MONTREAL—The commercial capital of Canada and the most populous city in British North America, is situated at the head of sea or outward navigation, and at the foot of the great chain of River, Lake and Canal navigation which extends westward to Chicago and Fond du Lac, a distance of about 1400 miles, embracing an almost unequalled extent of inland water communication. It occupies one of the most commanding positions in America, and stands on a large, fertile and beautiful island of the same name, 30 miles in length by 10 miles of extreme breadth, formed by the confluence of the Ottawa and St Lawrence rivers, and on the north bank of the latter. Thus situated near the junction of two very important rivers, with a free communication seawards, (though 90 miles above the influence of the tides, and 300 miles from salt water), Montreal possesses all the advantages of both an inland city and a seaport accessible to steamships and other vessels of over 3000 tons burthen. Holding, too, the keys, as it were, of the navigation of the Canals and Lakes,—the latter styled "the new Mediterranean,"—its position with reference to Quebec, Ontario, the Western States, New York, Boston, Portland, Albany, Nova Scotia, Newfoundland and Prince Edward Island, makes it, by means of its extensive water and railway communication, the great centre of attraction and COMMERCIAL EMPORIUM of the Dominion of Canada. The city is the chief seat of manufacturing operations in the Dominion; and it has many extensive and costly establishments, the productions of which will compare favorably with those of other countries. The principal business streets are Notre Dame, St Paul, Commissioners, McGill, St James, and the main streets of St St Lawrence, Quebec, St Anns, St Joseph and St Antoine Suburbs. The city and suburbs are well lighted with gas, and many of the principal streets paved with stone. From whichever side approached, Montreal and its vicinity (the wood-clad "Mont Royal" forming a magnificent background), with its numerous beautiful villas, orchards, and delightful drives, its grand and stately edifices, and many elegant public and other buildings of cut stone, adorned with glittering roofs and domes, tall spires and lofty towers, present to the view of the beholder a vast, picturesque, and grand panorama. Among the many handsome public buildings of which Montreal can boast, is the French Cathedral, Christ Church, the Gesu, St Andrew's, St Paul's, St George's, Trinity, St James the Apostle, Knox, Erskine, Wesleyan and other churches, the Jesuits College, McGill College, the Hotel Dieu and General Hospital, House of Industry, Post Office, Banks, Custom House, Victoria Skating Rink, Bonsecours Market, Court House, Military School, &c. Montreal has also magnificent water works. The water is drawn from the St Lawrence, a mile and a half above the Lachine Rapids, and conducted a distance of five miles through an open canal to a capacious basin, where it is, by powerful and costly machinery, forced up through the pumping-main, two miles and three quarters in length, to reservoirs on the brow of the Mountain, capable of containing fifteen million gallons. The Harbor and Basins, into which the last link of the great Canadian inland canals debouches, though not large, are good, convenient, and safe; and they are capable of indefinite extension and improvement at comparatively small expense. The wharves, extending over a mile in length, are surmounted by a massive cut-stone wall, along the height of which is a pleasant promenade and wide street, affording a fine view of the river and its shipping. There are numerous inclined planes from the wharves, by which carriages ascend to the street above; and the whole, for appearance, commodiousness, and cleanliness, is unexcelled by any port on the continent. From Point St Charles, at the head of the harbor, to St Lambert on the opposite shore, a distance of about two miles, the great "father of rivers," the St Lawrence, is spanned by the Victoria Bridge, the most costly and magnificent work of the kind ever erected. With its two long abutments and twenty-four piers of solid masonry, this great tubular bridge of iron stands a monument of engineering skill and the wonder of the world. The total length of the bridge is 9,184 lineal feet, with 24 spans of 242 feet each, and one (the central tube, which is 60 feet above high water,) of 330 feet. The first stone of this great masterpiece of Stephenson was laid on the 20th July, 1854, and the first passenger train passed over on the 17th December, 1859. Its construction gave the Grand Trunk railway a continuous and unbroken line of communication from Rivière du Loup and Portland to Lake Huron and Detroit, and Montreal unrivalled facilities and advantages for commerce, whether foreign or domestic, making it the great central depot for the traffic of Canada and the Western States. The cars of the Grand Trunk railway—the longest line owned by one company and under one management in the world, and the building of which has placed Canada in the proud and prosperous position she occupies to-day—run daily east and west, making close connections in Ontario with the Great Western, Brockville and Ottawa, St Lawrence and Ottawa, Cobourg, Peterborough and Marmora, Midland, Northern, Toronto, Grey and Bruce, Toronto and Nipissing, Wellington, Grey and Bruce, and Whitby and Port Perry railways, also with the Canada Air Line and Southern when completed; and in the province of Quebec with the Vermont Central, Stanstead, Shefford and Chambly, South Eastern Counties Junction, and Massawippi Valley railways; and with the following projected lines, some of which are in course of construction,—Levis and Kennebec, North Shore, Canada Central, Richelieu, Drummond and Arthabaska Counties, Gosford, St Francis and Megantic International, and the great Intercolonial. The two latter roads will give Montreal direct rail communication with St John and Halifax, and be the means of largely increasing its trade with the Maritime Provinces. The Intercolonial, it is expected, will be completed in 1872, and the St Francis and Megantic International about the same period. The latter is to be commenced in the spring of 1871, and will extend from Lennoxville to Megantic, connecting there with another line building from Lincoln, a station on the Maine Division of the European and North American railway. Only 170 miles of road have to be built to give Montreal by this route direct communication with St John, N.B., and reduce the distance between the two cities to 430 miles. The New Brunswick and Canada railway, when extended from Woodstock, N.B., will also connect with the Grand Trunk at Rivière du Loup. In the Eastern States the Grand Trunk connects with several lines branching off from its principal stations, and at Portland with the Allan line of steamers in winter, and with steamers for St John and Halifax the year round. The Vermont Central and Montreal and Province Line railways, and their connections, also afford direct communication with New York, Boston and the principal cities in the United States. In summer, to these advantages is conjoined that of the navigation, which is usually open from about the middle of April to the end of November. The Allan line of splendid, powerful, fast-screw steamers, performing regular mail service, ply weekly between Liverpool and Montreal in summer, and between Liverpool and Portland in winter. During season of navigation daily lines of steamers, propellers and other vessels run between Montreal and Quebec, Ottawa, Prescott, Brockville, Kingston, Belleville, Rochester, Cobourg, Port Hope, Toronto, Hamilton, and many other Lake and River ports, eastward as well as westward. Montreal is the Metropolitical See of the Church of England in Canada and the seat of a Roman Catholic bishop. It returns three members to the Dominion House of Commons, and three to the Quebec Legislature. The city is well governed by a Corporation composed of a mayor, nine aldermen, and eighteen councillors, has a fine police force, an efficient fire brigade, and the best fire alarm telegraph system in the world. It is the principal port of entry in the Dominion, and is rapidly increasing in population and extending its city limits. East, west and north of Montreal, attached to but not incorporated with it are a number of flourishing villages, while immediately opposite, on the south shore of the St Lawrence, is St Lamberts, Laprairie and Longueuil. Point St Charles, a populous suburb, is situated in the western section of the city. The general offices and principal workshops of the Grand Trunk railway are located there. Until recently Montreal was the military headquarters of British North America; but the withdrawal of Her Majesty's troops has deprived her of this position, and for the first time since the conquest left her without a British soldier. On the 28th Nov., 1870, St Helen's Island, the Quebec gate barracks, the

