Why not a photograph for Christmas? The one gift that can't be duplicated. Your friends can buy anything you can give them except your photograph. Our Christmas Special, until the New Year, two extra photos given with each dozen. Make an appointment to-day. H. IRIKON, Photo Artist.

## Revival Services

The Bristol Ridge Pentecostal Mission will hold Revival Services at their usual place of meeting, commencing Sunday, Nov. 20th, and continuing each night for two weeks, except Mondays and Saturdays, at 7:30 o'clock. Sunday services will be held at 2:00 and 7:30 p. m. The Rev. A. E. Adams, of Gananoque, Ont., Evangelist. Everybody welcome.

## Induction Service At St. Paul's

The Rev. T. E. R. Nurse, newly appointed Rector of St. Paul's Shawville, and Holy Trinity, Radford, was inducted by the Rt. Rev. J. C. Farthing, Bishop, of Montreal, on Thursday evening last. Clergymen assisting were Rev. R. Dean May, of Chelsea; E. F. Macklin, of Portage du Fort, and W. LeCras, of Quyon. Following the service the congregation repaired to the Guild Room where light refreshments were served.

## Shawville United W. M. S.

Nearly one hundred attended the last meeting of the United Church W. M. S. in its regular session. Mrs. Draper presided, and the meeting was in charge of Mrs. L. Workman's group. Special numbers on the program were a ladies' quartette; a scripture pageant "The wise and foolish virgins"; and a dialogue by Mrs. and Miss Audrey McPherson. After a brief address by Rev. A. F. Fokes, a presentation of a Life Membership Certificate was made to Mrs. E. T. Hodgins, by her son, Nellis Hodgins, of Ottawa.

The address of the evening was given by Mrs. W. J. Connolly, of Cobden, on the subject of "Prayer". At the close of the service, light refreshments were served.

## Pontiac County Memorial Service

On Sunday afternoon, Nov. 13th, the veterans of Pontiac County held in Shawville their annual service of remembrance for those who fell in the Great War. The weather prevented the service being held at the monument in the park, but the large Exhibition hall was crowded to capacity. With Mr. H. C. Rowat presiding at the piano, the audience was led in the singing of appropriate hymns, "O God our help" and "Rock of Ages". Rev. A. F. Fokes, of Shawville United Church, presided and introduced the various speakers, all of whom spoke in high praise of those who had served so well through the war days for their King and Country, and called upon all present to dedicate themselves to the principles and ideals for which our Soldiers had given themselves.

The speakers were Rev. Fr. W. L. Murray, M. C., P. P., of Campbell's Bay, Rev. T. E. R. Nurse, of Shawville Anglican Church; Rev. Fr. J. Sullivan, P. P., of Bristol; Rev. E. F. Macklin, of Portage du Fort Anglican Church; Rev. E. Darlington, of Yarm United Church.

At the close of the addresses, all stood while the names of those killed in the war and veterans who have died since were read, and after two minutes of silence in their memory, the meeting was brought to a close with the singing of the National Anthem.

## 1832-1932

**35 Years Before Confederation . . .**

The Confederation of the Canadian Provinces was of paramount importance to the political and economic life of the Dominion. Likewise the founding of The Bank of Nova Scotia, a century ago, was a milestone in Canada's financial history. Founded to meet the needs of a small community The Bank of Nova Scotia today serves its customers through an organization international in scope and above all with the accumulated experience of a century of successful banking.

*This advertisement is one of a series commemorating the hundredth anniversary of The Bank of Nova Scotia*

**A CENTURY OF BANKING SERVICE**

# The BANK of NOVA SCOTIA

## PERSONAL MENTION

Mr. and Mrs. Clarke Cowan, of Toronto, were week-end guests of their relatives in town.

Dr. and Mrs. Kemp, of Richmond, Ont., were guests of Mr. and Mrs. Floyd Wilson for the week end.

Mr. and Mrs. Bud Hobbs, of Ottawa, were Sunday visitors at the home of the former's brother, Mr. Hilliard Hobbs.

Mrs. Geo. Young, of Campbell's Bay, has been spending a few days in town with her sister, Mrs. Ad. C. Hodgins.

Mr. and Mrs. Lee R. Scott, of Picton, Ont., have been visiting relatives and friends at the former home of Mrs. Scott at Elmside.

Mr. Art Hayes, who has been attached to the local staff of the Bank of Montreal for the past three years has been transferred to one of the Bank's branches at Ottawa.

Rev. T. E. R. Nurse and Mrs. Nurse and their family, formerly of Kazimbazna, Que., arrived in town on Wednesday, Nov. 2nd, to take charge of the Anglican Churches in Shawville and Radford.

Mr. Chas. Imison and sister Miss Nell and the Misses Adeline Somerville and Bea Quinn, and Mrs. A. Somerville, returned on Monday evening after a week's visit with friends at Windsor and Detroit.

Mr. and Mrs. Truman Lynch and family were pleasantly surprised on Wednesday evening of last week, when about thirty of their former friends and neighbors of the Beech Grove section motored to their home to spend the evening.

## Pleasant Gathering

The members of L. O. L. No. 34 held their annual get-together party on Friday night, Nov. 4th, at their lodge room. The function was attended by a goodly number of the wives and friends of the respective members and a most enjoyable evening was spent. The Rev. A. F. Fokes and his harmonica band contributed several selections to the interesting program. County Master, Mr. Bert Oullimore, officiated as chairman.

## The Church in Clarendon

The family of the late Archdeacon Naylor, wish to dispose of the few copies reserved in the Synod Office, and have left a number with us. This book would make an ideal Christmas Gift, for old Clarendon residents. Price, 50 cents.

# ASK NO QUESTIONS!

By BELDON DUFF

## SYNOPSIS

Annassa West, young and impetuous, leaves Bride's House, deserted farmhouse in a remote district in Connecticut. She moves in and installs her string of polo ponies. While inspecting the private graves newly opened with the warning "Ask No Questions," Otto, her stable boy gives notice that he is leaving, declaring someone has been riding Dracula, a savage stallion, at night. Annassa finds Otto murdered.

## CHAPTER IV.—(Cont'd.)

The editor of the Free Press would have liked to go on studying the writing on the fireplace a little longer; but his hostess was eyeing the door suggestively. He made as good an exit as he could, registering a solemn inward vow, as the gate clicked behind him, to return at no very distant date to puzzle out the meaning of that strange inscription.

Miss West's next visitor was Seth Toby. He came, towed into the room by Abby, and sat down on his hat and the nearest chair, all without saying one word.

The local chief of police had reacted to the murder much as a sleep walker would have reacted to a bucket of cold water flung in his face. He was dazed. He was speechless. There was no definite plan in his mind as to how to begin the present interview. Miss West saved him the trouble by beginning it for him.

"You found no trace of the murderer?" asked the one who was to be questioned.

"Not a trace." In a discouraged tone, "Not even the weapon."

"It must have been something dreadfully heavy. An axe perhaps."

"Yes, marm. The boy's head was all stove in. Dr. Martin says he was stooping over at the time. Leastways, that's how it appears the thing caught him."

Miss West had not much desire to hear the details of the killing. "I've a theory—I don't know whether it might help you any—that my stable boy had made a discovery of some sort. He was as curious as a woman, and from the minute we came here he started snooping about the barns and outhouses. Looking to see what the former owner had done with his riding implements and old harness. The fact that he was down there, in the cellar of the red barn, would seem to indicate that he was on one of his tours of investigation and that it had begun to worry someone. I think my maid told you about the warning which was pinned on Otto's pillow yesterday morning?"

Mr. Toby tapped his breast pocket. "I got it here. Evidence."

"It may have been the coffin," Miss West pursued. "If Otto found—"

"Coffin?" The sheriff sat up. "I didn't hear about no coffin. When was that?"

It was Miss West's turn to look bewildered.

"Why, down in the cellar, right where Otto lay. It rested on two packing cases. You must have seen it, Mr. Toby."

The man shook his head. "I bin down in that cellar twenty times this morning and there wasn't no sign of a coffin except the one we just put the boy in; and that was brought over from the Crossing by one of my own—"

Miss West cut him short. She had been thinking and thinking rapidly. "Will you come with me to the family burying ground? I can show you

where the coffin I speak of was taken from." This was no time to be critical about one's English.

The sheriff of Hales Crossing rose, recovered his hat, and followed his hostess to the door.

Over by the burying ground the willows drooped despondently under their weight of raindrops. A lizard on the stone wall scuttled daintily into his hole. Everything about the place looked sadder and less cared for than ever.

Miss West led the way around the monument to the side where the Runnells family buried its female dead. "There," she said, and stopped, her finger wavering as she pointed from spot to spot. "No, here. Why, somebody must have put the dirt back." In place of the open grave which had yawned at her so hideously the day before was now a mound of sod, looking for all the world exactly like all those other mounds. The heavy rain of the night before had removed every vestige of loose earth. And to make her frantically reiterated statement that a coffin had been dug up, "it had, it had," seem even less credible to the surprised Mr. Toby, a full two inches of water covered everything. The place was awash.

On the way back to the house there was little or no conversation, but at the front door Mr. Toby made what, for him, was quite an eloquent speech.

"If you take my advice, marm," he said, not unkindly, "you'll pack your things and go straight back to the city. This ain't no fit place for a sensitive person to live in. The Runnells all went kinda crazy too before they died."

First Alva Cropsey, and now this country bumpkin! No one believed she had the courage to stick it out.

Miss West went into the house and slammed the door after her.

## CHAPTER V.

Later that same afternoon Garling, the early lodge keeper of Berkshire Towers, opened the gates to permit John Diamond's high-powered French limousine to roll out upon the state highway.

At a glance, one suspected Garling to be at odds with his world, misogynist as well as misanthrope. Which judgment closer contact confirmed.

With only a large and somewhat battered fighting terrier for company, he lived in the lodge alone, seldom emerging except in the line of his duty when, as now, both he and the dog stood at attention, one on either side of the blue-gravel driveway.

If the owner of the limousine saw these two faithful servants as he passed, he made no sign. Seated stiffly erect, his gloved hands folded across the handle of a malacca walking stick, the millionaire kept his eyes fixed on the road ahead. To judge from the frown which clouded his usually placid brow, matters of a disturbing nature occupied him. That these matters had, in part, to do with the recent tragedy at Bride's House would have been a safe guess. His business editor had just left after reporting on the unsatisfactory nature of his interview with Miss West; and that, in conjunction with an overheard luncheon of fried chicken and strawberry tarts, had acted as a wet blanket over the great man's spirits.

A mile and a quarter beyond Berkshire Towers marks the beginning of the Wood Road, universally avoided by the people of Hales Crossing because of its chill and sinister reputation. As the limousine turned in here from the highway, a shadow might have been observed to cross the face of John Diamond. Not so very surprising, since overhead were trees of such height and spread that their interlacing branches cut off all view of the sky, creating even on a sunny afternoon the effect of early twilight. Today the gloom was stygian.

The chauffeur, an impressionable little cockney, and the footman, on whom the story of the German stable boy's untimely exit from life had had a most nerve-racking effect, looked at each other furtively. A punctured tire at this moment would be a bit of bad luck which neither cared to contemplate. The sight of a trim blue-gray roan picking its way along the road just ahead came as a welcome diversion. On the roan sat a young woman whose unconventional riding costume in no way detracted from the charm of her smoothly rounded figure, and whose hair was red enough to suggest a generous supply of temperament. Both flunkies sat up consciously as they passed.

An imperative order through the speaking tube brought the limousine to a stop. John Diamond had also taken note of the roan and its rider. While they waited for the two to catch up he absently adjusted his collar and tie.

"Pardon me, but isn't this Miss West?"

The girl turned and looked down over one shoulder, her eyes alighted on jade, obliquely questioning.

"I was on my way to call on you," the millionaire continued.

"Indeed?" Miss West's attitude was not encouraging.

"Yes." His tone became less peremptory. "Mr. Cropsey informs me you are determined to remain at Bride's House." There being no answer to this he continued. "It is seldom an employee of mine fails to carry out my orders."

"Orders?" The green eyes sparkled dangerously. "Did I understand you to say—orders?"

The owner of the limousine lowered the window the rest of the way and leaned one elbow on the sill. The interview gave every promise of becoming heated. "I told Mr. Cropsey to see that you were moved out of here immediately. There is a comfortable farm over in Westport which belongs to me. You may have it rent free for the remainder of the summer."

"Thanks. I am not an object of charity. My rent is paid here, and here I propose to remain."

There was a pause tingling with suppressed emotions. At last Diamond spoke. "Suppose I force you to leave?"

Miss West threw back her head and laughed; but there was no mirth in the sound. "Try it," she urged, picking up the reins from her horse's neck. Instantly the millionaire's manner changed. He put out one hand to check the threatened departure. His voice, even his eyes, were pleading.

"Miss West, I have been at fault. When you came to me, six weeks ago, with this strange plan of yours, I mistook you for one of those young women who resort to all sorts of outlandish pranks to keep themselves in the public eye—a piece of blind stupidity for which I now ask forgiveness."

Miss West looked surprised at this complete change of front; but before she had thought of anything appropriate to say John Diamond continued:

"However, with my help or without it, you did come to Bride's House. One death already has been the result. Others may follow. My dear young lady, I beg of you, be advised by those older and wiser than yourself. Pack your things today—at once—and leave this gruesome spot. My servants are at your disposal, my car, my home—myself. Let me wipe the memory of that other visit from your mind by taking you back with me to Berkshire Towers."

## (To be continued.)

## Light on the Talkies

In discussing the development and use of talking motion pictures before the Franklin Institute H. M. Wilcox, who has had much to do with their introduction, remarked that the tinkling of keys "is about the highest-pitched sound that the ear can perceive and the rumbling of the lowest organ note the deepest it can detect, a range of about nine and a half octaves."

Artillery fire is the loudest sound that can be endured and the faint rustling of leaves the faintest sound that can be heard, "an energy ratio of about 100 million million to 1."

It cannot be said that any system records and reproduces satisfactorily all sounds from the lowest that are audible to the highest or from the faintest to the loudest. But ordinary requirements are readily met.

