THE EQUITY

No. 11, 61st Year — SHAWVILLE, PONTIAC COUNTY, QUE — THURSDAY, SEPTEMBER 9th, 1943

Alex Hollis Returns From England

—o—

On Tuesday evening of last week, Pte. Alex Hollis returned from England, where he had served for almost two years with the Royal Canadian Ordnance Corp.

Alex was returned because he was over age for active service. He is a veteran of the Great War, 1914-18, and was a prisoner of war in Germany for several months before escaping to Holland, where he was interned for a year or more.

Red Cross Shipment for Month of August

—o—

The work committee of the Shawville and district Red Cross report the following finished goods sent in to headquarters at Hull during the month of August:—

Ten bed sheets, 5000 surgical dressings, 44 quilts, 27 pneumonia jackets, 2 coats and caps, 7 dresses, 5 dressing gowns, 11 children's sleepers, 6 prs bloomers, 6 helmets, 9 sweaters, 12 prs sea boot stockings, 11 prs seaman's stockings, 3 prs auxiliary socks, 5 prs gloves, 5 prs mitts.

Trooper Ken Little Wounded Overseas

—o—

Word has been received by Mr. and Mrs. Joseph Little, of Austin section of Clarendon township, that their son, Trooper Kenneth Little, had been wounded in action at some unspecified place outside England. Trooper Little enlisted in the Tank Corps in January 1942, at Timmins, and took his training at North Bay and Camp Borden as a wireless operator. He arrived overseas in August of 1942. His mother received a cable that he was leaving England for duties elswhere.

Miss Virtue Beattie Honoured

—o—

Miss Virtue Beattie was honoured on Friday evening, August 27th, when a number of friends and neighbours gathered at her home.

The bride-elect received many beautiful gifts including a purse. To this she fittingly thanked her friends for their kind remembrance.

Refreshments were served afterwards. Those assisting the hostess were the Misses Noreen Killoran, Eunice and Florence Doherty. At the close "God be with us 'till we meet again" was sung.

Shawville Schools Open

—o—

High and Public Schools of this district opened on Wednesday, Sept 1st, with a full staff of teachers. In the High School the teachers are: Principal, John Tolhurst, Montreal; science specialist, Gordon E. Samson, Montreal; household science teacher, Miss Edith Barss, Dartmouth, N. S.; French specialist, E. K. St; Jean, Montreal; Miss Clara Strutt, Mrs. M. McEwan, Miss Gwen Shaw, Miss Margaret Judd, Miss Sadie Tubman, Miss Audrey Fulford, Miss Amy Corrigan and Mrs. Athol Dale.

In Clarendon Township the teachers are as follows: Zion, Miss Jean Judd; Austin, Miss Mary Jay; Stark's Corners, Mrs. Lennis Dean, Mrs. Myrtle Howie; Knox, Miss Mona Tracy; Fifth Line, Miss Muriel Murphy; Radford, Miss Beulah Findlay; Murrell's, Miss Laura Woodley; Green Lake, Miss Orla Mee; Moorhead, Miss Leona Horner; Charteris, Miss Elleda Beattie; Miss Iva Horner; North Clarendon, Miss Hazel Lang; Stevenson's, Miss Orma Smiley.

Day of Prayer Observed by Public Service in Memorial Park

—o—

Friday, Sept. 3rd, appointed as a Day of Prayer by His Majesty King George VI, was fittingly observed in Shawville at 11 o'clock, by a public service in the War Memorial Park at the East end of the village.

A large number of citizens attended and stores and other business places closed for the hour of prayer.

Mr. W. A. Hodgins, Shawville's veteran merchant, acted as chairman and made the introductory address.

The prayer of "Penitence and Humble Approach" was made by Rev. K. C. Bolton, rector of St. Paul's Anglican Church; Psalm 61 was read by Rev. A. F. Fokes, pastor of the United Church; Scripture, 2 Chronicle 7. 12-22, was read by Rev. R. J. Robertson, pastor of the Standard Church; prayer for "Those who Serve" was offered by Rev. H. Kielty, pastor of the Wesleyan Methodist Church; prayer for "Those who Suffer" by Rev. F. O. Routley, pastor of the Pentecostal Mission; prayer for "King and Country" by Rev. C. Macfarlane, pastor of the Holiness Movement Church.

Three hymns were sung during the service, and after the National Anthem, Rev. Bolton pronounced the Benediction.

ENGAGEMENT

—o—

HANNABERRY—McKEE

Mr. and Mrs. B Hannaberry, of Maryland, Que., announce the engagement of their daughter, Rita Ann Marie, to Mr. Merlin Patrick McKee, son of Mr. Frank McKee, and the late Mrs. McKee, of McKee, P. Q., Que. Marriage to take place September 11th.

PERSONAL MENTION

—o—

Mrs. Irvin Swarts left Monday to visit relatives at Valleyfield, Que,

Spr. Howard Storey, of Petawawa, is spending a furlough with his wife and son in town.

Mrs. H. Millar, of Ottawa, spent the week-end and holiday with her daughter, Mrs. J. P. Wilson.

Mr. and Mrs. Murwood Dale and children, of Oshawa, Ont., visited relatives in town for the week end.

Ac. Harry Campbell, R.C.A.F., of Trenton, spent the week-end with his wife and family in town.

Mr. H. T. Armstrong, of Regina, arrived Sunday to spend a vacation with relatives and friends in town.

Miss Mary Armstrong, of Ottawa, was a guest of Mrs. Alf Draper for a few days during the past week.

Mrs. Frank Frost, of Campbell's Bay, has been visiting her sister, Mrs. Heman Sparling, for the past two weeks.

Mrs. I. Shore and sons, Clarence and Miller, have returned to their home after spending the Summer at Kars, Ont.

Ac. 2 Ronald Dean, R.C.A.F., of Lachine, Que., spent the week-end at the home of his parents, Mr. and Mrs. John Dean.

Miss Amelia Smart left Monday for Lennoxville, Que., where she has been engaged to teach in Bishop's College School.

Misses Helen and Joyce Beckett, of Niagara Falls, N. Y., are visiting at the home of their uncle, Mr. Ray Beckett, this week.

Miss Belva Hodgins, of Pembroke, has been visiting her aunt, Mrs. Lee Hodgins, and other relatives in town and vicinity.

Mr. Williard T. Hodgins, of Montreal, spent the week-end and holiday with his father, Mr. E. T. Hodgins, and other relatives.

Mr. and Mrs. Rayburn McTiernan and Cpl and Mrs. Borden Corrigan, of Eganville, spent the week-end and holiday in town.

Mr. and Mrs. Russell Currie-Mills, of Noranda, Que., spent the week-end at the home of their parents, Rev. and Mrs. I. Currie-Mills, at Yarm.

Mr. and Mrs. Forest Prendergast and Mr. and Mrs. Royce Prendergast, of Ottawa, visited friends and relatives in town and district for the week-end.

Miss Amy Dahms, who has been spending the Summer vacation with her parents, Mr. and Mrs. E. C. Dahms, retuned to Montreal on Monday to resume teaching.

Mr. and Mrs. Harold Hayward, of Montreal; Miss Neta Burnside and Mr. and Mrs. Clarke Cowan, of Ottawa, were week-end and Labor Day guests of friends and relatives in town.

Rev. J. H. and Mrs. Stender and children, of Buffalo, N. Y., spent a few days of the past week visiting at the home of Mr. and Mrs. E. C. Dahms, and with other relatives in this district.

L.A.W. Cecilia Currie-Mills, of the R.C.A.F (W.D.) Summerside, P. E. I. and Miss Edith Currie-Mills, of Noranda, spent the past week-end with their parents, Rev. and Mrs. I. Currie-Mills, at Yarm.

Miss Mary Brownlee, of Montreal, spent the week end at the home of her mother, Mrs Norman Brownlee. She was accompanied by her cousin, Mr. W. G. Acheson, who will visit in the district for a week or so.

Mr. and Mrs. R. T. Kelly and daughter, Marilyn; Mr. and Mrs. H. L. Kelly and daughter, Marjorie, have returned to their home in Timmins, after visiting at the home of Mr. Thos. Kelly, North Onslow, and other relatives in this district.

Mrs. Walter Kilgour and Miss Margaret Dagg, entertained jointly at a miscellaneous shower at the home of the latter on Monday evening, Aug. 30, in honor of Miss Katherine Tracy, whose marriage took place on Wednesday, Sept. 1st, to Mr. Everett Moore, of Rupert, Que.

Shawville Women's Institute will meet at the home of Mrs. Bruce Barber on Monday evening, Sept 13th. Program—Demonstration; paper on Home Economics. Roll call—Supper dishes. Assisting hostesses, Mrs. Gordon Brownlee and Mrs. G. G. McDowell. The flower competition will be held.

Pte. Lloyd Pitt Killed on Active Service

—o—

Mr. and Mrs. James Pitt, of Bryson, have received a telegram confirming information of the wounding and death in Sicily of their elder son, Pte Lloyd Pitt.

