SHAWVILLE, PONTIAC COUNTY, QUE

THURSDAY, AUGUST 19th, 1943

Sunday School Picnic at Sand Bay

A Sunday school picnic of the Anglican Churches of Portage du Fort and Parkman, and the United Church at Starks Corners, was held last Thursday afternoon at Sand Bay with an attendance of over 250.

The weather was ideal for such an event and all thoroughly enjoyed the outing. Many spent the afternoon swimming or wading on the sand beach.

Sports were in charge of Rev'ds W. J. White and A. F. Fokes and during the afternoon softball games were played. A fine card of races was run off, which included participants from three years to the age of 70. Following the sports a war time supper was served.

August Meeting of Shawville Women's Institute

The August meeting of the Shawville Women's Institute was held on Monday afternoon, July 9th, at the home of Mrs. John R. McDowell with nineteen members present.

The meeting opened in regular routine order. Proceeds from the salad supper amounted to \$39.25 after expenses were paid. A vote of thanks was tendered Mrs. C. T. Wilson for the use of her premises for the salad tea.

Two letters were read from Geo. Eades and Arthur Strutt, thanking the Institute for boxes received. Fall Fair exhibit was discussed. The Institute was asked to help with the distribution of Ration Book No. 3, and offered assistance.

Mrs. W. E. Shaw gave an interesting talk on Current Events.

Roll call was answered by "some important event of the year. A quiz was held and enjoyed by all.

Delicious refreshments were served by the hostess, assisted by Mrs. Austin McDowell.

The New Ration Books

The cover of the No. 3 ration book, to be distributed under the direction of the Local Ration Boards during the week of August 23, will undergo further change in color, it is announced. To distinguish them from their predecessors, the new ration books will have a grey color, whereas the No. 1 book was of cream hue and the No. 2 books now in use have a green cover. Although the distribution of the new books is still more than two weeks distant, ration authorities suggest that book-holders will greatly facilitate the operation by filling out in advance the application cards to be found towards the back of the current books, taking care that the proper signature is affixed. All persons of 16 years and over must sign their own cards. If they are unable to write, they must make their mark and have the card signed by a sponsor. Cards of persons under 16 must be signed by a parent or sponsor. It is emphasized that these application cards are not to be mailed, neither are they to be detached from the books. Both are to be taken to the distributing centre, where, if found correct, they will be honored for the issue of a No. 3 ration book. In rural areas, however, an adult may bring in the books of his neighbours but each of them must be signed by its holder.

How to Make Handy Wagon for Farm Use

The description of the parts of a very useful transport wagon for the farm is given in Agricultural Engineering Circular No. 8, prepared by W. Kalbfleisch, Field Husbandry Division, Dominion Experimental Farms Service. The floor or platform of the wagon is about 12 inches above the ground and is carried on two railway irons or I-beams which are fastened below two truck front axles. When the wagon goes over a sharp rise in the road, the stringers act as skids until the wheels again come in contact with the ground. The side walls which form the box are attached to the platform by hinges and can be lowered to form a ramp for loading, or removed if a low platform wagon is required.

A low transport wagon of this type can be used to advantage in hauling corn, hay and other crops, manure, heavy loads, sick animals, and can be very useful for transporting farm machinery because moderately sized tractors can be driven across the platform. The wagon will carry three to four tons, but, because the platform is large, special care should be taken not to overload the wagon. Further details, with illustrations, will be found in the circular which may be obtained by writing to the Publicity and Extension Division, Dominion Department of Agriculture, Ottawa.

PERSONAL MENTION

Mr. and Mrs. S. E. Dale, of Ottawa, were week-end guests of relatives and friends in town.

Cpl. Elgin McKnight, of Winnipeg, visited relatives in town and vicinity during the past week.

Mr. G. A. Howard has returned from a few weeks' visit with his daughter and son at Guelph, Ont.

Dr. R. E. Dagg, of Montreal, is spending a two weeks' vacation with relatives in town and vicinity.

Mr. E. C. Dahms, returned on Sunday after a month's holiday visiting with relatives in Saskatchewan.

Mrs. Richard Young, of Quyon, is visiting her daughter, Mrs. Jas. H. Horner and other relatives in this district.

Miss Grace Harris, Reg. N., of Montreal, is spending a vacation with her father, Mr. Chas. Harris, at Sand Bay.

Mrs. Gerald Grant and little daughter, Marilyn, visited friends and relatives in Ottawa during the past week.

Writer Dean Fokes, R.C.N.V.R., of Deep Brook, N.S., is spending a furlough with his parents, Rev. A. F. and Mrs. Fokes.

A C. 2. Reid Glenn, R.C.A.F., Montreal, spent the week-end at the home of his parents, Mr. and Mrs. J. C. Glenn, Bristol.

Misses Edna Hodgins and Mildred Nicholas, of Ottawa, spent the week-end at their respective homes in Murrells section.

Mr. and Mrs. Chas. W. Dagg and daughter, Margo, of Ottawa, are spending a vacation at the W. A. Hodgins' cottage, Green Lake.

Mrs. Elizabeth Lunam has returned to her home in Campbell's Bay, after a month's visit with her daughter, Mrs. J. C. Glenn.

Mr. H. L. Rennie, of Granby, Que., a former principal of Shawville High School, visited friends in town for a few days last week.

Mr. Jas. Donaldson and Mr. and Mrs. Murrell Donaldson and sons, of Ottawa, are spending a vacation at their cottage at Green Lake.

Mrs. Curran and daughter, Mrs. C. Armour, of Ormstown, Que., are visiting at the home of their daughter and sister, Mrs. Arthur Dagg.

Mrs. Harris Jessiman, of Ottawa, is visiting at the homes of her sisters, Mrs. John D. Brown and Mrs. Leonard Horner, for a few weeks.

Rev. H. P. Maitland, Minister of St. Andrew's Presbyterian church, Arnprior, has accepted a call from the Morrisburg Presbyterian church.

W. O. Ebert Horner, and Mrs. Horner, of Ottawa, spent the week-end at the home of the former's parents, Mr. and Mrs. Jas. H. Horner.

Mr. and Mrs. D. H. Beckworth and Mr. and Mrs. J. Corvin and family, of Ottawa, were week-end guests at the home of Mr. and Mrs. Hilliard Palmer, at Yarm.

Mr. and Mrs. Stewart Hodge and children, of Thetford Mines, Que., are spending a vacation at the home of Mrs. Hodges' parents, Mr. and Mrs. Langford Strutt.

Mrs. K. C. Bolton left for Winnipeg on Wednesday evening, accompanied by Margaret and Kenneth. She was called to Winnipeg on the illness of her mother, Mrs. Cheyne.

Relatives in town have received word that Pte. Russell Judd, son of Mr. and Mrs. Geo. Judd, and Pte. Bert Swartz, son of Mr. and Mrs. Irvin Swartz, have arrived overseas.

* Mrs. Hilliard Hodgins and daughter, Catherine, have returned home after spending a week's vacation at the home of Mrs. Hodgins' sister, Mrs. John Dods, Maryland.

Mr. and Mrs. Melvin Armstrong and children, of Port Colborne, Ont., are spending several weeks' vacation with Mr. Armstrong's parents, Mr. and Mrs. Wellington Armstrong.

Mr. Wellington Smart, left last week to spend a well-earned vacation with his son, Mr. William Smart, of Renfrew, on a trip through the Eastern Townships to Quebec City.

Capt. Wallace Hodgins, who underwent an operation for appendicitis at Halifax Navy Hospital recently, is recuperating at the home of his parents, Mr. and Mrs. John L. Hodgins.

Mr. R. J. Connelly, of South Porcupine, Ont., accompanied by his daughters, Mary and Roberta, Miss Pearl Baker and Mrs. W. E. Millions and children, are visiting their relatives in this section.

ENGAGEMENT

TRACEY—MOORE
Mr. and Mrs. R. J. Tracey, of Shawville, announce the engagement of their elder daughter, Katherine May, to Mr. Everett Nesbitt Moore, son of Mrs. Jos. Moore and the late Mr. Moore, of Rupert, Que. Marriage to take place the early part of September.

MARRIED

JACKLE—GLENN
At Flaxcombe (Sask.) United Church on Wednesday, July 21st, by Rev. Banks, of Kindersley, Mildred Isabel, daughter of Mr. and Mrs. Jas. T. Glenn, of Flaxcombe, to Mr. Ferdinand Jackle, of Vancouver, B. C.