Mr. Wilcox says that by 1925 it was possible to record sounds which ranged from 200 to 9,000 vibrations a second in pitch and in volume from thirty to thirty-five decibels (a symphony orchestra has an average volume of sixty-six decibels), and which might be uttered by an actor at such distance from a microphone that he could move about with some freedom. After that the "talkies" were bound to come.

By October, 1927, Al Jolson was presented on the screen in the "Jazz Singer," the first full-length feature picture with dialogue. By midsummer of 1928 about 5,000 men were at work in one plant alone turning out equipment for talking motion picture theatres.

## Native Born

"Canada Week by Week" presents some interesting figures that refute, in convincing fashion, the oft-heard statement that the country is being "over-run" by foreigners.

According to "Canada Week by Week," quoting the recent Dominion census, 77.76 of the population of the country were born here. Those born in British countries outside of Canada account for 11.41 per cent and foreign-born represent 10.83 per cent of the residents.

## Latest Findings Of Science

### Volcanic Islands That Suddenly Appear Out of the Sea

—New Silk Fabric

As one result of the series of earthquakes that have shaken Greece, an island is reported to have disappeared in the Aegean Sea. Since one chief cause of earthquakes is the sinking of the earth's crust to keep pace with the shrinking interior, an unsupported island might easily fall inward. Raised masses of rock sometimes slip toward adjacent lower ground. An earthquake might start such a slip.

That islands come and go geologists have known for generations. In fact, the process has been seen. There are islands that appear because waters rise or recede, and islands that owe their existence to the rising and subsidence of land. At the deltas of huge rivers, sand and silt may accumulate to form islands that may measure square miles in extent. Even along the eashore the waves may form peninsulas and islands, although they rarely last for more than a season or two.

But most of the islands that come and go are of volcanic origin. Inasmuch as water covers three-quarters of the globe, it follows that there must be more submarine than land eruptions.

The Mediterranean peoples have recorded the formation of more than one island by under-water volcanoes which have built up cones that lasted for years and ultimately acquired vegetation. Thus in 1891 a temporary island was formed three miles south-east of Sicily. More spectacular was the case of an island which is variously known as Graham, Guilia or Ferdinandea, the appearance of which, in 1831, thirty miles south-west of Sicily, was heralded by a tremendous geyser of water and then of steam. The continued upward thrust from below ultimately formed land three miles in circumference and 200 feet high. Soon the newly formed island began to subside. In a few months it had disappeared.

Boguslov in the Aleutians, Alaska, appeared in 1796 and four years later had grown to 3,000 feet. An earthquake hanged the whole character of the region in 1899. Reefs and islands rose out of the water. Boguslov was affected. It comes and goes.

The recent case of the Greek island has its counterpart in the disappearance of the island Anak Krakatau in the Malay Archipelago—a disappearance clearly related to the intense activity of the nearby volcano Krakatau, the most tremendous eruption of modern times. In January, 1925, the island of Port Alexander sank, almost like a ship, off the west coast of Africa. A few sailors in the vicinity reported that they had been overwhelmed by a huge wave. When the water subsided the island was gone.

Puzzling, too, is the case of Falcon Island in the Nomuka group, which has been appearing and disappearing ever since 1865.

All this activity means simply that nature has not yet finished the task of molding the earth. She is busily engaged in tearing down mountains with the aid of wind and water, shaking continents down, wearing away peninsulas and thrusting up new land from below. When she completes her work and the earth is "finished," life will be extinct.

NO LABELS—JUST VOICE AND SPOTLIGHT.

While he was wandering about in a Chicago museum Ernest Kohler, Jr., an electrical engineer, was struck by the fact that exhibits were mere curiosities to most visitors. Few bothered to read the labels, and yet the labels pointed out what were really interesting and important about the exhibits. He convinced himself that a machine of some kind was needed to make information attractive—something that would give an arresting, brief lecture.

So Kohler developed a machine. A phonograph record is made by some one who speaks English pleasantly and correctly, and the record tells the story of the exhibit. If a case is filled with exhibits it becomes necessary to point out the one about which the phonograph is talking. The pointing is done by means of a spotlight. Who switches on the light and does the pointing? The voice from the phonograph.

In electrical communication we have many different substitutes for human senses and nerves. Kohler borrowed an electrical circuit that can "hear" only a musical note of the right pitch or the right combination of pitches. He also adapted the well-known vacuum tube to his purpose. The two together gave him a true musical nerve that hears only one note, although the human ear responds to any audible sound.

When the phonograph finishes talking about a peacock in a caseful of birds and it is time to switch to the bird of paradise it sounds a musical note. At once the spotlight shifts to the bird of paradise, and with it shifts the visitors' attention.

If it is desirable that the tone that twitches the musical nerve should not be heard, an electric wave filter is called into action. The filter shifts the announcer's voice from the twitching tone so that the tone is heard only by the musical nerve.

Soon we shall have window displays

## The Household Word For Tea

# "SALADA" TEA

"Fresh from the Gardens"

which will do away with the ribbons and strings leading from the plate glass to labeled parts. A suave voice will dwell on the merits of a new oil-burner, and a mechanical or optical finger will point to the particular feature that distinguishes the burner from all others.

## THE REVIVAL OF RAMIE.

For years the possibilities of ramie, which looks like silk but is much stronger, have been discussed by textile manufacturers. Individual ramie fibres range from four to six feet in length, compared with a length of less than an inch for cotton. The ramie plant yields 1,500 pounds of fibre a year, but the cotton plant only 150. Moreover, ramie can be harvested mechanically and it is free from pests.

What is the fly in this attractive ointment? The cost and difficulty of separating the bark from the fibre. In the Orient large quantities of the fibre are produced in carefully tended plots, harvested, purified and woven locally. Only the cheapest hand labor makes it possible for ramie to compete with other fibres in this limited fashion.

According to the American Chemical Society, the commercial prospects of ramie are brighter than they ever were, thanks to a new chemical process developed by Professors P. M. Horton and G. L. Carter of Louisiana State University, for scutching, or debarking, the fibre. The ramie is cooked for four hours in a combination of aqua ammonia and sodium sulphite under a pressure of sixty pounds per square inch.

When I was planning my summer wardrobe I got out all my old clothes," writes an enthusiastic lady from Toronto. "Way back in the closet hung a chiffon blouse—perfectly good but unwearable because it had lost all its original color. I asked the druggist one day what I could use to color my blouse that didn't require boiling. I knew boiling would ruin the delicate fabric. He showed me Diamond Tints; told me they were made by the makers of Diamond Dyes, which instantly made me feel safe about them because I know the quality of Diamond Dyes—have used them often in dyeing dark colors. He told me Diamond Tints are the new way to get light shades just by rinsing or dipping. He had all the popular shades, but I chose a delicate shell pink. It came out beautifully and was so easy. It was just like finding a brand new blouse!"

DIAMOND TINTS AT ALL DRUG STORES

## Trade in Year 900

Copenhagen.—Proof that trade connections existed between the far North of Europe and the East 1,000 years ago is said to be provided by the discovery of a collection of coins on a farm belonging to Anton Mortensen, of Over Randler.

Nearly all the coins in question are Kuphan (old Arabic), dating back to about the year 900; two are still older and hail from Persia, and one was minted in Milan at the time of the Carolingian Empire. Another is a kind of memorial coin or medal hailing from East Anglia, which is considered exceedingly rare, only very few specimens being known."

To give and to lose is nothing; but to give still, is the part of a great mind.—Seneca.

## ACHES and Pains easily relieved

Aspirin will relieve your suffering harmlessly and in a hurry. Swallow a tablet in a little water. The pain is gone!

It's as easy as that to be rid of the pain from an aching tooth; of headache from any cause. Muscular aches due to rheumatism, lumbago; to colds or strains, are easily overcome. Those unexplained pains of women are soothed away in an instant.

The modern way to relieve pain is with Aspirin. That is the way that modern medical men approve. They know Aspirin is safe—can do no harm. It does not depress the heart.

You will always find Aspirin in any drugstore, and if you read the proven directions and follow them you will always get relief. You will avoid lots of suffering if you just remember about Aspirin tablets. Be sure you get Aspirin and not a substitute.

"Aspirin" is a trade-mark registered in Canada.

## CANADA

### The Kingston Outbreak

The outbreak at Kingston Penitentiary came in the nature of a sudden shock to the people of Canada. We have been so used to regarding our prison administration as beyond reproach that we have come almost to a pharisaical attitude in regard to the prisons over the border which have witnessed not a few shocking outbreaks during the past few years. Now the matter comes nearer home and there is a very resolute conviction that this must be investigated thoroughly and without delay, and that any evils existing must also be remedied without delay.—Montreal Daily Star.

### Conditions Improving

Saskatchewan is conquering depression, and by the method of reducing unemployment. What that province has been able to do is an evidence of the unconquerable spirit of the west. Conditions are obviously improving, and already there is noticeable a change in the mentality of the people. They are realizing that conditions which they have been responsible for creating can also be overcome by themselves when they have the courage to face the facts.—Victoria Colonist.

### Safe Driving

One of the sound rules for safe driving is to "watch the other fellow." When we form the habit of doing just that we keep our eyes on the road ahead. When we keep our eyes on the road ahead it's ever so much easier to keep our minds on the all-important job of driving safely. Watching the other fellow develops a new interest in him, too. It fosters a badly needed highway courtesy. It is a constant reminder that the road is owned by all, and not by any one driver. It tells us that the other fellow has equal rights with our own, and that if we infringe on these rights we do so at our own peril.—Brandon Sun.

### Movement of Wheat

Although the price of wheat continues at a disappointingly low level, the sale of so much grain even at present rates means bringing into the country many millions of new money. Transportation interests are enjoying gratifying activity in consequence and general business is reviving steadily.—Calgary Herald.

### The New Empire

It must not be forgotten that the Ottawa agreements form but the first steps in the direction of a great and far-reaching adjustment of trade. The Empire has decided to trade more with itself. That means that henceforth it will be more interested in investing in itself and in developing itself. The new order of things should mean something far beyond increased trade in this commodity or that. It must mean, if it is to be a success, new Empire lines thrown out and around Empire countries—lines of emigration, lines of investment, lines of cultural contact—in short, a more closely-knit, more solid Empire than the past has known.—Vancouver Province.

## BRITISH

### Money and Employment

The first essential to the provision of jobs is money. Despite the prevailing depression, there is no lack of money in this country. Vast sums are lying idle in the banks. What is needed is the release of some of this money, and its flow directed towards the provision of employment through a plan of National Development.—London Daily Herald.

### The Crisis of the League

We have had the League of Nations only a few years now, and in that short time it has done much. It has bound up some wounds of the last war, cured some ills of the present, and prevented some evils for the future. It cannot attempt everything all at once—to give peace in twelve years to a planet which has been distracted by war for more than double that number of centuries. It can only attempt what a sufficient number of its supporters want it to attempt. The real danger in this crisis in its affairs is not of too slow progress but of its falling back through lassitude and ignorance on the part of Governments and peoples into a state where nobody cares whether it lives or dies. That must not be; the world would have no use for an apologetic survival lingering on like a Holy Roman Empire or a Holy Alliance long after the life had left it.—Manchester Guardian.

### Fasting Unto Death

Gandhi has established what seems to us a bad precedent, and we note that he threatens, should the occasion arise, to fast again. We may have a whole series of questions decided by this sort of appeal to a pity which is akin to terror. We do not say that there is any fear of the practice spreading to the West. Moreover, we are confident that, even if our Prime Minister or the Secretary of State were to sit down under an oak tree at Chequers, or a plane tree in Whitehall, with a glass of soda water beside them, it would make no difference at all to the policy of Congress in India.—London Evening Post.

## EMPIRE

### Britain's Trade Agreements

We are not surprised to learn that European nations are "tumbling over one another" in the desire to conclude new trade agreements with Great Britain. It is doubtful, however, whether they will receive treatment quite so generous as that accorded to the Dominions; a meticulously careful weighing of privilege against privilege is much more likely. After all, Great Britain has had all the disadvantages of international trade and none of its advantages for decades past; it is time we square up the account.—Rand Daily Mail (Johannesburg).

### Ottawa Logic

"Britain is the keystone of our Empire economic structure, and without a prosperous Britain with a high purchasing power all our efforts must fail," says Mr. Stanley Bruce. That is a sound point of view, though it is one which many Australians have failed to appreciate. We cannot sell to advantage in our best markets unless people there who are anxious to buy can do so; and they can only do so if their economic circumstances are favourable. The making of concessions on our part is therefore a form of enlightened self-interest.—Melbourne Australian.

### The New India

It is often said that Great Britain has gone too far in the surrender of power in India to retreat from what she has done but it is equally true that India has gone too far ever to get back to the evils of the past. A democratic India, an India devoted in far larger measure to industrialism, an India to which world trade will be an essential, will be an India transformed in her social life. The India of the future will not be an India in which millions are damned from birth or in which privileges are reserved for the few, irrespective of their deserving. It will be an India in which the opportunities will be equal to all. We are witnessing the slow dying of an epoch. It is for us all to see that it is replaced by something better.—Calcutta Statesman.

### A Good Prospect For Jamaica

Not a fortune for a few but a livelihood for the many is what we must aim at in producing fruit for the consumers of England and Canada. The masses in England are wage earners with a very small margin for luxuries, but when luxuries become cheap they also become necessities, and those parts of the Empire which can produce food and fruit that will be both luxuries and necessities will benefit greatly by preferences giving them first place in the British market.—Jamaica Gleaner.

### The Danger of Roads

Speed in itself is rarely a danger. Yet the road offence upon which police officers spend most time and ingenuity is the trapping of motorists who travel at 35 miles an hour, when often the circumstances would render safe an even greater speed. The culpable motorist is the one who imagines that the whole width of the road is his rightful preserve, that he can stop, turn or swerve without signal, and that he can swoop into a main road as though he were turning into his own gate.—Cape Argus.

## AMERICA

### A Genius Needed

Portland, Ind., erects a stone shaft memorial to Elwood Haynes as inventor of the modern automobile. But what a row of shafts a grateful public would be willing to erect to anybody who invented an automobile that would stay modern for more than one season!—The Christian Science Monitor.