Lloyd was born in Bryson, July 15, 1920. He enlisted Feb 18, 1942, and went overseas in March 1943, and was killed July 25th. He enlisted in Ottawa, was transferred to Cornwall and then to Brockville for basic training. A memorial service was conducted in the Bryson United Church on Sunday, at 3.15 p. m

A brother, Harold, donned the uniform on his 20th birthday and is now in training at Chicoutimi. Two other brothers, Russell, who has already received his call but has been allowed farm leave, and Leonard, are at home. Six sisters, Mrs. Emmerson Cole, of Campbell's Bay; Miss Lila, of Hamilton, Mrs. Kenneth Romain, of Thamesford, and Iva, Vera, and Norma survive.

MARRIED

—o—

MOORE—TRACY

—o—

On Wednesday afternoon, Sept. 1st, at the parsonage of the United Church, Shawville, Katherine Mae, elder daughter of Mr. and Mrs. Robert J. Tracy, Main street, was united in marriage to Everett Nesbitt, son of Mrs. Moore, and the late Joseph Moore, of Rupert, Que. The ceremony was performed by Rev. A. F. Fokes.

For the ceremony the bride wore a flying cloud blue wool suit with navy felt hat and accessories and she carried a bouquet of American Beauty roses. She was attended by her sister, Miss Mona Tracy, who wore a gold wool suit with brown hat and accessories and a corsage bouquet of yellow roses. The best man was Norman Moore, of Rupert, brother of the bridegroom.

Later a buffet lunch was served at the home of the bride's parents to 40 guests, after which Mr. and Mrs. Moore left by motor for the Thousand Islands and other points in Eastern Ontario. The bride's going-away costume was a black tailored suit with black felt hat and accessories and a silver fox neckpiece. On their return they are to make their home on the bridegroom's farm at Rupert.

Out of town guests included Sqdn. Leader and Mrs. Borden Campbell, Mr. and Mrs. George McDowell and Miss Winnifred McDowell, and Miss Arlene Hodgins, all of Ottawa; Mrs. Joseph Moore, Mr. and Mrs. James Moore, and Norman Moore, of Rupert; Mr. and Mrs Ezra Grant, of Campbell's Bay.

CARTMAN—DODS

—o—

On Saturday afternoon Norma Agnes Hughes, daughter of Mr and Mrs. Norman Dods, of Maryland, Que., was united in marriage to Pte. Robert John Cartman, son of Mr. and Mrs. Robert Cartman, all of the township of Clarendon, in St. Andrew's United Church Bristol. Rev. Andrew Russell, of Bristol, officiated at the ceremony

The church had been decorated for the occasion with ferns and autumn flowers, and the wedding music was played by Mrs. Frank Armstrong. The bride, who was given in marriage by her father, was becomingly gowned in a floor-length dress of shell pink chiffon over taffeta, with heart shaped halo hat, and finger tip veil, and she carried an arm bouquet of white gladioli, Talisman Rose and bovardia.

The was attended by her sister, Miss Shirley Dods, of Ottawa, who was dressed in blue chiffon over taffeta, with pattern of dress and flowers similar to the bride's.

After the ceremony a buffet lunch was served to about 100 guests at the home of the bride's parents. On Monday evening a large reception in their honor was given in the theatre hall at Shawville.

Later Mr. and Mrs. Cartman left for Simco, Ont., where they are to reside for the present, the bride's going away costume being a blue crepe suit, with tweed coat, black felt hat and black accessories.

Among the out-of town guests were Mrs. R. A. Elliott, of Copper Cliff, Ont; Mrs. J. A. Pritchard and family, of Alcove, Que., Lance Cpl. and Mrs. Fred Cant, of Monteith, Ont, and Mr. and Mrs. Morley Brude, the Misses Gwen and Barbara Bruce, Mr. and Mrs. John Bowes, Miss Anna Bowes, and Mr. and Mrs. Bertal Irwin, all of Ottawa.

KING HIGGINS

By
CAPTAIN FRANK H. SHAW

CHAPTER XXIII

Wynne was waiting for him. The two men grinned amiably at one another.

Then Wynne gave an exaggerated salute — imitating the old Roman greeting.

"O King, life for ever!" he said.

"I feel as if I had been, Wynne. How's everything? Coffee?"

"I'm full to the bilges with coffee, Chief. We hadn't much else to do aboard the Almirante."

"You worked the oracle there all right, I'm glad to say. Much trouble?"

"No, sir; not a lot. They were very reasonable, after I'd told them what you told me to say."

"What? About suggesting to the President that their pay should be raised?"

"Yes, that—and other things." Their eyes, meeting, twinkled gaily. "They were all for shelling Fort Juan to bits, of course—they wanted some target practice; but I persuaded them against it. And that Commander thought it would be salutory to lob a 12-in. shell or two into the Plaza here. But I pointed out that they might hit the Consulate, and that would never do; so they satisfied themselves with a blank round.

"We heard old Gaspardo's speed-boat when we were waiting, sir, so we went out and rounded him up; he had a load of rifles and not a leg to stand on. They were all for hanging him from what they've got in the way of a yardarm; but I advised them to wait a bit."

Manuel rapped on the door, entered, gravely tendered an envelope.

"From the Wireless Office, sir," he reported. "Will there be an answer?" Dickie tore open the missive, read, frowned, then began to laugh. He sat down and scribbled hurriedly on a blank. He gave the result to Manuel, with money.

"That's about the best news I've had so far," he mentioned.

"But you're not going to be the first to hear it, Wynne."

* * *

Apart from occasional sporadic outbursts down in the ciyt's purlieus, the attempted revolution was over; and already the forces of law and order were active in clearing up the mess when Dick Higgins started to cross the Plaza Grande on his way to breakfast at the Casa Falleiro. Don Enrico was in the patio, heavy-eyed but genuinely glad to see the Consul.

"Yes, yes, there were discomforts, one admits," he stated, referring to his adventures inland. "But all's well that ends well, your Excellency. I am told Dolores owes her life to you."

"Not quite that. But I'd like her to owe her happiness to me, one fine day. Is she better? It will interest you to know that the earthquake has revealed a new vein of gold—the mines will pay a better dividend than ever."

"Dios, the aplomb of the English! It is whispered by a bird that el Consul Inglese had a finger in this pie. Do you know anything?"

"Well, I'd rather tell what I know to the family as a whole, especially Dolores," said Dickie.

"Good. She shall be present," said Don Enrico, with a snap of his jaws. "Feminist or no feminist; she has done sufficient mischief. When you marry her, Richard, knock this emancipation nonsense out of the chit."

"The Higginses have always been on the side of freedom," Dickie laughed. "That's why I hated the thought of a Dictator in Hiyatala."

* * *

Dolores, limp and pale, sat down to breakfast at eleven o'clock. Reports were that the Police and National Guard, once more loyal to the accepted order, were making good strides with the clearing-up of the city.

"It is not as if a revolution were as rare as all that," said Don Enrico oracularly. "And the casualties have been very small, considering—fewer than if this Lafallette had become Dictator and declared war on the world."

"If Ferdinando had been here, there would have been a different story," said Dolores, rather fiercely for one in disgrace.

"But he failed — he failed!" said her father, wiping his mouth in the Spanish fashion. "He seems to have run away at the critical moment."

"He did not run away!" exclaimed Dolores.

"No; not exactly," admitted Dickie, looking somewhat shamefaced. "Not that he was the tin god he set up to be; he was just another filibuster, out for his own hand, with Hackett capital behind him. I made a few inquiries here and there, and all the evidence goes to show that he intended to annex this country and give concessions right and left to the Hackett gang."

"In which case Hiyatala would have been set back 50 years," said Don Enrico solemnly. "But what happened to this estimable Dictator?"

* * *

"Well, as a matter of fact, he's out on the high seas at the present moment," explained King Higgins. "He's actually aboard the Tarragona, bound for Eastern ports; and he'll be away a long, long time."

"Aboard the Tarragona?" exclaimed Dolores, half-rising from her chair.

"He was shanghaied," said Dickie gravely. "For the good of his soul. Captain Barker, of the Tarragona, agreed with me that it was best for everyone concerned. But I had a wireless message this morning to say that he is in good health. Barker sent a few men ashore to Lafallette's headquarters and picked him up without any fuss."

"You did this!" flamed Dolores. "To the man I love!"

"It seemed the best thing to do, considering everything," returned King Higgins. "No use leaving dynamite lying around loose in a place you happen to be fond of. I hoped that it would prevent any chance of an outbreak; but it seems I was wrong."

* * *

"You may steal him, but you will never make me forget to love him," said Dolores.

"Well, maybe not. But this wireless I got today might help even in that." He drew the flimsy note from his pocket and handed it over.

"Ferdinando — Don Ferdinando has implored to be landed at Sta. Augusta to—to—rejoin his wife!" flamed Dolores.

"Well, one of his wives, anyhow. Though I didn't even know he was married, except that he struck me as the sort of man who would be—pretty extensively."

"He vowed I was the only woman he had ever loved!" said a suddenly tearful Dolores. Then her expression hardened.

"Is this true?" she challenged a Dickie who shrugged almost as expressively as a true-born Hiyatalan.

"Captain Barker wasn't prompted by me," he said. Suddenly Don Enrico cast down his napkin and laughed uproariously.

"What need has this country of a Dictator when it already has a King?" he roared. "King Higgins—Hiyatala's greatest man."

"No, its humblest," corrected Dickie.

* * *

A cool, refreshing breeze began to blow through the awninged patio.

"Ah, there's the 'Doctor' started again," said Dickie.

"Are you too tired to go for a ride, Dolores; it might be better than sitting idle?"