DIED

HAMILTON—At the home of his son, Elwood Hamilton, Beech Grove, Que., on Tuesday, August 17th, 1943, Robert Morley Hamilton, beloved husband of Mary Bradley, in his 68th year. The funeral will take place at two o'clock on Thursday afternoon, August 19th, from the home of his son, Elwood, to Wesley Church and Mohr's Cemetery.

Death of a Child

Mr. and Mrs. Carl Mielke, of Schwartz, Que., mourn the loss of their only daughter, Edith Eleanor Louise Mielke, aged two years, one month and twenty days, whose death occurred at Pontiac Community Hospital, Shawville, on Wednesday, August 11th, following a short illness.

Funeral services were conducted at the home of the parents on Friday afternoon by Rev. Shaue, of St. Peter's English Lutheran Church, Ottawa. Interment was made at Zion Lutheran Church Cemetery, Schwartz.

The chief mourners were the sorrowing parents, an older brother, Mervyn, and one grand-parent.

The pall bearers, all dressed in white, were four young girls, Misses Rachel Bretzlaff, Frieda and Angela Zacharias and Lydia Koenig, of Schwartz.

Floral tributes were received from many friends in the community.

W. P. and T. B. Rulings

The sale of veal unfit for human consumption has been forbidden in all parts of Canada by the Prices Board. New regulations forbid the sale of any carcass of veal obtained from a calf less than three weeks old or any veal that has the appearance of being unfit for human consumption in accordance with specifications that are prescribed.

Holders of slaughtering permits, it is announced, are not to be allowed to kill lambs weighing less than 75 pounds live weight during June, July and August of any year. Also prohibited by the Prices Board is the slaughter by anyone of hogs weighing less than 100 lbs. live weight. This order is designed to increase Canada's meat supply by checking what has become a wasteful practice.

Miss May Wallace, of Weyburn, Sask., visited her relatives in town for the week-end.

Mrs. M. L. Wells, of Manassas, Virginia, is spending a few weeks with her parents, Mr. and Mrs. L. J. Fairfield. On her return home she will be accompanied by Mrs. Bob Fairfield and son, Bobby.

Mr. and Mrs. A. A. Macartney and daughter, Jean, of Richmond, Que., visited friends in town during the past week. While here they were the guests of Mr. and Mrs. C. H. MacLean, at Green Lake.

Mrs. Carl Beaton and son, John, have returned to their home in London, Ont., after spending a week's vacation with her grand parents, Mr. and Mrs. Alex Elliott, Austin, and other relatives in Shawville district.

Miss Iva Horner has returned to her home after spending a week's vacation at Wakefield. Previously she had attended Summer School at Macdonald College, where she was successful in the final examinations.

Mrs. M. Johnston, R. N., superintendent of Pontiac Community Hospital a year ago who had resigned to take other duties at her home near Vankleek Hill, has returned as superintendent of the hospital, replacing Miss Graham, R. N., who resigned in July.

Mr. E. P. Hodgins, editor of the Vanguard (Sask.) Times, who came to East to attend the Canadian Weekly Newspaper Convention at Toronto last week, is spending a few days at the home of his brother Mr. Hurst Hodgins, Yarm., and other relatives in the district.

THE WAR - WEEK — Commentary on Current Events

Russians Have Used Artillery Arm Effectively In Most Of Their Wars

Within the walls of Moscow's Kremlin stands a giant tube of ornamented metal weighing many tons. It was cast in 1586, just two years after the death of Ivan the Terrible. For centuries it has been called the "Czar's cannon" in tribute to its size. Today it is a reminder that Russians have long counted on the artillery arm and have used it to effect in most of their wars.

The present struggle is no exception, says The New York Times. Russian reliance on artillery as one of the answers to Nazi Blitzkrieg has proved well founded. Among the Soviet weapons praised by military men are a 45mm. anti-tank gun, the Putilov 76.2mm. field piece, a double-purpose anti-aircraft and anti-tank gun, of the same caliber, and a big 152mm. (six-inch) gun mounted on a 52-ton tank chassis. Used in conjunction with aircraft, tanks and the tactic of defence in depth, smash many a Panzer spearhead. Through much of the war their primary role has been defensive.

Red Pincers Tightening
Last week Russian artillery was being used to good effect offensively. It was playing an increasingly important part in the great Soviet drive on Orel, major Nazi supply base and hinge between the invader's central and southern fronts. For twenty months Germans had been digging in around the city, creating a maze of trenches, pillboxes and strong points miles in depth. To blast a way through the interminable barricade massed Russian batteries laid down drumfire reminiscent of World War I. With their aid the Red pincers slowly tightened, closing in on Orel from the north, the east and the south. After nearly three weeks of ferocious fighting, Soviet legions were within a few miles of their goal. An estimated 250,000 German troops were in danger of entrapment.

Descriptions of the battle by Moscow correspondents pictured enemy reserves being hurled in fruitless counter-attacks against Russian tank and infantry units. The Germans were ordered to fight to the death. Thousands of them did. Their resperate defence apparently was slowing the advance of the Red Army. Nevertheless, the Russians pushed nearer to the vital rail line running west to Bryansk, seized strategic heights north of Orel, crossed the Oka River to the north and south of the city. Red cavalry entered the struggle, seeking to exploit a breach opened by troops pressing up the railway from Kursk.

Widespread Fighting
Activities elsewhere on the long Eastern front were overshadowed by the struggle for Orel. Fighting was reported southeast of Leningrad, where the Red Army appeared to be trying to widen the corridor to the Soviet Union's second largest city. Local clashes continued near Belgorod, where the Nazis' summer drive had come to grief. Moscow communiques told of fresh enemy attacks in the Donbass, evidently aimed at relieving the pressure on Orel, 350 miles to the north.

Behind these vast operations on the Russian front some observers glimpsed the outlines of a new German strategy. It appeared to be a strategy of defence, born of necessity. One of its symptoms was the presence in the Orel sector of a defence weapon Russians have nicknamed "the iron crab"—a mobile armored pillbox for machine gunners that can be transported by truck and buried in the ground wherever needed. The Nazis were also laying vast mine

fields. From such signs it might be deduced that henceforth the German General Staff intends to husband its dwindling manpower against the day when it must defend Fortress Europe on every side.

Hamburg Under Fire
Target No. 1 for last week was Hamburg—Germany's second largest city, its greatest port, a vital centre of coastal and inland shipping, home of many industries. Eight times in six days British and American bombers swarmed over the sprawling city on the Elbe. Observers estimated that 8,000 tons of bombs were dropped in those 144 hours—a weight greater than that the Luftwaffe loosed over England in the eleven-month "blitz" of September, 1940, to July, 1941. At times the bombs came down at a rate of almost a ton a second—a drumfire of huge explosions. Under the impact, docks, ships, barges, cranes, factories and warehouses shuddered into ruins then burst into flames. Clouds of smoke towered five miles into the sky from fires apparently beyond the control of sleepless firefighters. Yet this was not all. Wilhelmshaven, Kiel, Wesermunde, Warnemunde and Wuestrow, all industrial and shipping centres, some of them important U-boat bases—were hit. Inland cities of Hanover, Kassel and Oschersleben—turning out guns, planes and tanks—heard the thunder of planes and the crash of bombs.

What can remain of Hamburg under such repeated and heavy blows only reconnaissance photographs can tell. It seemed clear that important parts of it must be blackened ruins. It was clear also that another objective of the Allies was being realized—the disorganization and extension of the Reich's sorely taxed defences. Pilots on the later raids to Hamburg encountered more planes and heavier flak, apparently drawn from other sections. But that they were not enough was indicated by reports that in the five days, in all raids, 200 German fighter planes were shot down by the Americans alone. The R.A.F. reported its bomber losses were running to only 3 per cent.

Rubber for War

Medium-sized tanks require 500 pounds of rubber, and pontoon-bridge sections over 1,000 pounds. The gasoline tank alone of a Flying Fortress uses 500 pounds of bullet-sealing rubber, while large bombers require over 1,200 pounds. Excavation trucks used by the army with tire diameters of 9½ feet require about 3,500 pounds.