### Judges at Royal Winter Fair

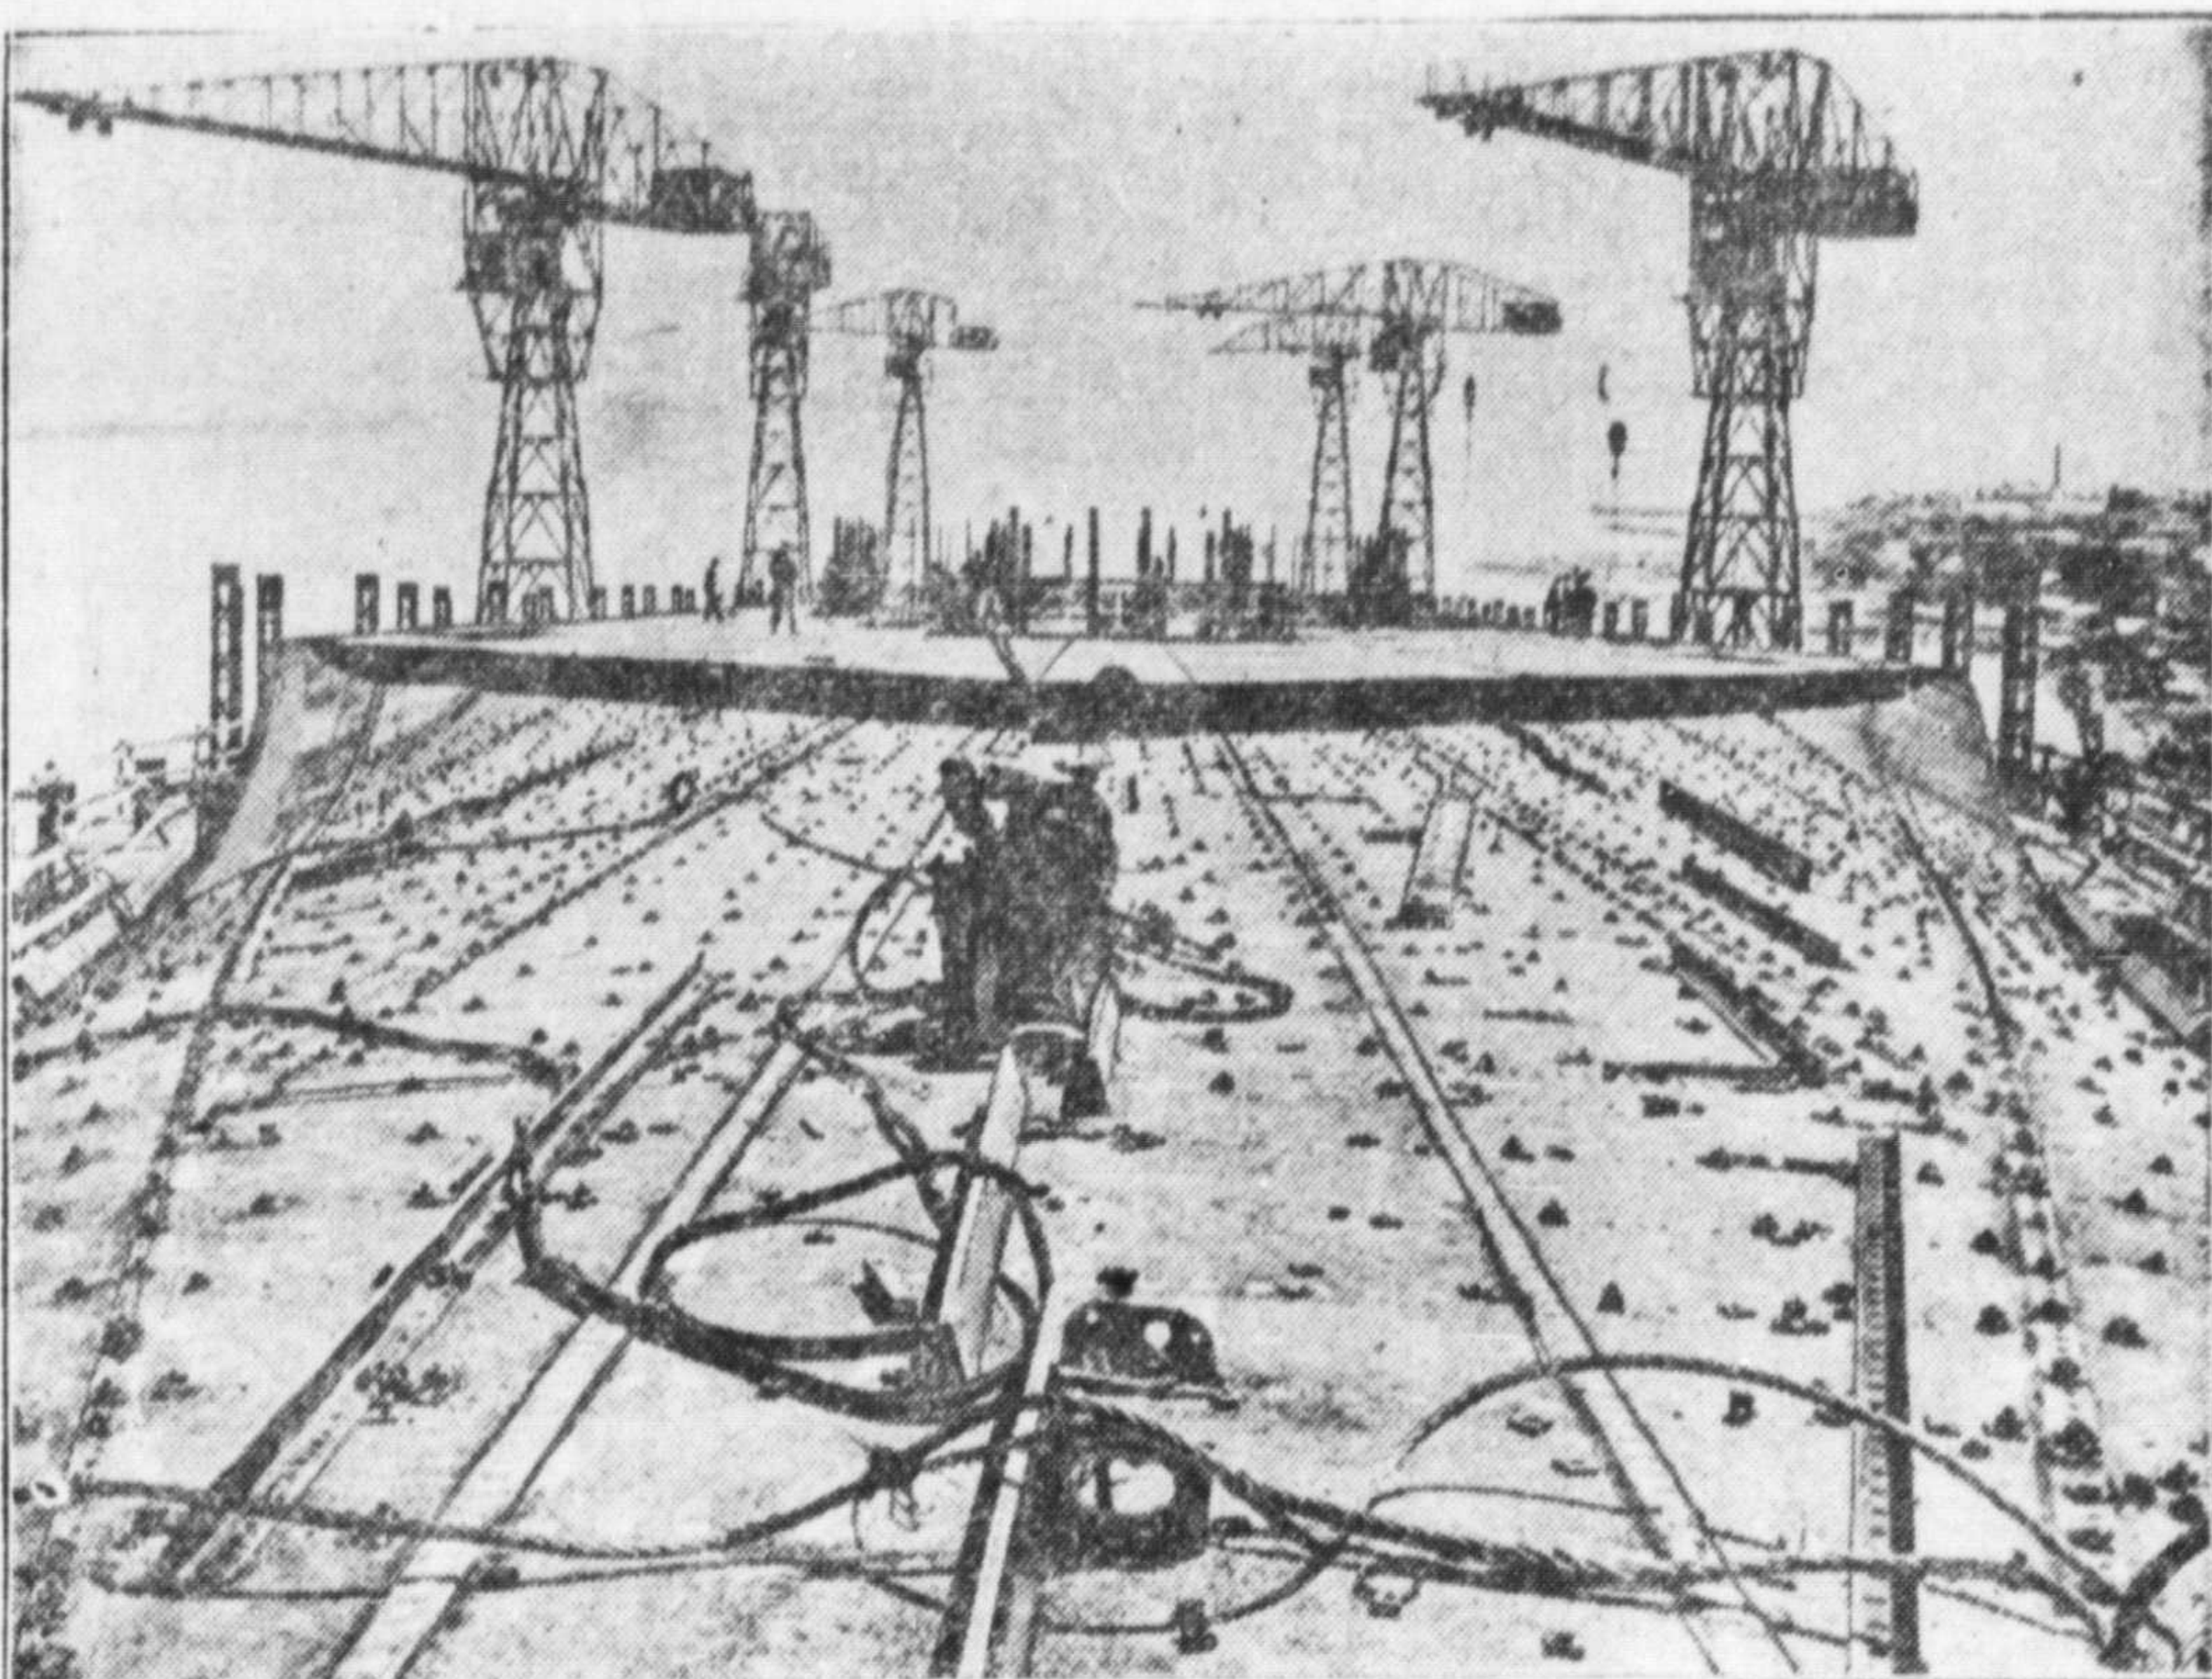

The Right Honorable the Earl of Westmoreland a prominent member of that elite group of hunting enthusiasts and sportsmen who, carrying on the long tradition of the Dukes of Beaufort, have made the little Gloucestershire village of Badminton world famous as the centre of all-round sport, will head the list of judges for hunters and jumpers at the Royal Winter Fair Horse Show next month. The Earl has just cabled his acceptance of the Royal Winter Fair's invitation to attend and to judge in the most interesting and numerous classes of the horse show programme. With him in the hunter and jumper division will be Elliott S. Nichols of Detroit and George B. Elliott of Toronto.

The other judges for the Royal Horse Show are: Harness Horses and Ponies—Wm. H. Wanamaker, Jr., Philadelphia, Pa.; Thos. W. Clark, Edgemont, Pa. Saddle Horses and Ponies—Frank Adair, Atlanta, Ga.; Holland B. Judkins, New York, N.Y. Commercial Classes—Thos. H. Irwin, Lambton Mills, Ont.; Andrew G. Bain, Hamilton, Ont. Roadsters—Herbert Collicutt, Port Perry, Ont.; Frank Adair, Atlanta, Ga.

### Sunday Island

Sunday Island, in the Pacific, is really the tallest mountain in the world. It rises 2,000 feet out of five miles of water, and is thus nearly 30,000 feet from base to summit.

## France Building 70,000 Ton Liner

Not content with just launching the fastest destroyer in the world, France is now busy building the largest liner. Here we see building operations at Saint Nazaire. She's 1,024 feet long and has a displacement of 70,000 tons. The rive's used, if placed end to end, would stretch 400 miles—and that's not stringing a liner.

## Students of McGill

### To Be X-Rayed for T.B.

Montreal—Five hundred first-year students at McGill University will be x-rayed for tuberculosis germs, by the department of physical education during the next few weeks. McGill is the first Canadian university to carry out an experiment of this kind.

The addition of X-ray apparatus to the facilities already available in the department of physical education at McGill is made possible through the co-operation of the university with the Quebec industrial hygiene committee and with the financial support of one of the McGill governors, who preferred to remain unidentified.

The X-ray photographs will be carefully studied and filed away in order that a complete history of the health of these 500 students may be kept all through their university course. In this way it will be possible to determine how the "white plague" attacks students and what percentage is affected.

Next session it is hoped to X-ray another 500 incoming students, both men and women, and thus have a record of some 1,000 undergraduates. It will require about five years to get the first fruits of the investigation, but the practical value of the X-raying will be immediately available to the students.

