### DESIRABLE LAKE PARK PROPERTY FOR SALE

I desire to dispose of my summer home at Twin Pine Point, Lake Park. This property consists of two large and one small cottage. All are practically new and up-to-date in every particular. They are in an ideal location, having beautiful surroundings and the outlook from either direction is simply magnificent. There is a beautiful beach for bathing, being sufficiently shallow to be safe for children. The arrangement of the interior of the buildings is all that can be desired by any one, the finish being such as a home in town would be expected to have. There is a good, convenient stable, fuel house, ice house and a very commodious boat house. There is a good, well graded and cared for State Road to this property, making it very accessible. There is no more desirable summer home on the Lake Shore.

**BENJAMIN P. BALL, Owner,** Derby Line, Vt.  
P. S. This property is all in Vermont.

Mr. Fred Moulton moved his road building apparatus to Lake Park on Monday. He has taken one of Mr. Holbrook's cottages and will live there while constructing the Eagle Point road, which he will commence work on at once.

One of our local business men got caught in a telephone booth with a knobless door recently. He telephoned Superintendent Millet to come and work the combination so that he could continue his business route. He was confined about half an hour.

The almost constant rain fall of this season has made the mosquitoes almost unbearable about the ponds and lakes where there is any breeding ground. The time is at hand for treating the low places about our ponds and lakes with benzine to prevent this pest.

Mr. Robert W. Sellar of Huntingdon, a son of Mr. R. Sellar, the veteran editor of the *Canadian Gleaner*, was a caller at the JOURNAL office yesterday. Mr. Sellar is taking advantage of his annual holidays to see the Eastern Townships for the first time. Incidentally he is collecting material for the news columns of the *Gleaner*.

Rev. H. F. Hallett gave an interesting talk on "Nothing but Leaves" at the Centenary Methodist Church Sunday evening. Mr. Hallett revealed that he is a very practical naturalist and was able to point out many very apposite analogies between the natural processes in plant growth and that we should adopt in sane living if we would enjoy the highest and best. The Centenary choir contributed much to the evening's worship.

Mr. Reginald Hanson, of the Derby Line Bank, who has been away for a vacation, returned Tuesday. He was taken ill at the lake and was sick at his home in Derby for several days.

Mr. A. J. Lawrence and Miss Marguerite Lawrence, of Montreal, arrived at Stanstead Friday and have since been staying at "The Cedars," the summer home of Col. Fred'k D. Burns.

Mr. Eugene Wells is taking a two weeks' vacation at Cedarville, after which he will continue work in the Butterfield shops until the opening of the school year, when he is to enter McGill College.

Mr. and Mrs. David LeBlanc, their son Donat, and daughter Bertha of Bedford, and son Fred of Chicago visited their sons Messrs. F. X. LeBlanc of the Butterfield shops, and Leo LeBlanc of the JOURNAL office, from Saturday until Tuesday.

There was a very large attendance at the Congregational Sunday School picnic at Lake Park, Tuesday. It was held on the grounds at "Kittensaug," through the hospitality of General and Mrs. Butterfield. The day was very favorable and all had an enjoyable time.

Mr. Lyman Spaulding and Mrs. Spaulding with Lieut. Pearson, of the 11th U. S. Cavalry, and Mrs. Pearson, formerly Miss Ethel Spaulding, have been in town for a few days at Mrs. Brigham's. They left on Friday in their car for an extended tour through Vermont, intending to call at Fort Ethan Allen.

Something should be done at once to exterminate the rats that are down at the "dumping grounds." They are dangerous creatures, carrying diseases into our homes and are very destructive in every way. They are increasing rapidly and immediate attention should be given to destroying them before it is too late.

The Stephen Foster pasture, as formally known, now owned by Paquette and Jenkins, has been platted into about twenty-five lots, a street graded from Railroad street, intersecting it between the Gareau and Phaneuf residences and bisecting the tract north and south and coming out on Maple Avenue. Lots number 13 and 9 were sold Tuesday. One great advantage in these lots is the fact that they are all supplied with a fine sewer system. They will be sold on terms to suit the purchaser, and if you want to build a house here is a good opportunity.

