platforms during the last year, information was denied, investigation refused and those seeking to expose departmental misconduct that amounted to public scandal were thwarted and insulted with the bestowal of opprobrious epithets.

Now, safely re-established in power for a term of years, with the minds of many Liberals affected to the extent of suspicion at least by the modicum of evidence that was secured or dragged from reluctant ministers, the Laurier government is forced into an effort to cleanse some of the corrupt methods from the departments of government.

It may be that the better, higher and more patriotic attitude of the government in consenting to investigation of other departments is not alone caused by the assurance of a large majority in the House of Commons, but by the feeling that unless the business life of Canada is to be prostituted and the fair name of the country dragged in the mire in the coming years, that the evil of departmental fraud, dishonesty and boodling shall be eliminated from the public service.

The Conservative party was defeated in the last general elections, but it is to be believed that it was the chief factor in bringing the knowledge of the Laurier government the patriotic necessity of purging the departments of rank dishonesty. The campaign for honest government, the "scandal campaign," sneered at by the Sifton wing of the Liberal party, may, when

the disclosures regarding the marine department are considered, if investigation is carried through the several departments to the department of the interior, be admitted by honest Liberals to have been the most patriotic tactics under the circumstances that a political party could possibly have taken.

NATIONAL DISHONOR.

Le Temps of Ottawa does not believe that Canada should have a navy either in embryo or in being. Here is its argument. On the sea Britain is powerful enough to paralyze the efforts of enemies who might seek a quarrel in her chief colony. It is true that Australia believes it necessary to establish a marine force. But the situation of Canada and that of Australia are not analogous. There is no need to arm against an Asiatic invasion of Canada. The Monroe doctrine is our safeguard.

Did ever any reputable nation take such an extraordinary attitude? If the Monroe Doctrine is to be our stay on the sea, then it should be also our support on land. In that case every cent laid out on militia expenditure is worse than wasted. Why should we prepare for war when the American army is panting with eagerness to fight our battles?

The British fleet in the early nineteenth century was strong enough to crush the French fleet, but it could not prevent the Toulon squadron from crossing the Atlantic and returning. Ships in those days were dependent upon wind and weather. One battleship of any European power might slip across the sea and blow Halifax and the other coast towns into dust.

How would the Monroe Doctrine prevent it? It is the height of stupidity to pretend that the country is properly defended when everything is spent on land forces and nothing on coast defenders. A few torpedo boats, destroyers and submarines would be the best defence the country could have against invasion. Our self-respect as a nation should surely prevent us from asking a friendly neighbor to pay our bills.

MAKING HAWAII THE GIBRALTAR OF THE PACIFIC.

The United States has taken up in earnest the work of defending Hawaii. The strategic importance of this "Key to the Pacific" was never so clearly seen as in the light of possible conflict with Japan. When the defenseless condition of this important point was presented vigorously and the danger to the Pacific Coast emphasized, Congress made liberal appropriations. The Navy and War Departments have begun work with unusual promptness and the enterprise is already well under way.

Hawaii is to become the Gibraltar of the Pacific. Not only have the army garrisons been largely increased and the building of strong fortifications begun, but the navy is to construct at Pearl Harbor one of its most important stations. Those who have not been keeping in close touch with events were surprised this week when the Acting Secretary of the Navy advertised for bids for constructing at Pearl Harbor the biggest dry dock in the world. This dock will be large enough to contain not only any battleship now afloat, but any that is likely to be built in the next twenty years. It is to be 1,125 feet long, 65 feet deep and 110 feet wide, and is to be built in sections so that two ships may use parts of it at the same time. This dock will be capable of caring for any ship in the navy.

This great dock is to be the central feature of one of the best equipped of navy yards, in which ships may be cleaned and repaired without making the long voyage to the Mare Island yard, on the California coast. The \$4,000,000 appropriated by Congress at its last session doubtless will be supplemented from year to year until Hawaii is made the most important United States naval base outside the borders of the continent.—Baltimore Sun.

ARE YOU WEAK AFTER SICKNESS?

Later on it will be Harder to Get Strong than Today. What are You Doing to Get Well?

A case in point is well exemplified in the following letter from Mrs. V. J. Wilder, wife of a well known citizen of Pittsfield, who writes: "I had a nervous disorder that completely prostrated me. I couldn't sleep, and would lay and toss about all night, arising in the morning more tired than ever, head heavy, eyes dull, and every bone and muscle aching. I tried to get along without calling in a doctor, but was finally driven to it. He treated me for some time, but with no perceptible improvement in my health. Some one recommended Ferrozone. The change it effected in my system was noticeable almost instantly. I gradually took on flesh. The 'all-gone' feeling left me. In less than six weeks I was fully recovered from what looked to me like an everlasting sickness. I will always recommend Ferrozone feeling with sincerity that it is an honest, powerful, health-giving tonic."

Try Ferrozone to-day! The nourishment and vital energy it supplies is wonderful. Ferrozone makes you feel better at once. It's good for men, for women, for children—just the thing for everybody seeking better health. Sold by all dealers, 50c. per box or six boxes for \$2.50.

The reason any girl can fool any man is because the man first fools himself about the girl every time. When a man discovers an affinity a careful examination into his business affairs is apt to disclose some crookedness there also. Truth is stranger than fiction, and often quite as dangerous.

Belle Isle (723)—Marconi station closed. No further communication until spring.

Cape Bay (523)—Cloudy, southeast. Outward 11 a.m. Corinthian.

Cape Race (830)—Clear, northeast; inward 7 a.m. Manchester Importer; outward Saturday Unimak.

H. S. D'GREEVY, Superintendent.

THE KAISER'S ALLEGED INTERVIEW

London, Nov. 23.—Few of the London morning newspapers comment on the alleged Emperor William interview, which was suppressed by the Century Magazine. Some of them decline to publish extracts in any shape and severely deprecate their publication in the United States, as being in extremely doubtful taste.

The Daily News and one or two other papers, in editorials, take the line that the Emperor, if he gave expression to the alleged sentiments, can only have done so in a moment of super-excitement and that, having since made the amends, the publication can have no effect upon the good relations of the English and German peoples.

HOW MRS. CLARK FOUND RELIEF

After Years of Suffering Dodd's Kidney Pills Cured Her.

Pleasant Point Matron Tells Her Suffering Sisters How to be Free From the Terrible Pains that Make Life a Burden.

Pleasant Point, Nov. 23.—(Special.)—That most of the ills that the suffering women of Canada have to bear are due to disordered Kidneys, and that the natural cure for them is Dodd's Kidney Pills, is once more shown in the case of Mrs. Merrill C. Clarke, a well-known resident of this place and a prominent member of the Salvation Army. Mrs. Clarke is always ready to give her experience for the benefit of her suffering sisters.

"My sickness continued 20 years ago with the change of life," says Mrs. Clarke. "My health was in a bad state. Water would run from my head which would make me faint. When I came out of the fainting spells I took fits. I was bloated till I was clumsy. The pain I suffered was awful. It would go to my feet and then to my head. Many doctors attended me, and I tried many medicines, but nothing gave me relief till I used Dodd's Kidney Pills. The first box stopped the fits and seven boxes cured me completely."

Every suffering woman should use Dodd's Kidney Pills. They make strong healthy Kidneys, and the woman who has good Kidneys is safeguarded against those terrible pains that make miserable the lives of so many women.

A STRANGE CASE

New York, Nov. 22.—Through the chance visit to-day of a neighbor to the home of Michael and Jno. Flaherty, brothers, aged 65 and 60 years respectively, of Sheephead Bay, it was discovered that the elder brother had died of starvation and that the younger man was dying from lack of food. Between them the brothers had in cash \$1,329 and it is not known how they came to be without food. John Flaherty was removed to the hospital, but it is not believed his life can be saved. He was so weak that the police forbore questioning him about the strange case. It is thought that illness may have prevented either men from going out to secure provisions.

RECORDER'S COURT.

Yesterday in the Recorder's Court three prisoners appeared, charged with drunkenness. One of them added disorder in a building and using violent language to his spree. For these little failings he was ordered to pay \$50 and costs or go to jail for three months. The other two were fined \$5 and costs each or eight days. A complaint of overcharging taxes was continued until Thursday next.