## Game Birds Take Toll of Crops in Alberta

Irricana, Alta.—Hundreds of ducks and geese are taking heavy toll of the wheat still remaining in the fields of this district it was noted last week. Only 40 per cent. of the crop has been harvested due to the delay caused by the early snowfall.

The game birds are attacking hundreds of acres of wheat, securing rare feeds from the crop. Two farmers of the district complained their 300-acre crops have been ruined by the birds.

## King Reduces Rents

London.—The King has reduced by 20 per cent. the rents for allotments of the Sandringham estate. One year ago the King took over the adjoining 1200-acre farm when no new tenant was forthcoming and it will now be used by 60 workmen, who will hold their allotments by tenancies let by the King personally at \$4 an acre.

## Non-Permanent Branch

### Of Air Force Considered

Ottawa.—Formation of a Canadian non-permanent air force on lines similar to the auxiliary air force in the United Kingdom is under consideration by the Department of National Defence and an announcement is expected shortly.

The proposed force would consist of three squadrons, located at points yet to be selected. Each squadron would contain about 20 officers and 175 other ranks, with a reserve of officers. Applicants for commissions would be required to obtain pilots' licenses and be acceptable to the other officers.

As a branch of the Royal Canadian Air Force the new body would be operated along about the same lines as the present non-permanent active militia.

## Watch Dial on Egg Shell Leads To Speculation on Hen's Diet

Chester, Eng.—An egg laid by a hen at Barton Malpas, Cheshire, had a perfect replica of the face of a watch marked on its shell. The Roman numerals are complete and even the minute divisions are perfectly plain. The numerals and divisions are raised above the surface of the shell and there is a deep impression above the number XII, corresponding to the window of the watch.

The egg has aroused great interest in the Chester market and the owner of the hen has been offered large sums of money for it. There is no explanation for this freak of nature, but some persons are wondering whether the hen has lately swallowed a watch.

## Belgium Now Has Phone Service to Leopoldville in the Congo

Brussels.—Telephone communication between Belgium and Leopoldville in the Belgian Congo has been inaugurated. The lines will be open from 10.30 a.m. to 12.30 p.m. and from 2.30 p.m. to 5.30 p.m. on week days, and from 10.30 a.m. to 12.30 p.m. on Sundays.

A three-minute conversation will cost 300 Belgian francs (about \$11.14), and each extra minute will be charged for at the rate of 130 francs. Persons desiring to converse with somebody in the Congo are advised to arrange for the call some hours in advance—preferably the day before.

## Home in the North

I know a house beside the sea Where rocks and gulls call down to me Of other shores more wide and fair Than those beneath the window there; With bolder rocks and whiter sand, And hills behind more green and grand.

I never listen, for I know That wheresoever I may go, No other place could ever seem More beautiful, no water's gleam More bright with memory's magic foam.

Than those about my northern home, That, nestling in its hills apart, Gathers me ever to its heart. —Elizabeth Fleming, in the Christian Science Monitor.

## More Tourists Visit Belgium

According to the Belgian tourist office, the number of foreigners who came to Belgium this Summer was greater than last year. Hollanders came first, in the matter of numbers, followed by French and Germans. There were few Americans and British. The tourist office directed its advertising efforts toward Holland, Northern France and Central Europe. Much is being done to attract parties of school children, with their teachers.

## Rich Copper Deposit in Nevada

A huge deposit of copper, averaging 46 per cent., now is being developed in the northern part of Elko County by the Rio Tinto Copper Company. It is said to be the world's richest copper deposit and, according to experts, would be a money maker even at present starvation copper prices.

## Census in China Reveals 474,787,386 Population

Shanghai.—The Mini try of the Interior in Nanking has completed a census of China which it claims is the most nearly accurate ever made. It establishes the population at 474,787,386. This includes Manchuria, Mongolia, and Tibet, over which China claims sovereignty.

Previous estimates of China's population have varied from 350,000,000 to 500,000,000. The Ministry does not explain how it has obtained such precise census figures in territory over which it has no actual control.

## Italy Seeking Speed Record

Despite Loss of Pilots, She Still Keeps After World Record on Lake Garda

Rome.—The tragic death of Lieutenant Ariosto Neri, Italy's "speed Wizard," has led to a delay in the preparations which are being made at Desenzano on Lake Garda to wrest from England the world's seaplane speed record, but the intention of regaining this much-sought-after honor has by no means been abandoned. On the contrary, it is stated that a fresh attempt will be made as soon as temperatures are steadily cool enough for racing seaplanes to take off. The Italian machine which is to make the attempt to conquer the world's speed record will be piloted by Warrant Officer Agello, who was formerly No. 2 of the Italian team and has become No. 1 since the death of Lieutenant Neri.

Italy has paid a heavy toll of lives to high-speed flying. No less than nine of her very best pilots have lost their lives in the last four years in practice flights in Desenzano. Nevertheless, there is no decrease in the determination to conquer the world's speed record.

The latest Italian racing seaplane, which was built for the last Schneider Trophy race, but was not in readiness in time to take part in the contest, is considered to be by far the fastest flying machine in existence in the world today. It has developed, however, a mysterious defect, the exact nature of which the engineers have not yet been able to discover. No less than three of these machines, while flying at top speed over Lake Garda, have suddenly nose-dived and plunged into the water of the lake. The pilot, in each case, was killed, so that it has been impossible to find out to what these accidents were due.

### Flier Avoids Crash

Lieutenant Neri himself, in a practice flight before his death, in which he is said to have reached a maximum speed somewhere in the neighborhood of 470 miles an hour, had his rudder carried away. Only his truly extraordinary skill enabled him to land safely on the lake, without injury to himself or his machine. It is thought that perhaps the destruction of the other machines was due to a similar breakage of the elevators. These, however have been carefully checked in the remaining machines, without any visible defect.

Others believe that the defect lies in the two engines revolving in opposite directions with which the new machines are fitted. Italian engineers believe that a great future is in store for machines of this type, as the fact that the two engines revolve in opposite directions eliminates the torque which is so troublesome to pilots in light racing machines. The mechanism, however, is extremely complicated, as the two propellers are driven by means of two concentric tubular shafts, revolving in opposite directions, the one inside the other. It is more than possible that the accidents are due to some slight defect which develops at high speed in this intricate mechanism.

## Leprosy Gains in Brazil

Rio de Janeiro.—The increase of leprosy in Brazil is alarming sanitary experts who assert that the malady is spreading so rapidly especially in the north, that it should receive the immediate attention of the government.

Unofficial figures indicate that affected persons are scattered throughout Brazil. Physicians are asking for special legislation to permit the formation of centres where lepers may be segregated in an effort to prevent further spread of the disease.

At present there is only one official leper hospital in Brazil. That is at Jacarepagua, on the outskirts of Rio de Janeiro, and has accommodations for only a small number of patients.

## England Forces Wealthy To Pay for Schooling

London.—New regulations which reduce free education in the secondary schools—corresponding to public high schools here—were announced in the House of Commons last week by Herwald Ramsbotham, Parliamentary secretary of the Board of Education. He estimated the saving to the Government would be £400,000 a year.

The regulations establish a "means test" which lays down a scale of income above which parents must pay fees.

