## WIRE ARTISTS DANCED INTO CAGE OF LIONS.

Rope Broke and Threw Them Among Animals.

BEASTS DRIVEN BACK BY TRAINERS—AN EXCITING INCIDENT AT PARIS SHOW.

Paris, May 2.—There was an exciting scene Monday night at the Apollo, the newest of the Parisian music halls. One of the numbers on the programme was slack-wire dancing by the Rosie sisters over a cage containing a couple of lions, which meanwhile were put through various tricks by Wood, the tamer. Wood, having just finished his performance, had thrown down his whip and was leaving the cage, when the wire on which the Rosie sisters were making a final pirouette snapped, and the girls fell into the cage, which had an open top. The lions alarmed at the sudden and unusual apparition sprang at the girls, one of whom was knocked down and received a severe wound on the right shoulder, which lay bleeding. The other girl remained lying where she fell, fortunately alongside the tamer, who, though whipped, drove back the beasts while the sisters were got out of the cage. The scene caused wild commotion among the audience and many women fainted.

## THEY WILL FLY IN GERMANY.

Wrights Preparing to Take Machine to Europe.

SAID TO HAVE BEEN OFFERED \$400,000 BY THE KAISER'S GOVERNMENT.

New York, May 2.—An official test of Wright Brothers' aerial machine, with which they have professed for the last two years to have solved the problem of aerial flight, will be made within a week in Germany. A Berlin despatch on Sunday announced that negotiations were under way, and it was learned that the inventors are now making preparations to start for Germany.

For the last month they have been quietly experimenting with their new machines at Kitty Hawk, N.C. They will sail for Germany some time this month, and the test will be conducted under the auspices of the recently formed German Aerial Navigation Society, which was organized early this year through the personal influence of the Emperor of Germany.

How large an amount the German Government of the Aerial Society has offered the Wright Bros. is unknown but it is variously estimated at from \$100,000 to \$400,000.

From the same informant it was learned that the present negotiations with Germany are of very recent date. Germany is not the only country that is likely to buy this secret of aerial flight, for it was further stated that Britain, France and Russia are inclined to view the proposition of the Wright Brothers with favor.

Up to a month ago both the United States Government and the managers of the Jamestown Exposition were negotiating with the Wright Brothers, and at one time it looked as though an arrangement would be made so that their secret might remain in this country. All hope of that is now gone.

## LIGHTED CIGAR AT ARC LIGHT.

Ogdensburg Man Received Fatal Shock.

PLACED CIGAR BETWEEN CARBONS AND GOT 2,000 VOLTS.

Ogdensburg, N.Y., May 2.—Joseph Goodson was killed by an electric shock while he was attempting to light a cigar from an electric arc in the street. With several companions he was returning from a dance when, in a spirit of bravado, he lowered one of the electric street lamps and placed his cigar between one of the carbons. He received a shock of 2,000 volts.

## WHY BRITAIN BARRED "MIKADO."

LICENSE WAS WITHDRAWN LEST THE OPERA MIGHT OFFEND THE JAPANESE.

London, May 2.—A rumor has been rife lately as to the reason that induced Mrs. D'Oyley Carte not to produce "The Mikado" at the Savoy Theatre after having announced it. The mystery was solved in the House of Commons Monday when Under Secretary Runciman, in reply to a question, said that no complaint had been received from Japan, but that the Lord Chamberlain had withdrawn the license for its production, the prohibition being on other reasons than the Anglo-Japanese entente can be given. It seems that the Government is afraid that the performance of this, one of the most popular of the Gilbert and Sullivan operas, would offend the susceptibilities of the Japanese, as it must be remembered that to the Japanese the living Mikado is a deity. It is stated that the suppression of "The Mikado" was due to a suggestion from the King. Some of the papers are howling as if they intended to promote agitation against the decision.

## INTERESTING TO AUTOMOBILISTS.

Court Rules That Autos Have Rights on Roads.

THE SAME AS OTHER VEHICLES, BUT NO MORE DAMAGES FOR BROKEN AUTOMOBILE.

