PEPPER'S QUININE and IRON TONIC contains an unvarying amount of quinine and iron. It possesses all the powers of these valuable tonics in banishing diseases, and symptoms traceable to weakness, a low state of the nervous system, enfeebled condition of the body, and derangement of the general health.

PEPPER'S QUININE and IRON TONIC strengthens the nervous and muscular system, improves digestion, animates the spirits, recruits the health. For debilitated health from the effect of hot climates this tonic is invaluable.

PEPPER'S QUININE and IRON TONIC rouses and develops the nervous energies, enriches the blood, promotes appetite, dispels languor and depression, fortifies the digestive organs. Is a specific remedy for neuralgia, ague, indigestion, fevers of every kind, chest affections, and in wasting diseases, scrofulous tendencies, &c. The whole frame is greatly invigorated by Pepper's Tonic, the mental faculties brightened, the constitution greatly strengthened, and return to robust health certain. Bottles, 32 doses, 4s. 6d ; next size, 11s. Sold by Chemists everywhere. The name of J. Pepper, Bedford Laboratory, London, must be on the label. There is no Tonic so certain in effect as Pepper's Quinine and Iron. It is strongly recommended to residents in India and the Colonies, and should always be kept ready for use in every case of fever or fabrile condition

TARAXACUM AND PODOPHYLLIN.—Prepared only by J. Pepper, London. This Fluid combination, extracted from medicinal roots, is now used instead of blue pill and calomel for the cure of dyspepsia, billiousness, and all symptoms of congestion of the liver, which are generally pain beneath the shoulders, head-ache, drowsiness, no appetite, furred tongue, disagreeable taste in the morning, giddiness, disturbance of the stomach, and feeling of general depression. It sets the sluggish liver in motion, very slightly acts on the bowels, giving a sense of health and comfort within 24 hours. It is the safest medicine. Taraxacum and Podophyllin is a fluid made only by J. PEPPER, Bedford Laboratory, London, whose name is on every label. Bottles, 2s. 9d. and 4s. 6d. Sold by all Chemists. A most valuable and essential medicine for India, Australia, the Cape, and Colonies generally.

LOCKYER'S SULPHUR HAIR RESTORER will darken grey hair, and in a few days completely bring back the natural colour. The effect is superior to that produced by an instantaneous dye, and does not injure the skin. Large bottles, 1s. 6d.—Lockyer's is equal to the most expensive hair restorer.

LOCKYER'S SULPHUR HAIR RESTORER is the best for restoring grey hair to its former colour. It produces a perfectly natural shade, and is absolutely harmless. Recommended for destroying scurf and encouraging growth of new hair

LOCKYER'S SULPHUR HAIR RESTORER—Sulphur being highly prized for its stimulant, cleansing, healthful action on the hair glands, LOCKYER'S RESTORER is strongly recommended. It is most agreeable in use, and never fails in its action on the colour glands, always restoring and maintaining that which has been lost. No other hair dressing is requisite. Large Bottles, 1s. 6d. Sold by Chemists, Hairdressers, and Perfumers in London, the Country, and throughout the world.

Lockyer's is equal to any of the high-priced preparations.

LIVER COMPLAINTS.

DR. KING'S DANDELION and QUININE LIVER PILLS (without Mercury.)

THE BEST REMEDY FOR BILIOUSNESS, STOMACH DERANGEMENT, FLATULENCE, PAINS BETWEEN THE SHOULDERS, BAD APPETITE, INDIGESTION, ACIDITY, HEADACHE, HEARTBURN, and all other symptoms of disordered liver and dyspepsia. Acknowledged by many eminent Surgeons to be the safest and mildest pills for every constitution.

In Boxes, at 1s. 1½d., 2s. 9d., and 4s. 6d. Sold by Chemists and Medicine Vendors throughout the world.

Prepared by Jas. Rorke, London.

The Royal Wedding Festivities.

(Per Montreal Line.)

BERLIN, February 26.—The Princess Augusta Victoria, bride-elect of the eldest son of the Crown Prince of Prussia, arrived yesterday. The streets were impassable, because of the enthusiastic crowds viewing the decorations. The bride-elect, accompanied by the Crown Princess Victoria, started on her public entry to the city this afternoon. The route taken to the Royal Castle, three miles, was kept by a continuous double line of members of the various guilds, students of high schools and academies and trade societies. Stands containing 18,500 seats along Unter der Linden were let at an average of fifteen shillings. The seats were crowded, as also the windows of houses, some of which were let as high as £25. The procession consisted of six Court carriages, escorted by cavalry. Outside Brandeburg they were received by the Governor Commandant and Prefect of Police ; a salute of seventy-two guns was fired. Burgomaster Forckenbeck welcomed the Princess in the name of the city. The procession was enthusiastically received.

A Brother's Crime—Suicide—The Financial Situation.

ST. LOUIS, Feb. 26.—Henry O'Connor, aged 17, suspecting his sister Annie, aged 20, had informed their uncle that he had struck a younger sister, went to Annie's room last night and shot her fatally. Annie to shield him says the shooting was accidental.

WINCHENDON, Mass., Feb. 26.—Dr. Arthur Clifford, son of ex-Governor Clifford, while returning from a trip to New York with Dr. Russell, shot himself through the head on the train. He was partially insane.

NEW YORK, February 26.—The *Post* says : No money has yet been put into the Treasury to-day to retire the National Bank Note circulation. The opinion is appearing that the refunding bill will not become law. The Weekly Bank report is much more favorable than expected, showing the banks instead of being below the reserve, still have a surplus of $1,500,000. The only failure at the Stock Exchange was Robt. Protestant Teachers Condemn the Pension Act.

PERSONAL AND RAILWAY NEWS.

Mr. Sewell's Winter Navigation Scheme.

OFFICIAL ANNOUNCEMENTS, ETC.

(Per Montreal Line.)

MONTREAL, February 26—The Protestant teachers of the city passed a resolution condemning the new Pension Act at a meeting held last evening.

The stock market was slightly lower than yesterday.

OTTAWA, February 26—Bishop Lewis has so far recovered from his recent illness as to be out of bed for a short period.

Mr. Allan Gilmour was last night appointed President of the Ottawa Horticultural Society.

A meeting of the Canada and Atlantic Railway directors at Lancaster lasted from 10 o'clock a.m. yesterday until 11 p.m. The contract for the construction of the road was finally signed by D. C. Lindsay of Burlington, guaranteeing to build the entire line by 1883, a distance of 122 miles, as follows :—From Coteau Landing to High Falls by the 1st of January, 1882 ; between High Falls and Ottawa by the 1st of September, 1882, the rest of the railway exclusive of the bridging of the St. Lawrence by 1st of May, 1883, and the bridge by the 16th May, 1884. Messrs. Noel and Sweetland, Ottawa, were appointed bond trustees. The contractor put up $30,000 cash and a bond of $100,000 made by Gregory Smith, of St. Albans, as security for the full completion of the contract, thus securing a route from Ottawa to Boston to be completed in three years. Hon. D. A. McDonald resigned the Presidency of the road as he goes South in a few weeks and afterwards to Europe. Mr. E. McGillivray, Ottawa, was elected President, Mr. A. McNab, ex-M.P., Vice-President and Mr. Perley, Ottawa, 2nd Vice-President.