OTTAWA REPORTS

That Farm Living and Operating costs Have Not Risen As Much as Selling Price

Donald Gordon, Chairman of the Wartime Prices and Trade Board has analyzed in the most interesting fashion the Canadian farm economic picture and reinforced with facts and figures the warnings issued by national leaders against the dangers of inflation.

Canada's own dose of inflation after the last war, he said, was small as compared to Germany's, but the benefits conferred on Canadian farmers were equally transitory. Although farm prices in Canada as a whole had more than doubled in the period 1913 to 1920 the apparent improvement in the farmer's position was largely an illusion because farm living cost and operating expenses rose nearly as much.

The slump in farm prices started in 1920 and gained momentum rapidly. In three years they had dropped 50 per cent. But the prices of all those things the farmers had to buy had not fallen as rapidly and taxes and mortgage costs had remained fixed. And by 1923 the farmer had discovered that the relation between farm prices and farm costs had been less favorable than before inflation began. "And so it will be again," said Mr. Gordon, "if we are foolish enough to let inflation take hold."

The Wartime Prices and Trade Board Chairman declared; "The real interest of agriculture is best served by a long period of stable prices. I have no quarrel with those who contend that the farmers of Canada were not receiving a proper return for their labors and who say that—notwithstanding the improvement of the last few years—their position is still not all that it might be. But to-

day we have not the goods and services available to increase the standard of living, or even maintain it. Our resources are pledged in a war for survival—the most costly of all wars."

Paying tribute to the farmers for the magnificent job they were doing in wartime food production, Mr. Gordon told the Alberta Federation of Agriculture that "the agonies of war is no time for any more than that, it is shortsighted to believe that concessions extracted from the community by virtue of wartime shortages could be maintained. Intelligent agricultural leadership will make neither of these mistakes. It would rather study and press for action which will insure stability now and postwar."

After praising Canadian farmers for the increase in volume of food production by more than 25 per cent last year despite manpower shortage, Mr. Gordon went on to discuss the economic position of the farmer today. The official index showed, he said, that farm prices had risen 43 per cent since 1939, and if wheat were left out, prices, on the average were 50 per cent higher, aside from subsidies.

The Wartime Prices Board, he said, had not frozen agricultural prices at a relatively low level as some critics had declared. Not only had there been the improvement in prices referred to, but, he added, there had been more adjustments in prices for farm products than for anything else the Board had dealt with.

Agreeing that farmers' expenses had gone up also, he declared that "taken as a whole, farm living and farm operating costs have not risen nearly as much as the selling price. The margin between income and expenses is almost double the pre-war figure."

Use of Sprained Ankle Is Advised

Immediate and normal use of a sprained ankle and foot, almost irrespective of the type of local treatment adopted, definitely hastens recovery according to Lieut. Commdr. Paul E. McMaster, USNR, writing in the Jour-

nal of the American Medical Association. Uniformly best results were obtained when all pain in the injured part was suppressed by injections of procaine hydrochloride. "Patients who returned immediately to normal activity and used and moved the foot and ankle improved much more rapidly than those who did not," Dr. McMaster said.

GLASSLESS GREENHOUSE... SHATTERPROOF FOR SAFETY...

Up in the nose the bomb aimer sits in a cosy little "greenhouse" all his own. Between him and the stars and empty space below is a curved, crystal-clear material that looks like glass—but isn't. Tougher by far than glass, shatterproof for safety, it is a clear transparent plastic that can be shaped and moulded to serve a thousand wartime uses. Plastics are infinite in variety, indispensable to modern war, and fabulous quantities of pure war alcohol are required to make them. Alcohol plays a vital part not only in the making of plastics, but in the manufacture of synthetic rubber, in keeping fighting planes ice-free, and in the war against infection in hospitals and on the battlefield. Every ounce we can produce is urgently needed. That is why all our plants are now on 100% war production.

"SALADA" TEA

KING HIGGINS
By CAPTAIN FRANK H. SHAW

CHAPTER XX

Higgins snapped: "How much is Hackett paying you for all this?" It was a bow drawn at a venture, but he saw their eyes flicker.

"I'll shoot the first man who moves!" he said, and began to back to the doorway. There, he turned and scudded at full speed for the flacre; leaped to the driving seat and caught the reins from the whip. The men ran from the cafe and began to blaze away at him.

"All right, there?" he threw over his shoulder to a huddled Dolores. Receiving no other answer than a muffled sob, he turned down a noisome side street; found himself heading full tilt into a clamorous horde of frantic humanity.

"Right into it!" he muttered. There was shooting immediately ahead; there was shooting behind as the gunmen came in hotfooted pursuit. At any moment flying lead might strike—possibly kill—the defenceless girl.

The disorganized rabble filling the street from wall to wall was drawing perilously near.

He leaped to the ground, dragged her from the carriage; drew her into a deep dark doorway. A storm of lead poured down the narrow way as he hid so; men fled past, yelling that the day was lost—lost!

He tried the handle of the door, it resisted; he set a capable shoulder against it and thrust with increasing force; felt it give. A moment and he had drawn Dolores within an entry that smelt to high heaven of onion soup and rotten fish. He pushed the door to and searched for a bolt, but his shoulder had burst the single frail bar out of its socket.

"Well, I hope you're satisfied," he said.

"Don Dickie, where is he?" the girl faltered and Dickie realized that she was in the circle of his arm, trembling there like a scared bird.

"I'm not his keeper! You may remember that I want to marry you; why should I worry?"

"You're still hateful," she protested.

"And you're still a fool!" he let

her know. Then he administered a sound shaking, because his nerves, too, were becoming rattled.

"We've got out of this," he muttered; and felt the shaky handrail of a stair. He reached a landing, found another flight of stairs, urged the girl up; just as someone fired at hazard up the stair-well. There was a hoarse challenge from below to which he gave no attention. Another shot was fired and he heard Dolores moan as she collapsed against him.

Dickie's heart stood still in his breast for countable seconds; he supported her; felt her quiver, decided she was still alive. He picked up Dolores' slumped body and reached the upper landing. Even so, unless an exit to the roof offered their position was in no wise bettered.

His seeking hand found a door; he knocked.

"I am locked in!" called small Miguel, the unwitting author of it all. Dickie had taken small heed to whether his destiny was leading him. Even now he did not recognize Miguel's voice. He deserted that door, quested until he found a rickety ladder leading upwards, and up this he, with supreme difficulty, contrived to carry the slumped body of the girl. At the ladder's summit was a trap, opening upwards; he pushed with his head, emerged in freer air. The first thing he saw was the ruddy glow of Monte Callano but the first vivid brightness of the volcano was wanting to some extent.

He took Dolores to the flat roof, and moved to the half-crumbling parapet. Then he literally recoiled, because of the frenzy that boiled below in the street. The mob had ceased to retreat, and was again advancing; augmented by fresh supporters who had entered from the waterfront end. A house blazed some distance up the street, by it glow it was possible to see a writhing mass of close-locked humanity.

"Where am I?" Dolores murmured.

"God knows!" ejaculated Dickie; but it's a good place to get out of!"

The only way of escape seemed to be along the joined flat roofs; and Dickie gathered up Dolores, who weakly protested that she was perfectly capable of fending for herself, and began to make his way along.

"You keep quiet; you've caused mischief enough," he adjured his burden. She accepted his biddance with unaccustomed meekness.

It meant climbing dividing low walls, but progress was made. But it was tedious grimy work, with no definite goal in sight. But presently he saw they had reached the end of the terrace of houses; and the endmost house contained an open patio, with a stair leading to the roof. Down this stair he carried Dolores; and reached terra firma.

"We may be all right here for a bit," he breathed. An infinitesimal fountain tinkled; he drenched his handkerchief in the cool

water and bathed the girl's pallid face. For the first time in an hour he had opportunity to draw a steady breath and think of the future.

"I suppose you're pleased with yourself!" he said with more than a touch of acerbity. "You seem to get your friends into most unholy messes."

Then he realized that she was crying, crying like a frightened baby. He sat beside her on the rim of the fountain, put his arms around her. Like the child she really was, she clung to him, shaking all over to her sobs. A thrill went through him—in her hour of real distress she was turning to him.

"I still think you deserve a spanking!" he assured her. "Why should you blame me so bitterly, Don Dickie?" she murmured, making no attempt to rid herself of his embracing arms.