beautiful Champ de Mars, and all other Imperial property in Montreal was presented by the Commander-in-chief, Sir Charles Hastings Doyle, in the name of Her Majesty, as a gift to the Dominion Government. The Canada Central and North Shore railways, the construction of which is expected to be at once proceeded with, will prove of incalculable benefit to the city of Montreal, by largely increasing its trade with the many prosperous sections of the country through which they will pass, and causing the rapid extension of its limits eastward as well as west. The head offices of the Montreal Telegraph Co. are located in St Sacrament street, while there are branch offices at the St Lawrence hall and Point St Charles. The Peoples Telegraph Co. also have an office in the city. Montreal is distant from Ottawa 130 miles, by water and 164 miles by rail, from Quebec 180 miles, from Kingston 173 miles, from Toronto 333 miles, from Hamilton 373 miles, from London 453 miles, from Boston 334 miles, from New York 400 miles, from Portland 292 miles, from Detroit 591 miles, from Chicago 845 miles, from Cincinnatti 1104 miles, from St John, N.B. *via* Lennoxville and proposed St Francis International railway, 430 miles, *via* Danville junction, Me., and European and North American railway, 580 miles, *via* Grand Trunk and Intercolonial railway 763 miles, *via* Rivière du Loup and Grand Falls 609 miles, from Halifax, N.S., 852 miles, from Liverpool 2750 miles. Value of assessed property, by latest returns, (Dec. 31, 1863) $47,679,000, showing an increase of $22,-123,667, since the last CANADA DIRECTORY was issued (1857). The revenue of the city at the same periods were, 1856, $285,092; 1869, $783,644, an increase of $496,612. Value of imports for year ending June 30, 1870, $25,680,814; 1856, $16,144,-696, an increase in favor of 1870 of $9,436,-118. Value of exports, 1856, $3,825,564; 1870, $19,100,413, increase $15,274,849. Customs revenue 1870, $4,128,052. 602 vessels arrived from sea in 1870, in 1856 there were only 232. Mails daily. Population, including suburbs outside city boundary, about 160,000.