Farnham, May 2.—(Special)—Judge Lynch was here a few days ago to hold a term of the Circuit Court, and the cases heard was one of special interest to owners of motor cars, and to municipalities, as to their respective rights about the public roads.

It was the case of Noisieux vs. Township of Farnham, a notary at Farnham, is the owner of an automobile, and last summer, while riding with his family on one of the roads, in the west part of the township of Farnham, broke one of the springs of his vehicle, and had to stop. The corporation, defendant, resisted the demand, on the ground that the road was suitable and in good condition for ordinary vehicles, and that it was not obliged to keep the roads in more stylish conditions for automobiles.

The court declared that corporations were not so obliged, but found that the proof disclosed showed that the road in question was not in a proper state of repairs for any vehicles, not having even been repaired during that season, although the accident happened in July. The automobiles had come to stay, and although they had not more rights, they had the same as other vehicles, and the corporation was condemned to pay the damages.

## MEXICAN FORTS TO BE FORTIFIED.

BOTH TERMINALS OF TEHUANTEPEC NATIONAL RAILWAY.

Coahuila, Mexico, May 2.—Official announcement has been received that the Mexican Government has determined to fortify this port and Salina Cruz, the two terminals of Tehuantepec National Railway. For this purpose General Manuel Mondragon has already left Mexico City. With him are high officers of the military engineering force. He will draw up plans and specifications, and the actual work of fortifying the port will begin at a not distant day. The exact nature of this move is not known, but it is believed to have simply grown out of the national policy, possibly spurred on by the Central American troubles, and in response to a strong popular demand. Before the opening of the Isthmian canal, the exact nature of this move was much urged, but since the opening, the popular demand has become strong. It is stated that the works will be of the most modern character, and that the batteries will include guns of the latest patterns and highest power.

## LIAR, NOT LAWYER SAID MR. TASCHEREAU.

SLIP OF TONGUE BY TRANSLATOR IN THE CRIMINAL COURT.

(Quebec Telegraph.)—The exact nature of the case at the expense of lawyers, but an instance in the Criminal Court this morning will go down as a good one, especially as the official translator who was responsible for it, is an advocate himself.

Taschereau, a French-speaking Hebrew, Kordowsky, charged with theft and receiving stolen goods, to wit: certain copper wire, the property of the Levis County Railway, was cross-questioning a French-speaking woman witness in this case, who did not agree with that of her son at the preliminary investigation.

"Your son is a liar then?" said Mr. Taschereau, and the witness nodded in the affirmative.

The translator, a well known young man, informed the jury in English that Mr. Taschereau had asked the witness if her son was a lawyer.

## BAD FREIGHT WRECK NEAR DANBY.

Cars Smashed and Track is Blocked.

PASSENGERS OF REGULAR TRAIN WERE TRANSFERRED TO PASSENGER WRECK.

A freight wreck which occurred on the morning of Monday, May 1st, near Danby, this morning has blocked the main line, and the express from Montreal due here at 11:35, is unable to pass.

It is reported that ten freight cars are derailed, left without loss of life, however.

The wrecking train from Richmond has been sent to the scene.

LATER PARTICULARS.

The passengers due to have arrived here on the express at 11:35 reached Sherbrooke shortly after 2 o'clock aboard the Portland express.

The wreck of eleven freight cars at Danby was caused by a broken wheel. The train left Sherbrooke this morning for Montreal but when near Danby a wheel broke, followed by the derailing and piling up of eleven freight cars, completely blocking the main line.

The Portland express leaving here for Montreal this morning about 10 o'clock was held this side of the wreck.

On the arrival of the express from Montreal, the passengers, baggage and express were transferred to the Portland train and vice versa which occupied considerable time.

Both trains now returned over the track they had already covered. The cars were badly damaged and smashed up. A wrecking train has been sent from Montreal and it is expected that the line will be open in a few hours.

## PLUNGED HEADLONG INTO THE CHASM.

Spring Freshets Had Washed Away Bridge.

THREE TRAINMEN KILLED—ENGINEER BURNED TO DEATH WHILE RESCUERS STOOD HELPLESSLY BY.