DO NOT FORGET

that to-day (Tuesday) we will offer for sale 200 pairs of woollen blankets, value \$4.50 for \$2.75. This is an exceptional bargain. Come in and profit now for we will soon have winter.

Another Case in Glendive

Glendive, Nov. 23.—Mrs. Chenoquith makes the fourth case of lung trouble cured this week by Catarrhoxone. A bad cold settled on her lungs and resisted all treatment, but "Catarrhoxone" cured the soreness and irritation in a few days. Local druggists report the sale of Catarrhoxone is enormous. It has great merit and quickly cures colds, bronchitis, lung troubles and catarrh. Two months' treatment costs one dollar and is guaranteed; sample size twenty-five cents at all dealers in medicine.

PREMIER STEAMSHIP AGENCY IN QUEBEC.

Water!!

is demanded by the system. Thirst follows. If the water you drink contains all the qualities necessary to satisfy the demands of nature the thirst is quenched. That's the reason

MAGI WATER

is the wettest, most satisfying of all waters. More than delicious and wholesome—beneficial. Magi Water is a pure, natural mineral water bottled exclusively at the springs. A delicious table water—a pleasant soda fount drink. Superior to soda with whiskey—both for flavor and healthfulness. Comes in pints, splits and half gallons. Can be had at cafes, hotels, bars, chemists', on all R. R. cafe cars and at your grocer's by the bottle or the case.

An interesting booklet about Magi Water will be sent free for the asking.

Sold from Coast to Coast

Caledonia Springs, Ontario

Modern Money Makers.

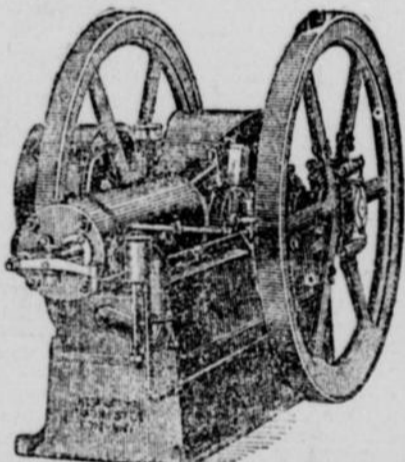

The farmer who uses antiquated machines cannot keep pace with his neighbors who use modern machines and implements.

The modern money maker for the dairy is a Bluebell or Dairymaid cream separator. One of these cream separators installed in your dairy will increase your profits by getting more of the butter fat from the milk than you can possibly get from the milk by the gravity method.

An I.H.C. gasoline engine is the modern money maker for all farmers. It will run the cream separator, churn, pump, feed grinder, threshing machine, saw, etc., and less money and labor will be required to do the work than by any other method.

The Bluebell and Dairymaid cream separators and I.H.C. gasoline engines will be found on exhibition at 418 St. Paul street, Quebec City, where they will be thoroughly demonstrated to you.

In addition to cream separators and gasoline engines, The International Harvester Co. of America, offer for your consideration binders, mowers, rakes, tedders, reapers, corn binders, hammers and shredders, knives and tool grinders, binder twine, disk drills, hoe drills, cultivators, seeders, land rollers, smoothing and disk harrows and rakes, hay presses, wagons, sleds and manure spreaders.

Any information you wish on the International line of machines can be obtained at 418 St. Paul street, or by mail. Write the branch house at Chicago, U.S.A.

NEW RULES MADE FOR ATHLETES

American Stars Cannot Exhibit for Prizes—Must Go in Regular Competition.

Several important amendments in the A. A. U. constitution were carried at the convention on Monday, their significance being overlooked in the flutter over the athletic breach with England. One of these was an addition to Article X., section 1, sub-division 1, and it hits at the star athletes who made it a practice heretofore of giving exhibitions at games for gold watches and other pieces of jewelry. If the star shows himself in future it must be in a recognized competition or else he is liable to suspension.

Section 2 of the same article was amended so as to prevent an athlete changing from one club in the union to another until one full year, unless with the consent of the national registration committee. This eliminated the provision which allow the club to consent to such a change immediately.

According to a few words inserted in Article X., section 2, pieces of jewelry given as prizes to athletes must be suitably inscribed.

Other changes made were as follows: "Amend Article XI., section 7, of the constitution by adding thereto the following:

"All sanctions must be signed by a member of the registration committee and a record thereof must be preserved by said registration committee in a book kept for such purpose.

"Amend Article XI., section 14, of the constitution by adding thereto the following:

"Appeals to the board of managers must be taken within ten days after a decision, and appeals to the board of governors within fifteen days after a decision. Any person interested may appeal."

BIG GAME IN ZAMBESI.

Sportsman's Paradise, Says a Man Who Crossed the Country.

"I consider Central Africa to be the sportsman's paradise," said J. J. Reynard, of the Cape to Cairo telegraph construction staff. Mr. Reynard, who had come down to Cape Town for a short visit, has been for ten years in the various British portions of Central Africa south and north of the Zambesi.

"Game is so plentiful," he said, "that in passing wild lands I have seen eland, zebra, hartbeeste, reed-buck and rhino grazing together, while hippo are plentiful in almost all rivers. I have myself shot six of these in one hunt, all the meat being saved for the camp by the natives, who dry what they do not eat.

"Lions are as common as jackals, and their roaring at night around the hunter's camp is constant, but they are not frequently seen, and it is far safer to travel through the veld than by river, where lurk the dreaded crocodile. I have known forty natives taken in one year by crocodile. If the sportsman takes the train in the dry season to Broken Hill, the present terminus of the line, he will find all the sport he requires."

Mr. Reynard, himself a striking advertisement of the salubrity of the climate, is strongly of opinion that the elevated portions of the vast inland territory will carry Europeans.

"European children in the country," he said, "are very healthy, and though there are not many European men, those who are there appear to thrive. You must understand, however, that communication is not easy, that the stations are 100 miles apart, and that all travelling is done with the help of native porters. The travellers' loads are carried on the head of porters, and the travellers on the porters' shoulders in the machilla." A machilla, it may be explained, is a kind of litter. A lady traveller who recently published a book on her journeys between the Cape and Cairo was so carried nearly all the way.

Note that Mr. Reynard referred to the "elevated" parts of the country, not the river valleys, in his remark upon the salubrity of the climate.

"The natives," he says, "are exceedingly loyal people, more especially in the British portions of Central Africa known as North-eastern Rhodesia and Nyasaland Protectorate. During many years residence in the country, during which I have travelled many thousands of miles, I have never met with an insolent chief. The European traveller on approaching a kraal is met at the village by the chief and is pointed out the best site for his camp, while water and fuel are provided by the chief's wives.

"Invariably the traveller is presented with food, in some parts with a young ox, in others with sheep, goats, fowls or pigeons. Labor is cheap and adults will work away from the civilized centres such as Blantyre for the official standard wage of three shillings per month, together with one yard of calico per week used in exchange for food. Again the native porter will carry a 55-pound load a distance of 200 miles for 5 shillings, together with four yards of calico."

The people are fonder of work than those in the south, but owing to the high mortality among those who went to the Rand mines the Imperial Government stopped recruiting.—From the Cape Argus.

DODGES OF COAL MINERS.

They Have Many Ways of Adding Extra Pennies to Their Wages.

In coal mining, as in other trades, there are many tricks played. Seams below three feet are paid extra tonnage, generally a penny per ton extra for each inch in the reduction of the thickness of the seam. Certain days are set apart for the purpose of measuring, and many schemes are resorted to by the miner to make the measurement as low as possible. Thus, according to the inequalities or irregularity of the floor and roof, a place may measure 3 feet one day and the next only 2 feet 9 inches. The miner

ANOTHER IRISH LAND BILL

To Facilitate the Carrying Out of the First Act—About Double the Money Wanted.