## Rumania Seizes Automobiles

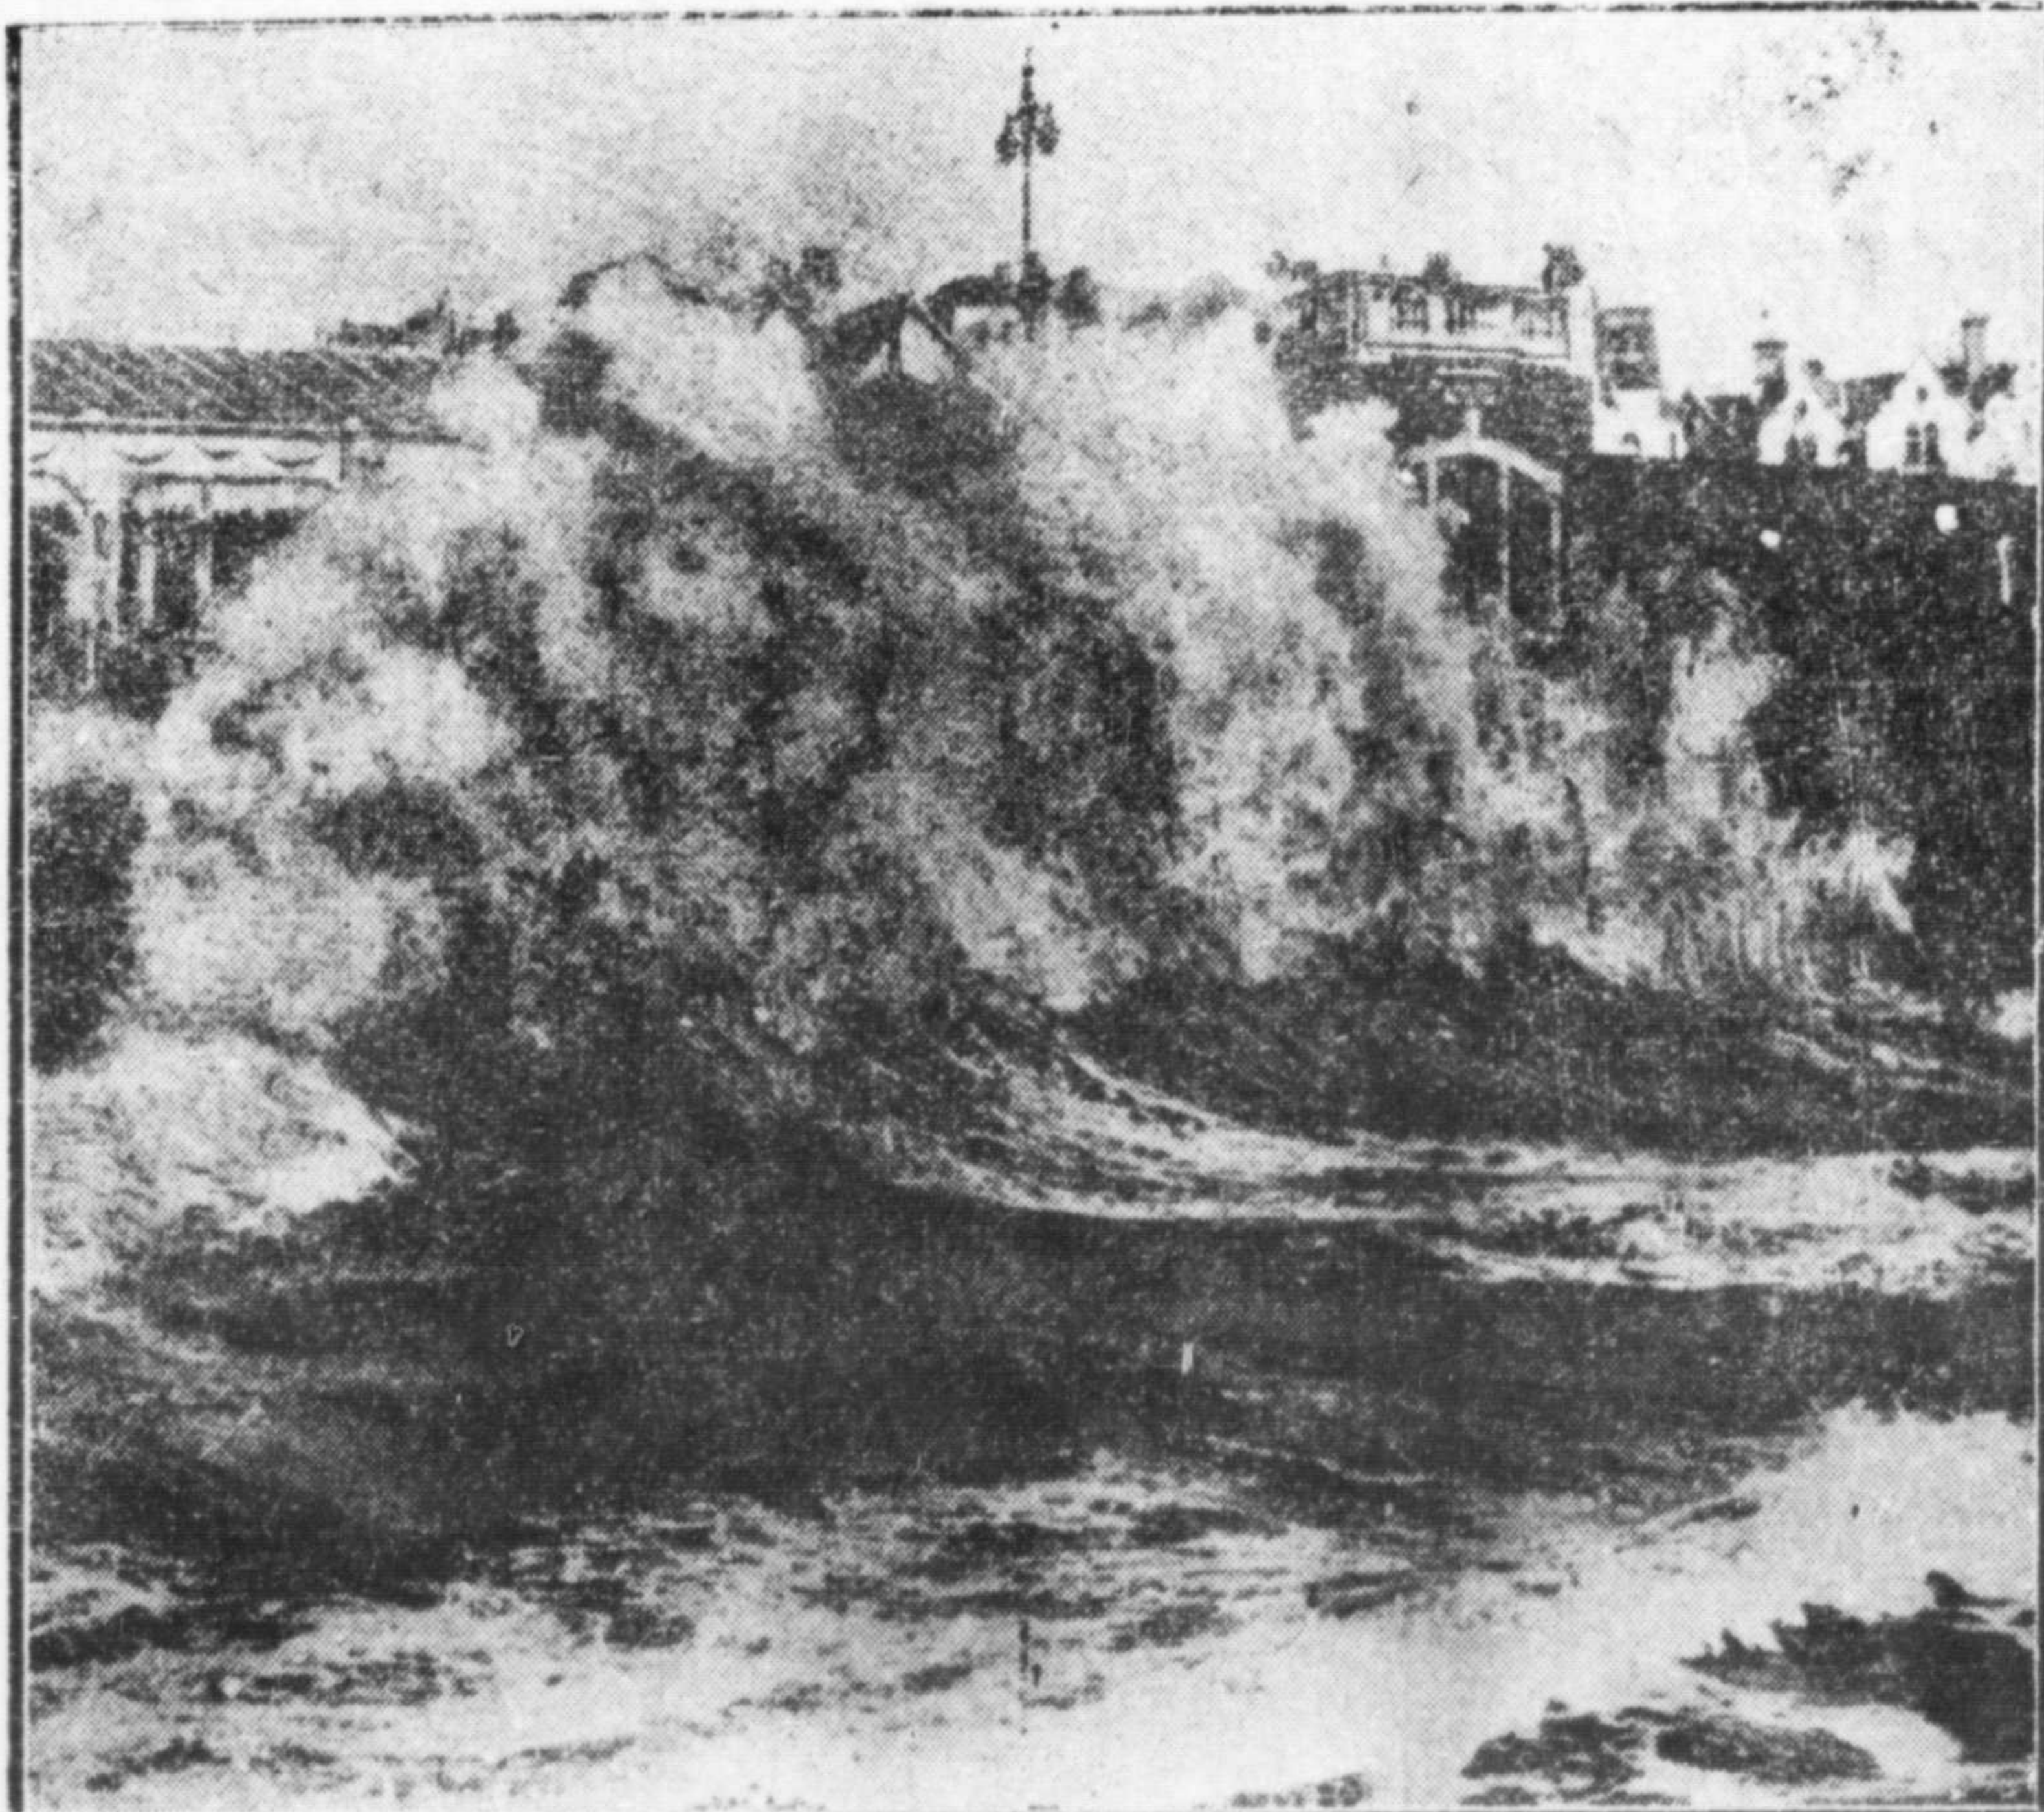

Bucharest.—Automobilists have been halted by policemen during the last few days and ordered to get out. On compliance they have simply been handed a slip of paper stating that their cars are requisitioned for the forthcoming manoeuvres. Thereupon the cars have been driven off by military chauffeurs and the owners left to fend for themselves. Motor trucks have been similarly halted on the high road, forced to unload and driven off.

## Russia Has Placed Orders

### For Equipment in Britain

London.—Russian orders for manufacturing and transport equipment costing £450,000 (about \$2,000,000 at par), have been placed with British firms.

## First Gales of Season Sweep English Coast

The holidayers have departed and the residents of Clacton, England, are now settling down for the winter. A bit risky to walk along the prom when the waves act this way.

## THE EQUITY

SHAWVILLE, NOV. 17, 1932.

### Shawville Council

Shawville, Nov. 7th  
Regular session of Shawville Council held on the above date. Present: Mayor Hodgins, and Councillors, Reg. Hodgins, Prendergrast and Gibson.  
Motion — Hodgins Prendergrast — That minutes now read be adopted. — Carried.

Motion — Gibson-Prendergrast — That the following bills be paid:—  
D. A. Baker, 6.40  
W. A. Hodgins Co., 1.78  
Cotie's Store, Mrs. Howard, 6.60  
Renben Wright, work, 9.00  
Gatineau Power Co., pumping, 8.86  
Charles Craig, wreath, 10.00  
Wilfred Howes, work, 15.00  
R. Swartz, freight, 1.40  
J. G. Elliott, 5.00  
Earl Horner, 7.80  
Wm. Elliott, bailiff, 20.60  
Herb Smith, 2.78  
J. L. Hodgins, piping, etc., 96.02  
J. N. Beauchamp fees, 75.00  
General Supply Co., 58.00  
— Carried.

Motion, Cr. Hodgins, that this Council adjourn to meet on Friday, Nov. 11 at 8 p. m. — Carried.

E. T. HODGINS,  
Secretary.

### Clarendon Council.

Shawville, Nov. 7th  
Regular session of the Clarendon Council held on the above date. Present: Mayor Barr, Councillors, Horner, Hanna, Corrigan and Connolly.  
Minutes of last meeting read. Motion — Hanna-Horner — That minutes now read be adopted. — Carried.

The Secretary to notify Hurst Hodgins to repair culvert opposite John D. Strutt, also notify Newton Lewis to repair the bridge opposite Peter Thompson's.

Motion — Corrigan-Connolly — To notify R. Dillion of Stark's Corners, to either have his dog destroyed or tied up as complaints have been made to this Council that he is vicious and running at large. — Carried.

Cr. Fulford took his seat.

Motion — Fulford-Corrigan — That the following bills be paid:—  
Leonard Belsher, \$155.46  
Harold Elliott, 60.40  
W. D. Hodgins, 240.80  
Newton Lewis, 350.00  
Ernie Queale, 100.40  
Ed. Stankey, 45.90  
W. J. Tubman, 306.50  
Garrett Walsh, 305.00  
Fred Lang, 150.00  
Pontiac Agricultural Society, 200.00  
Wm. Elliott, Bailiff, 48.55  
Federal Typewriter Co., 1.75  
Hodgins Lumber Co., 6.25  
Provincial Blank Forms, 3.00  
Earl Horner, Livery, 4.00  
J. B. Kilgour, (Rooney), 1.43  
W. H. Barr, meals, 2.20  
W. A. Hodgins, bill, 39.57  
Herbert Hobbs, work, 15.00  
J. A. Telford, 1 sheep, 3.00  
G. A. Howard, 1 sheep, 3.00  
Ed. Dagg, 1 sheep, 3.00

And that J. B. Kilgour's bill for Fraser be left over. — Carried.  
A letter from Dr. H. T. Hurdman, County Secretary, was read enclosing advice from J. P. Foran, B. C. L., Hull.  
A vote of thanks was tendered Messrs. Foran and Hurdman on resolution of Horner-Connolly.

This Council adjourned for supper and met again after supper to examine the Voters' List, same members present. Several names were added to the list, after which it was accepted on motion of Hanna-Connolly. — Carried.

Motion — Cr. Corrigan to adjourn.  
E. T. HODGINS  
Sec. Treas.

### South Onslow Council.

Quyon, Nov. 7th  
Regular meeting of the Municipal Council held on the above date at the usual place of meeting. Members present: Mayor Herbie Young, and Councillors Biehler, Barry, Muldoon, Craig and MacKechnie.

On motion of Craig-MacKechnie, the minutes of last regular and special meetings were confirmed as read.

On motion of Muldoon-Biehler, the following bills were ordered paid:—  
Leo Muldoon, re. Velon, \$ 22.75  
E. A. Pritchard, spikes, 1.00  
Marjorie Smith, typing, 4.00  
Canadian Bank Note, printing, 106.00  
bonds also sales tax, 5.23  
W. J. Fleming, board of council, 24.25  
Leo Kehoe, supervisor, 24.25

Motion — Biehler-MacKechnie — That Ernie Keon be notified to repair bridge at school house to keep fill from washing away. — Carried.

Motion — Muldoon-Craig — That Leo Kehoe be notified to put gravel in holes on Town Line, between Pritchards Store and Baptist Church. — Carried.

Motion — Barry-Muldoon — That Wm. Westbrook be notified to build a culvert on the Town Line opposite property of Jos. Clark, and that Wm. Westbrook be paid 6cts. per foot for cedar necessary to build culvert. — Carried.

On motion of Biehler the Council adjourned for dinner. Pursuant to adjournment Council resumed same members present.

A letter from Mrs. L. Dorris was received asking for assistance, and after consideration, it was moved by Muldoon-Craig, that the letter be sent to

the Soldiers' Settlement Board of Canada, for information on this case. — Carried.

Motion — Craig-Barry — That Cliff Hobbs, Rural Inspector, be notified to lay out a winter road across Lots 17, 18 and 19, Range 6, on or before Dec. 1st. — Carried.

On motion of Muldoon, the Council then adjourned.

Jos. A. STEELE  
Sec. Treas.

### Minutes of Council Onslow North

Minutes of the Municipal Council of Onslow North, held on Nov. 7th, 1932.

Present: Patrick Dolan, Mayor, and Councillors Pellerin, Robert, Alexander, Steele and Farrell.

Motion — Steele-Robert — That the minutes of October 3rd, 1932, as read, be adopted. — Carried.

A letter from Clinton H. Dowd, Advocate re Gerald Smiley, action for car repairs read; also a letter from H. P. Moyle.

Motion — Farrell-Alexander — That Patrick Dolan, mayor, be authorized to get legal advice in each case as to this Municipalities liabilities. — Carried.

Motion — Farrell-Robert — That the following accounts be approved and paid:—

R. N. Code, spikes \$ .75  
A. Farrell, extra services 3.00  
A. Lapierre, covering bridge 16.40  
— Carried.

Motion — Steele-Farrell — That Rural Inspector, Thos. Alexander, be instructed to lay out a winter road across Lots 26 and 27, to north quarter of Lot 26, Range 7, and connect with winter road Lot 26, Range 6 of South Onslow at the seventh range, same to be done in the legal time and form, for use the winter of 1932 and 33. — Carried.

Motion — Farrell-Alexander — That this Council grant James McGaff ten dollars to repair road 13th concession. — Carried.

Motion — Farrell-Robert — That road foreman, John Armitage, be instructed to repair culvert between Lots 1 and 2, Range 10, as soon as possible. — Carried.

Motion — Robert-Alexander — That Mayor Patrick Dolan, and Sec. Treas. Andrew Farrell, be authorized to sign a deed of transfer to Chas. Gorman his or legal heir, of the north half of Lot 14, Range 12 of this Township upon receipt of \$5.00 still due upon sale price. — Carried.

Motion — Robert-Pellerin — That By-law No. 89 be introduced and read a first time. — Carried.

By-law No. 89 now read.

Motion — Farrell-Alexander — That By-law No. 89 be read a second time. — Carried.

By-law No. 89 read a second time.

Motion — Steele-Robert — That By-law No. 89 be read a third time short and homologated. — Carried.

By-law No. 89 read a third time.

Motion — Alexander-Robert — That this Council adjourn until Dec. 5th, 1932, at one o'clock in the afternoon. — Carried.

ANDREW FARRELL  
Sec. Treas.

### Bristol Council

Bristol, Nov. 7th

Regular session of the Municipality of Bristol, held on the above date. Present, Mayor Young, and Councillors, Fitzsimmons, Henderson and Russell.

Motion — Fitzsimmons-Henderson — The minutes of the previous meeting were adopted.

Cr's Allen and Beattie took their seats.

A letter was read from David O'Brien complaining that Fred Cooney had not built his part of the line fence between their properties.

Motion — Beattie-Henderson — That he be notified of this complaint and also be notified to build his fence.

Michael Salmon appeared and requested that extra work be done on hill on new road to make it passable.

Motion — Allen-Fitzsimmons — That the contractor be allowed 4 days with team at \$3.00 per day to complete this work.

Motion — Henderson-Beattie — That the following bills be approved and paid:—

John E. Dagg, 992 ft. cedar \$ 19.84  
Ernest Murrell, bridge and fill 375.00  
" " building side pier 10.00  
" " 10 cedars 16 ft. 15.00

Mrs. M. McCaffrey, supplies for J. Hughes 38.64

Mrs. M. McCaffrey for spikes 13.20

R. N. Code supplies for P. McGale 17.79

J. M. Argue, 990 ft. cedar plank 22.00

Le. Soliel Ltd., 100 pages for collection roll 5.55

G. W. Craig, inspecting bridge and fill 5.50

Also that bills from Wm. McLeary and Guy Fletcher be held over.