She fought with emotion for a moment, then nodded.

"But I have a quarrel with you," she explained.

"A good beginning for married life," laughed Dickie. "I just want to draft out a report to my Chief at home; and then I'll have the ponies round in no time."

He said to Sebastian, in his own office:

"Take this down: 'There has been another sporadic outbreak of revolutionary fever, but the situation is now well in hand; and it is my opinion British trade were never better than now.' Got that, Sebastian?"

"Si Senor!" hissed Sebastian softly. To himself he added: "Always mad, these English; but it is a superb madness."

"And now for the ponies," said Dickie.

THEY LIKE IT AND DIE

GOOD STURDY PLAY TOGS

Either shorts or long trousers, plus a simple blouse to button them too, makes a practical outfit for the active boy, and one that can be made quite easily. Denim is a good fabric for the trousers; or a good ,heavy seersucker for the whole outfit, especially in the smaller sizes. It's a manly style, and the fellow who wears it is ready for anything from a commando raid to a quick trip to the grocery store.

Style No. 2759 is desgined for sizes 2, 4, 6 and 8. Size 4 requires 2⅝ yards 35-inch fabric for the suit with long sleeves; 1¼ yards 35-inch fabric for the blouse and ⅞ yards 35-inch for the shorts.

Send TWENTY CENTS (20c) for pattern to Louise Lennox, Room 421, 73 Adelaide St. West, Toronto. Write your name, address and style number. Be sure to state size you wish.

Censored

One soldier in North Africa thought he had figured out a sure method of beating the censors and letting his family know exactly where he was. He sent his mother a sequence of letters, each envelope giving her a different middle initial, the initials spelling out the city. But the letters reached home out of sequence. He got a pained and bewildered reply: "We cannot find this place Nutsi anywhere on the map of North Africa."

$50.00 For Grapes

Price Approved Is $5.00 Per Ton Over 1942 Peak

The recent announcement that the Liquor Control Board of Ontario had approved a price for 1943 of $50.00 a ton for grapes to be used for wine making highlights the importance of the wine industry to the agricultural interests of the Niagara Peninsula.

The grape crop is recognized as the most staple money crop of the fruit farmers of the Niagara Peninsula. This is due not only to an excellent regularity in volume of fruit production but also to the important fact that the wineries afford a dependable market for from 50% to 70% of the grape crop each season at an equitable price.

The price paid by the wineries in each year agreed upon between the Ontario Grape Growers' Association, the Niagara Wine Grape Growers' Association, representing the Grape Growers, and the Wine Producers' Association. The price so agreed upon has then to be approved as fair and equitable by the Ontario Liquor Control Board. Once this approval is given it is incumbent upon every winery to pay the agreed upon price.

Peaches, plums and cherries this year have all been crop failures in varying degrees. The fruit growers of the Peninsula therefore have to look to grapes to provide all or a large part of their income.

The price of $50.00 per ton to be paid this year is $5.00 more per ton than that paid last year. It is the price which the grape growers requested, and the members of the Wine Producers' Association agreed to, as being fair in view of conditions this year.

In recent years there has been a great improvement in the wineries and their equipment. Today the Ontario Wine Industry is a respected modern and efficient industry producing Ontario wines which are pure, of high quality, and of excellent taste.

This notable improvement in plant, equipment and quality of product in the Ontario Wine Industry springs from the full recognition by the Grape Growers and the Wineries of the mutuality of their interests and from the wholehearted understanding and cooperation existing between them.

It is a fine example of the advantages to be gained by both agricultural grower and processor through intelligent and equitable cooperation.

Sunk by Mines

The British Admiralty and Air Ministry claim that, since the beginning of the war, some 400 enemy ships have been sunk by mines.

Mines are laid by airplanes, by surface mine layers and by mine-laying submarines; it thus lies in the field of three-dimensional warfare. And as regularly as mines are laid, they are swept up by the busy mine-sweepers with their far-reaching paravanes, keeping open the lanes of normal traffic.

There is a story told of the Great War concerning a certain channel leading to a British port; that it was mined regularly by the Germans every night, and as promptly cleared by the British mine-sweepers every morning. One morning the commander of the mine-sweepers became curious as to what would happen if he neglected his task, so only made a pretence of carrying out the customary sweep. That night came the German mine-layer to drop more mines, but it was blown up by some of the mines left from the night before. It is said some of the captured survivors were very angry at this betrayal of routine!

Honeybees contribute to the war effort by producing beeswax as a coating for shells and airplanes.

MAN FROM ZERO

This sullen Jap Zero pilot, forced down on Vella Lavella in the Solomons, fell into U. S. hands by a roundabout route. Chinese plantation workers captured him, eluded other Japs on the island and turned the pilot over to Americans rescuing survivors of the U.S.S. Helena after Kula Gulf battle.

TABLE TALKS

SADIE B. CHAMBERS

Summer Vegetable-Plates

For family serving, an attractive vegetable platter is sometimes preferred to individually-arranged plates—it's more likely to reach the table with all its component parts thoroughly hot! Here are a few vegetable-combination suggestions which lend themselves to either way of serving—and a recipe for a delicious Cornbread, to give a special touch to vegetable dinners:

Cauliflower with cheese sauce; buttered green beans or spinach; potato croquettes; garnish of chive-sprinkled tomato slices.

Baked potatoes (cut, open and butter them); corn-stuffed baked green peppers; buttered sliced beets; sausage garnish.

Onions with chipped-dried-beef sauce; green peas; fried tomatoes or eggplant; corn-on-the-cob.

FOR THE CORNBREAD

5 1/3 tablespoons shortening
1/3 cup brown sugar
1 egg
1 cup Quaker Cornmeal
1 cup milk
1¼ cups Saxon Brand (pastry) Flour
OR 1 cup and 1 tablespoon Quaker (hard-wheat) Flour
4 teaspoons baking powder
¾ teaspoon salt

To the soft shortening, add sugar; beat together to combine well. Beat and add egg, then add milk and Quaker Cornmeal. Mix thoroughly. Sift flour once before measuring; add baking powder and salt. Sift flour into cornmeal mixture, and combine well. Turn into greased pan, about 10½ by 6½ inches, or the equivalent . . . or into greased corn-stick pans. Bake in moderately hot oven, 375°, for 20 to 25 minutes. Serve hot.

QUICK-EASY VEGETABLE IDEAS

Mash left-over baked squash with salt, pepper, a little butter, and cream if necessary; shape as croquettes and roll in Quaker Corn Flakes crumbs. Brown in oven.

To 1 cup Aunt Jemima Ready-Mix for Pancakes, add ¾ cup salted cooked corn-off-the-cob. Add 1 cup milk or water, stir and bake as ordinary pancakes. Serve with syrup and sausages or bacon.

In individual baking dishes, arrange alternate layers of Muffets crumbs, sliced tomatoes, chopped onion, seasonings and grated cheese; have crumbs on top. Dot with butter, and bake 25 minutes in a moderate oven. Makes a grand luncheon dish!

Miss Chambers welcomes personal letters from interested readers. She is pleased to receive suggestions on topics for her column, and is always ready to listen to your "pet peeves." Requests for recipes or special menus are in order. Address your letters to "Miss Sadie B. Chambers, 73 West Adelaide St., Toronto." Send stamped self-addressed envelope if you wish a reply.

Nazi Deserters

The Polish Telegraph Agency reports desertions from the German army in Poland are increasing. Between January and March 342 deserters were shot in Cracow. More than 300 officers and 750 other ranks await sentence for the same crime.

STRAWBERRY PUFF

2 eggwhites
2 tablespoons Crown Brand Corn Syrup
1 teaspoon Benson's or Canada Corn Starch
⅓ cup strawberry jam
1 teaspoon lemon juice

To unbeaten eggwhites add corn syrup and corn starch, which have been mixed well together. Combine thoroughly and beat all together until mixture stands in peaks. Fold in jam and lemon juice. Place mixture in greased top of double boiler, cover, place over steadily (but not vigorously) boiling water, and let cook for 40 minutes without removing cover. (Use a large double boiler as the mixture doubles its bulk.) Serve hot—plain or with cream, or with chilled Custard Sauce. SERVES 5.

VARIATION—Replace the strawberry jam with an equal quantity of any other favourite jam or jelly such as grape, currant, raspberry, etc.

BIG REDUCTION IN PRICE OF SMOKES

You can roll 44 best quality Mild Virginia Cigarettes for 19¢ . . . (plus papers)

Men, who are now rolling their own with MACDONALD'S FINE CUT TOBACCO, report that they get forty-four standard cigarettes out of every package. The popularity of this tobacco is growing daily, because of its mild, mellow smoothness — its consistently high quality. Cigarettes are easy to roll with MACDONALD'S FINE CUT TOBACCO and a joy to smoke. A big "44-size" package costs only 19¢ (including tax).

A FARM WIFE CHATS TO WOMEN

By Gwendoline P. Clarke

Last Sunday we had visitors from a distance—a farmer and his wife, both of whom I would think are in their early sixties. They have had a long hard life always with too much work and too little comfort. Now the man is pretty well used up with rheumatism, and his wife—well, I'm sure Mrs. Blank doesn't weigh a hundred pounds.