London, Nov. 23—Another Irish land bill to facilitate the carrying out of the previous land purchase act was introduced in the house of Commons to-night by Chief Secretary for Ireland Birrell. The chief secretary dealt in huge figures. He said he found that the estimate of \$500,000,000 made by one of his predecessors, George Wyndham, as the amount necessary to satisfy the land hunger of the tenants was totally inadequate; \$900,000,000 would be required for this end. The completed transfers of land up to October 31st represented \$125,000,000 which had practically exhausted the amount realized from the issues of land stock. Pending transactions representing \$260,000,000 the Government intended to raise the money necessary to complete these transactions, leaving about \$500,000,000 to be dealt with later.

The Secretary then said he proposed an issue of new three per cent stock in order to carry out the pending deals. He recognized, he continued, that he was engaged in an expensive policy, but he declared that land purchase had worked such marvels in Ireland that the Government did not hesitate to ask of the House of Commons to add materially to the burdens of the Imperial exchequer, which he proposed, should assume liability for the entire loss occasioned by the issue of the stock below par. This loss would total \$3,300,000 a year, which he proposed the Imperial exchequer should lift from the shoulders of the Irish ratepayers. Continuing, the Chief Secretary said the Government proposed to ask for power compulsorily to acquire the uncultivated grazing lands of the west of Ireland which had been such a bone of contention and which had led to such lawlessness in recent years. He said that about half the agricultural land in Ireland already had passed or was in the course of passing from landlord to tenant, and that to arrest progress in this direction would be an economic and political blunder of the first magnitude.

John E. Redmond, the Nationalist leader, followed Mr. Birrell and said the bill was a bold and far reaching measure. The reform it stood for, he declared, was largely in accordance with the popular sentiment in Ireland.

Mr. Wyndham, former Chief Secretary for Ireland, thought that the proposal to spend \$900,000,000 was fabulous.

Wm. O'Brien, Nationalist member for Cork, feared that the measure would never become a law and condemned the Government for its failure to make an attempt to solve the difficulty through a friendly conference to landlords and tenants.

John Dillon confessed that the Government's proposal almost satisfied him. He expressed the hope that Secretary Birrell would stick to his guns, and warned the landlords that they would be badly advised if they did not give the measure fair consideration.

Secretary Birrell, in closing the debate, declared his firm determination not to drop the measure, and the bill passed its first reading amidst Nationalist cheers.

takes advantage of this fact by letting his place stand for a whole shift, and sometimes a day, when he comes to a reduction in the thickness of the coal seam, and it pays him, too.

In other cases stone bands run in the seam of coal, and they vary in thickness also, but the miner is paid extra tonnage for the increase in the thickness of the band. Thus, you see that it means a considerable addition to his income to obtain an increased measurement.

A popular trick among mine managers is to work the near and most accessible coal in the mine, with no regard to system so long as they succeed in obtaining a large output of coal. Having worked all the best districts, they look out for another situation, and you will understand the position of the next manager and the enormous difficulties and expense to work the mine.

IN AND ABOUT TOWN

SOIREE DE CHARITE AT AUDITORIUM

Rehearsal of the Mexican Dance, This Evening, with Full Orchestra.

A complete rehearsal of the "Mexican dance" takes place this evening with full orchestra. The young ladies taking part are the Misses Green, Taschereau, Gibson, J. and W. Weir, Johnson, Meredith, Parmalee, D. Walker Blair, Poston, Hall, Dunn, Doucet, G. W. Van Felsins and Valiere. Mrs. Green has greatly improved this dance by adding new figures to it, and the singing part is very effective.

"Special Sale" 10% discount for November, at Dynes. See advt. top of this page.

RESTITUTION MADE.

The cashier of the Quebec Railway, Light & Power Company yesterday received the sum of fifteen dollars which was sent anonymously and evidently as an act of restitution.

LOST

On Monday, 16th November, between the Chronicle Office and City Hall, via Baude street, a small book of receipts, of parcels, signed by City Hall officials. Finder will be rewarded on returning same to Chronicle Office.

POLICE COURT.

Yesterday morning in the Police Court a woman charged with keeping a disorderly house pleaded not guilty and her trial was fixed for to-morrow. A defendant for selling liquor without a license was fined \$50 and costs.

TO-DAY (TUESDAY)

We will offer for sale 400 cream silk blouses, value \$2.75 for \$1.20. This is the time to profit, ladies.

DEATH OF A PRIEST.

The death is announced of Abbe Francois Elzear Tremblay, cure of St. Methode, Lake St. John. He was 33 years of age and a native of Grand Bay, Saguenay.

IN CRITICAL STATE.

Delphis Arel, the employe of the Fire Alarm Department, who was seriously injured by falling from a telegraph pole last week, is reported to be in a critical condition and his life is despaired of.

The lowest priced tea is not the cheapest. "Brown Label" "Salada" Tea at 30c. per pound makes many more cups than any tea sold at 25c. per pound. It is, therefore, not only more economical to use, but is infinitely more delicious.

CHILD INJURED.

A child belonging to Paul Bolduc, engineer, Bienville, Lewis, was seriously injured while sliding. The child lost control of the sledge and ran into a telegraph pole. The ambulance took the little sufferer to the Hotel Dieu.

WEDNESDAY, NOVEMBER 25TH.

Euchre-Bridge given by the Quebec Riding and Hunt Club at the Auditorium under the patronage of Sir J. George and Lady Garnet. Tickets on sale at Messrs. J. Savard, No. 35 St. John street; H. E. Lavigneur, 51 St. John street; H. E. Myrand, 54 St. Joseph street; S. J. Myrand, care Myrand & Pouliet, No. 219 St. Joseph street; George Carrier, No. 108 Dalhousie street.

ATTRACTIVE PROGRAMME.

A remarkably attractive programme has been prepared for the artistic concert and tableaux to be given this evening in the lecture hall of the Methodist Church. There are many items on the programme and all of them are sure to prove interesting and enjoyable. There should, and undoubtedly will be, an overflowing attendance, as the entertainment promises to be one of the treats of the season.

BISHOPS IN TOWN.

His Grace Archbishop Duhamel, of Ottawa, their Lordships Bishops Labreque, of Chicoutimi, and Cloutier, of Sherbrooke, Canons Dauth, rector of Laval University, Montreal, and Cousineau, Ottawa, have arrived in town to attend the meeting of the Roman Catholic Committee of the Council of Public Instruction.

RELAY RACE FROM NEW YORK.

Washington, Nov. 23.—President Roosevelt at 6.45 o'clock to-night received at the White House from the hands of Gordon Leach, the last boy runner in the relay run from New York to Washington, the silver tube containing a message to the President from Richard C. Morse, of the International Y.M.C.A. "I believe in athletics as a means to an end, and I see no reason why men should have round shoulders," commented the President, in accepting the message. He characterized as particularly praiseworthy the record made by the 200 Washington lads who brought the message here from Baltimore, a distance of 40 miles in 3 hours and ten minutes. The President, after a brief conversation with the young athlete, gave him one of his photographs bearing his autograph. Secretary Forster said that the contents of the message will be made public to-morrow, when it is probable the President's reply will also be given out. The message left New York Friday afternoon at four o'clock this afternoon when the run was resumed. About 1,000 runners took part.

HEALTHFULNESS OF MODERN GAS LIGHTING

(Continued from Last Issue.) The following is of vital importance to every user of artificial light, and explains the cause of "stuffy rooms." It is written by Mr. Irwin Butterworth, the manager of the Detroit City Gas Co., the President of which is Mr. Emmerson McMillan, who is also President of the Quebec Cartier Electric Co.

Note—The next paragraph would go to prove that gas lighting, instead of being injurious to the health, is rather, to the contrary, of great benefit to it. It forces the bad air containing organic matter that we expel from our lungs, to the ceiling, thus preventing us from inhaling the unwholesome air.

HEALTHFULNESS OF GAS LIGHTING.

"When the room with its occupants was lighted with electricity there was no rapid uprush in this way of the products to the ceiling, and the organic impurities and carbon dioxide, leaving at body temperature, remain diffused throughout the whole of the atmosphere of the room, causing a far more rapid fouling of the air and injury to health. If such a room were entirely left for its ventilation to diffuse through the walls, it would soon acquire that sour smell which is so noticeable in the warmth derived from their own bodies if all ventilation is cut off. When, however, this same diffusion through the ceiling and up part of the walls of the room takes place in a gas lighted room, this unpleasant human smell, so characteristic of the 'tube' railways, never appears."