Mr. Sewell, of Levis, who had an interview with the Premier to-day *in re* a project for securing an uninterrupted communication with Europe via the St. Lawrence, advanced the following facts and figures in support of the projected route :—That grain shipped from Ohio by the St. Lawrence route during the summer months has a distance of 4,088 miles of water, consisting of lake, canal and ocean, to traverse before reaching Liverpool, being 400 miles shorter than by the New York and Erie Canal route, while the advantages in favor of the projected winter route are still greater ; for instance, the distance between Chicago and Quebec by rail is 900 miles, Quebec to Liverpool 2,700 miles, making a total distance of 3,600 miles, while the distance between Chicago and New York is 1,418 miles, from New York to Liverpool 2,980 miles, showing a saving of travel in favor of the Canadian route of 798 miles. With regard to the physical difficulties to be encountered, Mr. Sewell states that the River St. Lawrence from Quebec to the Ocean is never frozen over, that its surface is covered with ice floes running from two inches to nine inches in thickness ; no heavy ice making an appearance till the spring, when the massive ice laying fast along both shores during the winter months moves off during the thaw and high tides of that season. He claims also that the three following advantages are secured to navigation by the presence of the ice floes :—1st. The floes keep the surface of the river smooth and unruffled during the heaviest gales ; 2nd. fog, that great bane of the mariner, the primary cause of almost all marine disasters, cannot exist during the presence of the ice floes ; 3rd. during gales of wind the floes pressed down upon the leeshore a great bank or shield under the passing ships lee. Mr. Sewell considers that these advantages far outweight the slight resistance of the floes as they intringed against the bows of large and powerful steamers. He further contends that a steamer sailing between Quebec and Liverpool during the winter months would on most occasions meet with little or no ice, as the floes lay for the greater part of the season upon the South Shore from the fact that our winter winds move more or less northerly, and the current of the St. Lawrence from the Saguenay eastward tends towards the south shore. Mr. Sewell is supported by a petition from influential citizens of Quebec, which sets forth the advantages which would accrue to the Province of Quebec and the western portions of the Dominion, securing to the former her share in the advantages resulting from the construction of the Pacific Railway, of which the City of Quebec would then become the easternmost extension The nature of his proposition to the Government Mr. Sewell hopes to be in a position to make public in a few days.

The town of Barrie is constituted a port of duty at which raw or leaf tobacco may be imported in bond.

The following appears in the Militia General orders in to-day's *Gazette* :—Artillery Staff —The resignation of Lt.-Col. Price Lewes, Assistant Inspector of Artillery and Warlike Stores for the Provinces of Nova Scotia, New Brunswick and Prince Edward Island, is hereby accepted, to take effect from 28th Feb. inst. 2nd Battalion Queen's Own Rifles, Toronto—To be 2nd lieutenants, provisionally, Corp. W. Campbell Macdonald, vice Pellatt promoted ; private Patrick Donahue Hughes, vice Sutherland promoted. 10th Battalion of Infantry, Royal Regiment, Toronto, Memo—Adverting to No. 4 of General Orders (21), 5th November, 1880, in which certain officers are removed from the list of officers of the active militia for the purpose of completely reorganizing the 10th battalion, it is now considered advisable to amend that General Order by placing Paymaster Nelson Gordon, Regular, having the relative rank of Captain on the retired list, with the honorary rank of Captain, and by permitting, as a special case, the following officers who held substantive rank to retire, retaining their respective ranks, viz. : Lieutenants Charles Reid, Thos. Flynn, Geo. Maurice Furnistal, Wm. M. Cooper, and Wm. M. McSpadden, and 2nd Lieutenants—Edwin A. Smith, Jos. Robert Miller and Neil McEachran. Memo—Adverting to the appointments of Captains in No. 1 of General Orders (1), 13th January, 1881, Read "George Anthony Boomer" instead of "George Alexander Boomer." Notice is given that a license to transact the business of Guarantee Insurance in Canada has been issued this day to the Citizens' Insurance Company of Canada, the head office being in the City of Montreal, and Gerald E. Hart General Manager.

A POSSIBLE PORK TRADE.

It is very probable that in addition to our trade in horned cattle with the mother country, a lively business will shortly spring up between the two markets in pork. Some samples which were recently sent over the ocean, have given good satisfaction in London and in Glasgow, and there has been a demand made for more of the same sort. A pork dealer of large experience in Scotland declared that the sample submitted to him was "well cut and handled, but too heavy for the Glasgow Market." He ordered fifty barrels more, and asked to have them as lean as possible. The heavy barrels, he thought would suit the London trade admirably. Of late beef and pork have taken an upward tendency in Britain, and we hope our butchers and shippers will not be slow to take advantage of a market which promises such excellent inducements for a large and profitable trade.

THE COAL DUTY.

This is the age of petitions, and London, Ontario, has joined the grand army of petitioners with a monster document, asking Parliament to remove the import duties now imposed on coal. The Londoners complain sadly of the tax, which they say falls principally on the frontier towns and cities of Ontario, that it is a tax on one of the necessaries of life, and that because coal is used as a raw material in many of the Western manufactories, the unjust tax should be abolished at once, else the Ontario people will be unable to compete with the industries of Great Britain and the United States. The import, it is further declared, is a serious burden on railroad and steamboat companies. All London nearly, has signed this petition, the list of names being liberally swelled out from the ranks of Reformers and Conservatives alike. We fear, however, that this petition will go the way of all petitions. The coal tax is the lynch pin of the National Policy. The Government could no more dispense with it than fly. The question has often come up before, and periodically it comes up again, but always in a new form, though the result arrived at is always the same. It is not likely to fare better to-day than it did yesterday. If a change in the tariff ever does take place with regard to the coal duty, our London friends may rest assured, that it will be in the shape of an addition to the rate, not a removal of it. The Nova Scotians are clamouring for an increase in the duty already, and as the rate of duty was especially framed to please them, in the first place, it is not improbable that the Government may ere long, accede to their wishes and raise the tariff. The experiment of taxing coal has so far not proved eminently successful, Ontario buying little of the quantity which she consumes, from Nova Scotia. With a higher tariff this might be changed, and coal from the Maritime Provinces might, in that case, find its way as far as London, Ontario, or perhaps further West. As it stands Ontario, notwithstanding the duty, continues to buy her coal from the United States, and to prevent this the Government may any day step in and levy a higher tax, just to encourage the Blue-Noses. Such a course would surprise no one.

CRUELTY TO CATTLE ON SHIP-BOARD.

The large percentage of losses from various causes, of horned cattle shipped from America to England, has provoked enquiry, in certain English circles. This enquiry has developed the fact, that in many instances great cruelty has been practiced on the cattle, and a very large percentage of the deaths which have occurred on board ship has been traced directly to that cause. The London *Daily Telegraph* states that expedients of such dire cruelty have been resorted to, that it forbears to describe them, lest their merciless character should shock the public. Expedients, it further declares are put in practice in order to compel oxen, maddened by sheer physical pain, to leap overboard when the movement of the vessel is so violent as to preclude the possibility of their being dealt with by the crew." It is significant that within the last few weeks we are informed by the same authority, a vessel which left the shores of America with a cargo of 594 live bullocks should have arrived in the port of London with only 45 of its horned passengers, the other 549 having perished during the voyage, "in consequence of heavy weather." As our readers might expect the story of this ill-treatment of cattle, has created widespread alarm in the British market, and steps are being taken to prevent the recurrence of the infamous practice in the future. The Board of Trade has been requested to interfere and to use whatever influence it may possess, to put a stop to a system which is simply an organized outrage. In the meantime, we hear, that the Society for the Prevention of Cruelty to Animals, has entered upon the exercise of its functions in this matter, and it is promised that rigorous proceedings will be begun at once to officially protect "the unfortunate creatures doomed to endure the horrors of a long sea voyage with the shambles as its goal." We have not heard that Canadian shipped cattle has been ill-treated on the voyage out, nor that the percentage of losses has, in any case, been unusually large. In the interests of the trade which we wish to encourage as far as possible, as well as on the broader plea of humanity, we hope that the charge of cruelty can in no way be fastened on the Canadian shippers. And at the same time we trust that the stories which fill several columns of the English newspapers, are in many instances, gross exaggerations. Still where there is so much smoke there is likely to be some fire, and the steps now being taken in England, will put the blame on the right shoulders, as well as kill out a practice which is at once as horrible as it is merciless, and a lasting disgrace to common civilization.