"In love with this famous Dictator, aren't you?" he answered her question with another.

"I—I don't know."
"The best thing you can do is to get home to bed and take some aspirin," he said rather foolishly, but very humanly. "And the sooner you stop meddling with affairs too big for you, the better for everybody concerned."

"Take me home, Don Dickie," she wailed; "I'm—I'm frightened."
"I'll scout around a bit," he offered. "Sit tight here."

Some groping was necessary before he could discover an exit from this unknown house which had offered involuntary hospitality.

"If you feel able to walk, let's be going," he said.

It called for a long and difficult circuit before the comparative security of the Plaza Grande was reached. By now this open space had assumed the semblance of an armed camp; but leadership was woefully lacking; parties of Guardsmen moved aimlessly or rested on their arms; and the machine-guns were unmanned.

Dickie had secured a stray flacre during the poignant pilgrimage. "The sooner you're with your mother, the better!" argued Dickie, and drove to the Casa Falleiro. Donna Elenora received the pair with exclamations:

"Off to bed, child!" she commanded. So the girl who had pictured herself as a second Joan of Arc, heading a victorious army in this fight for freedom, was packed off ignominiously to her own room and obscurity; where, being thoroughly frightened, she cried herself to sleep.

THE JUMPER OR PINAFORE

3463
SIZES
10 - 20

Such a charming custom, this mother-and-daughter fashion — and just as nice for big and little sister. This jumper frock, for instance, if you make it up in a clean-looking little print, makes mother look younger and daughter feel more grown-up. Both make cool, comfortable sun-backs, to wear without the blouses. And if mother does the sewing, the two should cost less than the price of one ready-made.

Style No. 3463 is designed for sizes 10 to 20. Size 16 requires 3 3/4 yards 35-inch fabric for the pinafore, and for blouse, 1 1/2 yards 35-inch.

Style No. 3430 is designed for sizes 8 to 16. Size requires 2 1-8 yards 35-inch fabric for the jumper; 1 1/2 yards 35-inch for the blouse.

Send TWENTY CENTS (20c) for pattern to Louise Lennox, Room 421, 73 Adelaide St. West, Toronto. Write your name, address and style number. Be sure to state size you wish.

Christie's Biscuits
"There's a wartime duty for every Canadian"

One Way of Killing Poison Ivy Weed

There is only one way we know of killing the weed that leads a stinging existence under the name of poison ivy, says The Winnipeg Free Press. Put what you like on it, and it survives. But get it by the roots, and tear, and drag, and dig, and pry it out, following its root foot by foot, yard by yard, perch by perch, and mile by mile, until its baneful length is eliminated.

That, and that alone, is, we believe, the least scientific or horticultural cure for this running sore of a weed. But that is the only cure we have found that does away with the pestilence, insuring next year that the weed will not be where it certainly was before you tore it out by the roots this year.

Others may talk over the fence about the action of a pound of borax spread over 30 square feet of the affliction known as poison ivy, but we're all for getting at the root of the matter.

Owens Only Hansom Cab In London

A hansom cab, newly painted, with yellow wheels and shafts and driven by an elderly man in a fresh gray billycock, has been seen of recent weeks in the streets of the City of London.

Cab and cabby are believed to be the last survivors of London's hansom-cab era, but they have not been brought out of their retirement and tittivated up merely to amuse soldiers from America. Some months ago Sir Edward Wilshaw, the chairman of Cable and Wireless, Ltd., laid up his car and hunted London for a hansom cab in which he could pay his business calls.

He now owns the only hansom cab on the streets of London and the best-looking cab seen in London for years.

SADIE B. CHAMBERS

Nutritious Summer Salads

Some women have a tendency to serve the lightest of salads during hot weather. With ordinary meals, this is ideal, for our bodies do not require as many calories in summer as in winter.

But how about making the salad more nutritious and serving it as the main-course dish? This reduces your calories still more, keeps from over-heating your home, makes it easy to prepare a meal, and gives a decided change. Summer greens may be combined with such healthful foods as chopped meats, eggs, and cooked, dried Lima beans to form dozens of delicious salads of this kind. Most of the ingredients called for in the following recipes, are already in your stock.

- Harlequin Salad**
1 cup cooked, dried Limas
1 1/2 cups chopped tongue or ham
3 hard-boiled eggs, sliced
1 tomato, peeled and sliced
1/4 cup chopped pickles
1/2 cup French dressing
1 head lettuce
Sour cream or mayonnaise salad dressing
Prepare and combine meat, Limas, eggs and pickles. Mix with French dressing, let stand 1 hour in a cold place. Pile on a bed of lettuce and garnish with the sliced tomato.
- Savory Lima Salad**
2 cups cooked, dried Limas
1/2 cup finely cut celery
2 small green onions
2 tablespoons chopped green pepper
2 hard-cooked eggs
2 tablespoons chopped Pimento
1 cucumber, sliced
1 tablespoon chopped parsley
Combine all ingredients and mix with highly seasoned French

dressing. Arrange on lettuce leaves.

- Cauliflower Orange Salad**
3/4 cup shredded raw cauliflower
3 oranges, cut in small pieces
1/2 cup diced celery
3 tablespoons minced green pepper
Salt and onion juice to taste
Combine ingredients in order given and chill. Place on individual plates on a salad green and serve with favorite salad dressing. Serves 6.

Miss Chambers welcomes personal letters from interested readers. She is pleased to receive suggestions on topics for her column, and is always ready to listen to your "pet peeves." Requests for recipes or special menus are in order. Address your letters to "Miss Sadie B. Chambers, 73 West Adelaide St., Toronto." Send stamped self-addressed envelope if you wish a reply.

Natural History

Every day of its life, an oyster draws from four to five gallons of water through itself.

A few hours after it's born, a baby zebra can run as fast as its papa and mamma — and that's fairly fast.

The albatross with a wing spread of more than 12 feet, has to take off much like an airplane, facing the wind, then running a short distance and finally taking off. But once it's in the air, it can

The deadliest species of the African jungle isn't the tiger, the lion or the snake, but the driver ants which, swarming in millions, proceed to eat serpents, human beings and animals — and don't even fear to feast on a live elephant.

Brave is the mongoose, a member of the civet family chiefly inhabiting India, which is about the size of a ferret, but fearlessly attacks and kills the most poisonous of snakes. Quantities of the mongoose were brought from India to Jamaica, where they did a good job in snake extermination.—Neal O'Hara.

Maple Products Down in 1943

According to a preliminary estimate, there was a considerable decline in the production of maple syrup and maple sugar in the four producing provinces in Canada in 1943. The crop is estimated at 2,358,200 gallons of syrup and 2,416,000 pounds of sugar, a total of 2,299,700 gallons, when calculated as maple syrup. This falls short of the 1942 crop of 3,250,600 gallons, by 950,900 gallons, or 29 per cent. The 1943 crop moved into market rapidly at higher prices than in 1942, the bulk of the sales being made direct to the consumer. The total value of the crop is estimated at \$5,750,000, a decrease of \$966,300, or 14 per cent compared with the 1942 crop which was valued at \$6,716,300.

Canada's only competitor in the production of maple syrup and maple sugar is the United States. According to reports issued by the United States Department of Agriculture, about six per cent fewer maple trees were tapped in 1943 than in 1942. The 1943 crop or 2,555,000 gallons of syrup in the ten producing States was 12 per cent below the 1942 total of 2,915,000 gallons while the maple sugar production of 578,000 pounds showed a similar decrease from the 654,000 pounds produced in 1942.

Appeal to Farmers to Alleviate Shortage of Wood

National Selective Service Director Arthur MacNamara stated Saturday that he is appealing to every farmer in Canada to go into the woods to help boost Canada's production of fuel and pulpwood.

Between 600,000 and 700,000 circular letters have been mailed to the farmers in the Dominion urging them to take wood cutting jobs when their crops have been harvested, said the manpower chief.

MacNamara, while stating that at present the Department of Labor is not considering plans to exempt wood workers from military service, said he was confident that the shortage of pulpwood required to fill the needs of both domestic and foreign markets would be met.

There is every chance, if the farmers respond to our appeal, that the requirements will be met and that the shortage of newsprint for export to the United States will be overcome, said the National Selective Service Director.