Dr. W. A. Aiken, writing to the British Medical Journal, says, with reference to the air of rooms in which people assemble: "The whole contamination is the effect of human exhalations. Such air becomes unfit for respiration much earlier than when carbonic acid alone has to be considered, and the necessary air change is certainly retarded by the absence of gas burners."

QUEBEC GAS CO., Sellers of Real Light.

The Gem Calendar for 1909, which is on sale this week at L. P. Dery, Filis, is the best improved calendar in existence and is a record of past, present and future. It accomplishes the work of a complete card index, months on each page, double writing surface and occupies less space than others. Price 75c. complete.

Claire Fontaine

AFTER MANY YEARS. Another crowded house greeted the change of pictures at Bennett's last night, and from the spontaneous and repeated bursts of applause that greeted each subject, the programme is apparently a very strong one in every respect. After Many Years might be termed the headline attraction. It tells the story of a young sailor who is first mate on the brig Mary Fuller. He has been married but a little over a year, and has just been blessed with a cute little baby girl.

He is congratulating himself that his ship makes nothing but short coast trips, when he receives word from the captain that the brig has been ordered to make a long cruise. He and his good wife are almost heartbroken, but decide to make the best of it, and both pray that he will return safe home again. Some time has elapsed when a friend of the family, and a former admirer of the wife, in looking over the morning paper reads the following:—Wrecked in mid-ocean, all lives lost, the brig Mary Fuller. He goes at once to the poor wife and breaks the sad news. The wife is heartbroken and falls to the floor. The next scene, two years after, shows the friend of the family making love to the supposed widow, but she is true to the dear husband, and she believes that it can not be true that he is dead, and that he will some day return. The following scene shows the husband in mid-ocean on a raft. He is finally tossed on an island where he lives the life of a Robinson Crusoe. He sees a sail in the distance, and gives the signal of distress and is rescued by the passing vessel. He returns to his native land to find that although his wife's hand is much sought after, she is still waiting for him, and with his little baby girl, who has now grown to a girl of seven years, he is once more united with his family, thanks to kind Providence. The remainder of the programme is in keeping with the above grand picture, and in addition to two good singing numbers, rounds out an entertainment which is well worth the price of admission charged.

CASTORIA.

The Kind You Have Always Bought

INTERNATIONAL AUTO RACING.

Savannah, Ga., Nov. 23.—Although the fourteen foreign cars in the Grand Prix race are still the favorites over their six American rivals, the honors of the final practice spins over the 25 mile course went to one of the American entrants and the automobile enthusiasts who are anxious for an American victory over the flower of the foreign makes have grown decidedly more hopeful. Willie Haupt, a young American driver, who began his racing career not more than two years ago and who has amazed some of the older men at the wheel by his seemingly reckless speeding around the track, made one round of the course to-day at an average speed of approximately 71 miles an hour. The unofficial timers caught the lap at 21.06. To gain this average over a course which has eighteen banked turns and twenty-six flat curves, it was necessary for the young driver of the Chadwick car to attain a speed of more than ninety miles in the straight stretches. Louis Strang, a member of the Renault French team, made three laps of the course in remarkably fast and consistent time. The first lap was made in 22.04, and the third in 22.06. This meant an average speed of about 68 miles an hour. Erle, of the Benz team, the German entrants, made one lap in 22.03, or a shade better than Strang. The speed attained by the foreign and American drivers in the preliminary trials have lent renewed assurance of a new American record for road racing on Thursday next. In the Vanderbilt cup this year, Robertson's winning time was 64.37 miles an hour. In 1903 the Vanderbilt record was 61.43 miles an hour; in 1905 it was 61.49 and in 1904 the best average was 52.2 miles. In the Grand Prix race of the automobile club of France the average speed of the winner in 1906 was 62.8 miles an hour; in 1907 it was 70.9 for the 478 miles and this year the winner's mark was 69 miles an hour. Saiz, who won the Grand Prix in 1906; Nazzaro, who won the same classic in 1907, and Hemery, who ran second among the 49 starters this year, are all entered in the race to be run here on Thursday.

LAW STUDENTS ELECTIONS.

The law students of Laval University are now in the midst of their annual election of officers for the faculty. At the nominations several were elected by acclamation, those being Messrs. L. Vallard, vice-president; M. Plamondon, secretary; J. Malouin, treasurer. Voting for the remainder of the officers will take place on Wednesday.

"THERE'S A REASON"

ALTERED BARRACKS OF SALVATION ARMY

Building Inspected by a Representative of the Chronicle—What He Saw.

At a cost of over \$11,000 the Salvation Army barracks at the corner of Palace Hill and McMahon streets, have been transformed into a most modern and comfortable lodging house where rooms and board can be obtained at the lowest rates. In fact it is a bright home, at which the poorest can obtain good substantial food and first-class shelter at a nominal figure.

Yesterday a Chronicle representative visited the building and was shown through it by Staff Captain Peterson. On the third flat are situated bed rooms, 21 in number. All these are neatly furnished, the outer ones being remarkably bright and affording excellent views from their windows. These are the most expensive in the building, costing \$1.75 per week. The inner rooms are intended for another class of people and are let for 50 cents per week less. This flat is perfectly ventilated and supplied with baths, lavatories, etc.

On the second flat are more bed rooms, equipped in the same manner as the rooms above. On this flat are also situated the rooms of the officers of the Army. The flat is also supplied with bath-rooms, lavatories, etc., while a large ventilating shaft runs through it from the roof of the building. The roof of the shaft being of glass furnishes good light to the inner rooms of the building.

On the first or ground floor, is the office of the officer in charge. This is fitted up in a most business-like manner, and affords ample accommodation for the officer to perform his manifold duties. On this floor are also the dining-room and quick lunch counter.

Here can be obtained good substantial meals for 5, 10 or 15 cents, according to the tastes or means of the diner. There is also a smoking and reading room combined, where the lodger can indulge in a quiet smoke, while enjoying a read. On this floor is also a large bed-room containing a number of double decker beds. This apartment is for the poorer class of boarders. The beds are most comfortable in appearance and will be, no doubt, enjoyed by many a poor fellow who finds himself in a strange city with a small amount of funds at his disposal. This apartment is also provided with baths, lavatories, etc., as well as enameled tubs, supplied with hot and cold water, where the men can wash their clothes when they so desire. There is also an up-to-date fumigator at their disposal.

The building is furnished with an excellent iron fire escape, reaching from the roof to the ground. Forty-eight lodgers in all three classes, can be furnished with accommodation.

The Army has also a free labor bureau, and anyone requiring a man to do odd jobs, such as shoveling snow, etc., may procure one by telephoning the barracks before 9 o'clock in the morning, or 2 o'clock in the afternoon. After the above hours, if the men are not engaged at the barracks, they are compelled to go out and look for work as it is not the intention of the officers of the Army to encourage idlers around the building which is now called metropole.

The Commissioners of the Army will be here on the 4th December next when the official opening of the building will take place.

MELO DRAMA AT THEATRE POPULAIRE

"Les Orphelins de Notre Dame" Produced Most Acceptably Last Evening.

The word melodrama is usually associated with a considerable amount of blood and thunder, sawing of air and revolver shots, but that presented this week at the Theatre Populaire, "Les Orphelins de Notre Dame" does not belong to that cheaper class of melodrama which has earned a malevolent reputation for that form of entertainment. Les Orphelins de Notre Dame is a very worthy production in every way. A piece of some literary worth, it contains many exciting situations and withal has a quality of refinement which could not offend the most aesthetic of tastes. The scene is laid in France during the eighteenth century and has to do with the work of Vincent de Paul, who has since been canonized by the Catholic Church and whose work then began goes on to this day. The part of Vincent de Paul is played in a most respectful manner by Mr. Julien Daoust, who by his quiet dignity and easy, graceful personality gives life to the whole entertainment. The main thread of the plot is founded upon the coincidental abandonment of two children upon the same day who find their way into the institution founded by Vincent de Paul. One, a child born of humble parentage has been abandoned through necessity. The other, a child of fortune has been removed from its parents by the machinations of a designing next of kin. The parts of the two orphans are taken by Mesdames Ouellet and Tremblay, and the fluctuations in the fortunes will be followed with the deepest interest by all who attend this popular resort.

