

QUEBEC, NOV. 22, 1850.

THE TIMES' ON THE FREE NAVIGATION OF THE ST. LAWRENCE.

Canada has again found favor in the sight of England; the free navigation of the St. Lawrence, it will be perceived, has been recommended by the London Times, and should look to her interests, keep those who are indebted to her constantly in sight, and give them such assistance as will enable them to repay her. That the view which the London Times takes is a correct one, few will venture to dispute. Military considerations have hitherto been the rule; and everything has been sacrificed to them. Money has been spent on a fort here and a fort there, which might have been more profitably spent on roads and bridges. The real strength of a country has been its internal interest. Take that away; let it be known, fully understood, that the interests of Great Britain, and the interests of Canada are distinct, and the bond which the former will have on the latter will be anything but strong. Yet, duty is not without its weight; the duty of loyalty may be, and is felt; but duty can be forgotten, too often is, when it clashes with interest. There can be no stronger motive for regard than interest, and up to this hour it has been the policy, because it has been the interest of all, who could, to claim kinship with England; to be safe, in any part of the world, it was and is only necessary to be an Englishman. The power of England is everywhere felt and acknowledged; the nations, savage and civilized fear her might; her immense resources fill the world with wonder; there is not a corner of the earth in which a Briton may not be found; the sun never sets upon her flag; her manufactures are carried to the ends of the earth; England is, in truth, at once the envy and the admiration of the world. To be connected with such a country is indeed alike honorable and advantageous. Not long ago, however, it seemed as if it were already our interest to be British. Britain legislated apparently only for herself. Her colonies were almost told to do best they could for themselves; told that they had been an intolerable burden and ought to go about their business. The free trade policy was not meant to benefit us; they had been a burden to the Mother Country. Her colonies were almost told to do best they could for themselves; told that they had been an intolerable burden and ought to go about their business. The free trade policy was not meant to benefit us; they had been a burden to the Mother Country. Her colonies were almost told to do best they could for themselves; told that they had been an intolerable burden and ought to go about their business. The free trade policy was not meant to benefit us; they had been a burden to the Mother Country.

THE RAILWAY.

We learn that the Finance Committee will report to the Corporation, this evening, on the Quebec and Richmond Railroad.

If we are correctly informed, one of the conditions attached to the issue of the Bonds, is that the road be commenced simultaneously with St. Roch and Richmond, and proceed *pari passu*. But we think this unreasonable; impracticable, with the means at the disposal of the Railway Committee.

With the greatest exertions on the part of the Committee, the private subscriptions amount to \$20,000.

Corporation Bonds 100,000

Contractors Stocks 25 p. c. 110,000

Government Debentures 220,000

\$450,000

Now, although very desirable to have a cheap road, we are satisfied that the average cost of Railways in the States, should be the correct basis on which to found our calculations, and taking \$5,000 per mile, the Committee could go boldly to work, if unfettered by the Corporation, and whatever may be the ultimate termination of the Road, the opinion generally entertained is that all that can now be done is to make the road from Richmond to the St. Lawrence.

We will not advocate Point Veil, St. Nicholas or Lottinville, but will cheerfully accept either so long as we have a Railroad.

We hope the Corporation and the Railway Committee will meet one another fairly and frankly, and we again reiterate our opinion, that the Railroad will at once command all the American travel in summer, and be a paying line, in which event the Corporation can run profitably, seeing they get \$125,000 Shares as collateral security for their Debentures of \$100,000.

The Right Reverend and Hon. John Inglis, D. D., Lord Bishop of Nova Scotia, we regret to learn, died in London on the 27th ult. The venerable prelate had been long ailing and had gone to England in the hope of getting well. At the time of his death he had been a very short time in the great metropolis: indeed it is only a few weeks since he left Halifax, carrying with him the good wishes of his friends.

Navy.—It is now thought that Sir Thomas Cochrane will succeed the Earl Dundonald in the command of the North American and West India Station.

Colonel Ord, late commanding Royal Engineers, in this garrison, we perceive, has been appointed to the command at Chatham.

We have again entered into arrangements with the Montreal Electric Telegraph Company for nightly reports of the state of markets and the news. We hope that we shall thus be enabled to give our readers the earliest information of every important occurrence during the winter, as we have endeavored to do during the past summer. We regret to find it stated in last night's report, that a very promising young man, Mr. W. B. Paxon, son of Mr. Charles Paxon, of this city, has died in San Francisco.