In his letter to the farmers of Canada, MacNamara pointed out that farmers may obtain permits to work in logging, lumbering and coal mining industries for sixty days. At the end of that time, they may appeal for an extension permit.

"Canada needs wood workers as well as farmers", said the manpower chief in a circular letter, which also bears the signature of Labor Minister Humphrey Mitchell.

"In slack periods, farm workers are urged to take work at logging, lumbering, coal mining and fishing", the letter said.

New Booklet on Fattening Poultry

Here are a few pointers concerning the fattening of poultry for market taken from the publication, No. 745 "Fattening Poultry for Market" issued by the Dominion Department of Agriculture and embodying the results of investigations over a number of years by the Poultry Division, Central Experimental Farm, Ottawa.

The types of birds which require fattening are cockerels of all ages, whether marketed as broilers, fryers, or roasters. Capons need little, if any, fattening because as a rule they are sufficiently fat and soft fleshed, if killed off range. The labour and cost of fattening roosters, pullets and hens are rarely justified. Cockerels of the light breeds, such as Leghorns, are uneconomical and are discriminated against on most markets.

Soft feeding in fattening crates is the most satisfactory method. Pen fattening is the logical substitute for crate fattening but should be considered only as a substitute. Diseased or very unthrifty birds should not be put into fattening crates. All feeds should be soft mixed, using skim-milk, butter-milk, or whey. The value of cereal grains is as follows in descending order of efficiency—corn and oat groats or hull-less oats (equal), buckwheat, wheat, oats, and barley. Ten per cent of meat meal or five per cent of rendered beef or mutton fat makes an excellent supplement to the ground cereal grains.

Freedom from draughts and sufficient change of air are important in the fattening room which should be somewhat darkened between feedings. Temperature, if within reasonable limits is not an important factor in fattening, because in the investigations average temperatures of 35, 53 and 60 degrees F. gave satisfactory results.

These and other points which cover the important factors in feeding and management will be found in the publication which may be obtained free by writing to Dominion Department of Agriculture, Ottawa.

Now..YOU can be a Fighting Airman in Double-Quick Time

The R.C.A.F. wants MORE Able-Bodied Men for Aircrew

THERE'S a place actually waiting for you in the gallant band now flying and fighting in R.C.A.F. planes on many different fronts.

More men are urgently needed to increase the attack—to bomb and blast the enemy into unconditional surrender. So, whatever work you are now doing, don't let adventure and glory pass you by. It's your great chance. A job, even in a war factory, is no longer as essential as fighting in the air. This is a call to every young Canadian who can make the grade.

Planes and Schools are Ready to Train You Quickly

You will be in Air Force uniform right away. No more delay getting into aircrew. Basic training begins at once. Skilled instructors are waiting. Fast planes are waiting. If you are physically fit, mentally alert, over 17½ and not yet 33, you are eligible. You do not require a High School education.

Aircrew Needed Now for Immediate Training as
PILOTS
NAVIGATORS
BOMBERS
AIR GUNNERS

Shawville Council

Shawville, Que, Aug 2nd, 1943
The regular meeting of the Municipal Council was held at Hynes' Hall on the above date.

Present:—Crs Caldwell, Cotie Smith, Prendergast and Rennieck.

In the absence of the Mayor it was moved by Cr. Cotie, seconded by Cr. Smith, that Cr. Caldwell preside over the meeting.—Carried.

Moved by Cr. Cotie, seconded by Cr. Prendergast, the minutes of the last meeting, which were read by the Secretary Treasurer, be adopted.—Carried.

The following bills were presented to Council for approval:—
Gatineau Power Company... \$51 00
Gatineau Power Company... 53 85
Farley and Cassels... 24 00
Mrs. R. Howard... 5 00
Mrs. L. E. Thomson... 5 00
Provincial Treasurer, re. Mrs. Wallace Hynes... 56 84

Moved by Cr. Smith, seconded by Cr. Cotie, that the above bills be paid.—Carried.

A delegation was received from the Holiness Movement Church regarding their water privilege at Shaw Lake. The Committee represented to Council the Holiness Movement Church has a 15 foot right of way to the Lake for water supply to be exchanged for perpetual water supply to Camp Grounds, from the Shawville Water Works. The Committee was requested to produce the Deed at next meeting of Council, for examination and further consideration of the matter.

Moved by Cr. Smith, seconded by Cr. Cotie, that the meeting adjourn.—Carried.

H. C. ROWAT,
Secretary.

Minutes of Clarendon School Board

At a regular meeting of the Clarendon School Board held on July 30th, 1943, the following resolution was adopted.

Motion by Comr. Hodgins, that a rate of 10 mills on the dollar be and is hereby levied on all taxable property in this School Municipality, to defray the expenses of this Board for the School year 1943-44. Three per cent discount will be allowed on current tax up to Dec. 15th. Five per cent interest will be charged after January 1st, 1944.

New England Canal Offers Haven to Ships From Subs

The Cape Cod canal, now reopened after being closed for several weeks by a ship that sank across the channel, lessens the sailing distance between New York and Boston about 70 miles.

When ships must go around the cape they are exposed to submarine attack, and they also enter waters that are particularly treacherous. A thousand ships are estimated to have been wrecked there during the first two decades of the century. Huts were built on the beach to shelter wandering survivors, as early as 1798.

Charts of the 17th and 18th centuries show possible routes for a canal through the cape, and work was started several times. The successful effort began in 1909. The canal, completed in five years by a private corporation, cost about \$13,000,000.

During the first World war, the war department assumed temporary control, and in 1923 the canal was purchased by the federal government for \$11,500,000. Building locks and enlarging the bed later brought the cost to about \$40,000,000. No tolls are charged.

NOTICE

The Renfrew Dry Cleaners will be closed for repairs from August 12th to 21st, inclusive.
RENFREW DRY CLEANERS
Renfrew, Ont.

Handy Back Shields

Ugly discoloration of perspiration on the back or shoulder of valued silks and synthetics can be avoided by sewing or pinning in a lightweight back shield which will keep perspiration from soiling the dress.

Back shields may be bought in department stores and dime stores. They are made of washable cloth, sometimes of cotton, sometimes of silk, sometimes of cotton net. The last is particularly good for very sheer dresses. They can be bought ready-made or can easily be made by hand or machine. Use the back pattern of any dress or blouse to cut out the material, and hem all around. Fasten to the inside of the dress at the shoulder seams with small stitches or tiny safety pins.

Down Near New Guinea

The Aroes, lying northeastward toward New Guinea from the Tanimbars, also consist of a large main island and many islets. The main island, Tanabesar, 120 miles long and 50 miles wide, is divided by several shallow channels. The town of Dobo, on one of the small islands, provides good harbor facilities.

The Kai group, northeast of the Tanimbars and west of the Aroes, is the most fertile and most populated. It includes mountains up to 3,000 feet and dense forests supplying excellent timber for the native boat-building trade. Harbors at Doelah and Elat are well concealed. Small shore settlements are numerous, and abundant fish supplement coconuts, bananas and maize in the native diet.

Suspend Crow Control Contest

Indiana's annual crow control contest, which has accounted for nearly 400,000 black marauders since its inception in 1934, has been suspended for 1943, the division of fish and game has announced. "While there is need for continuous control measures against the crow," the announcement states, "it was felt that no organized campaign should be sponsored this year when gasoline and tires are being rationed and when ammunition for sporting guns is increasingly difficult to obtain. This does not prohibit the individual conservationist from killing crows, nor does it prevent a club from continuing activities against crows in its community."

Could you do this with your present cream separator?

YOU WOULD BE PERFECTLY SAFE WITH A Renfrew

Of course, you wouldn't operate your separator in the best room of the house. This is just to impress you with the absolute cleanliness of a Renfrew. No splashing of oil—no greasy, insanitary, fly-attracting mixture of oil and milk, making a mess of both machine and floor. The oil necessary to the operation of a Renfrew goes in at the top and remains inside until it is time to change it.

This is only one outstanding feature of the Renfrew Separator. Others include the low supply tank, ease of operation, close skimming—and highest quality and performance at a reasonable price. You can buy your Renfrew from the man you know—Renfrew's own representative in your neighborhood. He is responsible to you and we stand behind him and all the Renfrew products he sells.

How Can I??

By Anne Ashley.