Mrs. Blank and I were talking, as farm women will, of the season's work and how difficult it had been to get things done this year after such a late spring. As we talked I could tell that mrs. Blank was a completely exhausted and discouraged women and I said to her—"Mrs. Blank, Why on earth don't you quit—retire, if you would rather call it that?"

"Retire? So I would—but I can't quit by myself, can I?" answered Mrs. Blank.

* * *

The logical reasoning behind her counter-question just about had me floored and it has been in my mind ever since because it applies to hundred of farm couples throughout the country where the women keep on working only because their husbands do. The farmer's wife may be fit or she may not be, but she tags along with her man, day after day, simply because she has to—because "she can't retire alone".

I think in the Social Security plans after the war it should be possible for farm couples over sixty to secure small holdings—say from one to five acres where they could keep poultry, a couple of pigs if they wanted to, and grow a good garden. In fact just enough land and stock to keep an average couple happy and occupied.

Probably one thing that keeps aging couples on farms long after their health and strength are spent is the thought that if they retire and take a house in town they wouldn't know what to do with themselves.

But offer such a couple a few acres of land and a warm compact little house in which to live and I am pretty sure nine out of ten would be glad to give up the home place to the younger folk and be quite content to spend the evening of their years usefully but leisurely employed.

* * *

Of course such a plan would only be made possible if the government were to buy up some of the larger farms and divide them into small holdings, each complete with a house and some outbuildings. A number of these farms might well form a sort of colony for retired farmers. Many a man might feel he could not afford to quit the farm to buy a house in town and yet might be only too glad to buy a small place where he would be assured of a partial living and a comfortable home amid the rural surrounding to which he has been accustomed all his life.

There now, don't you think I have put forward a good plan for taking care of elderly farmers and their wives in the post-war years? But I suppose my suggestions will fall on deaf ears. As for ourselves, Partner and I would hardly be eligible for anything like that just yet but it would certainly be nice to look forward to—a sort of farmer's paradise.

* * *

In the meantime we have a war to think about, and all our plans, years and mine, are contingent upon the winning of that war. As to that I am sure everyone has been heartened by recent Allied successes, but there will also be heavy hearts as the casualties of the Sicilian campaign are made known. That is unfortunately inevitable. And there will be other anxious mothers too. I mean the mothers of eighteen-year old sons. Young lads, who when the war started, were hardly out of public school. I am sure many a mother in 1939 looked at her school-boy son and said, "Well, thank goodness my Hughie is too young for this war anyway." But now Hughie's turn has come and it is up to Hughie's mother to be a soldier as well as her son. A soldier in the home—for Hughie.

ROBINSON CRUSOE

Here's how Marine Staff Sergt. Bill Coffeen of Chicago looked on arrival at Guadalcanal after 72 days of wandering around isolated South Pacific islands. Forced down on air mission, he lived on coconuts, met friendly natives who cared for him, then was spotted and rescued by navy patrol plane.

SUNDAY SCHOOL LESSON

September 12

ISRAEL MARCHES TOWARD CANAAN — Numbers 10:11—12:16.

PRINTED TEXT — Numbers 10:11, 12, 29-36

GOLDEN TEXT—Come thou with us, and we will do thee good. Numbers 10:29.

THE LESSON IN ITS SETTING

Time—The spring of 1444 B.C.

Place—The wilderness of Paran, south of Sinai.

Order of the Host

"And it came to pass in the second year, in the second month, on the twentieth day of the month, that the cloud was taken up from over the tabernacle of the testimony. And the children of Israel set forward according to their journeys out of the wilderness of Sinai; and the cloud abode in the wilderness of Paran." While detailed instructions in regard to the ordering of the camp for these years of wandering through the wilderness were absolutely essential for discipline and efficiency, the details do not carry great spiritual truths and we need not dwell on them. It will be noticed that the tribe of Judah, which was always the most important of the twelve tribes, from which David and all the kings of Judah arose, and from which the Lord Jesus Christ ultimately came, is placed first.

God's Ministers for Good

"And Moses said unto Hobab, the son of Reuel the Midanite, Moses' father-in-law, We are journeying unto the place of which Jehovah said, I will give it you: come thou with us, and we will do thee good; for Jehovah hath spoken good concerning Israel. And he said unto him, I will not go; but I will depart to mine own land, and to my kindred. And he said, Leave us not, I pray thee; for as much as thou knowest how we are to encamp in the wilderness, and thou shalt be to us instead of eyes. And it shall be, if thou go with us, yea, it shall be, that what good soever Jehovah shall do unto us, the same will we do unto thee."

It is an obvious conclusion, from the reasons here urged by Moses, that the many and wonderful promises of divine guidance and divine direction did not supersede in his eyes the use of all available human aids. . . . if we recall to mind that the host is calculated at more than two millions of people, it is quite evident that even during the march to Kadesh (and much more in the long wanderings which followed) it must have been extremely difficult to keep the various divisions together. In the broken and difficult country which they were to traverse, which had been familiar to Hobab from his youth, there would be scope enough for all his ability as a guide. And it would seem that it was just this prospect of being really useful to the people that prevailed with Hobab. We seek our Hobabs in the advice of sage, gray-haired counsellors; in the formation of strong, intelligent, and wealthy committees; in a careful observance of precedent. Anything seems better than a simple reliance on an unseen guide. Now, in one sense, there is no harm in this. We have neither rignht or need to cut ourselves adrift from others, who have had special experience in some new ground on which we are venturing. It is a mistake to live a hermit life, thinking out all our own problems, and meeting all our own questions as best we may. Those who do so are apt to become self-opinionated and full of crotchets. God often speaks to us through our fellows; they are his ministers to us for good, and we do well to listen to our Samuels, our Isaiahs, our Johns.

Divine Guidance

"And they set forward from the mount of Jehovah three days' journey; and the ark of the covenant of Jehovah went before them three days' journey, to seek out a resting-place for them. And the cloud of Jehovah was over them by day, when they set forward from the camp. And it came to pass, when the ark set forward, that Moses said, Rise up, O Jehovah, and let thine enemies be scattered; and let them that hate thee flee before thee. And when it rested, he said, Return, O Jehovah, unto the ten thousands of the thousands of Israel."

The original word here rendered 'scattered' denotes the action of waters in overflowing their banks, and is thence figuratively applied to bodies of men rushing in impetuous crowds and pressing out of the pathway on either side like a raging stream that bursts over its banks. When spoken of the dispersion of enemies it implies a routing and discomfiture that shall drive them one way and another like the foundations of a flood. So, when typically viewed, the language suggests that the death and resurrection of the Saviour is the breaking and dissipation of the combined forces of His enemies (Ps. 68:2, 3, 13, 15), while on the other hand it is a 'gathering together in one of the children of God that were scattered abroad' (John 11:51, 52; Isa. 11:10, 11). We have more need of God in times of peace than in times of effort. It is harder to realize His presence in the brief hours of relaxation than even in the many hours of strenuous toil. There is quite as much, if not more, peril to communion of soul with God in times when the whole nature is somewhat relaxed, than there is in times of work. So let us take special care of our hours of repose, and be quite sure that they are so spent as that we can ask when the day's work is done, and we have come to slippered ease, in preparation for nightly rest, 'Return, O Lord, unto Thy waiting servant.' Work without God unfits for rest with Him. Rest without God unfits for work for Him.

HAPPY WARRIOR

Flower-bedecked, even to the barrel of his rifle, and laden with fruit, this British Tommy tramps through Catania, where enthusiastic Sicilians greeted conquering army with cheers and gifts.

The Pentagon building in Washington housing war department offices occupies a square mile.

CANADIANS IN SICILY

Long, forced route marches which had been part of the Canadians' three-year training in England helped patrols like this to move rapidly and relentlessly from town to town in the invasion of Sicily. Peasant donkey carts like this one were commandeered to haul heavy weapons and other equipment.

Goodbye to Spinach

The sands seem to be running out for—if not from—spinach. The reign of this green-leaf vegetable has been threatened for some time—apart, of course, from the unceasing war waged against it by the childern. Dr. Henry C. Sherman, professor of chemistry at Columbia University, has given the insipid "green-feed" a further push down the toboggan. He terms "spinach" an unfortunate.

Of course, other scientists have said the same thing. The Mayo Brothers at Rochester, Minn., criticized spinach so severely as to cause a marked decline in real estate values in the vicinity of Crystal City, Texas, the world's largest spinach-growing centre, where a statue of Popeye the Sailor adorns the landscape.

But the blasting of spinach began long before today. As long ago as 1845, according to Mr. Eric Patridge's generally admirable "Dictionary of Slang and Unconventional English," the term "gammon and spinach" was in colloquial use in London as meaning "nonsence and humbug" — and Charles Dickens employed the name in the same sense.

On this side of the Atlantic, and in our own day, the little girl in "The New Yorker," with her immortal "I say it's spinach — and the hell with it," had kept up the war against the flat-tasting vegetable, even before science informed us willing-to-be told folk that spinach contains too much oxalic acid for the good of our innards.

Well, so be it. We are inclined to climb on the anti-spinach bandwagon with the children and the servants — and to add our prediction, green and puny though it may be, that the days of spinach like the sand it invariably conveys to our protesting molars, are numbered.

In the United States sockeye salmon are sometimes called blue-backs.

South Onslow School Commissioners

August 27th, 1943

South Onslow School Commissioners met on the above date at the usual place of meeting. Present: Comrs. Poole, Westbrook, MacKechnie, Henderson and Athol Inglee, having subscribed to his oath of office.