The State Highway Commissioner, Charles W. Gates, of Franklin, Vt., was in town Wednesday. Mr. Gates is touring the state by automobile, having with him Mr. Paul D. Sargent, assistant director of the National Public Roads Department, Washington, D. C. Bennington county is doing its road work under the direction of an engineer from the office at Washington and this reveals the interest the national government is taking in the "good roads" work of the several states. Mr. Sargent is in the state to see what is being done and by request of Mr. Gates, for the state commissioner is an honest student of the problem and avails himself of every means possible to do better work. Mr. Sargent was very free in expressing unstinted praise for the work done in that part of the state he had visited. Derby seemed to be specially favored in the quality of its road material, although some other localities had most excellent gravel. He spoke very encouragingly of the general sentiment on the "good roads" problem where he had visited. Mr. Gates is very much encouraged by the work being done this year and the trend of public sentiment. One of his chief shibboleths is: "Maintain what road you have built." The "stitch in time" idea must be regnant in road work. County Commissioner Stoddard B. Bates was with the party, a close second of his superior both in enthusiasm for our roads and as a practical road builder. The party drove through our villages, expressing themselves as pleased with our thrift and tidiness.

I wish to announce to the citizens of the Three Villages and surrounding places that I have engaged the services of a first class upholsterer from Boston, who has had 30 years experience, and I am now prepared to do all kinds of upholstering in the furniture line, carriages, automobiles and hair mattress renovating. If you cannot call at my shop, call me by telephone, and I will be pleased to show you samples. Work called for and delivered at reasonable prices, and all work guaranteed. Gilmore Harness Shop, J. W. Downing, proprietor. 69w2

Timothy Edward Demick, a well-known resident of Stanstead township, died at his home Tuesday, August 6th. He had been in poor health during the past three years, being afflicted with a disease of the kidneys. Of late his condition had been particularly distressing, and his death did not come unexpected. Before his health failed the late Mr. Demick was a very active man. Aside from his farming interests he owned and operated a sawmill for many years. He will be much missed, not only from the family circle, but by a large number of other relatives and friends. Deceased was 63 years of age. The funeral will take place at 2 o'clock this afternoon; interment at Crystal Lake Cemetery.

#### TOWN TOPICS.

Mayor Mellon is out again after a few days illness.

Dr. Hight, chiroprapist, is at the Rock Island House, where he will remain until to-morrow afternoon.

Voting on the by-law for a loan of \$25,000 to consolidate the municipal debt of Rock Island and provide for a new civic building took place on Tuesday. Public apathy was the chief feature. Owing to illness the Mayor was absent. Half an hour after the poll opened the secretary treasurer had to go out and "drum up" a few rate-payers in order to secure a presiding officer. During the day thirty four votes were cast for and three against the by-law. The total valuation of these thirty seven electors aggregates \$82,940, just about one third of the taxable valuation of the municipality. Some of the remaining two thirds did not take sufficient interest in the by-law to learn when the voting was to take place. The reason for this remarkable indifference to civic affairs is puzzling some people. An explanation offered by one citizen is that the community is pretty thoroughly given over to commercialism, its citizens being so well satisfied with their own material prosperity as to be indifferent to such trifles as a \$25,000 municipal debt.

THE COUNTY SHERIFF.

The theatre-goers will have a treat in store when "The County Sheriff" comes to Rink Opera House on Wednesday, Aug. 14th, 1912. This is one of those quiet melodramas that burns little powder. Still abounding in heart interest and thrilling climaxes, it tells a beautiful love story of the plains, with just enough comedy to relieve the intensity of the dramatic situation. The story is told in four acts and special scenic and stage equipments are carried for the entire production. Mr. Lem B. Parker, the author, has added very little fictitious embellishment to the already interesting story. The costumes, which are historically correct, is a feature of the performance. "All the world loves a lover" is an old adage and a true one, and one of the most fascinating stories of the love of two men for one woman that was ever told, is the basis of the play, "The County Sheriff."

GRANITEVILLE.

Mr. Harry Salls, of Pennsylvania, arrived here on Tuesday to visit his parents, Mr. and Mrs. Parker Salls.

Mr. Robert W. McIntosh has returned from Irberville, where he visited his uncle, Mr. Robert Brodie.

Several men arrived here Tuesday to work for Mr. James Brodie.

Mr. Eugene Boulais arrived here on Tuesday from Montreal to run the steam derrick for Mr. Jas. Brodie.

The wet weather makes it rather discouraging for those who have not finished their haying.

Fast Motor Boat to be Launched on Lake Memphremagog.

Mr. Gustave Dufresne has placed an order with Mr. A. M. Bowker for a 20-ft. special racing "Viper" boat to be launched on Lake Memphremagog in the near future. It is expected to be the fastest boat on this lake. This boat is the second of this particular type placed by Mr. Bowker. The first was purchased by Messrs. John and Donald Patterson and has always defeated everything with which it has raced. It is expected that Mr. Dufresne's boat will cause a sensation. It will be capable of a speed of 25 to 28 miles per hour, engine installation along Hickmap and Bowker methods which have proven these boats to be the fastest of their type in the world.