The country has now quite a wintry appearance. The ground is hard & sprinkled over with snow, and, indeed, it seems as if we were about to have a little more snow than we have had at Montreal last night, and we are not usually very much behind our sister city in anything. The navigation cannot remain open much longer. There are now only about a dozen vessels to put to sea. We had an arrival, however, this morning, the brig Albert, from Sydney.

The steamer from Montreal has not arrived when we went to press.

Mr. Torrey, the contractor for the erection of the telegraph from this city to Westport, has returned from New York with a good supply of wire. The operation of carrying a light steel wire across the river from the Citadel to Point Levy will shortly be commenced. The posts are to be shot and every thing to be got in readiness for finishing the remainder of the work in the spring.

We beg the reader's attention to the advertisement of Dr. Peck (a colored physician) who is to lecture on Electrical Psychology, in the Hall of Assembly to-morrow evening. The Doctor is most highly spoken of as a lecturer, and we can do nothing less than advise our readers to go and hear him. The price of admission is only 3s.

We refer our readers to the advertisement "Rate Chances," and would recommend amateurs not to neglect it.

On our first page will be found one or two communications. "Lumpy's" letter will appear in our next.

We have to thank the Messrs. Broussau Bookellers, Bank Street, for a number of *Sonnet Musical Times*, (a New York publication, for which they have been appointed Agents), and a copy of the "Magnificent engraving of Jenny Lind," given as a premium to every subscriber paying in advance. The *Musical Times* is a weekly publication and every number contains two pieces of music mostly original—it is a journal devoted to literary, music and fine arts, and seems to be well worthy of public patronage. The terms are \$2 a year in advance.

We have further to thank the Messrs. Broussau, for an excellent photographic likeness of the very Reverend C. F. Baillargeon, formerly R.C. Curate of Quebec, and now Agent for the Church in Canada, at Rome, a clergyman highly esteemed by those who know him intimately and much respected by those who know him less.

The Cape Breton Giant, says the *Nova Scotia* of 13th inst., arrived yesterday & has up a quarters at Mrs. McDonald's. He is a Big Angus is a Scotchman by birth, is 19 years of age, 7 ft. 3 1/2 inches in height, 52 inches round the chest, is extremely well proportioned, and has a foot exactly 14 inches in length. My—what a foot!Mr. Dr. Rotermund, says the *Montreal Transcript* who was formerly Chemist to the Geological Survey, having made an attack on Mr. Hunt, who at present occupies that situation, and whose scientific attainments are of a very high order, has just received a pretty severe castigation at the hands of Professor Crofts of Toronto who most successfully (as we think) defends Mr. Hunt from the charge brought against him—viz: of professional incompetence—and who, moreover, puts Mr. Dr. Rotermund himself in rather a queer box.The Cape Breton Giant, says the *Nova Scotia* of 13th inst., arrived yesterday & has up a quarters at Mrs. McDonald's. The terms are \$2 a year in advance.

We have further to thank the Messrs. Broussau, for an excellent photographic likeness of the very Reverend C. F. Baillargeon, formerly R.C. Curate of Quebec, and now Agent for the Church in Canada, at Rome, a clergyman highly esteemed by those who know him intimately and much respected by those who know him less.

The Cape Breton Giant, says the *Nova Scotia* of 13th inst., arrived yesterday & has up a quarters at Mrs. McDonald's. He is a Big Angus is a Scotchman by birth, is 19 years of age, 7 ft. 3 1/2 inches in height, 52 inches round the chest, is extremely well proportioned, and has a foot exactly 14 inches in length. My—what a foot!Mr. Dr. Rotermund, says the *Montreal Transcript* who was formerly Chemist to the Geological Survey, having made an attack on Mr. Hunt, who at present occupies that situation, and whose scientific attainments are of a very high order, has just received a pretty severe castigation at the hands of Professor Crofts of Toronto who most successfully (as we think) defends Mr. Hunt from the charge brought against him—viz: of professional incompetence—and who, moreover, puts Mr. Dr. Rotermund himself in rather a queer box.The Cape Breton Giant, says the *Nova Scotia* of 13th inst., arrived yesterday & has up a quarters at Mrs. McDonald's.