SPECIAL CORRESPONDENCE.

(Per Dominion Line.)

OTTAWA, February 27—At the close of Friday's session, Mr. Charlton brought up a matter of considerable interest to the lumber trade. He expressed his regret that round timber had not been placed on the free list, as the operation of the present export duty prevented the lumbermen in the upper lakes from engaging in a large and very important trade. The round timber sent from the Michigan pineries to Detroit, Toledo, Cleveland and Buffalo, amounted to 100,000,000 feet annually, worth in the market $1,300,000. It was a profitable trade and did not interfere in the slightest degree with the said lumber interest, as it was manufactured into anything excepting bill timber for immediate use. The sale of the offal was sufficient to meet the expense of sawing and enabled the middlemen to pay a higher price for the timber. The removal of the duty would not interfere with the interest of the Ottawa lumbermen, and if it did, the difficulty could be obviated by classing as saw logs only sticks less than 24 feet in length, which would exempt long timber from the duty and meet the requirements of lumbermen on the upper lakes. The Finance Minister promised to take the matter into consideration.

Mr. Sewell had an interview with Sir John Macdonald yesterday, on the subject of winter navigation of the St. Lawrence. Sir John promised to bring the matter before his colleagues.

It is understood that the Liberals here have decided not to run a candidate in Charlevoix.

Hon. Mr. Langevin has given notice of a series of resolutions authorizing the granting of a charter to Sandford Fleming and others for the establishment of telegraph communication between British Columbia and Asia, and giving the proposed Company exclusive privileges for 20 years.

In the Committee of Banking and Commerce yesterday morning, the consideration of the bill incorporating the Credit Foncier of the Dominion of Canada was resumed. It was announced that the promoters of the Credit Foncier of Canada had agreed with that of the Credit Foncier Franco-Canadian, and that the former had consented to have no organization in France. The question as to whether the company should have power to hold its annual meetings in France was reserved. The bill was carried with some amendment up to clause 74; reserved from 74 to 94. The remaining clauses were carried with some amendments. A sub-Committee, consisting of Messrs. Ives, Boultbee, Rykert, Girouard and Kirkpatrick, was appointed to consider and reconstruct the clauses of this bill, as also Mr. Girouard's.

The Franco-Canadian Credit Foncier is lending money at 6 per cent interest on property.

The local manufacturer of satin and silk in this city complains bitterly of the contemplated reduction of duty on these fabrics. He says it will kill his trade, and 100 operatives, all Canadians, will have to leave for the States.

The talk here to-day in finance circles was about the panic in New York yesterday. Quite a number of Montreal operators were badly hit by the fall in stocks, but as they were able to put up more margins they pulled through and will likely get out without loss if the improvement continues. Our market came through better than was expected, although the amount of stock sold on margin is very large.

LONDON, February 26—The *News* says:—"Lord Frederick Cavendish, Financial Secretary to the Treasury, proposes if the opportunity offers to move in the House of Commons on Tuesday for a sessional order limiting the scope of amendments that may be moved when supply is the first order of day on Monday. In the absence of this order it would be possible on Monday for amendments to be moved on any subject. We understand the Home Rulers intend to avail themselves of this privilege to an extent that precludes all hope of the number of men in the army being taken and even threatens to defer the statement of the Secretary of War."

The election in East Cumberland to-day to fill the Parliamentary vacancy caused by the death of Sir Richard Musgrove (Conservative) resulted in the choice of George James Howard (Liberal) over James Lowther, Lord Beaconsfield's Chief Secretary for Ireland, by a vote of 3,071 to 3,041.

February 27—The scare about trichinae in American pork has extended to most parts of England.

SOUTH AFRICA.

MOUNT PROSPECT, Natal, Feb. 26.—Genl. Colley with six companies took possession of Spitzkop, a position to the left of Lainganeck. Firing has been heard all morning.

NEWCASTLE, Natal, February 26—A severe engagement took place to-day between Boers and Colley's force. The latter were driven from the position at Spitzkop. There was great loss to both sides. Many British officers were killed and wounded.

LATER—A telegram from Colley's camp says all the wounded coming in agree in reporting Colley has been killed and only a hundred British escaped. The Boers charged up hill four times, and were about to retreat when the British were forced to retire because a reserve of ammunition had not been taken to the extreme summit.

MOUNT PROSPECT, Feb. 27—It is ascertained that the enemy has been largely reinforced by the Boers from the Orange Free State.

NEWCASTLE, Feb. 27—The Boers were beaten off at Wakkerstrom, after two hours' fighting. The British loss was slight.

FRANCE.

PARIS, Feb. 27—There was a great popular manifestation to-day in honor of the birthday of Victor Hugo. A large number of members of the Chamber of Deputies and other distinguished persons were received by Hugo. While the reception was going on a procession of deputations marched through the enormous crowds to the residences of the illustrious author, who saluted the deputations from a window. The number of people in all the deputations is estimated at 300,000. Louis Blanc delivered a panegyric on Hugo at the Trocadero.

GERMANY.

BERLIN, Feb. 27—The religious ceremony of the marriage of Prince William and the Princess Augusta was performed this evening in the chapel of the Royal Castle by the Chief Court Chaplain. A grand court reception was afterwards held in the White Hall, followed by a state banquet at which the Emperor toasted the bride and bridegroom.

RUSSIA.

ST. PETERSBURG, Feb. 27—The Secretary of the Chinese Mission has started for Peking with a new treaty. The *Agence Russe*, denying the statement that by the treaty Russia cedes the entire Kuldja district to China, says it is not a question of the cession but the restoration of the Province of Ili to China which Russia temporarily occupied.

GREECE.

ATHENS, Feb. 26—The European representatives have separately interviewed Premier Coumondourus, counselling Greece to refrain from disturbing the peace. Coumoudourus replied that he was willing to listen to the counsels of Europe, but he hoped for a speedy execution of the decisions of the Berlin conference.

The Ottawa Government paid $20,900 to Colonel Wilguss, Peter and John Jackson and F. X. Jarvey, for land taken for the enlargement of the Lachine Canal.

SPECIAL FROM OTTAWA.

OTTAWA, Feb. 26—Mr. J. D. Edgar, President of the Ontario and Pacific Junction Railway in a letter to the *Free Press* denies that the G. T. has bought their charter, either conditionally or unconditionally.

Bishop Duhamel, accompanied by the Rev. N. Campeau, who has been in Quebec this last few days attending the meeting of the Council of Public Instruction for that Province, returned to the city to-day.