LORD CURZON'S CALIGRAPHY.

Bad writing is not always to be deprecated, as Lord Curzon, who recently met with a nasty motor accident near Sunningdale, Eng., can testify. During the days of his studentship up at Oxford, his lordship—as is the wont of the undergraduates—had a habit of writing on occasion to a certain relative a request for funds, which was sometimes conceded, at other times ignored. Now, it so happened that one day young Curzon penned an epistle of this description, at the same time scrawling a letter to an intimate friend, with whom he was wont to be somewhat candid on the score of that relative's shortcomings. Through an oversight, however, he put the epistles in the wrong envelopes, and posted them, quite unconscious of his lapse. But Lord Curzon's execrable calligraphy saved him. His kinsman, surmising that the illegible scrawl must be a request for money, favorably responded to that hypothesis; while the undergraduate did not discover his error till he received an indignant letter from his chum, refusing in any circumstances whatever to present him with the donation he so coolly petitioned for.

SUFFERED FOR YEARS

Says Per-na Completely Restored Health.

MRS. CHAS. GROS LOUIS.

MRS. CHAS. GROS LOUIS, Indian Lorette, Quebec, Can., writes: "For years I suffered from a disease that the doctors did not understand. One day I read in the paper about your excellent remedy, Peruna. I procured a bottle of it and took it according to directions. It was not long until I observed a change for the better. I can say that Peruna has cured me. I could not take any nourishment except milk. I will at all times say a good word for Peruna. I hold it in the highest esteem."

Not only women of rank and leisure praise Peruna, but the industrious, useful women engaged in manual toil would not be without Dr. Hartman's world-renowned remedy. The doctor has prescribed it for many thousand women every year and has never fails to receive a multitude of letters like the above, thanking him for his advice, and especially for the wonderful benefits received from Peruna.

INDOOR BASEBALL SCHEDULE DRAWN

Five Teams in the League and an Interesting Series Expected.

The Indoor Baseball League met last evening and drew up a schedule of games for the season. There are five clubs in the League, and the first game will be played on Dec. 14th. The complete schedule is as follows:—

Dec. 12—R.C.G.A. vs. R.C.R.
 21—Dept. Stores vs. R.C.G.A.
 24—R.C.R. vs. 8th R.R.
 28—Q.O.C.H. vs. Dept. Stores.
 31—R.C.G.A. vs. 8th R.R.
 Jan. 4—R. C. R. vs. Q. O. C. H.
 7—Dept. Stores vs. 8th R.R.
 11—Q.O.C.H. vs. R.C.G.A.
 14—Dept. Stores vs. R.C.R.
 18—8th R.R. vs. R.C.R.
 21—Q.O.C.H. vs. Dept. Stores.
 25—R.C.G.A. vs. 8th R.R.
 Feb. 1—8th R.R. vs. Dept. Stores.
 4—Q.O.C.H. vs. R.C.R.
 8—R.C.G.A. vs. Dept. Stores.
 11—8th R.R. vs. Q.O.C.H.
 15—R.C.R. vs. R.C.G.A.
 18—Dept. Stores vs. R.C.R.

ATHLETIC RECORDS OF PAST SEASON

Marks Which Have Been Confirmed by the American Athletic Union.

Records made during the past year have been approved by the American Athletic Union as follows:—

65 yards run, indoors—Lawson Robertson, 7 seconds.
 120 yards high hurdle—A. B. Shaw, Dartmouth College, 15 1-5 seconds.
 220 yards low hurdle (2 ft. 6 in.), fifth of a mile track around a turn—J. J. Eiler, 24 4-5 seconds.
 230 yards high hurdles (3 ft. 6 in.)—J. J. Eiler, 27 3-5 seconds.
 440 yards high hurdle (3 ft. 6 in.)—Chas. Bacon, 1 minute 3-5 seconds.
 800 yards run—Andrew Garner, San Francisco, 2 minutes 1 2-5 seconds.
 16-lb. shot—Ralph Rose, 49 ft. 10 in.
 12-lb. shot—Ralph Rose, from 7 foot circle, 57 ft. 3 in.
 Discus (7-foot circle)—M. B. Horr, 132 ft. 11 in. (weight 4-4 lbs.).
 Discus, Olympic style—Martin J. Sheridan, 140 ft. 5 1/2 in.
 16-lb. hammer—John Flanagan (9-ft. circle) 179 ft. 6 1/2 in.
 18-lb. hammer (including weight of head and wire handle)—B. F. Sherman, Boston, 131 ft. 1/2 in.
 21-lb. hammer (including weight of head and wire handle)—B. F. Sherman, 109 ft. 1 1/2 in.
 Pole vault—Walter R. Dray, Yale, 12 ft. 9 1/4 in.

NEW BOWLING CLUB.

The Colts Bowling Club was organized at a meeting held at the Y.M.C.A. last night. Mr. W. F. Fanning was elected President and Mr. S. H. N. Kennedy Secretary-Treasurer. A team will enter in the matches of the Quebec and District Bowling League.

BOYS' RELAY RACE ENDED.

Washington, Nov. 23—The Y.M.C.A. relay message sent from New York was delivered to President Roosevelt at the White House by Gordon Leach, of the Boys' department of the local association, at 6:45 p.m. to-day. The fast time of three hours and ten minutes was made between Baltimore and this city.

HOT TIME IN PITTSBURG.

Pittsburg, Nov. 23—A disgraceful fight marred the P.A.C. vs. Lyceum hockey game in the West Pennsylvania League at Duquesne rink last night, and as a result players Garnet Sixsmith, Fred Taylor, Lorne Campbell and Jack McDonald, all well known on Canadian ice, have been summoned to appear before Addison C. Gumbert on Thursday. The management of Duquesne Garden demands that action be taken against these players, claiming rough hockey is injuring the attendance.

NEW SWIMMING MARKS.

The following swimming records were awarded to C. M. Daniels, having been made in open tidal salt water at Travers Island, Sept. 10:—

220 yards, one turn, 2 minutes 40 3-5 seconds.
 300 yards, two turns, 4 minutes 15 seconds.
 440 yards, three turns, 5 minutes 54 1-5 seconds.
 Other swimming records approved were:—

200 yards, breast stroke, bath, nine turns—A. M. Goessling, March 18, 2 minutes 45 2-5 seconds.
 150 yards, bath, five turns—A. M. Goessling, March 18, 2 minutes 15 seconds.
 400 yards, relay—C. M. Daniels, C. D. Trubench, L. B. Goodwin, Geo. South, March 27. Time, 4 minutes 13 3-5 seconds.
 Plunging, one-minute time limit, 74 feet—O. S. Brown, March 21.

WESTERN REFORMERS IN VARIOUS CITIES

where boxing is under the ban: have been protesting vigorously to the authorities against the "prize fight" in which John L. Sullivan and Jake Kilrain appear twice daily in connection with a burlesque show. Sullivan's manager as a result has issued a statement to the effect that if any judge declares that a man 50 years old and weighing nearly 360 pounds is a prize-fighter in the eyes of the law he will give \$1,000 to charity.

PROPOSED RUGBY CHANGES.

Followers of Rugby football in England are greatly interested in the changes proposed by the New Zealand authorities regarding certain laws. Perhaps the two which would do most to improve and enliven the game are "to allow a man to pass the ball after being tackled and brought down," and "it shall not be considered a knock on if the player recovers possession before the ball touches the ground." Should these proposed changes become law, it will save many scrimmages and much whistling and make the game faster.

QUEBEC TEAM SAME.

Montreal Gazette:—Joe Power, President of the E.C.H.A., announced on Saturday evening that Quebec would have practically the same team as last year, with the chance that Eddie Garneau might be out again to fill the right wing position. Joe Power himself and his two brothers, Rocket and Chubby, will be in the game again, and with them will be Jordan, McDonald, Moran and perhaps Hogan. Hogan is doubtful, as he is said to have offers to go elsewhere. Garneau, who may be out again, is a clever wing and played with Quebec the year they won the C.A.H.L. championship.

WANDERERS WERE WAITING.