Motion — Henderson-Russell — That all parties holding Road Labor slips be hereby notified to hand them in by Dec. 5th and receive credit for them.

Motion — Allen-Russell — That the Collection Roll as prepared be accepted and homologated.

On motion of Henderson the meeting adjourned.

Forty million dollars was spent in Ontario on relief for the year ending October 31, 1932. Of this amount, the Dominion Government contributed about \$11,000,000; the Province \$15,000,000; and the Municipalities \$14,000,000. In addition to the Province's share, approximately \$5,000,000 was expended by Ontario on the Trans-Canada highway work.

## THE SHAWVILLE MILLING CO., REG'D.

W J. EADES - PROPRIETOR.

### Laying Mash

We are now manufacturing a Laying Mash which has been giving us excellent results with our own flock. This Mash is economically priced at \$1.90 per cwt. We would be glad to have you inspect our flock.

By the way, due to a mistake, Oyster Shell was wrongly quoted at \$1.40 per cwt. The correct price is \$1.20 per cwt.

### PUBLIC NOTICE

To Ratepayers of Clarendon and Shawville

PUBLIC NOTICE to the above ratepayers that the Collection Rolls for both Municipal and School Taxes are now completed and will remain in my office for the next thirty days (30) for the inspection of all parties interested. After the 30 days are expired all parties whose names appear on the said rolls are hereby notified to pay into my hands the amount of their taxes as shown on those rolls during the next 30 days.

Three percent discount allowed on taxes paid before Dec. 15, 1932. Given at Shawville this 15 day of October, 1932.

E. T. HODGINS  
Sec. Treas.  
Clarendon and Shawville.

### NOTICE

TO WHOM IT MAY CONCERN:—I hereby give notice that hereafter I will not be responsible for any debts contracted in my name without my written order.

I also wish to give notice that I am not doing business in partnership with any other person and all moneys owing to me in connection with any sale or any transaction must be paid to me personally or by cheque to my order.

SIGNED  
MRS. JOHN MCCORRISTON

### Ottawa Winter Fair Opens November 29th

The Ottawa Winter Fair's official premium list for this year has been issued. Entries will close on November 18. The first class will enter the tankard at the Coliseum on the morning of November the 29th, and the closing ceremonies will take place on the evening of December 2nd. A study of the prize list shows that every provision has been made for a well rounded out four-day show, full of action and as interesting as educational.

The excellent distribution of a liberal amount of prize money over the various competitive classes and the securing of many trophies and challenge cups, so as to cover all major departments, make for well balanced competitions and very attractive classes throughout.

While the show is some two weeks distant, the executive, under President Hugh Carson and Secretary-Treasurer Herbert H. McElroy, have preparations well under way, with the determination to make this year's Winter Fair the best of its kind in competition and attendance that has yet been offered to the Ottawa Valley and beyond.

It is confidently expected that the excellent support which the Management received from the people of Ottawa last year will be again repeated and this will be paralleled part of farmers, for whom primarily this show is being held.

The evening shows with their special attractiveness are considered as among the social events of the Winter season and it is suggested that reservations for the evening performances be made as soon as possible.

Those intending to enter their live stock can assist the Management very much by sending in their entries as soon as possible.

### RADIO DIRECTIONAL STATIONS.

There are now five radio directional stations for airplanes operated by the Canadian Government in Western Canada. While primarily intended for the guidance of mail planes, any plane equipped with either of the two types of apparatus used in picking up the beam from the station, may make use of the service. Radio direction finding is especially useful for night flying in case of vital importance during foggy weather, or during snow, rain or wind-storms.

### REFUSED TO OWN HER BABY.

A girl baby was given away at Queen's Hospital, B.C., when its mother refused to own the child after its birth at the Queen's Hospital. "It's the 7th baby I've had, and I don't want it," the mother, a woman, whose husband has a bush preoccupation near hospital, told the doctor and nurses. "I don't want the baby," she said. The hospital authorities cast about for foster parents and were fortunate in finding a couple who adopted the infant as their own.

At this season many parents are bringing their children to our Studio for gift portraits. No portrait is so completely satisfying as one made by a professional photographer. The only gift that pleases, a photograph of son or daughter, or a family group. H. IMISON, Photo Artist.

### GLORIFYING GANGSTERS.

American Writer Contrasts His Country With Canada.

James Truslow Adams had an article in the New York Times magazine in which he tried to show why gangsters are glorified in the United States and why this tendency is not manifest in Canada.

"While we developed vigilance committees and lynchings Canada developed the Northwest Mounted Police. Our view of law and law-breaking has become different—and it must be confessed much inferior—from that of the English at home or in their new lands." As one reason he says that the United States broke away from England in 1783, while the Dominions remained parts of the British Empire.

The Dominions still have that English past of theirs. The whole colorful pageant of a thousand years is their own. Not only have they the great tradition of warriors—the heroes of a people—Marlborough, Wellington, Nelson and the rest—but they have all the lighter figures of myth or imagination—the Robin Hood, the Falstaffs and others. Suddenly cut adrift for a century or more we looked almost exclusively over our own contemporary scene.

He goes on to say that humanity craves for heroes, legends, color and drama, and that the people of the United States found their heroes in the free-shooting men of the frontier.

### A PIONEER OF THE WEST.

Mrs. Gladue Saw Many Changes In Over Century.

Mrs. Joseph Gladue, who lives east of the High Bluff bridge near Portage la Prairie, Man., is qualified to lecture on "How to Live to Be Over 100 Years Old."

"Live the simple life, live near nature, work hard, but always enjoy life," is the advice of the pioneer woman of the district, who is well over the century mark.

Born in British Columbia in 1826, Mrs. Gladue moved to Manitoba 59 years ago, and settled in the Raelin district. Buffalo still roamed the plains then. One of the clearest recollections she has is of jumping on a horse and taking part with the men in a buffalo hunt.

Another recollection of the early days is being chased by a pack of wolves near her home. Mrs. Gladue had to climb to the top of a large pine tree and sit ensconced from early morning until 8 p.m. before help arrived.

### THE HUMAN FURNACE.

In Manchuria, as in all China, it has long been known that man himself is the best furnace, if only the heat of his body can be conserved. So, as the autumn comes on, the Chinese in Manchuria put on more garments, and during the winter still more garments, piling one on the other; aiken, if there is money, otherwise cotton and wool and sheepskin and fur. His clothes are padded with cotton waste or silk waste or raw wool, garment on garment, bound tightly about the ankle, and buttoned tightly under the chin. No frost-bite kills a native; but the stranger to the climate suffers.—New York Times.

### DEATHS

#### Death of a Child

At the home of her parents, Bryson, Que., on Friday, Oct. 28th, the death occurred of Patricia Anna, daughter of Mr. and Mrs. Percy Walls, aged three months and four days, following an illness of less than a week from pneumonia. Surviving are her parents and sister, Pamela; also her grand-parents, Mr. and Mrs. Joseph Wall and Mrs. A. Somerville. The funeral took place Sunday morning, at 10.30, to St. James' Church, Rev. Mr. McDonald, conducting the service.

Floral tributes were:—Spray—Father, Mother and Sister; Bouquet—Misses Eva, Laurette, and Master Bernard Mineault; Cut flowers—Mrs. H. T. Hardman.

Interment took place in St. James' Cemetery.

At her home in Bristol, Que., on Oct. 28th, 1932, Phyllis Marion, youngest daughter of Mr. and Mrs. Bertie Johnston, aged 22 months. The funeral service at the residence, was conducted by their pastor, Rev. F. W. Taylor, with Rev. McMillan assisting. The former delivered a very touching and impressive sermon, taking for his text, Luke xviii: 16th verse, dwelling on the innocence of little children and the Saviour's love for such. After which the body was conveyed to Norway Bay Cemetery for interment. Despite the inclemency of the weather a goodly number of conveyances followed, thereby denoting their sympathy and respect for the bereaved parents.

She was only a little white rosebud  
A sweet little flower from birth,  
God took her home to Heaven  
Before she was soiled on earth.

She has gone through the beautiful gates,  
Away to the City of Gold,  
Which knows no sorrow, sin, or pain,  
She is safe in that Heavenly Fold.

Never one day forgotten.

#### Sheriff J. B. Sloan Dies Suddenly

Bernard J. Sloan, for the past 15 years sheriff of Pontiac county and well known over a wide territory collapsed Monday morning Nov. 7, while on his way to his office at Campbell's Bay and died a few hours later.

When stricken Sheriff Sloan was taken to a nearby house and Drs. S. J. McNally and L. Renaud were hastily summoned, but he was beyond human assistance.

Sheriff Sloan was a lifelong resident of Vinton, where he was born 70 years ago, son of the late John Sloan and Ann Flannagan. He farmed for a number of years and was appointed sheriff in 1917. He continued to live on the farm after his appointment, driving daily to and from his office. He was a member of St. Elizabeth's parish, Vinton.

Surviving are three sons, Maurice, of Campbell's Bay; William, of Vinton; Herbert and Edwin, at home; three daughters, Mrs. W. Giroux, at home; Mrs. J. McGee, of Vinton, and Miss Loretto Sloan, of Ottawa; and one sister, Mrs. Hugh Doyle, of Vinton. His wife formerly Hanna Roach, predeceased him by two years and a brother, Rev. Canon J. A. Sloan, died four years ago.

The funeral, which was one of the largest ever witnessed in the district was attended by many from all points of the county, was held on Wednesday morning, with requiem high mass celebrated in St. Elizabeth's Church, Vinton, by Sheriff Sloan's nephew, Rev. T. J. Sloan, of Pembroke, with Rev. H. Martel, of Calumet Island, as deacon and Rev. W. L. Murray, of Campbell's Bay, as subdeacon. Present in the sanctuary were Most Rev. P. T. Ryan, Bishop of Pembroke, Rev. J. Kimpton, of Vinton; Rev. J. L. Bourk, of Lapasse; Rev. J. Sullivan, of Maryland, and Rev. J. L. Enright, Calumet Island.

Pall bearers were four sons, Maurice, William, Edwin and Herbert Sloan; John McGee, a son-in-law, and Ernest Sloan, a nephew. A delegation from Pembroke Council, K. of C., of which Sheriff Sloan was a member, attended the funeral and many spiritual offerings were received.

Tenders for the construction of a dam on the Ottawa river at the foot of Lake Temiskaming have been received by the Public Works Department at Ottawa in response to a call for same.

The dam to be built will replace one which had become worn out. In the lake a huge amount of water can be stored for power purposes. With the possible exception of Lake Simcoe, that lake which has North Bay as one of its borders is the largest inland lake in Ontario. The construction of a new dam there, if proceeded with, is certain to give employment to a large number of men, as the job is a big one and requires to be of a very substantial character. Its collapse in a season of high water would involve much damage along the shores of the Ottawa river.—Renfrew Mercury.

## Contagious Diseases Studied in New York

### Rockefeller Research Studies Controlled Epidemics in Mice of Laboratory Rabbits Also Are Used

By G. Edward Pendray in The N.Y. Herald Tribune.

In the Rockefeller Institute for Medical Research, hundreds of small, vivacious animals are now engaged in revealing the secrets of epidemics. Under controlled conditions that as nearly as possible reproduce their natural circumstances, mice of many different strains and colors are making it possible for scientists to learn something of an age-old problem—how to prevent and control diseases that spread in epidemic fashion.

#### NATURE OF EPIDEMICS.

As might have been expected, the investigators at the Rockefeller Institute, who explained their work for the Herald Tribune, are learning that microbes on the loose in communities of normal animals do not behave in quite the same manner as cultures raised and handled under highly artificial conditions.

The research program at the Institute is being carried on under the direction of Dr. Leslie T. Webster. So far, nine intestinal and respiratory diseases of mice, rabbits and chickens have been analyzed by Dr. Webster and his associates. These diseases, among which are mouse typhoid, rabbit pneumonia and chicken cholera, behave in a manner not unlike the human illnesses of the same name. They were chosen because of the special light they may be able to throw upon the behavior of their human counterparts.

One discovery disclosed by these studies is that epidemics may be started in two different ways. One method is to introduce the bacillus directly into a community of susceptible but previously uninfected animals. The other is to add susceptible individuals to a community in which the disease already is present in a quiescent state. Adding fresh individuals under such conditions is like putting dry kindling on an old fire. The epidemic blazes up and passes over the community in virulent waves.

Another finding is that when an epidemic sweeps through a community the course of the outbreak is determined by the resistance of the population and not, as formerly supposed, by changes in the virulence of the microbe as it passes from person to person.

#### DEMONS CAUSE OF EPIDEMICS?

It was believed in the Middle Ages that epidemics were caused by a demon that hibernated in the underworld. Upon occasion this creature would burst out of its dungeon and fight its way into a city, where, enfeebled and ravenous, it fell upon the inhabitants, first feeding upon defenceless infants, then upon the aged, weak and infirm, and finally, growing in strength, upon able-bodied adults.

When the germ theory of disease was elaborated in the '90s, scientists came to regard the demon story as merely a fantastic explanation of the observed course of epidemics, which usually start mildly, with one or two cases, and gain momentum as they grow. Singularly enough, the scientists of the '90s did not discard the fundamental concept of the old fable. They merely translated it into the new language.

Thus, instead of the demon, scientists talked of the microbe. The microbe, they assumed, began his epidemic course as a relatively mild creature, but he grew in virulence as he passed from victim to victim, until at length, even the most resistant could not withstand his attack, and whole communities were overwhelmed.

This conception—that microbes increase in virulence when passed from individual to individual, and that the increased virulence gives rise to epidemics—is one which experimental epidemiology has modified, at least so far as it applies to animal communities. Dr. Webster reports that differences were certainly found in virulence in various strains of microbes, but the killing power of any one strain remains essentially the same throughout an epidemic. What changes is the resistance of the community. If this finding among animals proves to be the same among humans it is really a piece of good news, for, if epidemics are essentially provoked by lowered resistance on the part of the population, we can find out what leads to such changes in resistance, and take steps to keep the barriers up.