On motion of Comr. MacKechnie, Athol Inglee was appointed chairman for this year.

On motion of Comr. Poole, the minutes of last meeting were adopted as read.

On motion of Comr. Westbrook, the following bills were ordered paid viz:—

General Insurance, Bond	$ 6 50
McKechnie and Co. Auditors	25 00
Hodgins Lumber Co.	8 82
Mrs. O'Connor	16 75
E. A. Pritchard	5 58
Moyer Co.	13 30
The Equity	10 00
Mrs. Joe. Bradley	10 00
Harvey Mohr	4 00
Helen Mohr	10 00
Municipal Form	17 75

On motion of Comr. Westbrook, the Auditor's report was adopted.

Motion by Comr. MacKechnie, that the attendance officers be as follows:

No. 1 school, Fred Hutchison; No. 3, Russell Taber; No. 4. Freeman Merrifield.

On motion of Comr. Henderson the meeting then adjourned.

Jos. A. STEELE

Moisture and Air in Filling Silos

In experiments conducted in the past 20 years by the Field husbandry Division, Dominion Experimental Farms Service, it has been found that the moisture content of the crop is the most important factor. The most suitable moisture content is around 65 percent, but it is possible to make reasonably good silage with the moisture ranging from 5 per cent above or below that amount. Next in importance and closely connected with the moisture content is the control of the air in the silage mass. It is undesirable to force all of the air from the interspaces of the cut crop, only a small amount of air being necessary for the functioning of the ensilage process.

To provide the proper amount of air in the silage, the following precautions should be observed: (1) The walls and the doors of the silo should be airtight. See that there are no small holes or cracks; (2) The moisture content of the crop should be about 65 percent; (3) The silage cutter should be set to cut in ¼ lengths; (4) The silo should be filled as quickly as possible, hold ups over 24 hours should be avoided; (5) The heaviest and wettest material should be placed on top to provide pressure on the entire mass; (6) A limited amount of drainage should be located at the bottom of the silo to prevent waterlogging or accumulation of moisture; (7) Pack solidly, taking care to fill in and tramp well any pockets that may occur near the walls. Even after the silage is settled, it is well to examine the top from time to time to see if any shrinkage from the walls has occurred.

U. S. Praise for Canada's Egg Powder

There's more to food than proteins, fats, minerals and vitamins—there's flavour. No matter how essential a food product may be, there's not much fun eating it unless it tastes good. The people of Britain get both healthful food and tasty food in the dry egg powder sent to them from Canada.

To find out how Canada is making egg powder with the flavour of fresh eggs, a group of United States scientists recently visited Ottawa. They talked with other scientists of the Dominion Department of Agriculture and National Research Council about the latest methods of converting eggs to powder, and one of the visitors stated "Canada is consistently turning out a better product than we are".

He credited improved scientific manufacturing methods for the high quality of Canadian egg powder, but said its superiority originally began with superior grading of the raw product, the egg itself. He explained that in making a uniform product. Canadian egg powder manufacturers have a uniform raw product to start with.

A top quality egg grades A in Sydney, Nova Scotia, as it does in Victoria, B. C. Grade A eggs are worth ia premium anywhere in the Dominon. They make better egg powder. They make more money for the poultrymen, too.

It all comes back to the farmer. When his hens lay top quality egg, the farmer enables the manufacturer to produce a top quality, finished product. By giving proper feed and care to his flock, the farmer is making possible enormous shipments to Britain of dried egg powder, the equivalent of nearly 60 million dozen fresh eggs in the last year and a half.

NOTICE

All persons are hereby forbidden to trespass in any manner on the following properties :—Lot 1-A, Range 13, Township of North Onslow, and Lot 10-B, Range 11, Township of Bristol.

All live stock running at large on the above-mentioned properties must be removed at once by their owners.

By order,
JERRY QUAILE, Owner,
North Onslow, Que.

Major Had Good Time

An army major who must have had a good time at some recent USO dance, sent this letter to a Miss Mary Winn of New York city: "You are much too nice to know for only one evening. Could you put me on your list for a Christmas card?" At the bottom of this diplomatic overture to further correspondence were the names and addresses of two other Mary Winns, evidently culled from the 'phone book, with the implied plea that if the first to receive it didn't happen to be the right lady, please pass the letter on. The Mary Winn who received it happened not to be the right one, but was a staff member of a nationally syndicated magazine, and passed it on through the columns of the publication, asking nothing in return but a piece of the wedding cake to sleep on.

Timber Industry

Colombia has 62 large sawmills, planing mills and plants for impregnating lumber. Twelve of these are capitalized for sums ranging from 25,000 to 1,000,000 pesos. Nineteen of these plants are located in the department of Cundinamarca. In addition there are 390 woodworking plants turning out plywood, veneer, staves, boxes, wicker furniture, wooden heels, toothpicks, moldings, carved images, desks, kitchen and dining room furniture, beds, door and window frames and cabinet work. In spite of its large timber resources Colombia has imported much lumber in the past. Between 1938 and 1941, Colombia imported 15,696 metric tons of wood and wood products valued at 1,314,201 pesos. This does not include wood pulp for paper, wood for matches or sawdust and shavings which also were imported.

Storing Potatoes

Storing potatoes in the basement of a dwelling house is not as a rule satisfactory, owing to the difficulty in providing proper ventilation. Many bushels of potatoes are lost every year, the authorities say, through storing in faulty cellars, in closely constructed bins, or where the temperature is too high.

Celestite Goes to War; Lights Way for the Army

Celestite, old standby of the fireworks industry, has gone to war.

The crimson trail made by a tracer bullet as it speeds toward its target is blazed by this mineral. The bright glow of military flares, the parachute distress signal, the flare shot to the surface from a submerged submarine and the waterborne "ball of fire," lighting up enemy ship movements, all get their dazzling red flame from celestite. Blackout signs and signals used in London "glow" because celestite has been added to paint.

In peacetime this mineral had many jobs. It furnished the red flame for some types of fireworks, brightened paints and served as a filler in sealing wax and rubber. The rayon industry used celestite to remove impurities in caustic soda. Some sedatives and medicines dipped deeply into the supply of celestite. Railroad companies used it for flares. Steamships used it for distress rockets and the small "bombs" that truck drivers in trouble use at night along highways burn red with celestite.

Suggest Six-Point Plan To Boost Milk Output

The shortage of milk and milk products resulting from huge new demands by the army, lease-lend, and civilians offers a direct challenge to dairymen.

To bring about the much-needed increase in milk production, a six-point emergency program has been suggested:

Increase the present cow population, especially on existing dairy farms, by bringing in milking cows and heifers from other areas where such a situation is practical.

Breed the cows now on hand to good dairy bulls and properly growing out the heifer calves; also give more emphasis to proper feeding and management.

Keep production records on all dairy cows.

Improve the old pastures and seed new ones until at least 1½ acres of good pasture are available for each mature dairy animal.

Grow more and better legume hay on every farm.

Maintain the present milk routes and develop new ones as feasible.

Fire Prevention

Landscaping around rural homes is a valuable aid in checking fire hazards and reducing the appalling loss of life and property exacted yearly from farm homes. Broadleaf evergreen shrubs planted to form screens and borders often are effective barriers against grass fires spreading from fields or pastures to farm buildings. Broadleaf evergreens when planted about the foundation, also may serve to stop a fire on the lawn from spreading to the house. Clearing away rubbish, removing dead plants, trellises covered with dead vines, cutting away dead portions of trees or shrubs, and stacking wood a reasonable distance from the house are fire prevention measures which also help to improve the landscaping.

Different Treasury Jobs

The secretary of the treasury and the treasurer of the United States are different officers of the government. The secretary of the treasury is the head of the treasury department and as such is a member of the President's cabinet charged by law with the management of the national finances. The treasurer of the United States is not a member of the cabinet; he is an important subordinate in the treasury department charged with the receipt and disbursement of public money deposited in the treasury at Washington and in the other depositaries authorized by the secretary of the treasury to receive deposits of government funds for credit in the treasurer's account. The office of treasurer of the United States was created by the act of September 2, 1789, and Samuel Meredith of Pennsylvania was the first man to fill the office.

4-H'ers Become Cattle Raisers in Massachusetts

Fourteen future dairymen in Massachusetts have recently become half owners of purebred Holstein bull calves, Harley A. Leland, assistant state leader of 4-H club work, has announced.

This is the first time, says Mr. Leland, that Massachusetts or any New England state has ever carried out such a plan for promoting better bulls among the 4-H club members. It is sponsored by the New England Holstein Breeders association in cooperation with the club department.

Breeders throughout New England have donated calves which are four to six months old when the 4-H members take them. Each member must make a deposit of $5 which goes into a general insurance fund; must raise the animal until next fall; and must show the animal at county or local fairs.

At a special auction, in co-operation with the annual Holstein sale, these 14 prospective herd sires will be sold. All expenses will be deducted and the net profit will be divided between the 4-H member and the dairyman who donated the calf. Prize money will also be given for the best jobs of fitting and training the animals.

Lamp Shade Care

Now that the War Production board has ordered thumbs down on wire lamp-shade frames, shades made of silk and other fabrics have joined the list of household irreplaceables. Unshaded lights are not an immediate prospect, however. With proper care, fabric shades that are now in good condition can be made to last for many more years. All lamp shades should be frequently dusted with a soft clean brush or a vacuum cleaner attachment, but fabric shades sometimes need more than brushing to remove ingrained dirt.