It is understood that His Excellency the Governor-General will go East about the middle of next week, visiting Quebec and probably Montmorenci Falls. Lord George and Lady Campbell will pay a visit to Washington shortly, spending some little time in the States prior to returning.

It is understood that the Minister of Customs has confirmed the decision of the Collector of Customs at this port that 5¼ cents per pound should be the value of iron bridge material sent into Canada from the States, and upon which value the duty of 25 per cent shall be collected.

SPECIAL FROM ST. JOHN, N.B.

ST. JOHN, N.B., February 26—Petitions are being numerously signed asking the Legislature not to grant a charter to a company for building a bridge at the Falls.

Revd. J. W. Weeks, of Ontario, has accepted the call to the Germain street Baptist Church and is expected here in March.

WINDSOR HOTEL, MONTREAL.—This subrep hotel, furnished with elevator and all the latest improvements, and carefully maintained at the highest standard of excellence, offers good rooms with board at $2.50 to $3.50 per day. The Windsor is but four blocks from the G. T. R. Station, and a free coach plies constantly between the hotel and the Post Office. Sample room at 183 St. James Street, free to commercial travellers. cm

BENEFACTORS

When a board of eminent physicians and chemists announced the discovery that by combining some well-known valuable remedies, the most wonderful medicine was produced, which would cure such a wide range of diseases that most all other remedies could be dispensed with, many were sceptical; but proof of its merits by actual trial has dispelled all doubt, and to-day the discoverers of that great medicine, Hop Bitters, are honored and blessed by all as benefactors.

The most conclusive testimony, repeatedly laid before the public in the columns of the daily press, proves that *Dr. Thomas' Eclectric Oil*—an absolutely pure combination of six of the finest remedial oils in existence—remedies rheumatic pain, eradicates affections of the throat and lungs, and cures piles, wounds, sores, lameness, tumors, burns, and injuries of horses and cattle.

TWO SHOPS AND FOUR COTtages, on the Little River Road, two minutes walk from the Street Railway

DEATH OF MGR. CAZEAU, V. G.

It is our mournful duty to chronicle today, the decease which occurred on Saturday morning last, of His Lordship Mgr. Cazeau, Vicar-General of the Archdioceses of Quebec and Toronto, and Domestic Chaplain to His Holiness the Pope. The Right Rev. gentleman had been ailing but a few days from a bronchial affection, and remained in the Bon Pasteur Convent from the commencement of the malady until its fatal termination.

The following interesting account of the last days of his life is a translation of a report, for which we are indebted to those who attended him during his last illness:—"Mgr. Cazeau has from time to time felt the after effects of his severe illness of last winter, but for some time back his health appeared to be re-established and never was he more gay and joyous; his words, however, revealed the great thought of his soul—"I must hold myself in readiness" he would say, "to make the great journey of Eternity." He was ready; his Divine Master found him brave, hopeful and praying. On Sunday, the 20th, his whole morning was spent in the discharge of his several functions; it was sought to restrain his zeal but without effect. In the afternoon he gave an instruction to the inmates of the asylum, and —characteristically—it was on the great virtue of Charity and was in the English language. This was his last utterance. On Monday he experienced the first attacks of the malady to which he was so soon to succumb. On the following day inflamation of the lungs declared itself and made such rapid progress within a few hours as to baffle the skill of his medical attendants. On Thursday afternoon he became exceedingly week and fainted. His Grace the Archbishop and three others of the Bishops of the Province, who were in town during the past week, called to see the invalid about the same time, and it was deemed advisable to administer the last Sacraments. His Grace essayed the duty but his emotion overcame him and he was obliged to ask His Lordship of Chicoutimi to officiate. The sufferings of the illustrious deceased continued during Friday, but in all this time there was not a word of complaint; his lips opened but in prayer. "I must continue," he said, "I must continue my work of patience." In the morning he foresaw that his end was near, that that was the last day of his life. He became unconscious, and it was only at rare intervals that he recognized those around him. On Saturday morning at ten minutes past one he breathed his last. His end was peace."

The mortal remains of the regretted Prelate were exposed yesterday in the Chapel of the Bon Pasteur, where a service will be chanted this morning at 9.15 o'clock. This afternoon at 4.30 o'clock, they will be translated to the Basilica where the office for the dead will be recited. To-morrow at 9 a.m., a solemn service will be chanted, after which the mortal remains will be transferred to the cemetery of the Bon Pasteur. The crowds seeking admission into the Convent all day yesterday to witness the body of the deceased Prelate were simply immense. During the morning the orphan children of the various Catholic institutions visited the remains at the Chapel of the Good Shepherd—in charge of the Nuns of the respective Convents.

It was in January of last year, 1880, that Mgr. Cazeau attained the 50th anniversary of his ordination to the priesthood, and our readers cannot but remember the joyous celebration of that happy jubilee in the Basilica, in the Bon Pasteur Convent, in the Ursuline Convent, at St. Bridget's Asylum, in Laval University, in St. Patrick's Hall and elsewhere, and the many valuable presents received by His Lordship on that occasion, including the £50 from 12 Irish Catholic gentlemen of this city. It was upon the same occasion that Mgr. Cazeau was nominated Vicar-General of Archbishop Lynch of Toronto, and received a precious document from Bishop Persico, naming him Honorary Canon of the Basilica of Aquin, with privileges of mitre, ring, &c.

The following biographical sketch of the lamented Prelate up to the date of the jubilee already referred to, is taken from a work published in this city last year, and entitled *"Souvenir du Jubilee Sacerdotal de Mgr. C. F. Cazeau."*

"Charles Felix Cazeau was born in Quebec on the 24th December, 1807. His father died when he was only two years of age. On his mother, therefore, devolved the duty of providing for and educating her children, whom we believe to have been five in number. Of the success attending her energetic exertions to attain those ends, no further proof need be given than to state the fact that every one of the five have filled respectable positions in society.

The young Charles Felix began his studies in a college which had been established in the suburbs of St. Roch's, by the Rt. Rev. Joseph Octave Plessis, Bishop of Quebec. The late Archbishop Baillargeon was at that time a professor in the same college. After spending some time in this new institution, Charles Felix Cazeau entered Nicolet College, where he made his classical course. A few years ago, at the celebration of the centenary of Nicolet College, Mgr. Cazeau was one of the many eminent men who met within its walls to celebrate the occasion with their former fellow-students. In 1825, Mr. Cazeau returned to Quebec and was appointed, while yet in the 17th year of his age, to the important office of Under-Secretary of the Diocese. Shortly afterwards, on the 2nd of October of the same year, that eminent Prelate, Mgr. Plessis, who had always taken a lively interest in the promising young student, admitted him to the first degree of Holy Orders. Mgr. Cazeau continued to fill the office to which he had been appointed, and at the same time pursued his theological studies at the Seminary of Quebec, up to the 3rd January, 1830, when he was promoted to the order of priesthood. The friend and protector of the young ecclesiastic had, ere this, gone to receive his eternal reward, and was succeeded by Mgr. Panet. Mgr. Panet had made a just estimate of the young priest's valuable qualities, for immediately after his ordination, and when he was only twenty-two years of age, he promoted him to the very important and responsible office of Secretary of the Diocese, giving him, at the same time, charge of the chapel of the Congregation in the city. The increasing duties of Diocesan Secretary, added to the multitude of acts of charity to which Mgr. Cazeau had devoted himself, requiring his whole time, he resigned his parochial charge of the chapel of the Congregation in April, 1849.