Q. How can I clean oak furniture?

A. For oak or walnut furniture, wipe with cheesecloth wrung out of tepid suds of white naphtha soap. Clean but a small portion at a time and rub dry with a flannel cloth before going on. Finish by applying a little high grade furniture polish on a clean piece of flannel, and rubbing until the wood no longer feels greasy.

Q. How can I remove discolorations from the inside of an aluminum kettle?

A. Cut a piece of rhubarb into small pieces and boil it in the discolored utensils until clean; then rub up a little for polish. Apple peelings are also good.

Q. How can I remove the odor of smoke from a room?

A. Put a basin of water in the room, leave overnight and keep a window slightly open. The air will be sweet by morning.

Q. How can I whiten yellowed laces?

A. Add dissolved soap to equal parts of milk and water until a strong suds is formed. Add a teaspoonful of borax for each quart of liquid, put in the lace and boil for a half hour.

Q. How can I remove white spots from mahogany furniture caused by hot dishes?

A. Put a few drops of sweet or camphorated oil over them and let it soak in, then polish with a soft cloth.

COUNT IN?

Count Dino Grandi, above, one of Mussolini's original black shirts and a former Italian foreign minister, is rumored as a successor to Badoglio if latter quits the premiership.

Many specimens of goby, one of the smallest species of fish, live their entire lives inside sponges and larger fish.

Modern Etiquette

By Roberts Lee

1. What are the principal duties of the best man at a wedding ceremony?

2. How can an unmarried woman, living in a hotel, return the hospitality shown her by married friends who have entertained her?

3. Is it permissible to eat the lettuce on which a salad is served?

4. What is the correct way to hold a coffee cup in the hand?

5. How far under the table should the chairs be pushed, when placing them for a dinner?

6. Should a secretary rise when an employer introduces her to a business visitor?

ANSWERS

1. The best man looks after the groom, generally driving him to the church. He takes care of the ring, giving it to the groom at the proper moment. He gives the clergyman his fee, and takes care of any tips incidental to the going away, being, of course, reimbursed by the groom at a convenient time. 2. By taking time to dinner at the hotel or restaurant. 3. Yes, if you wish. It is entirely optional. 4. The handle of the cup should be held by the thumb and first two fingers, the other two fingers being bent slightly towards the palm of the hand. 5. The front edge of the chair should be on a perpendicular line with the edge of the table. 6. Yes, if the secretary is a man; if a girl, no.

Roll your owners! Go for Ogden's

A Farm Wife Chats To Women

By Gwendoline P. Clarke

Picking berries must be as contagious as measles. Two weeks ago, if you remember, I deplored the fact that picking wild berries had apparently gone out of fashion. And it had, but the price of tame berries changed all that. Now it seems, the world and his wife are all out in the berry patch. It is really funny. You know there is something about picking wild berries that is quite fascinating. When you come to a really good spot where the branches are literally drooping with rich red, or black fruit, as the case may be, you get so excited that you pick with almost feverish haste, just as if you were afraid something was going to happen to those berries if you didn't hurry up and get them picked the next few minutes. But where the berries are few and scattered you just sort of putter around and take your time.

But don't think picking berries is the only excitement in the berry patch—far from it. Yesterday, for instance, we were told of a new place to explore—fifty acres of bushes where no one had ever picked. The owner of the bush directed us. The road in was long, narrow and uphill all the way for about a mile and a half. Fortunately it wasn't too rough for the car. And then we came to the berries—and the mosquitoes came to us! Swarms of them. They lit on every piece of bare flesh they could find; they buzzed around our eyes and ears and in five minutes I was ready to turn tail and run for home—only I didn't like to suggest it. But presently the mosquitoes decided they didn't like the queer odor that emanated from our clothes and persons—for believe me, we had just about saturated ourselves with a mosquito repellent—and finally we were left to pick in comparative peace.

But there were other enemies abroad. One time Mrs. B. and I were picking from the same bush in the middle of which was the stump of a tree. Said Mrs. B. to me—"Do you see this queer looking piece of wood on this stump?" and then almost in the same breath she added—"Oh, I'm stung—it's a bee's nest!" Sure enough out came a swarm of angry yellow-jackets after us and down through the bushes crashed two

frightened women. It was a wonder we didn't fall and break our necks for the going was decidedly rough in that particular spot. But we didn't fall, and we didn't spill our berries, but we did get away from the bees.

About four o'clock we all made our way back to the car thinking what a treat a good cup of tea was going to be. But alas, the rough road had been too much for my thermos. The inner container was smashed into a hundred pieces and my precious, life-renewing tea was all over the floor of the car. I could have wept. However, Mrs. B., like the good soul she is, shared her thermos with me. But oh dear, just as she had a cup of tea poised for drinking, a mosquito, whom she had not met before lit on her hand. Mrs. B. smacked at him with her free hand—and away went more tea.

Of course we also managed to lose our bearings every little while when we were picking, but we always managed to find ourselves again in spite of the fact that Mrs. M. was determined to head in the opposite direction each time we made for the home trail where we left our big pails.

And by the way, I wish you could have seen us in our full dress regalia when we set out for the berry patch. Mrs. M. wore a pair of men's overalls, a man's shirt over the overalls, and an old straw hat. Mrs. B. was quite in style in a blue denim overall suit that really fitted. As for me I dug up my son's mechanic's overalls. We really looked quite respectable when we started, but coming home a tramp would have put us to shame. We were hot, dirty, scratched and bitten, yet we made our homeward way like conquering heroes, for in our pails were berries, lots of them—great, red luscious berries, which, if I know anything, are going to taste mighty good during the long winter months that will soon be lying ahead of us.

So there you have my berry experience. I wonder what has been yours? I hope none of you were too old, too stiff, too lazy or too superior to take advantage of Nature's bounty! Sometimes I looked around at the berries—far more than we could pick—and I thought what a sin it was for so much fruit to go to waste. And I looked at the aeroplanes flying overhead and I wondered if the time would ever come when we would go berry-picking by plane. Just sort of drop out of the blue from one of these helicopter planes, pick our berries and away again to another patch. Sounds crazy—but who can tell?

SUNDAY SCHOOL LESSON

August 22
GOD GIVES LAWS FOR HIS PEOPLE—Exodus 19—24; Deuteronomy 11: 18-21; Galatians 3: 23-28; 5: 13, 14.

PRINTED TEXT, Exodus 23: 1-9; Galatians 3: 23-28; 5: 13, 14.

GOLDEN TEXT—Thou shalt love the Lord with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind; and thy neighbor as thyself. Luke 10: 27.

Memory Verse: He hath made everything beautiful in its time. THE LESSON IN ITS SETTING Time—1445 B.C.

Place—At the foot of Sinai.

Spread Not False Reports

"Thou shalt not take up a false report; put not thy hand with the wicked to be an unrighteous witness." How many heedless whisperers, conjectures lightly spoken because they are amusing, yet influencing the course of lives, and inferences uncharitably drawn, would have been stillborn if this had been remembered! But when the scandal is already abroad, the temptation to aid its progress is still greater. Therefore it is added, "Put not thine hand with the wicked to be an unrighteous witness."

"Thou shalt not follow a multitude to do evil; neither shalt thou speak in a cause to turn aside after a multitude to wrest justice." The blind impulses of a multitude are often as misleading as the solicitations of the bad, and to aspiring temperaments much more seductive. There is indeed a strange magnetism in the voice of the public. Every orator knows that a great assembly acts upon the speaker as really as he acts upon it. Its emotions are like a rush of waters to sweep him away, beyond his intentions or his ordinary powers. Yet he is the strongest individual there; no other has at all the same opportunity for self-assertion, and therefore its power over others must be more complete than over him.

Peaceful Contact of Foes
"Neither shalt thou favor a poor man in his cause. To countenance or honor the poor man in his cause is to connive at his criminality from a mistaken compassion for his poverty. This rule is extended to the rich as well as the poor in Leviticus 19: 15.

"If thou meet thine enemy's ox or his ass going astray, thou shalt surely bring it back to him again." He that meets his enemy's beast going astray is not only not to be silent on the subject, but not to refrain from interfering. He is to bring back the straying animal to his enemy, as if he were a friendly brother.