The most practical way to banish harmful dirt is by soap and water washing. Metallic ribbons and braids, or other trimmings that may not be washable, should be removed. The shade should then be doused up and down in a tub of luke-warm soapsuds until the colors brighten and the dirt floats out. A soft brush may be used if the soil is stubborn. Rinse in several clear waters of a lukewarm temperature. Speed in washing and drying will reduce color loss in fabrics that are not colorfast. Drying can be hastened by placing the shade in a current of air from the windows or an electric fan. Blotting with a soft cloth will also shorten the drying period.

An eight-day Camp Meeting of the Standard Church will be held in Mr. Hodgins, Grove from Sept. 5th to 12th. Rev. A. J. Slater will be the guest speaker.

We extend a hearty invitation to all.

R. J. ROBERTSON, Pastor

New Trench Knives

A trench knife, redesigned to conserve critical materials and superseding the previous standard model which has been issued by the thousands to combat troops, is now under procurement by the ordnance department. The new knife is a sturdy, sharpbladed weapon, in appearance resembling an oversize hunting knife. The knife has a corrugated raw-hide handle with a 6¾ inch blade. One cutting edge runs the full length of the blade. The other cutting edge extends for 2¾ inches. From that point to the hilt, the steel widens, proving extra strength.

A new sheath made of leather also has been designed especially for the knife. There are metal plates on both sides of the sheath to protect the wearer from possible injury in a fall, for example, wherein the knife blade might otherwise pierce the sheath.

Army Needs Arts

Liberal arts studies make a definite contribution to an efficient army and should not be ignored as nonessential, educators say. The liberal arts studies are fighting for life because people have the idea that they are unnecessary during war. Many do not realize their close connection with army service. Technical skills need a mathematical background. Liberal arts also include foreign languages, English composition and literature; social sciences such as economics and history; and appreciation of music and art. Each of these studies, it is said, contributes in an important way to the need of our soldiers. They need French in Africa; English composition to enter the armed forces, and for reports of missions; books and music for recreation; and social science for just administration of post-war problems.

Need Food Sources

Victory gardens will be emphasized in 1943 as never before, and products from them will be worth their weight in gold. Government figures on military demands on the commercial 1943 pack of canned fruits and vegetables show that about 33 pounds of canned foods will be available for each civilian in 1944. In the prewar period, we used about 46 pounds. That means that about one-third of our fruits and vegetables will need to come from victory gardens if we are to have amounts similar to the prewar period. Of course, we would be better off nutritionally if we used even more, especially more of tomatoes, greens and green and yellow vegetables, which can be easily grown in the victory garden.

Of course, you wouldn't operate your separator in the best room of the house. This is just to impress you with the absolute cleanliness of a Renfrew. No splashing of oil—no greasy, insanitary, fly-attracting mixture of oil and milk, making a mess of both machine and floor. The oil necessary to the operation of a Renfrew goes in at the top and remains inside until it is time to change it.

This is only one outstanding feature of the Renfrew Separator. Others include the low supply tank, ease of operation, close skimming — and highest quality and performance at a reasonable price.

You can buy your Renfrew from the man you know—Renfrew's own representative in your neighborhood. He is responsible to you and we stand behind him and all the Renfrew products he sells.

Municipalities Co-operate

Intermunicipal water service agreements, through which more than a score of large cities serve their suburban communities, are proving valuable in meeting various wartime problems. Cities throughout New York banded together in war zones for mutual aid through interconnections of water systems and interchange of materials and personnel. Washington, D. C., led in planning interconnections with adjoining communities, establishing intercommunications systems between emergency repair groups, and exchanging equipment.

Co-operative Buying

An increase in co-operative buying by Texas farm women was one of the significant trends in the field of rural home industries in 1942. Several years ago marketing committees of the state's county home demonstration councils experimented with co-operative purchase of pineapple for home canning. The venture proved so successful that the same plan has been applied to the purchase of other fruits, wheat, syrup, fruit trees, vines, rose bushes and some home equipment.

Kelly Field

Kelly Field in San Antonio, Texas, is believed to have been the "birthplace" of more military aviators than any training field in the army. It gave their wings to virtually all of the pre-war army aviators now in active service. The activities at Kelly Field and nearby Randolph Field have made San Antonio widely known as the "Mother of Aviation."

The first army airplane was purchased in 1909 and during the early summer of 1910, San Antonio first became associated with army aeronautics. From June 1 to 7, 1910 General Foulois, then a lieutenant, made a total of five flights at Kelly Field, marking its inauguration as a military flying establishment.

Lieutenant Kelly arrived there in the spring of 1911 and was killed on May 10, 1911, the army's first pilot casualty and its second aviation death. Following the accident, flying activities were moved temporarily back to College Park, Md. In 1912, however, two hangars were located at San Antonio and early in 1913, seven airplanes were sent there for border service.

The First Aero squadron was assembled at Kelly Field for duty with the Mexican Punitive expedition in 1915 and returned in the fall of 1916

Poison for Grasshoppers

Grasshoppers, which destroy an estimated $25,000,000 worth of crops annually, face a chemical foe in 1943 notwithstanding that the government requires for other purposes the sodium arsenite used heretofore to poison the pests. It is sodium fluosilicate, which meets all government specifications for use in poison baits to save large acreages from depredation. Sodium fluosilicate is a dry powder much more easily and safely handled than concentrated sodium arsenite solutions commonly employed. It is said to be much more distasteful to farm animals than sodium arsenite which is quite attractive. However, it is poisonous, and must be handled accordingly.

UBIQUITOUS ARMY JEEP HAS NEW FIRE-FIGHTER ROLE

First of 15 "jeeps" to be converted by the Canadian Army for use as fire-fighting equipment has rolled out of the Canadian Mechanical Transport Shops at Ottawa. This is a side view of the world's first "jeep" fire engine.

More than 70 per cent. of all the casualties suffered by the armies of the British Empire in all the campaigns of 1940 and 1941 were suffered by United Kingdom troops.

OTTAWA REPORTS

The Appointment of "The Joint War Aid Committee," Manned by Canadians and Americans

To the five committees in which Canada and the United States previously have joined economic and military resources for the most efficient prosecution of North American war effort has been added a sixth, the most important of all, perhaps, in its ultimate bearing on United Nations victory.

It has been named the Joint War Aid Committee, United States-Canada, and through the medium of Cabinet committees at Ottawa and Washington, to all intents and purposes will direct and control the flow of surplusses from the vast arsenals and agricultural fields of the two nations.

* * *

Chairmanned by an American, Major-General James H. Burns, Munitions Assignment Board, it is manned by Canadians and Americans, experts in the fields of military strategy, diplomacy, and munitions production. Its decisions while not to be law in themselves, will decide the course of action of Canadian and American Cabinet directing bodies in the disposition among United Nations of vast quantities of war supplies.

Billions and billions of dollars' worth of munitions and foodstuffs will be routed around the world on this committee's recommendations. Just how many billions of dollars' worth of supplies no one at the Canadian capital cares to estimate. But Canada's Mutual Aid program alone involves a billion dolars' worth of supplies, and United States Lease-Lend schedules visualize distribution involving many more billions.

* * *

The committee really constitutes a liaison between the two North American Governments—a body of experts to co-ordinate the various requests for aid of needy United Nations members. If a United Nations member asks Canada for machine guns, for instance, the committee will decide whether the need can best be filled out of Canadian or American stores and munitions plants; if a United Nations member asks for tanks, or aeroplanes, or guns, or wheat, the question of who will supply, and what country can best provide the ships, will be determined in the light of the knowledge and experience and circumstances of the two nations.

The work of the new committee is calculated to prevent overlapping of effort and duplication of supply. It probably will be expanded and continued into the post-war era when hungry nations of Europe are begging for sustenance from the two greatest food storehouses in the world, Canada and the United States.

SEND THE BOYS THE BEST

O'Keefe's BREWING COMPANY LIMITED is proud to reproduce from the current series of British War Posters, this tribute to the men of the Merchant Navy who carry food and munitions to embattled Britain.

A limited number of full colour reprints, size 10" x 15", of this poster are available, free. These reprints carry no advertising and are suitable for framing. Write asking for Poster No. 1, to "Poster", O'Keefe House, Toronto.

Canadians too, are playing their part in the gigantic task which this British poster depicts. You take part when you accept the need for sacrifices—when you voluntarily cut down your own purchases. As you keep your own needs to a minimum so do you release food to feed Britain.

F32

REG'LAR FELLERS—Where There's a Will . . . By GENE BYRNES

Harvesting with oxen is still a common sight to tourists visiting the beautiful Island of Orleans, a few miles below Quebec City.

Wagons Hitched To Wrong Mules

Capturing Italian generals in a race over the slopes of Mount Etna on muleback is all in the life of a British provost marshal.

The aventure began when two men in civilian attire proceeding on donkeys along a Mount Etna road inside the Allied lines aroused the suspicions of an alert British Eighth Army provost marshal, who found himself a similar mount and set off in pursuit.

Closing in on his prey in true Western style, the British officer found that he had rounded up a prize captive in the person of General Fiumara of the Napoli Infantry Division, who readily admitted his identity and pulled forth a crumpled but once resplendent uniform from his saddlebag to prove it.