Montreal, Nov. 20—Wanderers will probably complete their team this week. Jimmy Gardner stated on Saturday that the club had been awaiting the results of the annual meeting before closing contracts with players; now they were prepared to go ahead.

ROSS AND HORN ARE NOW OPEN TO RECEIVE OFFERS FROM THE FOUR CLUBS OF THE LEAGUE, PROVIDED THEY ARE RELEASED FROM THE ENGAGEMENT WITH MONTREAL.

As Montreal has no way to use them: Ross has signified his willingness to release Montreal from their side of the contract.

OTTAWA'S ATTITUDE AT THE LEAGUE MEETING GAVE THE IMPRESSION THAT OTTAWA STILL HAS HOPES OF ROSS, BUT HE IS GENERALLY CONSIDERED TO WANDER.

A FOOTBALL MAN OF THE "TERRIBLE" TYPE

Something Bound to Give when Coy Hits the Line—In Fine Trim Now.

Ever see Coy, of Yale? The fellow that threw Tibbott, the big Princeton back, so hard that the classic Princeton windows rattled? The fellow that ripped and tore, and plunged through the Princeton eleven and twice scoring a touchdown, thus winning the great "sentimental" game of the east? Well, take a look. Now do you wonder that Yale beat Princeton, even after the shifty Tigers had scored an early touchdown, by tallying a touchdown in the first half of the game? Do you? No, of course not! Very well, then. Adjectives, similes and metaphors were used in profusion after the game to describe just what a great football player Edward H. Coy is, and how he won the game for the Elis. But the above conception of Coy by Vet Anderson gives a fair idea why Coy is such a successful gridiron star. Ordinarily, and when logged in street attire, Coy is an amiable, even pleasant chap to meet. But when he arranges himself in football uniform and assumes his "fighting face," as he did in the Princeton game, Coy presents anything but an "amiable" appearance. But he doesn't stop at appearances, as many a battered and bruised Princetonian can testify. Coy is really a player of the terrible type. He goes into the game with the idea that his opponents are all of the Hercules type that can stand almost anything, and he treats them that way. At least, he did so in the Princeton game. He smashed and battered and ploughed through the opposing line as if the black and yellow clad players were real tigers that were hurling themselves at his throat—but what's the use! Everybody knows what Coy did to 'em.

If you had a football tucked neatly under your left arm, and were tearing down the field at a rate closely approaching 11 seconds for the hundred yards, and you found yourself confronted by this, wouldn't you suddenly remember that you had important business elsewhere that demanded your immediate attention?

The betting is 100 to 1 that you're turn around and scot for the nearest tree.

HOW IT FEELS TO FLY.

"Human flight is a new physical and mental experience, and its sensations and emotions are so unlike or are so much more intense than what is felt on the earth's surface that going up in an air-ship for any length of time is really living in another world. We have been so busy trying to fly and trying to imagine what effects flights will have upon life upon earth, that we have failed to record the effects of flight on those who fly."

Captain Thomas W. Baldwin, whose dirigible balloon has been purchased by the United States Government for military purposes, pronounces this opinion of the sensations of flying. Captain Baldwin has spent more than twenty years on the problem of aerial navigation, and during that period has made a hundred ascensions and voyages through the air.

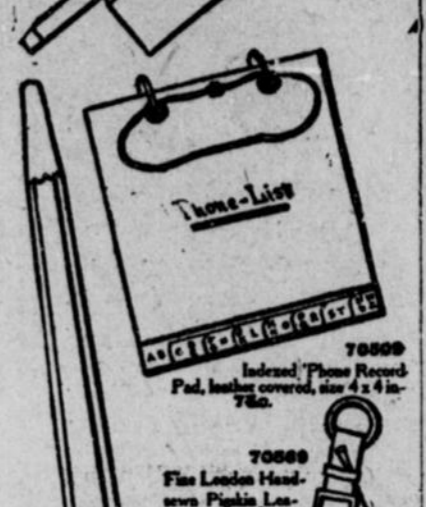

"The first experience of flight," Captain Baldwin continued, "is the most wracking mental and physical tension. Indeed, going into battle, facing a storm at sea, or struggling with a fire does not equal it for trying the nerves. There are, of course, situations of suspense with the element of fear which more unmanly one than that felt during the first moments of flight by a beginner; but nowhere else does such intense alertness stem so helplessly against fatal accident. This feeling will be shared by every one on his first voyage in an air-ship."

"But the reaction on the nerves of the aeronaut when he perceives that his machine is working, and that he is not only actually flying, but controlling his own flight, is simply indescribable. Some of us know what the feeling of mastery is in driving an automobile seventy-five miles per hour on a smooth, clear road, or what it is to drive a locomotive engine at a hundred fold and one may get a faint conception of what the guiding and driving of an air-ship through space means. The sense of physical, mechanical, and mental mastery over one's environments, and over one's self is so complete, so buoyant, exhilarating, exalted, that one feels more fearless than he ever did with his feet on the firm earth. Indeed, one is in another and higher world mentally as well as physically. One feels that a great weight has been lifted from his shoulders. His body is stronger, his mind is infinitely clearer. He sees himself riding upon a sunbeam or a star-beam; there flashes across his vision the snowflake or the raindrop in its helpless fall; by him passes the cloud at the mercy of the wind, and on the crest of the storm he walks as a god upon the waters."—David F. St. Clair, in Harper's Weekly.

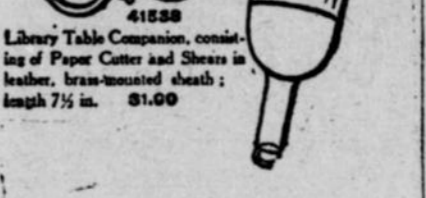

ATTRACTIVE GIFTS

50 Cents to \$5.00

The multitude of inexpensive gifts which this store shows, makes it a favorite place to shop. The fact that one may be always sure of the high quality of every article is still another agreeable feature that attracts buyers from all parts of Canada.

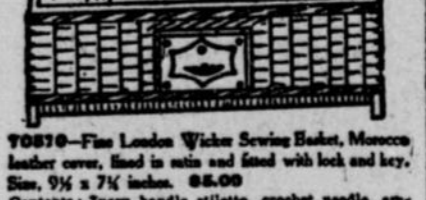

70705 Case of three Trousers or Skirt Hemmers when closed 5 x 1 1/2 x 1 1/2 inches, occupies less space than a hair brush. \$1.75

Commercial News
 NEW YORK STOCK MARKET.
 New York, Nov. 23.—Today's business at the Stock Exchange was the smallest for any day since the election. This subsidence of the speculative furor awakened some regret in many elements closely adjacent to the Stock Exchange, but in the larger financial circle of the Wall Street section there is an avowed satisfaction with the slowing down of a speculative pace which it was feared would prove perilous. There is a tone of depression in any attempt at a sudden and violent boom in business. There is also a realization that the assembling of Congress and the State Legislatures may bring some force in action that will chill speculative enthusiasm. These influences were perceptible in prices of stocks today, and rather than in any possible depression. There was quite a volume of selling orders in the market at the opening, as the after effect of last week's fall and those made the opening prices lower. At the lower level the professional traders on the floor were disposed to work for a recovery, but trading was light. Another reduction in quotations for Copper at the New York metal exchange was a factor in the restraint on speculation perceptible in the day's market. Bonds were irregular. Total sales, par value, \$5,072,000.
 By private wire from Chase Nat'l Bk., New York, to Bureau & Dapala, Stock Brokers, St. Peter Street.