This is the phase of the question upon which the Rockefeller Institute scientists are now working. One of the most important factors—perhaps a fundamental one—has already been found. It is inheritance. In a given mouse community, for instance, it has been found that many will die of disease, but a few will survive. The offspring of these survivors, if exposed to the disease, will be found more resistant than unselected mice of the same age.

In fact, families of especially resistant, and others of especially susceptible mice have been carried on for generations at the Rockefeller Institute. Tests show that the characteristic of resistance to disease is completely transmissible from parents to young. Moreover, resistance to one disease appears to be accompanied by

resistance to others, and even to poisons, such as mercury bichloride. Strains of mice which are susceptible to one disease, on the other hand, are susceptible to others, and readily fall victim to poisoning.

If this is equally true in man it perhaps explains why people long exposed to disease appear to become more or less immune to it. The susceptible families are killed out, and the families with natural resistance fill up the ranks.

Heredity, however, is not the only factor in resistance. Other causes—and these are the ones that produce fluctuations from season to season, and perhaps even from week to week—include diet, weather and various other environmental conditions.

#### PROPER DIET NECESSARY.

Diet seems to be extremely important, according to Dr. Webster. Two mouse diets have been used at the Rockefeller Institute. One is an adequate diet, giving plenty of the proper substances for promoting growth and reproduction. The other is a special diet, including an excess of the various vitamins and other essentials.

The experiments so far have shown that mice fed on the just-adequate diet are less resistant to disease than those having an abundance of all food factors. Moreover, seasonal fluctuations in resistance are pronounced in the mice getting the poorer diet, while in the other group seasonal variations in susceptibility are almost nonexistent.

Precisely what food substance contributes most of resistance to disease has not yet been determined. This is one of the special lines of research which the methods of experimental epidemiology have opened up.

Thus it may be that what started as an investigation of epidemics will turn out to be a valuable contribution to the conquest of all disease. If it accomplishes nothing else, experimental epidemiology has already demonstrated that public health agencies and social welfare groups are on the right track in urging proper diet and better living conditions as a sure way of protecting the entire community against disease.

## British Rule in India

By Lord Reading

We in England have had to face unanticipated crises apart altogether from international political complications. In addition to other problems, England was confronted with a serious situation in India. I am anxious that you should understand our position in India, for we care so much for your opinion. I would ask you to keep in mind the immense complexity of the problem, the burdens of responsibility that rest upon British shoulders, the care they have taken to discharge it with fairness and with justice and with proper regard to the rights of those minorities whom it is their solemn obligation to protect. If all these considerations are kept in mind we need never fear the judgement of wise and thoughtful men or of those who seek to ascertain the truth, for never shall we be more certain of the conclusion that Britain has done her duty well and nobly.

I honestly believe that the rule of the British in India constitutes one of the most glorious records of the history of the British and is a just source of pride. Heaven forbid that I should suggest that no errors have been committed, but in arriving at a judgment comparison must be made of India as she was and had been throughout the centuries before the British came and India as she is under the present system.

#### A PRAYER FOR TO-NIGHT

Night has drawn its curtains  
Round a world asleep.  
And, with lanterns lighted,  
Silent watch doth keep.

Children, sweet as cherubs,  
Folding weary wings,  
Visions see of fairies,  
Palaces, and kings.

Sleep now give to all men  
Who, their duties done,  
Now retire from labour  
With the setting sun.

Sickness, care, and sorrow,  
Gracious Lord, abate,  
And to dark foreboding  
Close sweet slumber's gate.

Those upon night duty  
Bless, Lord, everywhere;  
As they share Thy watching  
May they share Thy care.

Thomas Tiplady in "Songs of Kinema Church" (Methuen).

#### For Boys

One of our great men has said that a boy should learn:—  
To be kind to all animals.  
To be manly and courageous.  
To ride, row, shoot, and swim.  
To build, a fence scientifically.  
To be gentle to his sisters.  
To shut a door without slamming.  
To sew on a button.  
To do errands promptly and cheerfully.  
To have a dog, and make a companion of him.  
To get ready to go away without the united efforts of mother, grandmother, sister, chambermaid and cook.

## Scotsmen—Attention

Page Sir Harry Lauder. An "everlasting" match has been introduced in the old country. A single match may be used more than 100 times and a great sale is predicted in Aberdeen.

## New Charter For Children

An important step in social reform has been taken by the passing of the Children and Young Persons Act for Great Britain, writes the Montreal Daily Star. There are many features of this Act that are of real interest to us here, since we too are engaged in efforts to provide better safeguards for children who, for one reason or another, come within the jurisdiction of our Juvenile Courts.

It is proposed that a woman shall be one of the justices in the Children's Court. The age up to which it is presumed no child can be guilty of an offence is raised from seven to eight. The death penalty cannot be imposed upon anybody under eighteen years of age. Many people, indeed, consider that this age is too low.

The words "conviction" and "sentence" are not to be used in future on the Courts' registers of cases heard and decided. Under ordinary circumstances, no newspaper report will reveal the identity of any child or young person concerned in any criminal proceedings. The Home Secretary is given wide discretionary powers in regard to the removal of children and young people up to the age of eighteen from places of moral danger. The names "Industrial" and "reformatory" schools are no longer to be used. Instead, the term "approved schools" will be employed.

The law governing child labor is amended in several important particulars, which it is recognized have long stood in need of revision. The Lord Chancellor himself is empowered to draw up rules for the formation and revision of panels of magistrates for the reformed Children's Courts. It is felt in Britain, as here, that many magistrates have failed to understand and difficult children and that in order to secure the best results in the interests of the children themselves provision shall be made

for private and informal investigation and hearing. The main idea is to remove the stigma of criminality from the proceedings and the records.

The new Act is regarded by the British press generally as marking an important and long-needed change in the administration of the law so far as juveniles are concerned, and as an official recognition of the social truth that the future of the nation depends upon the physical and moral health and training of its young, and that the State has a duty to its weakest and most handicapped and tempted members. With that view there will be general accord everywhere.

## Gems from Life's Scrap-book

Books

"A true book is an inspiration."—Alex. Everett.

"Good books are true friends."—Bacon.

"Books—lighthouses erected in the great sea of life."—Whipple.

"Books are the ever-burning lamps of accumulated wisdom."—G. W. Curtis.

"Let us digest them; otherwise they enter our memory, but not our minds."—Seneca.

"This Book of books is also the gift of gifts."—Mary Baker Eddy.

"If a book come from the heart it will continue to reach other hearts; all art and authorcraft are of small amount to that."—Carlyle.

"Books like friends, should be few and well chosen."—Fuller.

Remember—Andrew Carnegie gave a fortune that books might be available to all.

#### Upward or Downward?

The optimist sees improvement, generosity, progress, faith and harmony. The pessimist sees depression, greed, collapse, fear and discord.

Advice should be like a gentle fall of snow, and not like a driving storm of hail. It should descend softly, and not be uttered hastily.

## Cattle Bells

How clear tonight the far jaug-jaug-ling bells  
Of Champlain's herd, the melody that wells  
Tuneful as stony water, from the nook  
In the sweet-grass marsh of Alder Brook.

What patient strength of earth their tones disclose:  
The peace of stars like quiet-falling snows,  
Of forests slumbering, soundless, but for the fox  
Stepping among the clinking rocks.

What world unsullied, free of guile and snare,  
What valley of contentment they declare:

A valley soothing as its bullfrog croak,  
Serene as the one slim drifting smoke;

A valley of waters that softly talk of dreams,  
Of the slow, sweet enterprises of little streams,

Of their solemn concern with every woodland thing  
Lingering to bathe a paw, a wing;

Of the veery, thick with sleep, who stretched his throat  
And tossed in the brook a single pebbly note;

Of the frothing doe who buried her muzzle, drank,  
And dropped in the brookmints on the bank. . . .

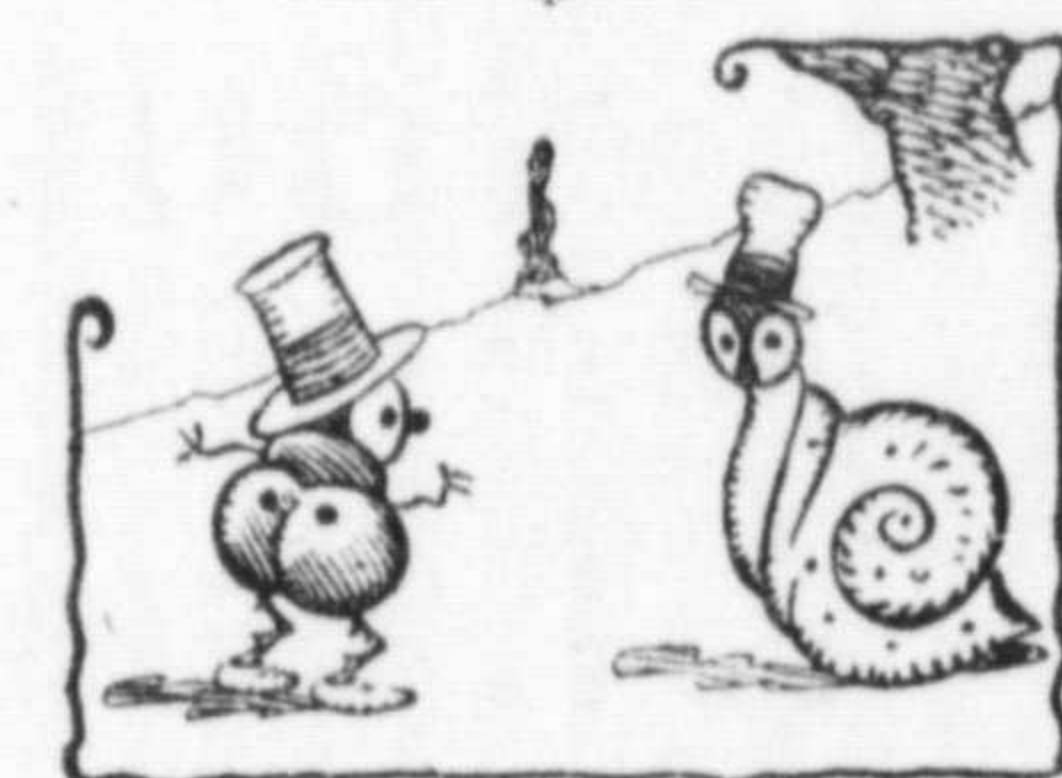

—Lew Starrett, in "Wings Against the Moon."

## "More Light"

By Abraham Flexner

Over a hundred years have passed away since Faraday, at the Royal Institution in London, began to play with electricity. He had absolutely no idea that his investigations would have any practical consequences or any theoretical consequences beyond the satisfaction of his curiosity, and yet everything that we do today with electricity is more or less directly dependent upon the unfettered investigations which Faraday was fortunately in a position to make.

It is as true today as it was when Goethe closed his eyes in death that what the world needs is "more light"—more light to illuminate what is obscure, more light to enable us to reorganize our intellectual and social and political lives. No one is wise enough to tell the source from which illumination will come, but the experience of the race will not in the future be different from what it has been in the past, and an institute which enables men of superior wisdom and capacity to indulge their curiosity and to promote understanding will in due course produce consequences of which neither they nor we now dream.

Snail—"How is Mr. Caterpillar progressing in his attentions to Miss Butterfly?"  
Bug—"He has wormed his way into her affections at last."

If you are so unhappy as to have a foolish friend, be yourself wise.

## SNAPSHOTS OF A MAN GETTING A MATCH

By GLUYAS WILLIAMS

1. SETTLES WITH GOOD BOOK AND GOOD CIGAR. FEELS IN POCKET FOR MATCH, WIFE REMARKING THERE ARE SOME ON MANTLEPIECE

2. AFTER SOME SEARCH FACE LIGHTS UP AS HE FEELS A PAPER CLIP OF MATCHES IN VEST POCKET

3. FIND IT'S EMPTY

4. SEARCHES POCKETS ALL OVER AGAIN, BOOK SLIDING TO FLOOR

5. AFTER REMOVING CONTENTS OF LEFT TROUSER POCKET, LOCATES BROKEN MATCH, ABOUT 1/4 INCH LONG

6. SPENDS FIVE MINUTES TRYING TO STRIKE IT ON SHOE

7. MATCH LIGHTS AT LAST, BURNING HIS FINGER BEFORE HE CAN GET IT TO CIGAR

8. GETS UP, SIGHING, WALKS TWO STEPS TO MANTLEPIECE AND GETS FULL BOX OF MATCHES. WONDERS WHAT WIFE IS SNICKERING AT

GLUYAS WILLIAMS 6-25

## London Impressions of 150 Years Ago

Sunday—This morning we went to Portland Chapel, and afterwards we walked in the Mall of St. James's Park, which by no means answered my expectations; it is a long, straight walk, of dirty gravel, very uneasy to the feet; and at each end, instead of an open prospect, nothing to be seen but houses built of brick. When Mrs. Mirvan pointed out the Palace to me—I think I was never more surprised.

However, the walk was very agreeable to us; everybody looked gay, and seemed pleased,—and the ladies were so much dressed that Miss Mirvan and I could do nothing but look at them. Mrs. Mirvan met several of her friends. No wonder, for I never saw so many people assembled together before. I looked about for some of my acquaintance, but in vain, for I saw not one person that I knew, which is very odd, for all the world was there.

Mrs. Mirvan says we are not to walk in the Park next Sunday, even if we should be in town, because there is better company in Kensington Gardens. But really, if you had seen how much everybody was dressed, you would not think that possible.

Monday—We are to go this evening to a private ball, given by Mrs. Stanley, a very fashionable lady of Mrs. Mirvan's acquaintance.

We have been a shopping, as Mrs. Mirvan calls it, all this morning, to buy silks, caps, gauses and so forth. The shops are really very entertaining, especially the mercers; there seem to be six or seven men belonging to each shop, and every one took care, by bowing and smiling, to be noticed; we were conducted from one to another, and carried from room to room, with so much ceremony, that at first I was almost afraid to go on.