On the death of Mgr. Panet, in the year 1833, Mgr. Turgeon was called to the Episcopal chair. Like his predecessors in office, Bishop Turgeon knew how to appreciate the character and abilities of the Diocesan Secretary. Shortly after his consecration, this esteemed prelate preferred Mgr. Cazeau to the dignity of Vicar-General. This position he has filled under three successive Archbishops, and still continues to exercise the duties of that office.

In 1856, in spite of all the labors and responsibilities attached to his office of Vicar-General, the Very Rev. Mr. Cazeau, prompted and sustained by his zeal and unbounded charity, took upon himself the duties of Roman Catholic chaplain to the forces at Quebec, as well as that of Director of the newly organized community of the Good Shepherd in that city. This he did in order to permit the Rev. Mr. Ferland, who was then fulfilling those duties, to visit Europe in the interests of the Canadian people. It then became quite a familiar scene to the good people of Quebec to witness the Vicar-General cautioning a soldier whom he supposed to have entered on the downward path, or stooping to remonstrate with those who had already fallen to encourage their return to righteousness.

On his return from Europe the Abbe Ferland reassumed the duties of chaplain to the Catholic soldiers, V. G. Cazeau became the permanent director of the Asylum of the Good Shepherd, and continues to this day, to discharge the charitable duties of that office.

A few years ago, during the visit of the present Archbishop of Quebec to Rome, the Very Rev. Mr. Cazeau was charged with the administratorship of the arch-diocese.

The merits of the administrator were known in Rome, and, as a proof of his high appreciation of the Very Rev. Mr. Cazeau's character and services, His Holiness Pope Pius IX, created him a domestic Prelate of the Papal household, and conferred upon him the title of Monsignor.

Thus, for over 54 years has this devoted servant of God held office in the most ancient Catholic diocese in the New World, and notwithstanding his humility and his aversion to celebrity, has been raised to the dignity of a Prince of the Church, while his fame as a philanthropist is world-wide.

It is but meet to mention some of the facts for which the Irish race, particularly the Irish in Canada, have reason to love and to honor Monsignor Charles Felix Cazeau. During the cholera season of 1832, Mgr. Cazeau, who had been ordained a priest but two years before, distinguished himself as the friend and the consoler of the afflicted.

Day and night he was at their bedside ministering to their wants, and obtaining for their physical relief and comfort all the assistance in his power. Were the scene never so loathsome and so pitiful he was there. His great, generous heart throbbed with sympathy for the unfortunate sufferer; tears of pity gushed from his eyes, but his noble Christian soul sustained him, and gave him strength to overcome the weaker impulses of his tender heart, and to proceed on his holy mission.

In that scourge the Irish race were not alone the victims, and the reverend gentlemen's holy labors were distributed *indiscriminately* amongst all nationalities.

Fifteen years pass away. The young priest of 1830 has now had seventeen years' experience in his sacred duties. His abilities as diocesan secretary are now fully appreciated by his ecclesiastical superior, to whom his constant presence has become a necessity. He has the chapel of the Congregation to administer to, and consequently it cannot be expected that he should attend to anything else.

The conclusion seems to be quite natural, but in the bosom of the St. Lawrence, a few miles below the ancient city of Champlain, there is a portion of land known under the peculiar name of *Grosse Isle*. Although intended by nature to be a quiet, salubrious spot of land, that speck on the broad river is gaining a ghastly notoriety. The sound of its name falls on the Irish ear, like the tolling of the funeral bell.

Beyond the Atlantic, famine has thinned the ranks of the inhabitants of the Emerald Isle. The crops have failed in Ireland, and there is no food for the people in 1847. One alternative is left—emigrate! Thousands gather up the remnants of their once modest fortunes, and join the ranks of the famine stricken to flock to the seaports and go on board the ships that are to take them to a land of plenty. The holds of ill-conditioned, ill-ventilated vessels are packed with living human freight. Disease is fostered in the floating hotbeds of contagion. Weeks and weeks those *sluggish* sailing vessels are tossing lazily among the billows of the Atlantic and their course is marked by the Irish corpses strewn upon the ocean. Thousands of the more robust reach land. In order to prevent the contagion from overtaking the healthy population of the cities and surrounding country, a quarantine is established, where the emigrant is to purify himself after leaving the floating pest-holds in which he has crossed the sea. The island, of the name mentioned, is chosen for that purpose.

The angel of death spared some of the victims, and a large proportion of these were children of tender age, whose *natural* protectors and guardians had left them orphans, strangers in a strange land. What was to become of those little helpless ones? Ah! there were noble, generous hearts amongst the representatives of the several nationalities then inhabiting Canada, and they came forward in the time of need. They took those orphans into their families and they cared for them.

But standing out in lofty pre-eminence above them all, there was in particular a man of noble figure, of high scholarly attainments, of refined manners, the welcome guest in the highest social circles, a man born to take rank among the Princes of the Church, who came to the rescue. He stooped down to take the little forlorn Irish orphans by the hand, and to seek and find for them homes where kind hearts and willing hands would minister to their *wants* and give them a Christian education. He was beloved and honored by his people and into their charge he entrusted *seven hundred* of Ireland's fatherless and motherless children.

He looked after them with the solicitude of a kind foster-father; he followed them in their career, and when assistance was required he furnished it, even to the extent of depriving himself of the strict requirements of one in his position.

He is loved and honored by every Irish heart in Canada. His names is revered by all who know it. That name is Father, and now Monsignor, CHARLES FELIX CAZEAU."

Death of Monsignor Cazeau—Resolutions of Regret.

ST. PATRICK'S LITERARY INSTITUTE.

At the meeting on Saturday night the President, Mr. Owen Murphy, said that he was sure that in the essentially representative Irish Catholic meeting before him, he would find a response in every heart when he gave expression to the deep, the heartfelt regret with which the news of the death of their good friend and counsellor, the lamented Right Rev. Monsignor Cazeau was received. On many occasions, he said, whilst spending an evening with the deceased in his quiet home at the Good Shepherd Asylum, he had ample opportunity of knowing the depths of his love for the Irish people. Their welfare was his constant theme; their successes were his pleasure and their reverses and troubles were his own, Mr. Murphy continued in this strain for a short time, but finally acknowledged that his emotion was too great to allow him to do that justice to the matter which its merits deserved.

The following resolutions were proposed and seconded with appropriate remarks, and unanimously adopted amid a silence which eloquently bespoke the feelings of the meeting:

Moved by John Giblin, Esq., J.P., seconded by Mr. Matthew F. Walsh,

That we the members of the St. Patrick's Literary Institute have learned with the deepest and most heartfelt regret of the death (to enter upon a better life, however) of the Right Reverend Charles Felix Cazeau, Domestic Prelate to His Holiness the Pope; honorary Canon of the united dioceses of Aquin, of Pontecorvo and of Sora, (Italy) Vicar-General of the Archdioceses of Quebec and Toronto, &c.

That as Irishmen and as Catholics we, whilst bowing to the inscrutable decrees of Divine Providence, feel that in his demise we have lost a true friend—one whose advice, counsel and assistance was never denied to one of our race; but our grief is assuaged by the reflection that our loss is his gain; for he has assuredly merited the reward promised to the protector of the widow and the orphan.