"If thou see the ass of him that hateth thee lying under his burden, thou shalt forbear to leave him, thou shalt surely release it with him." In this verse there is a climax: the enemy (one hated)

is actively hostile. The beast is in sore distress; and the help extends to peaceful contact of the foes. The suggestion is, that hands would have to meet in jointly raising the fallen ass.

The Needy Brother
"Thou shalt not wrest the justice due to thy poor in his cause. Keep thee far from a false matter; and the innocent and righteous slay thou not; for I will not justify the wicked." We return again to truthfulness of speech. The needy and dependent are exposed to oppression and injustice in a selfish world. But the man of God is not to wrest the judgment of the needy. Thy needy, thy brother who is needy. This touches the feelings of a common humanity.

"And thou shalt take no bribe; for a bribe blindeth them that have sight, and perverteth the words of the righteous." This passage refers to bribery, and how true it is! Gifts have been the cause for false decisions in court, for favors in universities, for unfairness in business relationships, and for many other unjust acts on the part of men—giving favors to those who deserve not, and keeping back honors from those who are entitled to them.

"And a sojourner shalt thou not oppress: for ye know the heart of a sojourner, seeing ye were sojourners in the land of Egypt." This verse is a repetition of 22:21, but the precept is there addressed to the people at large, while it is here addressed to the judges in reference to their official duties.

Law Leads To Christ

"But before faith came, we were kept in ward under the law, shut up unto the faith which should afterwards be revealed. So that the law is become our tutor to bring us unto Christ, that we might be justified by faith. But now that faith is come, we are no longer under a tutor. For ye are all sons of God, through faith, in Christ Jesus. For as many of you as were baptized into Christ did put on Christ. There can be neither Jew nor Greek, there can be neither bond nor free, there can be no male and female; for ye all are one man in Christ Jesus." Paul insists that the law had kept the Jews in the state of children under a tutor to prepare them for the acceptance of Christ. On the other hand, faith in Christ had brought them into the position of full-grown sons, to whom belonged the privilege of free access to the Father, into whose hearts God had sent the Spirit of His Son, and who had indeed entered upon their rightful heritage.

Law Fulfilled in Love

"For ye, brethren, were called for freedom; only use not your freedom for an occasion to the flesh, but through love be servants one to another. For the whole law is fulfilled in one word, even in this: Thou shalt love thy neighbor as thyself." The Apostle here means to say that just because we are not under the law but under grace, we are not to live as we please, to satisfy our own selfish instincts and desires, but we are to live in love for one another.

Swordfish liver is one hundred times richer than cod liver in vitamins A and D.

Morale of U-Boat Crews Still Good

Reports from neutral and unofficial sources of bad morale amongst U-boat crews should be heavily discounted. Discipline in U-boat service is still good. As in the last war, U-boat service

gets the cream of German seamen and priority of supply. Contrary to general belief, there was no break in U-boat morale at the end of the last war, and U-boats must, despite Allied successes in the last two months, still be regarded as an extremely formidable and well-tempered weapon, despite their growing training difficulties.

A REQUEST

The Equity is very thankful to those who send in items of news; very often however, these items are sent to the office at the last minute, and this delay upsets our work routine. Our type is limited and at times a worthwhile news item arrives when forms have been exhausted on items of less importance. Considerable time is required to put news contributions into type. We will appreciate having news items as early in the week as possible to reduce the last-minute rush.

Elmside Women's Institute

Mrs. Leonard Angus was hostess to the members of the Elmside of the Elmside Women's Institute on August 11th, with the president, Mrs. W. J. Murray, presiding. Ten members and nine visitors were present.

The meeting opened by singing the Ode and repeating the Collect. Discussions followed regarding butterfly quilt, apron, school border, 30th anniversary and home beautification banquet.

Arrangements were completed for School Fair to be held at Elmside on September 10th, also exhibits for Shawville Fair, fifteen sick visits were reported.

Correspondence was received from Stewart Murray, Dave McWhirter, Gilbert Young, and Leslie Smith.

A very interesting paper on the "Joy of Work" was read by Miss Sarah Campbell.

Roll call—Demonstration of a reducing exercise.

The members were pleased to have Mrs. Charles Ade, of Sudbury, Ontario, address the meeting. Two ditty bags are to be filled at the next meeting.

The meeting closed by singing the Maple Leaf.

Refreshments were served by the hostess, assisted by Misses Joan Angus, Eileen Fitzimmons and Margaret Roy.

Gasless Days Bring Back

Community Sings, Dances

Good, old-fashioned community sings, and band and orchestra concerts are coming back with gasless days.

With tire and gas rationing and defense work holding people in their own communities, the home town music fans are dusting off their pianos and tuning up their fiddles.

Not only has music become a community entertainer, but also it has placed the high school music director in a more responsible position than ever. The need for high school bands, orchestras, and choral groups to fill the gap of much-needed entertainment for war purposes and public morale is greater than ever.

Victory concerts for war effort drives, send-off parades for selective service men, community sings for war defense workers, high school group entertainment for nearby army camps and USO centers are some of the jobs which the high school music director must assume.

Because of a Curious Boy

Another idol of history is knocked from his pedestal. In his place stands a curious boy.

Although Galileo has long been named in the history books as the inventor of the telescope, which opened the path to our knowledge of the universe, recent researches indicate that the telescope actually was discovered by a curious boy. It is said that the children of a Dutch spectacle maker, Hans Lippershey, were playing with some old spectacle lenses, all of which then were made circular, and one of the boys held up a combination of lenses before his eyes and was delighted to find that distant trees appeared to be close at hand. Lippershey made many experiments in 1608, and in the following year Galileo so improved upon Lippershey's telescope that he was able to see the mountains of the moon.

Canned Ham and Eggs Is

Newest Food to Be Sold

The 365 items of canned food have added a new member to their ever-increasing family—ham and eggs, America's favorite breakfast duet.

The food-canning industry, which in normal years rolls out approximately 12 to 13 billion cans of various kinds of edibles, actually began in the days of the Napoleonic wars.

The French government, seeking to feed Napoleon's hungry soldiers on far-flung battlefields, offered a prize of 12,000 francs to anyone who could "preserve" food for the armed forces. In 1809, 14 years after the offer was made, Nicholas Appert, a Parisian confectioner, received the award. His method of sealing certain foods in stoppered glass bottles and heating them in boiling water was made public in 1810 and other countries rapidly picked up the method.

In England a search began for a cheaper and better container. Appert's heavy glass bottles were too cumbersome for shipment. A tin canister, similar to the one used for packing tea, was used. Thus the canister, shortened to "can" by Americans, came into being.

Canned goods were taken with Sir William Edward Parry on his voyages in search of the Northwest Passage between 1819 and 1826.

Illegal Collectors Almost

Destroy Balata in Guianas

The Guianas, earliest source of balata, a rubber-like substance, exported three to five million pounds annually from 1910 to 1923. Meanwhile British and Dutch officials established regulations designed to keep the trees alive. They banned felling by the gum collectors and limited the extent of tapping and retapping. They licensed collectors and registered laborers. Forest rangers and land officers policed the industry. But regulations deep in the jungle were easily overlooked by workers paid for each gallon of production. Depletion of accessible trees is shown by the drop in Guianas production in 1940 to less than 800,000 pounds. Unrestrained by conservation laws, balata collectors attacked Venezuela's jungles in 1906 and for 15 years averaged over three million pounds of export balata annually. It is estimated that in this period they left nearly 40 million fallen monarchs to decay in the forest. Venezuela's 1940 export total was under 300,000 pounds.

By felling a mature balata tree, about three gallons of gum can be drawn off, producing 16 pounds of dried export gum. By restricted tapping of the standing tree it is estimated that a gallon of the milky latex yielding five pounds of balata may be taken every second or third year for many years.

Northern Brazil, untouched in the early years of balata production, recently has been the outstanding source. Brazil exported over five million pounds in 1940—about three-fourths of the year's total for all South America.

Metallurgy Is a Term

With Broad Meaning

The worker in the laboratory will tell you that metallurgy is the science and art of extracting metals from their ores, refining them and preparing the resultant metals for actual use. Metallurgy also includes the many and varied processes by which the structure and properties of metals are changed, such as rolling, forging, swaging, stamping, heat treating and many others. Metallurgy is, indeed, a broad term, as well as an advanced and highly specialized science.