I thought I should never have chosen a silk, for they produced so many, that I knew not which to fix upon, and they recommended them all so strongly, that I fancy they thought I only wanted persuasion to buy everything they showed me. And, indeed, they took so much trouble, that I was almost ashamed I could not.

At the milliners, the ladies we met were so much dressed, that I should rather have imagined they were making visits than purchases. The dispatch with which they work in these great shops is amazing, for they have promised me a complete suit of linen against this evening.

I have just had my hair dressed. You can't think how oddly my head feels; full of powder and black pins, and a great cushion on the top of it. I believe you would hardly know me, for my face looks quite different to what it did before my hair was dressed. When I shall be able to make up of a comb for myself I cannot tell, for my hair is so much entangled, frizzled they call it, that I fear it will be very difficult.

I am half afraid of this ball to-night, for, you know, I have never danced but at school; however, Miss Mirvan says there is nothing in it. Yet I wish it was over.—From "Evelina," by Frances Burney.

## Scotland Yard

"Personal details of criminals are filed in dossiers kept in the Record Index Department. Officers thus know a man's character, habits, tastes in clothes and food, and all his family history.

"If he affects brilliantine, that will be set down, so will his superstition about black cats, and the fact that he has four artificial teeth. There will be his photograph full-face and profile, and his personal description—anything and everything that builds up the individual picture.

"Another big department at the Yard deals with photography, not only of criminals but of injured persons, dead bodies, footprints, car tracks, and a dozen of other bits of evidence.

"Enlarged in a picture, a gashed neck may plainly indicate the nature of the wound over which the surgeon hesitated, revealing that it was obviously caused by a certain kind of knife, and so the detectives know precisely what sort of weapon they must search for.

"Documents are photographed, too, for an enlarged signature often shows what no naked eye could discover, the first tracing the forger made. 'Close-ups' of anonymous letters can be compared with 'close-ups' of the handwriting of suspected persons and tiny similarities traced normally invisible."

## Home Again

The old gate swings with broken catch

Below the hawthorn's duty white.  
The cheeping little chickens scratch  
Where once the garden beds were bright.

The kitchen door is open wide,  
The ragged window curtains sway;  
The thin, sweet odour steals outside  
Of fragrant apples laid away.

What matter dust and knocking bough,  
The weedy path, the unwashed pane.

I have been long away, but now,  
O heart! I have come home again.  
—Domina Wills, in "The Australasian"

## In Bed for Weeks

Miss Kerton Was Nervous and Anaemic Until Dr. Williams' Pink Pills Restored Her Health

Experienced  
Wonderful  
Relief

"I believe it is my duty to tell other sufferers of the wonderful relief I experienced from taking Dr. Williams' Pink Pills for anaemia," writes Miss Mamie Kerton, Badjeros, Ont. "For three years I suffered from weakness, shivering and fainting spells, feeble pulse, poor appetite. I was nervous, restless and always pale. I was in bed for weeks at a time, until I put Dr. Williams' Pink Pills to the test. After taking three boxes I was restored to my normal health."

Thousands of other young women have been benefited as Miss Kerton was. Dr. Williams' Pink Pills rebuild health by actually creating an abundance of new blood and increasing the blood cells thereby restoring wasted tissues and revitalizing the exhausted nervous system. Growing girls are greatly helped by Dr. Williams' Pink Pills. Try them. 50c a package at your druggist's.

## Ocean Voyage

Pulse of engines underneath, ceaseless, faithful as a heart; Order, shining whiteness, peace; Current of a world apart—World where days are marked by bells,

Nights are watches, and the while Fleet-of-foot men serve the ship, Mile slips by on rolling mile.

Overhead the bright blue dome Curving to the water's rim; Rainbow-lined in the dusk, Mystical, poetic, dim; Opalescent in the dawn, Palely brilliant at high noon; Star-strewn in the velvet night, Cloud-wracks flying past the moon.

All around the restless sea, Blown to fury... smooth as glass; Foam-lace spreading in the wake; Flecks of distant ships that pass; Seaweed gardens; purple depths Where the magic kingdoms are; Fish that leap in silver arcs; Moon paths leading to a star.

—Adele de Leeuw.

"The world suffers a great deal from people who are uninteresting, because they themselves are not interested in anything."—Sir Adair Roche.

## For COLDS

"I always use BABY'S OWN TABLETS to break up my baby's colds," writes Mrs. Wilbert Colquhoun, Sturgeon Falls, Ont.

"When I see a cold coming on, it is to BABY'S OWN TABLETS that I turn," writes Mrs. Robert Greenhorn, Phillipsville, Ont.

Mothers everywhere report in like vein of the safe, sure results that follow the use of BABY'S OWN TABLETS in treating children's colds, teething troubles, simple fevers, disordered stomach, colic, constipation. 25 cents.

Dr. Williams'

BABY'S OWN TABLETS

## Lisbon Traffic

Wheel traffic offers more variety in Lisbon than in many other capitals of Europe. Modern traffic is very much in evidence; motorcars of all makes hoot their way through crowds of leisurely pedestrians, electric trams, turning sharp corners with grinding sound of wheels, urge state-ly coaches to give them free passage, by means of a nematic bell. The coaches oblige, and with more expedition than do the pirate tram-cars, already described. These coaches are a link with the past. They rumble rather heavily over the stone pavement, drawn by horses decked out in a brave display of plaid harness. The coachman is generally a typical Portuguese servant, with long side-whiskers, and he urges his steeds to high stepping rather than to speed. The horses are of the breed that figures in paintings of the seventeenth and eighteenth centuries, having small heads and round rumps, wavy flowing tails, arched crests and waving manes, and so much action that pace has to suffer; but dignity is maintained.

Yet more primitive vehicles roll through the streets of Lisbon, plain box-like carts on solid wooden wheels, of a design unchanged since Roman times. These carts have a talent, far more pronounced than that of the pirate tram, for getting in the way and impeding traffic; the drivers are as impervious to oburgation as the oxen that draw these obstructive conveyances.

These varied forms of vehicles make up the daily pageant of the streets.—Captain B. Granville Baker, in "A Winter Holiday in Portugal."

- 59—Note of scale

## Taken Literally

A census taker, on asking a woman how old she was, received the following answer:

"Do you know how old the Hill girls next door are?"

"Sure."

"Well, I am as old as they."

The census taker wrote down, "As old as the hills."—Congregationalist.

## A Unique Club

There has been no sign given that the Ugly Men's Association of Perth, West Australia, is going to change the name of the institution. The qualifications for membership which have always been simply the possession of ugliness have not, as far as can be learned, been altered.

No doubt the members go about full of a sort of perverse, boyish pride in the possession of their unprepossessing exteriors. Of such institutional detail one can speak but in whimsical suppositions and fancies, for exact information is lacking. On one point, however, there remains no question. The record of this strange club bears out the old quotation, "Handsome is that handsome does."

This organization, which in 1919 raised £6000 to teach men carpentry, blacksmithing, and other pursuits, has lately purchased a farm for the training of boys in agriculture. During the next 18 months, says a press dispatch, "the Ugliers" hope to train 1000 boys.

If this is the way ugly men comfort themselves when they organize let us hope that they get together in increasing numbers. What the world needs, in other words, is more ugly men, and them organized. Like that famous ugly man of literature, Cyrano de Bergerac, the members of the Ugly Men's Association undoubtedly carry their adornments in less material molds.—The Christian Science Monitor.

## THREW AWAY HIS STICK

When Sciatica Yielded to Kruschen

There can be no doubt that this man has finished walking with a stick, for it is now four years since he discarded it.

He writes:—"For 18 months I suffered with chronic sciatica and rheumatism, and was unable to walk without the aid of a stick. But after taking Kruschen Salts for a short time, I was able to throw away the stick. It is now four years since this happened, and I have had no return of the complaint, and have not lost a day from work. I shall never be without Kruschen Salts, as they are worth their weight in gold. You can use this letter as you please, as I can honestly recommend Kruschen Salts to any sufferer."—C. F.

If the eliminating organs become sluggish, they permit harmful uric acid to accumulate and deposit itself in the tissues, muscles and joints in the form of needle-pointed crystals, which, piercing the nerve sheaths, cause excruciating pains of sciatica. The six salts in Kruschen stimulate the eliminating organs to healthy, regular action. Mischievous uric acid is then given no chance to collect.

## Owl Laffs

First Floorwalker—"Poor old Perkins has completely lost his hearing. I'm afraid he'll lose his job."

Second Floorwalker—"Nonsense! He's to be transferred to the complaint department."

## Hot Blasts

Some minds are so open that they appear unable to hold anything. Nobody loves a flat man. A man is sometimes known by the ignorance he is willing to admit. And remember that good luck is a lazy man's estimate of the trouble you have and don't go around hunting for more. A wave of emotion has swept more than one man into the sea of matrimony. When a woman cleans her husband's pipe—well, she surely loves him.

## Fetch a Basket

"Have you noticed how Ashton drops his aspirates?"

"It's nothing to the way he drops his vowels. I've got more than a dozen of his I. O. U's."

And after all, isn't the modern girl fifth her paint, lipstick and rouge just about as real as grandmother was with the false hair and bustles?

He—"Oh, you mustn't blame me for my ancestors."

She—"I don't. I blame them for you."

## All Set For a Massacre

"I told my wife I would shoot any man who had flirted with her at the seaside."

"What did she say?"

"She told me to bring a machine-gun."

Willie—"I'm ready to eat now, mother."

Mother—"Have you washed your face?"

Willie—"No."

Mother—"No what?"

Willie—"No soap."

## Incriminated

Guest—"Your little daughter looks so good and quiet."

Hostess—"I hadn't noticed. Mary, come here—what naughtiness have you been up to now?"

Caller—"And what are the twins to be named, Johnny?"

Johnny—"Helen and Maria."

Caller—"Why, no, Johnny, it can't be that."

Johnny—"Well, that's what Daddy said when the nurse brought them in."

The advertisement read thus: "Before you put the baby on the floor, clean it thoroughly with our Vacuum Cleaner."

## Knows His Oats

Beginner—"Now, my man, I want to hire a horse. How long can I have it out?"

Groom—"Well, sir, we usually leave that to the horse."

It takes more than one swallow to make a summer—and more than one flirtation to make a vacation.

Grace—"I didn't accept Bob the first time he proposed."

Graceless—"No, you weren't there."

Says a famous novelist: "A man of experience can generally tell a woman's age." But he lacks experience if he does.

"Who invented high heels?" asked a magazine writer. One theory is that

## DR. PLUMB'S PERFECT PIPE

## IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

—No Calomel necessary

For you to feel healthy and happy, your liver must pour two pounds of liquid bile into your bowels, every day. Without that bile, trouble starts. Poor digestion. Slow elimination. Poisons in the body. General wretchedness.

How can you expect to clear up a situation like this completely with mere bowel-moving salts, oil, mineral water, laxative candy or chewing gum, or roughage? They don't wake up your liver.

You need Carter's Little Liver Pills. Purely vegetable. Safe. Quick and sure results. Ask for them by name. Refuse substitutes. 25c. at all druggists.

ISSUE No. 44—'32

#### Swine Fair and Sale

Clarendon Farmers' Club purpose holding a Swine Fair and Sale at Shawville on Wednesday afternoon, Nov. 3rd. All parties having hogs to dispose of at the Fair will please communicate with the Secretary on or before Nov. 21. Prizes will be awarded for the best pens and the hogs will be sold for the highest market prices. The Club will also conduct a Poultry Fair at the Agricultural Hall on Friday, Dec. 9. The poultry will be graded there and then shipped to competitive buyers, thus getting the producers the best possible prices. All parties who wish to dispose of poultry will please give the number of birds, of the different varieties to one of the committee, namely, R. J. Tracy, Hollis Barber, Verla Smiley or the Secretary, Claude Elliott.

It is urged that all parties who wish to dispose of their fowl through the Fair will have them crate fattened and properly dressed, as well finished fowl bring highest market prices.

#### Campbell's Bay W. M. S.

The W. M. S. of the United Church, Campbell's Bay, held a very successful Thank Offering meeting at the home of Mrs. Styles, Wednesday evening, Nov. 2nd.

The President, Mrs. H. T. Lunam, presided. The minutes of last meeting were read by the Secretary, Mrs. Wm. Cain, and adopted on motion of Mrs. McLeod and Mrs. David Lunam.

Roll call was answered with a verse of Scripture containing the word "Thanks". Nine members and a large number of visitors were present.

Mrs. McLeod concluded the chapter on relations and problems to sects from the study book "Korea Land of Dawn". Mrs. E. G. Warren gave a paper on

"Thanksgiving" and was very much enjoyed.

A very suitable sketch was given by Miss Blanch Lunam and Miss Lucille Styles "Stewardship of Thankfulness" after which the offering was received.

A trio was beautifully rendered by Mrs. McLeod, Mrs. Warren and Mrs. Smith, accompanied by Mrs. Lunam.

Delicious refreshments were served by the hostess and a pleasant time spent.

## General Insurance Life, Fire, Windstorm, Casualty

### NEW TOTAL DISABILITY BENEFITS

Are announced by the

### Confederation Life Association

And provide as follows:

In the event of total disability from accident or disease, before the insured reaches age 55 (males) and age 50 (females) and during the continuance of such disability, the following benefits, based on a \$10,000 Policy, will be payable after six months' continuous total disability:

1. \$1.00 per month for 50 months;
2. \$50. per month for next 100 months;
3. \$10,000 in cash at end of 150th month;
4. Waiver of all premiums falling due during the period of disability payments.

In event of death or maturity during the 150-month period, the proceeds of the policy will be paid without any deduction of amounts paid on account of disability. The guaranteed values accrued dividends will not be affected in any way by the payment of the monthly income during disability.

I have all the records from the former  
Agency of DAGG & TUCK, which have  
been transferred to me. Would be  
pleased to attend to your Insurance  
problems.

Dancing after the Show

Positively one of the funniest Comedies  
ever produced

You may have seen it on the Screen  
You may have heard it on your Radio  
Now see and hear it on the Stage