That we heartily sympathise with our French Canadian fellow-citizens in their loss of a compatriot whose long career as priest and citizen reflected honor on them.

That copies of the foregoing be forwarded to His Grace the Archbishop; the Reverend Lady Superioress of the Good Shepherd Asylum and to the members of his family, and that the city papers be requested to publish the same.

SPECIAL FROM HALIFAX.

HALIFAX, February 27.—Information has been received from England to the effect that the vote for the maintenance of the Halifax garrison for the ensuing year is only half what it formerly was. This indicates that the strength of the garrison will be materially reduced. It is probable the 101st Regiment will be removed and that other reductions will be made.

John Grange, of Partridge Island, was recently drowned from a vessel near Apple River by being thrown overboard by the jibboom.

C. J Campbell, coal merchant, has made an assignment.

SPORTING NEWS.

AQUATICS.

LONDON, February 26—The annual boat race of the Oxford and Cambridge University crews occurs 8th April.

CURLING.

For His Excellency's prize the Blue Nose Curling Club, of New Glasgow, N.S., beat the Toronto Caledonia by 17 shots. For the Quebec Challenge Cup the Quebec Club beat the Toronto Caledonia by 17 shots. Half of the game was played with iron, and the other half with stones. On Monday Ottawa plays the Blue Nose Club, one rink, at Rideau Hall. The other at the Ottawa rink, Victoria street, the game to commence at 10 a.m.—*Witness, Feb. 26.*

Presented, a petition from Mr. Henry Higgins and others, proprietors in St. Michael street, Montcalm Ward, praying for the introduction of water in their houses in the said street.—Referred to the Water Committee.

Presented the 82nd report of the Health Committee.

By consent of the Council, Alderman Rinfret, seconded by Alderman Gingras, moved and it was

Resolved,—That this report be taken up this evening as the first order of the day.

Presented, the 513th report of the Market Committee (special appropriations)—Referred to the Finance Committee.

Presented, the 576th report of the Road Committee (widening Bridge street)—Referred to the Finance Committee.

The orders of the day being called,

Read, the 82nd report of the Health Committee, which being put to the vote was passed, and it was

Resolved,—That the Police Board be respectfully requested to give orders to the police to prevent the cutting of ice for consumption inside the new harbor works opposite the cut stone wall, inasmuch as the general upper town sewerage is discharged into this dock, in the interest of the public health.

Councillor McWilliam, seconded by Alderman Vallerand, moved and it was

Resolved,—That pursuant to the Act 29th Vict., ch. 57, Messrs. P. Murphy and M. A. Labrecque be re-appointed City Auditors for the ensuing year 1881-82.

By consent of the Council,

Alderman Henchey, seconded by Alderman Gingras, moved and it was

Resolved,—That the remaining portion of the sentence passed by the Recorder's Court on John McGrath for two months' imprisonment in the common gaol be remitted, provided His Honor the Recorder consent thereto,

Councillor Johnston, seconded by Alderman Vallerand, then moved and it was

Resolved,—That this Council do now adjourn for a fortnight, to wit, the 11th March next, at half-past seven p.m.—Adjourned.

Miss Phelps on Woman Suffrage.

The following is an extract from a letter of Elizabeth Stuart Phelps, the author of "Gates Ajar":—

"So far as I understand the municipal suffrage plan it is the *next thing* for us women. Hundreds of women will vote on sharply defined moral questions like the liquor problems, who would not move for anything else. It is true that the self-respect of women was not met by the limited school bill. A more just and generous opportunity will meet a just and generous response. I, for one, sympathize with the reluctance of women to play beggar-maid to that little Cophetua.

"If De Tocqueville was right in attributing the singular prosperity and growing strength of the American people mainly to the superiority of their women, it is time that the Commonwealth availed itself more directly of the reserve forces and sources of such superiority.

"I earnestly desire to see a more rational basis for the political future of our sex, which is as sure to develop as the dawn to follow the dark. I have never faltered for an hour either in this wish or this assurance.

Most sincerely yours,
ELIZABETH STUART PHELPS."

The White Rose.

The beechen woods, the ancient hall,
The river widening to a lake,
I love them one, I love them all,
I love them for a maiden's sake;
A maiden with whose gathering blush
The very roses dare not vie,
The daisies which her footsteps crush,
The very daisies love and die.

Her lips half-conscious of a smile,
Her eyes all beaming with delight,
A white rose in her hair the while,
Like frosted moon against the night.
No lovelier roses bloom than these,
No woodland song more sweet than here,
Yet song and roses fail to please,
When love has told me she is near.

A Column for the Ladies.

It is very mean to ask a man whose wife is a shrew if it is hot enough for him, or if it's scold enough for him.

Among rude tribes in America, Africa, and Australia, it is forbidden that a man should look at his mother-in-law or speak to her.

Jones thinks a man is fortunate who has his will contested after death only. He says his will has been contested ever since he married Mrs. Jones.

Nearly one-third of the women married in Gratiot county, Mich., last year were under 18 years of age. Nineteen were 16 years old, four were 15, two were 14, and one only 13.

A new Russian pianiste, Madame Varette Stepanoff, is just now engaged upon a continental concert tour, and appears to be Stepanoff well on the road to fame.

A wedding party was dismissed by the intended bridegroom, at Layfayette, Ind. "I understood the young lady to say yes," he explained, "but it seems that I was mistaken, and she meant to say no."

There is a woman at Detroit whose husband is so given to flirting, that when they go to concerts, theatres or parties, she puts blinders on him. Then she can see him every time he turns his head to look at a girl.

There are five ladies living who can tell Mrs. Garfield just where the White House pipes are most likely to burst. They are Mrs. Polk, Mrs. Tyler, Mrs. Lincoln, Mrs. Grant and Mrs. Hayes.—*Philadelphia News.*

A Galveston man, J. Hafney by name, who is in the interior of the State, received a letter from his wife the other day. It read: "Dear husband, I have been very anxious about your personal safety ever since I read of the cattle train being wrecked."

The attention of the British House of Commons is to be directed to the women clerks in the drapers' shops, who are compelled to work thirteen or fourteen hours a day in a close and unhealthy atmosphere, most of the time standing.

Queen Margaret, of Italy, has such delicacy of tact and taste, her charm of manner, her culture, and her womanly prettiness and grace are so engaging, that she is said to be described only by the untranslatable word *simpatica.*"

Miss Dobie, a young lady of twenty-six, who has contributed sketches of New Zealand scenery to the London *Graphic*, was lately murdered by a Maori while on a solitary sketching excursion. The murderer confessed his crime.

Women (remarks a late essayist) skate much better than men. Or is it that their superior gracefulness give them an air of superior ease? I saw only one girl fall the other day and she managed it beautifully, but several men came down most ignominiously.

Joaquin Miller's first wife is now Mrs. Thomas Logan. She is described as thirty-five, with a thin, wasted form, and a wealth of black hair. Her health is said to have been effected by her separation from her daughter, removed by Mr. Miller to a convent in this country.

He was seventy and she was eighteen, and they were on their wedding tour. He pointed out to her the beautiful scenery, and said, "We may have many anniversaries of this season." "Yes," she answered, "you will probably live long enough to have a tin wedding."

The late Mrs. Bateman, the London actress, is described as having been a most excellent woman in all the relations of life, public and private; a model manager, most courteous, liberal, and considerate in all her dealings; and at the same time a woman of extraordinary shrewdness, courage, and activity in business. And above all, she was an admirable wife and mother.