The general's companion produced an equally wrinkled uniform to identify himself as the general's aide de camp.

The provost marshal remarked afterward that all he needed to complete the "Western thriller" was an American lasso.

WHAT SCIENCE IS DOING

MEAT BY-PRODUCTS

Scientific research is adapting many of the mea industry's by-products to war uses, a meat packing company said recently.

Dr. H. H. Young, Swift & Co., chemist, declared that animal tissues, glands, inedible fats, hoofs, horns, bones, hides and wool "are going to war in many forms and packages."

The chemist said in an interview that in the field of pharmaceuticals, research has made what he described as astounding ingredients produced from meat developments, with many of the animals saving lives on the battle fronts.

He listed among these lecithin and cephalin, which come from animal brain tissue and are used in treating poisonous reptile bites and promoting blood clotting; intestines used in making sutures; and adrenalin, derived from suprarenal glands, which makes bloodless surgery possible.

A special soap necessary for synthetic rubber manufacture has come out of the meat industry laboratories and the chemist estimated 100,000,000 pounds eventually will be utilized annually.

Other by-product uses listed by Dr. Young included:

Animal bones are an important source of gelatin used in photography, bone ash needed in copper smelting and special bone powders which are effective in removing fluorine from drinking water.

Hoof and horn meals as well as summer hog hair have found wide usage in Great Britain for making foam type fire extinguishing fluids. Hog hair also goes to make aviators' cushions.

Gelatin is used in the manufacture of photographic films for reconnaissance purposes and for the manufacture of smokeless gunpowder, among many other uses. Soap and glycerin, derived from inedible fats, have wide uses as lubricants, nitroglycerin, gunpowder, cordite and dynamite.

Picobac

IT DOES TASTE GOOD IN A PIPE!

GROWN IN SUNNY, SOUTHERN ONTARIO

How Can I??

By Anne Ashley.

Q. How can I get rid of ants?

A. Sprinkle oil of pennyroyal in the places infested by them.

Q. How can I avoid having brittle wallpaper when hanging it?

A. Leave the rolls of paper on the basement floor for a few days before beginning the work. The paper will absorb sufficient moisture to keep it from being brittle, and will also facilitate the handling.

Q. How can I remove olive oil from a rug?

A. Try covering the spot with Fuller's Earth, allow it to remain for several days and then brush off.

Q. How can I make a good filling for cookies?

A. A delicious filling for sugar cookies is peanut butter, thinned with butter and a little cream.

Q. How can I remove grease from trousers or other fabric?

A. Saturate with turpentine; then place the spot between two pieces of blotting paper and press a hot iron over damaged part a few minutes.

Training for Youthful Recruits

Youths of 17 and 18 years are needed for service in the Canadian Army as tradesmen and will be given special training in various categories as soon as enlisted.

Trades courses will train men as machinists, electrical automotive, draughting and survey workers. Youths enlisted in these categories must be in top physical condition. Their schooling must include at least completion of the eighth grade. Recruits will be documented and outfitted at district depots and then sent to vocational training school.

Application for enlistment as tradesmen may be made at the Beaver Hall hill recruiting centre.

HEMORRHOIDS

2 Special Remedies by the Makers of Mecca Ointment

CANADA'S NEW TIRE REGULATIONS

ADD MANY NEW CLASSES OF ELIGIBLE TIRE BUYERS - - -

Note: The following table of eligible tire buyers is of necessity greatly abbreviated. Many of the classifications are subject to qualifications and the list is not complete. The Firestone Dealer will gladly allow you to consult the Rubber Controller's Order No. 4 of June 30, 1943, which defines exactly who are eligible buyers:

CLASS A

Eligible for new, retreaded or used tires and retreading service; also for new or used tubes:

Doctors
Visiting Nurses
Veterinaries
Ministers, Priests, Rabbis (serving 2 or more parishes 3 or more miles apart)
Ambulance
Hearse
Fire fighter equipment
Police service
Garbage disposal
Express & Mail Service
Armoured cars
Delivery of newspapers (wholesale)
Prospectors
Public utilities
Public Passenger Vehicles
Ice and Fuel
Furniture movers
Construction, Repair and Maintenance
School Buses
Waste & scrap materials
Transportation of raw materials, semi-manufactured and finished products, including
Farm Produce
Farm tractors and combines
Common carriers
Industrial, Mining and Construction equipment

CLASS B

Eligible for used or retreaded tires and retreading service; also for used tubes:

War workers
Vehicles registered under Wartime Industrial Transit Plan
Vehicles used to carry mail
Dominion and Provincial Govt. officials
Judges, magistrates, crown attorneys, sheriffs, etc.
Highway engineers
Construction superintendents
Inspectors for fire, accident, grain elevators or boilers
Red Cross employees
Welfare Workers (full time)
Employees of Dom. or Prov. Depts. Agriculture or Breed Assns.
Employees of canners and preservers of essential foods and chick hatcheries
Buyers of livestock and perishable food commodities
Dentists and optometrists who attend the armed forces or who operate branches
Press reporters and photographers
Regional supervisors of Aircraft Detection Corps, Reserve Army or A.R.P.
School inspectors
Rural school teachers
Exterminators
Vehicles owned by flying schools
Taxis
Cars and trailers owned by farmers or by persons engaged in fishing, maintaining or repairing buildings and essential commercial machines

CLASS C

Eligible for used tires and tubes and retreading service:

Commercial travellers
Bond or Life Insurance Salesmen
Insurance adjustors
Finance company collectors
Chain-store supervisors
Farm implements or horse-drawn vehicles
Passenger cars owned by a farmer who also has a truck
Rural auctioneers
Vehicles operated by hotels
Ministers, Priests, Rabbis
Drugless and Christian Science Practitioners
Rural undertakers
Incapacitated individuals
Land surveyors
Tourists (emergency)
Members of the Diplomatic Corps, High Commissioners, Consuls, etc.

CANADA'S rubber crisis is still with us. But because of careful conservation and controls there are tires for those cars, trucks, and farm equipment essential to the war effort.

If you fall in this category (the chart at the left will guide you) and your tires cannot be repaired or retreaded, you are considered eligible to buy tires.

Your first move then is to go to your nearest Firestone Dealer. He has the definite official information and necessary forms. He will furnish the required Inspection Report and do everything possible to help you obtain a Tire Ration Permit necessary to obtain new or used tires or tubes and retreading service.

And remember — even if you cannot buy new tires—your Firestone Dealer has been trained and equipped to help you get the very last mile out of your present tires — no matter what make they may be. Put the care of your tires in the hands of your Firestone Dealer *now* —see him today.

MARRIED

LAUGHREN—SMITH

With Rev. P. Raymond Stote officiating, St. Matthew's Anglican Church at Charteris, Que., was the scene of a pretty Fall wedding on Wednesday afternoon, Sept. 1st, when Roberta Eileen, youngest daughter of Mr. and Mrs. Gordon R. Smith, of Maryland, Que., became the bride of Erwin Everett, son of Mr. and Mrs. Everett Laughren, of Charteris.

Given in maariage by her father, the bride was becomingly attired in an afternoon frock of heavenly blue crepe, fashioned on simple lines with touches of white lace. From her matching felt hat fell a shoulder-length veil. Her accessories were in black and her corsage bouquet was Briarcliff roses.

The bridesmaid was Miss Lois Laughren, of Ottawa, sister of the groom. She chose a rose two-piece dress designed on fitted lines, with lace peplum. Her hat was of matching straw and her accessories o black suede completed her ensemble. Her corsage bouquet was Johanna Hill roses.

Both the bride and bridesmaid carried white prayer books with colored streamers.

Mr. Ebert Smith, brother of the bride, was best man.

The wedding music was played by Mrs. Ruby Armstrong, of Maryland

Mrs. Smith, mother of tne bride, wore a becoming frock of dark green crepe, with matching accessories, and Mrs. Laughren, mother of the groom, chose an afternoon frock of Congress blue, with navy accessories.

After the ceremony, tea was served at the home of the bride's parents to the families of the contracting parties. The dining-room was tastefully decorated with summer blooms, pink and white streamers and white bells.

During the tea-hour, a telegram of congratulations was received by the bride and groom, from Lac. Marshall Laughren, R C. A. F., brother of the groom, stationed in Nova Scotia, who was unable to attend.

Later in the evening a reception was held in the Theatre Hall at Shawville, some 300 guests were present, Mr. and Mrs. Laughren were the recipients of numerous beautiful gifts and a substantial sum of money. The groom, on behalf of the bride, thanked their many friends and neighbours in a few well chosen words.

The happy young couple left by motor for Smith's Falls and other points. For travelling Mrs. Laughren wore a biege wool tweed suit with brown accessories. They will take up residence at Charteris on their return.

No Army Waste

Any soldier who has served his turn on KP duty will tell you that the only thing that is wasted in the mess halls at the Enid army flying school is good strong soap and a lot of old fashioned elbow grease on the KPs part. It seems to the KP a waste of time and soap to scrub the floor three times a day.

The motto of the cooks and KP pushers is "Don't throw that away." Every piece of excess fat trimmed from the meat before cooking is put into a big vat to boil out the grease for cooking purposes. All meat left over from meals is used again in meatloaf, swiss steak or stew.