Port Arthur, Ont., May 2.—A terrible accident, attended by the death of three men, occurred on the Canadian Pacific Railway, at a point 79 miles east of Port Arthur Monday night. The dead are:

Wm. Fixter, engineer, of Schreiber, formerly of London, Ont.

Villanove, brakeman, from Ottawa, or vicinity.

J. J. Beaudry, of Schreiber.

A freight train in charge of Engineer Fixter, and Conductor Jas. Cross, left here yesterday shortly after noon for Schreiber. The train was made up of cars largely loaded with flour, and several empty passenger coaches. At 8:30 p.m. the train, containing 18 men, was picked up, by the train at Jackfish. About 10:30 the train approached Fire Hill Bridge, a short distance west of Mastokoma, and 79 miles from Port Arthur. No sooner had the locomotive's front wheels touched the rails on the bridge, than the structure gave way. The locomotive plunged headlong and downward, followed by several cars loaded with flour. The sudden shock did much damage to other cars in the train, particularly to the boarding cars, which were completely wrecked, from the debris which the eight men slowly extricated themselves, none having suffered any serious injury.

The engineer is believed to have applied the brakes when he saw the bridge was gone, and this explains the escape of the conductor and the men in the boarding car, but the weight of the train forced the engine into the ravine.

## RESCUE IMPOSSIBLE.

While these men were extricating themselves, Conductor Cross ran forward, and a fearful sight met his gaze. Down in the ravine, flames were already rising from the broken timbers of the cars. Volumes of steam hid the locomotive from sight, but by the fitful glare he made his way down, and guided by the cries of port William Fixter, reached the locomotive. By the cab of which was the unfortunate engineer, lying. Steam poured out all around and in the cab. The frantic conductor was unable to extricate the engineer from the position, in which he was being scalded to death. The cries were frequent, and no other sound but the crackling of the crackling of flames and hissing of escaping steam.

Needless to say the dogs were quickly disposed of to the satisfaction of all. The men were in no way thankful there was nothing more to be paid.

Traveling on the lake is at an end for this season owing to the ice around the shore prevents teams from getting on the ice. The warm weather of Tuesday had the effect of making the ice look very dark.

Master Allan Grover McLeod, of Echo Vale, who has been quite sick for some time, is gradually getting better.

Much disappointment is felt among the Megantic people caused by a cablegram which has been received from the Rev. Mr. McDonald, of Scotland intimating that through illness, he will not be able to come to Knox Presbyterian Church as was expected.

Mrs. T. J. Norris entertained the Woman's Reading Club at "Green Gables," on Tuesday afternoon. The subject for the afternoon was "Early France." Mrs. A. Lee Holmes presided, owing to the President, Mrs. B. F. Ball being out of town. The following contributed to the afternoon programme: Mrs. M. H. C. Covles, a paper on the History of France at that early stage (Louis XV.) which was very well written indeed, followed by a solo rendered in excellent style, "The Robins Have Come Again," by Miss Edith Blair, accompanied by Mrs. Rank and the Misses Flint. A paper, a continuation of Mrs. Covles', going as far as the settling of Canada and bringing in Dr. Drummond's recent writings; selections from "Evangeline," by Mrs. Sidney Telford. Mrs. T. J. Norris certainly delighted her hearers with a selection from the "Habit of the Heart," by Mrs. Rank. Mrs. Charles Mansur read a short sketch of the life of Marie Antoinette, which was well written. At the close light refreshments were served, and it was certainly pronounced in more ways than one, very instructive and enjoyable.

The annual meeting of the Stanstead Rifle Association was held in the Columbian Club Room Friday evening. As there are several sportsmen who are good shots here, they intend having regular shoots and will make these meetings very interesting.

## BOUCHER & LACROIX,

THE DREADNOUGHT ERA.  
(From the Providence Journal.)

On the eve of the second Hague Peace Conference the greater nations are rushing to completion the mightiest armaments that the world has ever seen. The Dreadnought fleet will within a few years represent the standard of fighting prowess, displacing the more battleships as these displaced frigates and ships of the line. All the nations share in the general commercial prosperity, and there are ample funds for building the monster fighting machines of which England furnishes

the stimulating example. England, Germany, France, Japan, the United States, even some of the South American republics are in the market for Dreadnoughts. Such programmes will accordingly not affect the relative sea strength of rival nations, but will simply increase the cost of construction and maintenance all around. War will be made no more terrible, except on the national pocketbooks.