CANADIAN STAMP DUTIES.

Up to the 1st August, 1864, there was no stamp required for bills, drafts and notes in the former Province of Canada. But by 27 and 28 Vict., cap. 4, there was imposed a duty on all promissory notes, drafts or bills of exchange, when executed singly, of three cents for the first $100, and a further duty of three cents for each additional $100 or fraction of $100; the duty to be paid by affixing an adhesive stamp. This Act was amended by 29 Vict. cap. 4, which imposed a duty of one cent on notes, drafts, or bills of $25 and under; of two cents when over $25 and not over $50; and of three cents, when over $50 and not over $100. The Act also provided that it should not be necessary to obliterate any stamp by writing the signature or initials upon it, but that the person affixing such stamp should, at the time of affixing, write or stamp thereon the date when it was affixed. This amendment came into force on the 1st of January, 1866, and the law continued unchanged till 1st February, 1868, when the Act 31 Vict., cap. 9, came into force. By this Act, stamp duties were first imposed in Nova Scotia and New Brunswick. No duty is payable under this Act on bills, drafts, or notes under $25. One cent on notes, &c., of $25; two cents when over $25 and not over $50; and three cents over $50 and not over $100, with a further additional duty of three cents for each additional $100, or fraction of $100. The duty is payable by stamps, which are to be obliterated by signature, initials, or some material or integral part of the instrument written thereon, or by writing or stamping thereon the date of affixal.

The rates will be more apparent by the following table :—On Bills of Exchange, Drafts and Promissory Notes.

AMOUNT.	Singly.	Duplicate each part.	Triplicate each part.
$25	$0 01	$0 01	$0 01
Over 25 and not exceeding $ 50	0 02	0 01	0 01
" 50 " " 100	0 03	0 02	0 01
" 100 " " 200	0 06	0 04	0 02
" 200 " " 300	0 09	0 06	0 03
" 300 " " 400	0 12	0 08	0 04
For each additional $100 or fraction of $100	0 03	0 02	0 01

In computing the duty, it must be borne in mind that any interest made payable at maturity with the principal, must be counted as part of the amount.

The tax necessitates great care on the part of business men, as the penalty of neglect in affixing or cancelling the necessary amount of stamps is very heavy, the instrument being rendered null. Thus the Court of Queen's Bench for Ontario recently held a note for a large amount to be null, because, though the necessary stamps were on the instrument, yet, from having been placed one above another, all had not been obliterated. When duties were first imposed in Nova Scotia and New Brunswick, many of the inhabitants of those Provinces neglected to comply with the provisions of the Act, and a measure for the relief of these persons (31 Vict. cap. 52,) was subsequently passed.

THE Revenue from Stamps, and the number of each value supplied, for the year ending 30th June, 1869, was as follows:

LOVELL'S SERIES OF DIRECTORIES.

Dominion, Provincial, County, City, and Town Directories.

THE want of accurate, reliable and intelligible Local Directories has been commonly felt and generally expressed by all classes in Canada, and only in a less degree by the inhabitants of e n eighboring Provinces. Indeed the complaint has become so common, and the requests to remove it so urgent, that the Publisher of the DOMINION DIRECTORY has determined to make the exoeriment, and discover for himself what encouragement may be expected for such books as the commercial public have very generally concurred in asking for. Should the first experiment turn out satisfactorily, it is the Publisher's intention to follow it systematically, and at stated periods, with new and enlarged editions of the same works. He begs further to say that whether such Directories be general in their character, like the Domion Directory; or local, like the Provincial Directories; or Municipal, like the County, City or Town Directories, they will in either and all cases be prepared with the greatest care, constructed on the simplest plan, printed in a uniform manner and bound according to a uniform pattern.

As the Publisher of the DOMINION DIRECTORY is thoroughly acquainted with the modes in which information for such use should be obtained, and as he has accumulated an immenses stock of the requisite materials, and gathered about him a reliable body of men, whom by constant employment as agents or artizans, have made themselves practically acquainted with every branch of this department of industry, he is able to offer guarantees of his ability to satisfy the commonly expressed want by printing and publishing accurate, reliable and intelligible Directories.

The Publisher has no hesitation in guaranteeing as thorough correctness as it is possible to attain, and respectfully points to the accompanying Directory as an example of the character of the work and of the workmanship he will study to maintain in the projected series. Intimation from merchants and gentlemen in localities where the want of a Directory is recognised, would be accepted as a special favor, and acted upon wherever practicable.