Female teachers have a hard time of it in Ireland, if we may judge from the last official report of the Commissioners of National Education in Ireland, signed by four professors. These learned men say: "These female teachers were in instructed in plain cooking—had, in fact, to go through the process of cooking themselves in turn." It is suspected that it was one of these professors who advertised for a man "to sleep in the house, but to eat his own vitals."

Patti appeared three times at Nice in the "Trovatore," "Somnambula," and the "Barbiere." She received the unprecedented sum of $3,000 for each performance, and prices were raised in proportion, a seat in the pit costing $6. She then went to Monte Carlo. To celebrate her arrival on the Riviere, Mme. Blanc presented her with a diamond corset, costing $15,000. In September she is going on a six months tour in the United States. Miss Minnie Hauk does not appear to have met with success at Nice, for she was hissed in "Carmen."

Phrenological chart of Mlle. Bernhardt; Her amativeness is quite well developed, but not in a remarkable degree. She would be capable of very ardent love, but only for a congenial object, and she would by no means be dependent upon this faculty for happiness. Her philoprogenitiveness is very large. There could not well be a more devoted mother. To quote her own words, "*J'adore les enfants.*" She has rather large adhesiveness, and should manifest great sociability and friendliness; but, with her temperament, her attachments would not always be of the most enduring character.

Mr. Carlyle on the Woman Question.

The following highly characteristic letter, which appears for the first time in a Scottish newspaper, published on the 8th inst., was sent by the late Thomas Carlyle to a medical student who was a prominent supporter of his candidature for the Lord Rectorship of Edinburgh, in reply to a request for his opinion on the woman question in general, and especially in regard to the entrance of women into the medical profession. It is dated 5 Cheyne Row, Chelsea, 9 Feb., 1871. DEAR SIR,—It is with reluctance that I write anything to you on the subject of female emancipation, which is now rising to such a height, and I do it only on the strict condition that whatever I say shall be private, and nothing of it guts into newspapers. The truth is the topic for five and twenty years past, especially for the last three or four, has been a mere sorrow to me, one of the most afflicting proofs of the miserable anarchy that prevails in human society, and I have avoided thinking of it except when fairly compelled. What little has become clear to me on it I shall now endeavor to tell you. In the first place, then, I have never doubted but the true and noble function of a woman in this world was, is, and for ever will be, that of being a wife and helpmate to a worthy man, and discharging well the duties that devolve on her in consequence as mother of children, and mistress of the household duties—high, noble, silently important as any that can fall to a human creature—duties which, if well discharged, constitute woman in a soft, beautiful, and almost sacred way the queen of the world, and which by her natural faculties, graces, strengths, and weaknesses are every way indicated as specially hers. The true destiny of a woman therefore is to wed a man she can love and esteem, and to lead noiselessly under his protection with all the wisdom, grace, and heroism that is in her the life presented in consequence. It seems indubitable that if a woman miss this destiny, or have renounced it, she has every right before God and man to take up whatever honest employment she can find open to her in the world. Probably there are several or many employments, now exclusively in the hands of men, for which women might be more or less fit—printing, tailoring, weaving, clerking, &c. That medicine is intrinsically not unfit for them is proved from the fact that in much more sound and earnest ages than ours, before the medical profession rose into being, they were virtually the physicians and surgeons, as well as sick nurses, all that the world had. Their form of intellect, their sympathy, their wonderful acuteness of observation, &c., seem to indicate in them peculiar qualities for dealing with disease, and evidently in certain departments (that of female disease) they have quite peculiar opportunities of being useful. My answer to your question then may be that two things are not doubtful to me in this matter:—

1. That women—any woman who deliberately so determines—have a right to study medicine, and that it might be profitable and serviceable to have facilities, or at least possibilities, offered them for so doing.

But 2 That for obvious reasons female students of medicine ought to have, if possible, female teachers, or else an extremely select kind of men; and in particular, that to have young women present among young men in anatomical classes, clinical lectures, or generally studying medicine in concert is an incongruity of the first magnitude, and shocking to think of to every pure and modest mind. That is all I have to say, and I send it to you under the condition above mentioned, as a friend for the use of friends.

Yours sincerely,
T. CARLYLE.

A "CHURCH" DIFFICULTY.

The *Witness* of a few days since contained the following very sensible article on what it terms a "Church" difficulty. It says:—A curious ecclesiasticle difficulty has arisen in Quebec. A number of earnest Christians of all denominations met together to see what could be done to form a society for the promotion of temperance. We may presume that all were equally in earnest in their advocacy of the end in view, but certain of these persons were troubled with a conscientious conviction as to what constitutes a clergyman, and were afraid that by attending meetings whereat persons not in their view properly ordained were liable to be called upon in a quasi official capacity to conduct religious exercises, they would be countenancing what they conceived to be a spiritual wickedness. It must be remembered, however that we are all forced to live in the presence of many evils, and we do not make ourselves responsible for everything that is done wherever we go. It is a common and decent thing to see Roman Catholics and Israelites in Protestant places of worship at funerals. By so doing no one imagines them to approve of the rites they there witness. They simply show that they regard it as fitting that a man should be decently buried according to the rites of his own community. We have seen Protestants of all sorts reverently witness the consecration by a procession of clergymen of a bit of ground for the inhumation of the remains of departed worth without ever imagining that they thereby acknowledged that the ceremonial made the ground any more fit to absorb its kindred dust. We have seen Baptists taking part in religious gatherings of all denominations, without for a moment lowering their protest against the irregular walk of every kind of Christians who differed from them in practice as to immersion. Still in such matters conscientious people are necessarily controlled by their own consciences and their faithfulness is to be respected if these consciences bind them in bonds to themselves painfully confining. We do not wonder at members of the Church of England, less versed in ecclesiastical distinctions, being indignant of what appeared to them as a slight aimed by their own clergy at their fellow-Christians. But it might have been better if members of other churches could have kept themselves out of this purely Episcopalian dispute. The protestors, all ministers, offered terms of agreement, upon which they promised hearty co-operation, namely, that ministers should be excluded from the performance of religious exercises which should be performed by lay officers. This was a curious but perfectly workable basis, and a trial of it would have done no one any harm. Experiment would have shown either that the objectors had no cordial interest in the movement and were, therefore, not worth considering further, or else that their help was worth getting even at the expense of placing all ministers under disabilities with regard to public prayer at the meetings. Whichever way this question was decided one result would be pretty certain to follow, namely, that the common sense of the laity of the Episcopal Church would have revolted at the monument thus set up to the narrowness of their clergy, and the High Church party would have lost ground through the acts of its own advocates.

Mortgage and Bottomry Bond.

(To the Editor of the Shipping and Mercantile Gazette.)

SIR,—A British vessel was mortgaged bound from a foreign port to another foreign port to discharge. On her voyage she encountered bad weather, suffered damage, and was obliged to put into a British Port for repairs. The question in point is this—Can a Mortgagee stop the ship and sell her (at an intermediate port before or after repairs, for which a Bottomry Bond on cargo, freight, and ship is executed) while she has cargo on board, and in prosecution of the voyage? Yours, &c.,
SUBSCRIBER.

London, Feb. 10, 1881.

[If the Master of the ship was compelled to execute a Bottomry Bond in a British Port abroad, where his employers did not reside, and had no credit, the Mortgagee could not sell the ship, even though the Mortgage was in default, so as to defeat the claim of the Bottomry Bondholder.]