 Phone 946.
 New York, Nov. 23.—Under the influence of bearish sentiment in London, as exhibited in their quotations, our market opened heavy and lower, but soon showed an undercurrent of strength that brought about quick recoveries. St. Paul rallied over a point and Reading 7-1/2, while New York Central, on the renewed story of Mr. Harriman's connection with the company, rose 2 1/2 points. Reports of improving business conditions in Chicago and Pittsburg continue to come in, the latest being that the Pennsylvania Railroad would spend \$50,000,000 for new equipment, etc. Various protests have arisen in the Northwest against the proposed new issue of \$50,000,000 Canadian Pacific stock. The formation of a new fertilizer and chemical company with \$50,000,000 capital was announced from New Jersey, but had no effect on the stocks of the two other companies. Steel common was weak on Mr. Carnegie's attack on the protective tariff, but as Mr. Carnegie owns nothing but first mortgage bonds, his position and income are

PERSONAL
 Hon. Jas. J. Guerin, of Montreal, is a guest at the Chateau.
 Mr. W. B. Debbage, of Montreal, is at the Frontenac.
 Mr. and Mde. Jules Tessier, are guests at the Chateau.
 Hon. Hector Champagne, of St. Eustache, is at the Chateau.
 The Rev. William J. Shaw, of Montreal, is a guest at the Frontenac.
 Drs. W. Bourbonnais and D. Gadois, were at the Frontenac yesterday.
 Miss Georgina Hunter, of Montreal, is a guest at the Frontenac.
 Mr. R. T. Hensker, of Montreal, registered at the Chateau yesterday.
 Messrs. H. E. Christmas and H. V. Benson, of Montreal, were in the city yesterday.
 Rev. Brother Bernard Louis, visitor of the Christian Brothers school, is in the city, a guest at the Commercial Academy.
 Mr. S. C. Rioux, advocate of Fraserville, is in the city on his return from a business trip to Toronto, Chicago and Lafayette, Ind.
 The marriage is announced for the 25th inst. of Mr. Armand Normand, son of Mr. Alfred Normand, to Miss Marie Louise Marcoux, daughter of Mr. Odillon Marcoux, of this city.
 Mr. J. R. O'Neill, railway contractor, his many friends will regret to hear is confined to his home, Prince street, for the past week, suffering from a cold.
 Montrealeers at the Chateau: J. E. Normandin, Gaston Drainville, Will LeBel, J. A. Chabot, V. E. Miller, R. S. M. Bouchette, E. J. McLelland, Raoul Dionne, H. B. O'Neill.
 Mr. and Mrs. Harry F. Dyke (the latter formerly Miss Ena Drum), left here on Saturday last, on a visit to Mr. Dyke's parents Mr. and Mrs. Edward Dyke, Worcester, England. They expect to be absent about three months.
 Lady Valda MacNeill's little son was baptised recently in the Chapel Royal, St. James' Palace, the scene three years ago of his mother's brilliant marriage. The ceremony was of the simplest nature, and Lady Mont Stephen, Count Gleichen, Lord Cromer, and Sir Cecil Spring-Rice acted as sponsors. To the name Roger was added Victor, in memory of the baby's grandfather, Prince Victor of Hohenzoln, and, in accordance with Royal custom, Jordan water was used.
 Arrivals at the Clarendon: E. W. Dawson, Toronto; A. M. McInnes, Cape Breton; A. D. Stewart, H. C. Thomson, St. Romuald; H. E. Balfour, St. Casimir; S. D. Prevost, Montreal; F. Pluff, Chicago; Robt. A. Chillas, R. Piche, Montreal; J. O. Baillargeon, Victoriaville; J. H. Smith, Toronto; Geo. Bernier, B. Freedman, E. E. Guilbault, R. E. Lyons, Montreal; C. A. Ha el, Boston; Gust. Turcotte, Ottawa; Dr. Bedard, Pembroke; T. P. O. Guilbault, Joliette; J. B. Carboneau, Roberval; R. J. Miller, J. L. Brodie, Montreal; Capt. A. W. Higge, Chicoutimi; H. Grant, La Tuque; C. H. R. Bird, E. L. Palmer, D. Guenette, Montreal.
 Lady Violet Elliot has arrived in India, and is now on her way up to Simla, and will be in time to take part in Lord and Lady Minto's autumn tour of visits. The Viceroy's party, which includes Lord Francis Scott, Lord Windsor, Colonel Victor Brooks, Colonel Dunlop Smith, Colonel Crooke Lawless, Mr. S. H. Butler, the Foreign Secretary, and Mr. A. Guise, who was Comptroller of Lord Minto's Household in Canada, will pay a round of interesting visits to Jodhpore, where the Maharajah will be invested with the Knight Commandership of the Star of India; Bikanir, the paradise of the sand-grouse shooter; Lucknow, Agra, Benares, and Pusa, where the magnificently equipped Agricultural College, will be formally opened. The Viceroy will arrive in Calcutta during the first week of December.

LAVAL LAW STUDENTS DINE
 Very Successful Gathering at the St. Louis Hotel Last Evening.
 The annual dinner of the law students of the Laval University took place at the St. Louis Hotel last evening, and was, as usual, a most successful and enjoyable affair. There was a large attendance, which included many distinguished guests as well as representatives from sister universities and faculties. Mr. Hector Laferte, President, presided with rare tact, and among the guests were Mgr. Laflamme, Rector of Laval University, Sir Frs. Langelier, Hon. Judge Lemieux, Hon. L. A. Taschereau, Hon. E. J. Flynn, Hon. L. R. Roy, C. T. Delage, M.P.P., Abbe Fillion, Ed. Dorion, F. Roy, Abbe Bernier, L. d'Hellencourt. The representatives from sister universities were Messrs. Savard, McGill, Audette, Laval (Montreal) and LeRoy, Lennoxville, while sister faculties found sturdy champions in the persons of Messrs. Duncan McGuire, Arts, and Bonenfant, Medicine. A recherche menu had been prepared for the occasion by the culinary department of the St. Louis, and full justice was done to the efforts of the staff of the hostelry by the students and their friends.
 After the toast to the Pope and the King had been duly honored, Mr. Hector Laferte rose to propose the toast of "Our University and Its Professors," which he did in an eloquent and interesting address, in which the claims of Laval were eloquently eulogized, and the inestimable services which it has rendered, identifying it with the national life, pointed out in forcible terms. Mr. Laferte took occasion to felicitate the university upon the happy choice of Mgr. Laflamme as its rector.
 The toast was responded to by Mgr. Laflamme and Sir Frs. Langelier, doyen of the Professors of Laval and Chief Justice of the Superior Court.
 The remainder of the toast list was as follows:—
 "Our Guests," proposed by Mr. Lucien Cannon, and responded to by Hon. L. A. Taschereau and Sir Geo. Garneau, Mayor.
 "Bench and Bar," proposed by Mr. Th. La. Bergerson, and responded to by Judge Lemieux and Hon. E. J. Flynn, Baronier of the Bar.
 "Notarial Profession," proposed by Mr. Maurice Brassier, and responded to by Mr. L. P. Sirois.
 "Sister Faculties," proposed by Mr. Arthur Pouliot, and responded to by representatives of sister universities.
 "The Press," proposed by Mr. Mains Plamondon, which drew forth responses from representatives of the local press present.
 Songs and recitations helped to make the evening most enjoyable and the banquet was in every respect one long to be remembered.

WHICH WINS FAVOUR?
 King Edward and the McGill Top Coats in the Race for Favour.
 This year the King Edward overcoat which has held sway for several seasons, has its first decided rival in the McGill Ulster. Both garments appear on the New York and London fashion plates as being correct dress for the winter, and the Semi-Ready Store is showing a varied line of patterns in imported woollens.
 Few men nowadays would think of going to a custom tailor for an overcoat when they can get better tailoring at a less price in the Semi-Ready shop. They have the advantage of selection at the trying-on stage, the only way one can judge a constant liking for a garment, and King Edward overcoats that cost \$15 in a Semi-Ready Store would cost half as much more at the retail tailors. "McGill" Ulsters are sold in the Semi-Ready Stores at \$20 and \$25.

FREE PILE CURE
 Sent to Demonstrate the Merits of Pyramid Pile Cure.
 What It Has Done For Others, It Can Do For You.
 We have testimonials by the hundreds showing all stages, kinds and degrees of piles which have been cured by Pyramid Pile Cure.
 If you could read these unsolicited letters you would no doubt go to the nearest drug store and buy a box of Pyramid Pile Cure at once, price fifty cents.
 We do not ask you to do this. Send us your name and address and we will send you a trial package by mail free. We know what the trial package will do. In many cases it has cured piles without further treatment. If it proves its value to you order more from your druggist. This is fair, is it not? Simply write us a letter giving your name and address and we will send you the trial package by mail in plain wrapper free. Address Pyramid Drug Co., 164 Pyramid Bldg., Marshall, Mich.