A reasonable amount of meat is placed on each soldier's tray along with several kinds of vegetables. If a soldier is hungry enough to eat all of that, he can get back into the line for more.

Rationing has hit the soldier too. He is allowed a small square of butter with each meal, no more. Coffee is served 40 times a month. Each soldier is allowed a half-pint of milk a day, which is usually served at breakfast.

IN MEMORIAM

WOOLSEY — In loving memory of our dear Dolly Woolsey, who passed away Sept. 8th, 1941.

Quickly and suddenly came the call,
Her sudden death surprised us all;
Dearer to memory than words can tell,
The loss of our darling we loved so well;
We know that she is happy,
In our Saviours home above,
Growing fairer as she lingers,
In the sunshine of his love.

Sadly missed by
Father, Mother and Brothers

RENNICK—In fond and loving memory of a dear husband and father, Samuel Rennick, who passed away Sept 7th, 1941.

Sweet memories will linger forever.
Time cannot change them, it's true;
Years that may come cannot sever
Our loving remembrance of you.

Ever remembered by
WIFE and FAMILY

Fat Still Remains Best Source for Glycerine

Fat has remained the only important and economical source of glycerine in the eight decades that have passed since Alfred B. Nobel commenced his experiments in the utilization of the explosive powers of nitroglycerine. For that reason the soap industry, generally thought to be remote from the direct war effort, finds itself shouldered with the responsibility of producing sufficient glycerine to meet the great demands for high explosives by the armed services, both of this country and the United Nations, and the mining industry.

Glycerine, always important because of its many uses in industry, medicine, and the arts, is a vital product today because it is an essential ingredient of the high explosives demanded by war. The demand for glycerine is constant and urgent—for explosives such as dynamite, for propellants such as cordite, and for hundreds of other purposes contributing to the welfare of the United States and her Allies. When the war machines start rolling, glycerine is indispensable.

It is indispensable from the beginning of the fight to the end. The defense worker uses it in production; the soldier needs it for battle; the wounded man is grateful for it in the field hospital. Tanks, ships and planes last longer because of glycerine. Precious rubber is made more durable. Food is more easily transported. Wounds heal better, and burns are more successfully treated What used to be mortal infections are now being cured by its help as a base for the new sulphonamide ointments.

Music Only a Sideline To Marine Corps Band

"Persons who conceive of military musicians as 'stay-at-homes' who have nothing to do with the fighting overseas, would be surprised if they could visit this marine jungle outpost," writes Sergt. Charles R. Gordon, marine combat correspondent, in a report on musical activities in the South Pacific.

"In the marine corps every man is a fighting man. 'Field musics,' as the marine officials call the men who comprise their bands and drum and bugle corps, mix music with musketry. They carry rifles and bayonets as well as the less murderous trombones and trumpets."

Nearly every evening, Sergeant Gordon states, the band must furnish music at some camp or island function. On Sundays it plays for chapel services. Regular band practices last from two to three hours daily. Aside from these musical duties, band members must find time for a rigorous combat training in jungle country, and must become expert marksmen.

"To every marine-music-man music is only a sideline now."

SHAWVILLE FAIR
September 16, 17 and 18

Reports on Fall Fairs held in the Ottawa Valley to date show a marked falling off in exhibits Would-be-exhibitors are short of help and find it impossible to prepare exhibits as in the past. Shortage in labor and unfavourable weather for some Fairs has greatly reduced the attendance. Shawville coming next week will also suffer from shortage of labor. However, the increased prize money offered from the Breed Associations to arrange black and white, red and white, Shorthorn and Jersey shows at this Fair should bring out a good showing in these four breeds providing the Club and Society Officials co-operate in arrangements for housing, etc., and boosting these four special shows.

The Prize money for specials in ladies Depastment and Horse Classes has been increased. The purses for trials of speed are larger than formerly.

The Military Officials of No. 3 District who arranged for our music and military exercises last year have promised to supply us this year. Night shows before the Grand-stand each night will be arranged as usual.

Don't tell the girls and boys but, Benny H. has promised to be here again with Daniel's Greater Shows. Altogether we plan for a good Fair and a bumper crowd. Invite your friends. The puzzle is, how to feed our visitors under rationed conditions of purchasing even for this important event.

Once more we must depend on the generosity of the people of the district to donate for the Dining Hall services and eats (we know you are rationed also). We believe you will respond as in the past when the Committee make their appeal very soon

Let us all work to make Our Fair a most successful Exhibition and a general meeting place for friends.

R. W. HODGINS,
Secretary

Largest City in Algeria

Algiers: The largest city in Algeria, with 252,000 people, this is one of the leading French African naval bases on the Mediterranean as well as an important port for trade between Algeria and France. About halfway between the Algerian frontiers of Morocco and Tunisia, Algiers is less than 400 airline miles across the Mediterranean from France. With a moderate climate, the city is a curious mixture of modern French city life and unchanging Arab customs, such as the veiling of women. The European part of Algiers has theaters, big hotels, open-air cafes, and up-to-date shops along broad paved avenues, where automobiles and street cars run. The naval base is not far from the commercial harbor.

Some Siberian Cities Are Along Soviet-Jap Boundary

Some of Siberia's most populated and war-busy cities are strung along the threatened Jap-Russ border. Chita, north of the Manchurian border town of Manchuli, is perched in the Yablonovy mountains more than 2,500 feet above sea level. Its population of over 100,000 grew from a small contingent of exiles sent there in the early 1800s. The exiles built their own jail and their wives established homes along a street which ever since has been known as "Lady Street."

What is now a branch of the "Trans-Sib" railway cuts south near Chita through rich cattle lands and through the iron and tin-bearing districts to reach Manchurian territory at Manchuli. Before Japanese occupation of Manchuria, this route was a short cut to Vladivostok.

The country east of Chita is mountainous, wild, and well-timbered for many miles before it flattens out into the valley of the Zeah. In this valley, south of the railway, the forests have been cleared, the land plowed, and the rich black soil produces some of the finest grain known. This is the wheat bin of the Far East with its cultural and capital city of Blagoveshchensk.

Farther east, where the mountains and the fertile valley meet, is the Jewish Autonomous Region of Birabijan—a territory approximately twice the size of Palestine. The population is still relatively small and scattered, but the activity is great and concentrated. This region is peopled by voluntary Jewish settlers engaged primarily in mechanized agriculture. A huge steel mill is under construction in Birabijan.

HIGH SCHOOL EDUCATION NO LONGER REQUIRED

to join the

R.C.A.F.

YOU don't need a high school education to win your wings now. The R.C.A.F. is prepared to provide you with the education necessary to make you eligible for aircrew. This is your chance to team-up with the hard-hitting comrades of the skies in the big drive for Victory. Yes! . . . you can be in a fighting man's uniform at once. Make your decision right now! Enlist, for aircrew, today!

Planes and Schools are Ready to Train You Quickly

No more delay getting into aircrew. Basic training begins at once. Skilled instructors are waiting. Fast planes are ready.

If you are physically fit, mentally alert, over 17 and not yet 33, you are eligible.

ROYAL CANADIAN AIR FORCE

Join the Fighting Comrades of the Skies

Recruiting Centres are located in the principal cities of Canada. Mobile recruiting units visit smaller centres regularly.

Transplanted Seedlings Raise Good Garden Crops

Several good garden crops are usually started from seedlings that have been transplanted once or twice. These crops are usually either long-season crops that would not mature in the short growing season if they were planted outdoors after the weather became warm enough in the spring, or crops that do not grow well in the hot midsummer weather, but do grow well in the cooler fall months.

Home gardeners can usually grow their own plants of late cabbage, brussels sprouts and other fall growing plants, as the seed can be sown outdoors in late spring, and the plants set out in July or late June at the earliest.

But tomato, muskmelons, pepper, eggplant, and some other crops should be started indoors in the cold weather, to make plants that can be set in the garden after danger of frost is past, and the weather is warm enough for these warmth-loving plants to grow well.

The gardener who has a hotbed, or perhaps a greenhouse, can grow his own plants. If he has a large garden, or grows plants for a commercial crop, or to sell transplants to his neighbors, the system works well. Some farmers grow good plants in a brooder-house window. But many families try to grow tomato and other seedling plants in pots or flats in a kitchen window, or some other spot in the house. All too often, they finally have to buy their plants from some plant grower anyway, as their seedlings die, or get so spindly and weak that they are late in producing a crop.

Horses Aid Marines in Maintaining Patrol Duty

Early records show that the first mounted marines in the United States were British and that they were evacuated from Portsmouth, N. H., in June, 1779. They were known as Manley's marines and had been cavalrymen under General Burgoyne.

The United States marines never had cavalry for their mounted troops. Official records called them "mounted detachments" and the world has nicknamed them "Horse Marines."

Four years ago the most famous detachment of Horse Marines, that of the Legation in Peiping, China, was disbanded and the men absorbed into other regular marine units.

United States marines first went to China during the Boxer Rebellion of 1900. Nine years later a mounted detachment was formed to maintain a mounted patrol at night. It also took a weekly census of all Americans living in Peiping and its suburbs. Men of the detachment were familiar with the place of residence of all Americans, the location of all legations and Chinese government buildings so that they could be sent anywhere trouble broke out.

Moreover, their horses could take them through Peiping's narrow streets which were closed to automobiles and motorcycles.