The most desirable boarders are scared away by door and window signs—and secured through want advertising.

### THE TWO PRICE PLAN

has worked so well in our Watch Department that we have recently decided to extend this system to other lines. We now give a discount of 10 per cent. on all sales amounting to one dollar or more, which are paid for within 30 days, with the following exceptions:

FOUNTAIN PENS, SAFETY RAZORS, SPECTACLE WARE, AND REPAIR WORK,

which are not. This system will result in a saving to the prompt payer and will we hope meet with your approval.

A. C. SKINNER,  
The Square Jeweller and Optician.

## CITY NEWS

The annual meeting of the "Y's" will be held to-morrow at 4 o'clock, at Mrs. McKenna's, Queen street.

Deceased was a native of Vermont, but it is thought had relatives in or near Sherbrooke or Brompton Falls. Address, George H. Thompson, Astorway, Placerville, California.

Mr. H. D. Lawrence was at Island Pond a few days ago, engaged upon a case, and accompanied some American friends to a public meeting at North Stratford, where he had the pleasure of hearing Mr. W. J. Bryan. Mr. Lawrence says that Mr. Bryan is a powerful and impressive orator, but not to be compared to our "silver-tongued Laurier."

Some work will be required to put Strathcona Square in order this spring. The closing of the walks last fall directed the course of travel onto the grass, and considerable damage was done, besides, if the plot in the centre of the square is not to be decorated by a flower bed or utilized for some ornamental purpose many believe it would be a good plan to remove it.

The sidewalk at the junction of Meadow and Wellington streets continues to interfere with traffic. Two horses fell heavily on this walk yesterday while hauling loads up the steep grade to Wellington street. If a few feet of this walk were raised in a way to give horses a little foothold the difficulty would be overcome. The grading of Meadow street, bringing it up to a level with that of Wellington street would overcome the difficulty.

The annual meeting of the Sherbrooke Tennis Club was held on Tuesday at the office of Mr. Ralph H. Fletcher. Steps will be taken to put the courts in order at once, and it is expected that the opening game of the season will be played on Saturday next. A number of new members have been added to the club.

Mr. W. H. Veilleux, son of Mr. Henry Veilleux, was one of the successful speakers and prize winners at the Ottawa University, a few days ago. He

and his partner in debate, Mr. J. H. Gilbert, of Marysville, Ont., won the annual debate gold medal. Unfortunately there was only one and as put by Mr. R. Devlin, M.P., who congratulated the happy pair, Mr. Veilleux was doubly entitled to it, as he united in his person the qualities of two nationalities. Mr. Veilleux spoke for about twenty minutes before an assemblage of six hundred people at the rate of 130 words a minute and his oration was proclaimed one of the best ever delivered in the University on similar occasions.

The entertainment given on Tuesday evening at Plymouth Church Hall was one of the most attractive and successful of the many given by the Young Ladies' Guild of the church. The audience which, owing to the storm, was not so large as would otherwise have been was most appreciative, and was moved alternately to tears and smiles. Kate Douglas Wiggin's charming little story, which has been translated into many languages, and has fully become a classic, was beautifully read by Miss Mory, and was illustrated at all the striking points of the narrative by capital and well arranged tableaux. Mrs. Andrew Sangster took the part of "Mrs. Bird," Miss Quenne Rice, "Carol," Mr. Fred. Rugg, "Uncle Jack," Mrs. A. Deane, "Mrs. Ruggles" and the little Ruggles were impersonated by Misses Carrie Hovey, Sarah Foss, Messrs. H. Lockhart, Lyndon, Haver and Iva Satter, Waldo Hovey and Stanley Thornton. Mrs. T. E. Read was inimitable as Mrs. Ruggles (who had been a McCreary) and the other girls, in preparation for the famous dinner party, and the "company drill" of the "Little Ruggles," was as spirited a piece of acting as is often seen on any stage, the young people evidently enjoying their parts. The Christmas carol, which had been written by Mr. Veilleux, assisted by Miss Norriss, Robins, was prettily rendered, and as the curtain rose on the final scene, "My Ain Country" was very sweetly sung by Master Robins, while the closing words were softly read, "There were tears in many eyes, but not in Carol's. Carol had fallen asleep. But, as to the song, I think perhaps she heard it after all."