MUSIC AND THE DRAMA.

THE CARRENO MATINEE.

The large and handsome *salon* of the New York Piano Company was crowded by one of the finest audiences in point of composition we have seen anywhere this season, gathered together to listen to the eminent pianiste Madame Teresa Carreno, who had kindly acceded to the request that, before leaving the city, she would afford her many admirers another opportunity of hearing her. The result, we need scarcely say, was an artistic treat of the highest order. Madame Carreno's powers are now so well known in Montreal that it is unnecessary to enlarge upon them. The talented lady has completely and deservedly won her way to public favor to an extent no pianiste has ever done, and in no place, we are assured, are her great gifts and wondrous skill more fully recognized than in this city. The programme was as follows:—

1. Rhapsodie Hongroise, No. 2.....*Liszt*
(By special request,)
2. Three Studies,
(*a.* Study in C sharp minor.....*Chopin*
(*b.* Study in D flat.....*Liszt*
(*c.* Octave Study.....*Kullak*
3. Sonata quasi Fantasia.....*Beethoven*
(Op. 27, No. 1.)
Andante—Allegro. Allegro molto e vivace—Adagio—Allegro Finale.
4. Rondo Capriccioso.....*Mendelssohn*
5. "Last Rose of Summer".....*Thalberg*
(By special request.)
6. (*a.* Impromptu in A flat,.....*Schubert*
(*b.* Schlummerlied.....*Schumann*
(*c.* Waltz in A flat.....*Chopin*
7. Grand Fantaisie on Faust.....*Liszt*
(By special request.)

Thoughout, Madame Carreno completely enchains the interest of her audience, a fact which is the more significant, inasmuch as apart, perhaps, from Thalberg's "Last Rose of Summer," there was nothing which could be called popular in the ordinary sense of the word. The numbers which, perhaps, excited the most admiration, probably from the fact that they were the best known to those present, were the one we have named, Schumann's exquisite "Schlummerlied," the Rondo Capriccioso, and Liszt's Rhapsodie Hongroise No. 2, and the grand fantasia on Faust by the same composer. In the rendering of these, and indeed in every number on the programme Madame Carreno excelled herself even. The circumstances were all favorable to the artiste—a splendid room, thoroughly appreciative audience, and, above all, a magnificent piano, a Weber Grand. The merits of these instruments have so often been the theme for eulogy that it is a difficult task to avoid repetition in the choice of words wherewith to praise them. We can only say in conclusion that all who were so fortunate as to secure admission yesterday, owe a debt of gratitude to the New York Company for the opportunity of hearing an artiste, who is in herself perfection, perform on a piano to which the same term may be justly applied.—*Montreal Gazette.*

A GENTLE HINT.

In our style of climate, with its sudden changes of temperature—rain, wind and sunshine often intermingled in a single day,—it is no wonder that our children, friends and relatives are so frequently taken from us by neglected colds, half the deaths resulting directly from this cause. A bottle of Boschee's German Syrup kept about your home for immediate use will prevent serious sickness, a large doctor's bill, and perhaps death, by the use of three or four doses. For curing Consumption, Hemorrhages, Pneumonia, Severe Coughs, Croup, or any disease of the Throat or Lungs, its success is simply wonderful, as your druggist will tell you. German Syrup is now sold in every town and village on this continent. Sample bottles for trial, 10c.; regular size, 75cts

A Baptist Minister's Experience

I am a Baptist Minister and before even thought of being a clergyman I graduated in medicine but left a lucrative practice for my present profession, 40 years ago. I was for many years a sufferer from Quinsy, "Thomas' Eclectric Oil cured me," I was also troubled with Hoarseness and Thomas' Eclectric Oil always relieved me. My wife and child had Diphtheria, and "Thomas' Eclectric Oil cured them" and if taken in time it will cure seven times out of ten. I am confident it is a cure for the most obstinate Cold, or Cough, and if any one will take a small teaspoon and half fill it with the Oil and then place the end of the spoon in one nostril and draw the Oil out of the spoon into the head by sniffing as hard as they can until the Oil falls over into the throat and practice that twice a week, I don't care how offensive their head may be, it will clean it out and cure their Catarrh. For deafness and Earache it has done wonders to my certain knowledge. It is the only medicine dubbed patent medicine that I have ever felt like recommending, and I am very anxious to see it in every place, for I tell you that I would not be without it in my house for any consideration. I am now suffering with a pain like Rheumatism in my right limb and nothing relieves me like Thomas Eclectric Oil.

IMMINENT DANGER THREATENS ANY ONE troubled with a hacking cough. Inflammation, when it attacks the delicate tissue of the lungs and bronchial tubes, travels with perilous rapidity. It is worse than madness to neglect a cough or cold. To do so is simply to invite consumption and premature death, Battle with and overcome the disease in its infancy, and avert the peril. Do not allow the lung-eating tubercles to develope themselves before resorting to medicine. Experience has shown that the preparation best adapted to subdue a formidable cough—to sooth and heal the lacerated lungs—is Northrop & Lyman's Emulsion of Cod Liver Oil and Hypophosphites of Lime and Soda—a swift and sure specific for bronchial and lung affections, laryngitis, and the various forms of scrofula. It is not pretended that this favorite remedy will cure fully developed consumption, but that it will avert it is a fact too well proven to admit of any reasonable doubt. The fact is equally well known and appreciated, both by the public and the profession, that the article is an admirable fertilizer of the blood, imparting to it those constituents which are essential to the complete nutrition of the system and its preservation in a state of health. In an enfeebled system, phosphorus—that necessary element of bodily substance—is deficient. This constituent, as well as lime and soda (important in bone formation) are supplied in the Emulsion of Cod Liver Oil. Prepared by Northrop & Lyman, Toronto. Sold by all Druggists.

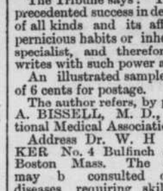
AYER'S CHERRY PECTORAL

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma and Consumption.



The few compositions which have won the confidence of mankind and become household words, among not only one but many nations, must have extraordinary virtues. Perhaps no one ever secured so wide a reputation, or maintained it so long, as AYER'S CHERRY PECTORAL. It has been known to the public about forty years, by a long continued series of marvelous cures, that have won for it a confidence in its virtues, never equalled by any other medicine. It still makes the most effectual cures of *Coughs, Colds, Consumption,* that can be made by medical skill. Indeed, the CHERRY PECTORAL has really robbed these dangerous diseases of their terrors to a great extent, and given a feeling of immunity from their painful effects, that is well founded, if the remedy be taken in season. Every family should have it in their closet for the ready and prompt relief of its members. Sickness, suffering, and even life is saved by this timely protection. The prudent should not neglect it, and the wise will not. Keep it by you for the protection it affords by its early use in sudden attacks.

THOS. JAMES, Darlington, England, says: The "Only Lung Pad" is being thoroughly tried here. One lady has already received great benefit, who has suffered for years from Bronchitis and Asthma, and congestion of right lung.

H. E. HODGE, Cambridge, Mich., says: I have been afflicted with Asthma for years An "Only Lung Pad" gave me immediate relief. I can recommend it as the greatest remedy ever produced.

HENRY VAN NORTWICK, of Toledo, Ohio, says: A friend prevailed upon me to try an "Only Lung Pad," and I obtained immediate relief from a racking cough. I *know* the Pad helped me.