The growth of our modern mechanical civilization has been to a great extent dependent upon this science, writes Eugene W. Nelson in Nature Magazine. Today more than ever before in all history we live in an age of metals. Some call it the Iron age and others the Age of Steel. Still others prefer the Aluminum age or even the Age of Alloy Steels.

CARDS OF THANKS

The family of the late Mrs. John Murphy, Blaine Lake, Sask., and Charleris, wish to express their appreciation for the many kindnesses and evidences of sympathy shown by their friends and neighbours in their recent bereavement.

Mr. R. A. Hodgins and family, desire through The Equity, to express their heartfelt thanks for many kindnesses and manifestations of sympathy from friends and neighbours during the illness and death of their beloved wife and mother.

Great Lakes Ships Being

Moved Down Inland Rivers

Ships formerly operated on the Great Lakes are now being converted for wartime use as ocean shipping at yards in New Orleans, Mobile, Ala., and Galveston, Texas, the war shipping administration discloses.

The vessels, all built in the early 1900s, averaged about 4,000 gross tons and are between 350 and 400 feet long. They were moved down the Illinois waterway and the Mississippi river after their superstructures had been stripped down to permit passage under numerous bridges.

The boats are among dozens which have been moved from Great Lakes routes for wartime ocean transport duty. Government authorities declined to reveal the number. In addition to the inland route to the Gulf, a number of ships have been taken down the St. Lawrence waterway and the New York State Barge canal.

Practically any boat now operating on the lakes, one government official said, could be moved over the inland route to the Gulf, provided there is proper ballasting and, in some cases, removal of superstructure and machinery. By such procedure the boats may be held within the maximum draft of eight feet.

A \$2,000,000 navy project, in which machinery for moving or lifting 17 bridges on the Chicago sanitary and ship canal is being provided, will reduce difficulties with moving the larger boats.

Rubber-Like Material in

Golf Balls Is Not Rubber

Maybe it was just so much hard rubber to you. The tough golf ball cover that took the full force of your hook or slice before you gave your clubs to the salvage drive was not rubber, however. In most cases it was gutta percha; in some, it was balata.

Dimple or mesh, there will be no more of these useful gums for golf balls for the duration. Gutta percha came largely from Borneo, Sumatra and Java. Balata, its first cousin, from South America, now must do double duty. The War Production board recently issued strict regulations governing uses of the limited balata supply.

Balata, like gutta percha, is flexible but hardly elastic, says a National Geographic society bulletin. Neither can qualify as a versatile rubber substitute, but both have well-established uses that ease the critical demand for rubber. Strong, tough, water-resistant nonconductors, they are invaluable as ocean cable coverings. Also, they are used to make industrial belting, boot and shoe soles, dental packing and plates. One of balata's military assignments is in the manufacture of self-sealing fuel tanks for airplanes and other modern war vehicles.

Qattara Depression

The Qattara depression is situated between Libya and the Nile delta, its northern rim lying about 40 miles south of the Mediterranean sea and its extreme eastern tip extending to within 130 miles of Cairo. About one-half of its total area of 6,950 square miles is over 160 feet below the level of the Mediterranean and at one point in the south is 440 feet below sea level. This region of sand dunes, alkali flats and salt plains and marshes, narrows from a broad base in the southwest to a tip in the northeast, with concave edges on the east and south. Caravan tracks cross it from south to north-east and from east to west but no good roads reach the depression. There are small settlements around the few springs and oases along the northern and western fringes.

Valley Forge Chapel

Washington Memorial chapel at Valley Forge is under the auspices of the Episcopal church. All wedding arrangements must be made directly with the chapel office. According to the requirements of the Episcopal church, at least three days' notice of the date of the wedding is required before the rector can officiate. Dr. John Robbins Hart is rector of the chapel. If the wedding ceremony is to take place between 8 a. m. and 5 p. m. the fee for use of the chapel is \$10, and after 5 p. m. the fee is \$15. Those arranging the wedding can bring their own organist and there will be no charge for use of the organ. If they wish to obtain the services of the chapel organist there will be a \$10 fee.

RATION BOOK 3

— WHEN AND WHERE YOU GET IT

RATION BOOKS WILL NOT BE MAILED OR DELIVERED — THEY MUST BE CALLED FOR

For the convenience of the public and to ensure speedy distribution, Ration Book 3 will be issued locally at the distribution centres listed below.

FOUR THINGS TO DO to get your new book

1 Fill in the application card—which is the first postcard in your present ration book. DO THIS AT HOME.

2 PRINT clearly—do not write—the information required, and sign at the bottom with your usual signature. Follow the method on card illustrated.

TO THOSE ON VACATION

If you are staying at a summer cottage, with friends or relatives, or at a hotel as a non-permanent guest, give your usual or permanent address on the application card.

3 Do not detach the card from your ration book. This must be done by an official at the Local Distributing Centre. If already detached, it should be brought in along with your present ration book.

4 Persons of 16 years or over must sign their own cards. Cards of persons under 16 years must be signed by parents or guardians. Children under 16 will not be allowed to apply for new ration books, either for themselves or for other members of the family.

Print in Block Letters in Ink (Ecrire à l'encre en lettres bloquées)

No de série (avec lettres) MWS34677

Préfix & Serial Number

Last Name MORRISON
Nom de famille seulement

First Name JOHN HARRY
Prénom(s) du requérant

Address or P. R. No. 860 PARK AVE.
Adresse

City, Town or Village MONTREAL P.Q.
Ville ou village

Date AUG. 25/43

Age, if under 16
Age, si moins de 16 ans

I declare I am the holder of the Ration Book from which this reference card has been taken, or that I am signing this in good faith on behalf of the holder, whose name and address appear above.

Je déclare être le détenteur du carnet de rationnement duquel cette carte de référence a été détachée, ou que je signe de bonne foi pour le détenteur dont les nom et adresse apparaissent ci-dessus.

J. W. Morrison
(Signature—Signature)

IN FILLING IN YOUR APPLICATION CARD... FOLLOW THE METHOD INDICATED ABOVE.

DO NOT SURRENDER, DESTROY OR THROW AWAY YOUR PRESENT RATION BOOK. IT CONTAINS COUPONS YET TO BE USED FOR MEAT PURCHASES.

RESIDENTS OF RURAL AREAS may apply on behalf of their neighbours, providing Ration Book 2, and properly filled in application cards, are presented.

RESIDENTS OF A TOWN OR CITY. Any senior or responsible member of a household may apply for new Ration Books on behalf of other members of the household, providing Ration Book 2 and properly filled in application cards, are presented.

On presentation at a Distributing Centre of your present ration book with properly completed application card, you will be issued your new Ration Book 3; and your present Ration Book will be returned to you.

Volunteer Workers are giving their time to serve you at the Distributing Centres. Help them by following these instructions carefully.

LOCAL DISTRIBUTING CENTRES

ADDRESSES	DATES	HOURS
WILSON'S OFFICE, SHAWVILLE,	August 25, 26, 27, and 28	9.00 a. m. to 5.00 p. m.
ELLIOTT'S STORE, STARK'S CORNERS,	August 25, 26, 27, and 28	9.00 a. m. to 5.00 p. m.
SCHOOL No. 13, NORTH CLARENDON,	August 26,	9.00 a. m. to 5.00 p. m.

RATION ADMINISTRATION

THE WARTIME PRICES AND TRADE BOARD

Ever Hear of Chittagong?

It's Leading Indian Port

Chittagong is normally one of India's leading ports. Its commercial fame is not new for, in the 16th century, the Portuguese thought so well of it they called it Porto Grande.

Nature was generous in providing the city's site on the deep Karnaphuli river, 12 miles from its outlet in the Bay of Bengal. The largest ocean-going ships can safely proceed up river nine miles. Cargoes are handled between ship and shore by modern cranes serving waterside tracks of a rail terminal. Coal, machinery, railway materials, mineral oil and salt are brought for distribution to Indian and Burmese points. The ships take away tea, jute, cotton, hides and wax. Passenger steamer lines regularly served the port and there is telegraph communication with all the principal towns of India.

A loose grouping of villages, Chittagong stands on low ground, making a colorful picture as viewed from the river. A 200-foot hill where Europeans live, is a local distinction. Natives people the lower districts, their huts framed in fruit trees. Paddy fields give the same clusters of huts an island effect. Gardens brighten the uplands. Business buildings are modern.