### WHAT ONE EMIGRANT HAS DONE IN THE EASTERN TOWNSHIPS.

(Compton County Chronicle.)

There is one man with a family who has been in the Eastern Townships since 1840. William George Lucy, who emigrated from London, England, just a year ago, settled in Cookshire, working as a farm laborer. He has, in that short time, proved himself to be the right kind of emigrant, having bought and paid for a house and an acre of land. This goes to show that there is just as good openings for the right kind of men in the Eastern Townships as in the West. It is very doubtful if this same man had he gone to the West, could have made as good a showing. He has acquired property which is valuable, whereas, in the West he might have taken up land of no more value than to drag out an existence on, with small prospects for the future. We always were and still are of the opinion that it is hard to beat our section of the country, wherever you may take it.

### WILL WE BE ABSORBED?

(From the Canadian Courier.)

Laugh, laugh, my merry fellow-citizens, for you are soon to be merrily marching arm in arm with our friends across the line—those who have for years tried to injure us commercially. The Washington correspondent of the "Dry Goods Economist" says that "Canadian Root is convinced that Canadians are coming to a realization of the necessity of much closer relations between the two countries." The word "necessity" is badly chosen. The writer might better have used "advisability." In that case it would sound much less unreasonable.

This gifted correspondent then goes on to tell some more of Secretary Root's feelings. "The old feeling of absolute allegiance to the mother country in all things, sentimental and otherwise, is giving way rapidly to the idea that their material interests lie in other directions." Why are these gentlemen so impressed? Not from the recent changes in postage! Not from Sir Wilfrid Laurier's speech in London! Not from Lord Grey, who was Mr. Root's host at Ottawa! Not from Mr. Bryce, who was plainly told that Canada could seek no further for Washington favors! Not from Secretary Root's visit was an absolute failure, and the people of the United States may as well recognize it. Secretary Root is gentlemanly and clever, but he cannot perform the impossible. Canada is piddling her own canoe and that canoe will not be lost to north and south.

### BISHOPS CROSSING.

Hooker, of Brookbury, at his brother's, Mr. F. R. Hooker's; Mrs. J. A. E. C. Gilbert's; Mr. H. Bishop who is ill; Mr. and Mrs. Oscar Joyce on to their farm here, having spent the last two years in South Duxwell; Mr. G. G. Lasell, East Duxwell, visiting friends.

### THOUGH INNOCENT SHE RECEIVES PRACTICALLY A LIFE SENTENCE.

(Toronto Globe.)

As Mrs. Perkins was proved not guilty of the killing of her husband she did not suffer capital punishment or the entire loss of her liberty. But because she was accused, she had to undergo several months' imprisonment and to bear defence costs amounting to three or four thousands dollars. For her this heavy fine is a life penalty. She will be working with her needle all her days to make up the money thus sunk in a fight for her life against the "theory" of a detective, and against the pitiless officers and resources of the Crown. Robbed of a husband who cherished and supported her, deprived of his small estate, which she had done her part to gather and conserve, she is left to make her own way in the world after an ordeal that, if it does not shorten her years, has left upon her name a stigma that no innocence can wipe out. So she limps out of the iron clutch of the law, crushed and all but broken. What quarrel have the people of Ontario with this woman? What terrible thing has she done that she should suffer this? The prejudice that exists against her in her own home was plainly shown at the trial, more plainly perhaps than any other fact. Is that a reason why her life should be put in peril, and a staggering fine be placed upon her shoulders? If there was a mystery in Henry Perkins' death, it may never be solved. If he was murdered, his murderer may never be known. Only one person has been proved guilty of his death, and that person is his wife. Nothing that can be done now that will fully atone for the tragic blunder of her trial, but it should be in the power of the people of Ontario to lift her life from the weight of a blighting debt. So much reparation is due to her, and not less should be made without delay. Nor is it a day too soon to give trial judges the power to order the expenses of defence in criminal trials to be borne by the prosecution, as in civil cases. Should such reform spring from the trial of Mrs. Perkins, the case would have at least one associated incident upon which the mind of a just man could dwell without alarm, and without disgust.