Correspondence
 To the Editor of the Chronicle:
 Dear Sir—Will you kindly insert this letter to correct a wrong report that appeared in your paper on Saturday last with reference to a euchre party held under the auspices of the St. Columbia Social Club of Bergerville.
 In said report it was stated that Mr. Robert Wilson was host and that certain parties had won the prizes. This report was far from the truth. The winners mentioned do not even belong to the club, nor were they present on this occasion. The host at this party happened to be myself and the winners of the prizes are as follows:—
 Ladies: 1st prize, Miss Emma Julien; 2nd prize, Miss M. Clark.
 Gentlemen: 1st prize, Mr. M. McCormack; 2nd prize, Mr. J. Falardeau.
 How such a report got into Saturday's Chronicle is very puzzling to the members of the club, as no report was given out of this affair. This is the correct report of the euchre party held by our club last Friday night, and only the secretary of the club is authorized to report such meetings for publication. Thanking you, Mr. Editor, for granting me the opportunity of making the correction.
 Yours truly,
 JOHN BLACKWOOD,
 President St. Columbia Social Club, Bergerville,
 November 23rd, 1908.

OBITUARY.
 A old and highly-esteemed resident of Lauzon, Levis, has just passed away in the person of Madame Charland, widow of the late Mr. William Charland, in his life-time a well-known shipbuilder. Madame Charland, who was formerly Miss Marie Mathilde Canac-Marquis, was 82 years of age. Her husband died about five years ago. The aged couple celebrated in 1896 their golden wedding. Mrs. Charland leaves six children.

 THEY WORK WHILE YOU SLEEP

IT'S YOUR DIGESTIVE JUICE
 Gets Weak and Scarce that Causes Indigestion and Stomach Troubles.
 If what you just ate is scouring on your stomach or lies like a lump of lead, refusing to digest, or you belch Gas and Eructate sour, undigested food or have a feeling of Dizziness, Heartburn, Fullness, Nausea, Bad taste in mouth and Stomach headache—this is Indigestion.
 A full case of Pape's Diapepsin costs only 50 cents and will thoroughly cure the worst case of Dyspepsia, and leave sufficient about the house in case some one else in the family may suffer from Stomach trouble or Indigestion.
 Ask your pharmacist to show you the formula plainly printed on these 50-cent cases, then you will understand why Dyspeptic trouble of all kinds must go, and why they usually relieve a sour stomach or Indigestion in five minutes. Get a case now and eat one Triangle after your next meal. They are harmless and taste like candy, though each contains powder sufficient to digest and prepare for assimilation into the blood all the food you eat; besides, it makes you go to the table with a hearty, healthy appetite; but, what will please you most is that you will feel that your Stomach and intestines are clean and fresh, and you will not need to resort to laxatives or liver pills for Biliousness or Constipation.
 This city will have many Diapepsin cranks, as some people will call them, but you will be cranky about this splendid stomach prescription, too, if you ever have Indigestion or Gastritis or any other Stomach misery, and eat just one Triangle of Diapepsin.

DAY BY DAY
 Good morning, have you missed no much?
 Talk of the streets, now wouldn't they jar you, Mabel!
 Just a month to Santa Claus—and bills.
 It used to be the man with the hoe, Who was pointed to as a lesson to take, But he never gets so much of the dough As it seems does the man with the rake.
 Every day now should be Ash Wednesday, remarks the Champlain street philosopher.
 Any sporting man would bet on the Merry Widow hat to show—and a fearful show some of them make.
 At the risk of being quoted, we must still remark that this milk question cannot be watered down.
 Yes, the skating's fine, thank you, But the sitting down is not so good.
 People kick about the price of gas, yet St. Nicholas street residents have been getting it free and still are not satisfied.
 Oh, law! exclaimed the turkey at last night's students' dinner. But its pleading was ruled out of court.
 Slide and the world slides with you. That is if you can manage to get hold of a section of it when you start to go down.
 Montreal has an opportunity to go to The Devil this week. The much-talked of play is at one of the theatres.
 SS. BERMUDIEN.
 A beautiful model of the Quebec Steamship Company's fine twin-screw SS. Bermudian, 5,530 tons, with the latest up-to-date passenger accommodation for 240 saloon passengers, is, by the kind permission of Messrs. Lavigne & Hutchison, the well-known piano dealers, on view at their establishment, 81-85 St. John street, and is attracting a great deal of attention. The model is a work of art, perfect in every detail, and it speaks well for the enterprise of the Quebec Steamship Company in adding such a large and fine steamship to their fleet.

DOCTORS MISTAKES
 Are said often to be buried six feet under ground. But many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous prostration, another with pain here and there, and in this way they present alike to themselves and their easy-going or over-busy doctor, separate diseases, for which he, assuming them to be such, prescribes pills and potions. In reality, they are all only symptoms caused by some uric acid disease. The physician, ignorant of the cause of suffering, keeps up his treatment until large bills are made. The suffering patient gets no better, because of the wrong treatment, but probably worse. A proper medicine like Dr. Pierce's Favorite Prescription, directed to the cause, would have entirely removed the disease, thereby dispelling all those distressing symptoms, and instituting comfort instead of prolonged misery. It has been well said, that "disease known is half cured."
 Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate system. It is made of native American medicinal roots and is perfectly harmless in its effects in any condition of the female system.
 As a powerful invigorating tonic "Favorite Prescription" imparts strength to the whole system and to the organs distinctly feminine in particular. For overworked, "worn-out," run-down, debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," house-keepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequalled as an appetizing cordial and restorative tonic.
 As a soothing and strengthening nerve "Favorite Prescription" is unequalled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, nervous prostration, neuritis, hysteria, spasms, St. Vitus' dance, and other distressing nervous symptoms commonly attendant upon functional and organic disease of the uterus. It induces refreshing sleep and relieves mental anxiety and despondency.
 Dr. Pierce's Pleasant Pellets invigorates the stomach, liver and bowels. One to three doses. Easy to take as candy.

DOCTORS MISTAKES
 Are said often to be buried six feet under ground. But many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous prostration, another with pain here and there, and in this way they present alike to themselves and their easy-going or over-busy doctor, separate diseases, for which he, assuming them to be such, prescribes pills and potions. In reality, they are all only symptoms caused by some uric acid disease. The physician, ignorant of the cause of suffering, keeps up his treatment until large bills are made. The suffering patient gets no better, because of the wrong treatment, but probably worse. A proper medicine like Dr. Pierce's Favorite Prescription, directed to the cause, would have entirely removed the disease, thereby dispelling all those distressing symptoms, and instituting comfort instead of prolonged misery. It has been well said, that "disease known is half cured."
 Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate system. It is made of native American medicinal roots and is perfectly harmless in its effects in any condition of the female system.
 As a powerful invigorating tonic "Favorite Prescription" imparts strength to the whole system and to the organs distinctly feminine in particular. For overworked, "worn-out," run-down, debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," house-keepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequalled as an appetizing cordial and restorative tonic.
 As a soothing and strengthening nerve "Favorite Prescription" is unequalled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, nervous prostration, neuritis, hysteria, spasms, St. Vitus' dance, and other distressing nervous symptoms commonly attendant upon functional and organic disease of the uterus. It induces refreshing sleep and relieves mental anxiety and despondency.
 Dr. Pierce's Pleasant Pellets invigorates the stomach, liver and bowels. One to three doses. Easy to take as candy.

DOCTORS MISTAKES
 Are said often to be buried six feet under ground. But many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous prostration, another with pain here and there, and in this way they present alike to themselves and their easy-going or over-busy doctor, separate diseases, for which he, assuming them to be such, prescribes pills and potions. In reality, they are all only symptoms caused by some uric acid disease. The physician, ignorant of the cause of suffering, keeps up his treatment until large bills are made. The suffering patient gets no better, because of the wrong treatment, but probably worse. A proper medicine like Dr. Pierce's Favorite Prescription, directed to the cause, would have entirely removed the disease, thereby dispelling all those distressing symptoms, and instituting comfort instead of prolonged misery.