### A TREE THAT GIVES MILK.

(From Harper's Weekly.)

In South America is a remarkable tree growing in the valley of the Amazon. Its sap is a milk similar like the finest cow's milk. It is highly nutritious, and will mix with water, hot or cold, and never curdles in hot mixtures. It keeps good for a week, even more, and is especially good for the taste of cow's milk in which cinnamon has been steeped. It is a little thicker than ordinary milk, and has the feeling in the mouth of liquid juice. If left standing for a few hours a thick, oily cream arises. When dry it has the consistency of soft wax. A recent traveller in South America says he has drunk large quantities of it, both as it came from the tree and also mixed with tea or coffee, with which it combines better than animal milk. He is sure that it is extremely nourishing, and that when he could get this sap he always preferred it to cow's milk. The milk is obtained either by bruising the bark of the tree or by breaking the smaller branches, when it flows very freely, so that a few severe quarts may be obtained from a single tree within a few hours' time.

**Torn By Wild Beasts**

**HISTORY OF A GREAT DIS-**COVERY.

The old Roman heroes who were torn by wild beasts at their fights in the now ruined Colosseum at Rome, the Greek charioteers, and the gladiators who made fighting a profession, all knew the virtues of herbal essences for skin injuries and diseases. They would emerge from a combat sore, bleeding and covered with wounds, they would apply to their secret herb balms, and in a few days would again be ready for combat. Their ideal of a balm or salve was the correct one—a preparation which must combine power with purity; and that ideal is realized in Zam-Buk.

Ordinary ointments, salves, and embrocations are generally composed of rancid animal fats and mineral poisons. Zam-Buk, on the contrary, is a healing balm, composed of highly refined saps and juices got from certain rich medicinal herbs, and every household may rely on its healing aid.

When the little one runs in from his play with a smarting, dirt-filled scrape on his hand or knee, simply wash the part, and smear with Zam-Buk, bandaging if necessary.

When father returns from work with a cut hand, the handy box of Zam-Buk again meets the emergency, and the housewife or mother continually finds it a real friend in need for the burns, the scalds, sprains, and sores of general household duties. For eczema, ulcers, tch, fistulas, abscesses, scalp sores, and all skin diseases, it acts like a charm. It eases the pain and stops the swelling, and cures this painful ailment quickly and surely. All druggists and stores sell at 50c a box, or from Zam-Buk Co., Toronto, for price, 6 boxes for \$2.50.

**A CRISIS IN RUSSIAN FAMINE.**

**Need of Relief Pressing and Immediate.**

**OVER 400,000 PERSONS IN DIRE** WANT - SUFFERING AGGRAVATED BY THE FAILURE OF THE CROPS.

St. Petersburg, May 2.-Prince Lvoff head of the Zemstvo organization for famine relief, returned here Monday from the famine districts. He reported that the crucial moment had arrived. Scoury is spreading rapidly in Ufa province and had appeared in the provinces of Samara, Saratov, Kazan and Tambov. Ergotism (poisoning from ergotised grain) is widely prevalent also. The inhabitants of whole villages are affected by the convulsions characteristic of the disease. The Government distributions of grain are on the same scale as during the winter, but private relief has been enlarged to the greatest extent possible with the funds available. The Zemstvo organization alone feeding 1,066,000 persons. The free kitchens cost \$750,000 monthly, and an extension of the work is demanded everywhere. In spite of the activity of the Zemstros, Red Cross and Free Economic Society, the official reports show that over 100,000 persons in Samara, 236,000 in Ufa and 75,000 in Kazan province are still in need of assistance, while the scope of the work in Saratov province should be doubled. Prince Lvoff appeals for the speediest possible forwarding of the money collected in America.

The Government crop report presents a discouraging picture of the prospects in the central famine region, where the spring sowing is restricted by the lack of seed grain. The winter crops, except in the South of Russia, are backward owing to the cold weather and late spring.