#### BEEBE.

The Sunday School of the Methodist Church had its annual picnic last Friday afternoon. Eleven autos were at the church at two o'clock and took the scholars to the number of eighty on a drive, which was greatly enjoyed.

On returning the camera was brought into use and the seven cars with their occupants were taken by Mr. Dixon and Mr. Berry. After games on the church lawn all went down to the supper room of the church to bountifully spread tables, when ample justice was done by young and old to the substantial and delicacies served by the ladies of the school. The picnic was most enjoyable. The officers and teachers of the school desire to tender their very sincere thanks to the gentlemen who so kindly came with their cars and gave the scholars so great a treat.

#### KINGSCROFT.

The hay crop seems abundant around here, but haying has come to a standstill owing to so much cloudy and rainy weather. A few farmers have finished. Gardens and all hoed crops are doing well.

#### HATLEY.

Gloom was cast over the community by the sudden death of Mr. Charles P. Kent, of Hatley. The deceased had been for many years a resident of this place. He leaves a wife, two young sons, an invalid mother, one sister, and many other relatives and friends to mourn his loss. Mr. Kent was a member of the I. O. O. F., which conducted the burial service and rendered all possible aid to the bereaved family. The funeral which took place at the Methodist Church, Hatley, was attended by a large number of sympathizing friends and neighbors. The church was beautifully decorated and the masses of flowers which adorned the casket and altar were an outward expression of the sympathy of the many friends of the family. The service at the church was conducted by Rev. C. Moore, of Ayer's Cliff, and Rev. F. Williams, pastor of the Methodist Church, Hatley.

## HOW TO PREPARE ASPARAGUS

Three Ways in Which to Serve This Delicious and Healthful Vegetable.

**Asparagus in Ambush.**—Scrape out the inside of eight or nine rolls or plate biscuits; cut off tops to serve as covers. Set open in the oven to crisp. Heat two cups of milk, pour over four beaten eggs. Stir over the fire until it thickens. Add spoonful of butter rolled in flour. Put in the tops of two bunches of asparagus, boiled tender, chopped fine and seasoned. Fill the rolls with this mixture. Put on the tops and serve hot.

**Baked Asparagus.**—Lay two bunches of cooked asparagus on a buttered baking dish and spread Bechamel sauce thickly over the upper half of the stalks only. Sprinkle with grated cheese and bread crumbs and dot with bits of butter. Lay an inverted pan over the baking dish so that only the part of the asparagus covered with the sauce will be exposed to the heat and bake a light brown.

**Asparagus and Eggs.**—Cut about two dozen stalks of asparagus (tearing out hard parts) into inch lengths and boil tender. Drain, pour on a cup of drawn butter; stir until hot, turn into a bake dish. Break about six eggs on top, put a bit of butter on each; salt, pepper and put in quick oven until the eggs are "set."

## HOW TO MAKE AN EGG LOAF

Very Dainty Dish for Summer Days and Can Be Served Either Hot or Cold.

For egg loaf use six hard-boiled eggs, 1 1/2 cups grated bread crumbs, one cup finely chopped meat, any kind; one cup soup stock, one cup sweet cream, two raw eggs, one rounding teaspoon salt, one-fourth teaspoon pepper, one minced onion and one heaping teaspoon powdered sage if liked. Directions: Remove the shells from the hard-boiled eggs, grate them, both yolks and whites; add the raw eggs, beaten; now the chopped meat and seasoning, next add the stock and cream and last of all add the bread crumbs. The other ingredients should be thoroughly mixed before the crumbs are added. The mixture must be stiff enough to form into a loaf. Use more bread crumbs if needed. Mold into a loaf, place in a pan and bake in a moderate oven twenty-five minutes. Cut into slices and serve either hot or cold with tomato sauce if liked.

## USES FOR THE PAINT BRUSH

Comes in Mighty Handy About the House if One Knows How to Use It.

Some uses for a paint brush are to clean out the corners of windows and corners of furniture and carved work, also to brush out dust and dirt around buttons of leather furniture. Keep one in the pantry for brushing milk over the top of pie crust before baking, also to grease your bread pans and cake tins, so all the corners are sure to be greased well. Use one to spread your stove polish to get in places a cloth cannot be used without getting the hands all mused up. To take out ink from white goods, soak in fresh milk about 15 or 20 minutes, then rub till stains take a grayish look, rinse in milk once more, then place in cold water in wash boiler and shave some more soap and boil 10 or 15 minutes, and the stains will disappear.

### How to Make Hominy.

Take one-half gallon of white corn, shelled; put into a kettle sufficient to hold about two gallons of water, add one tablespoonful of lye or potash, put kettle on stove and boil about one hour and a half, or until the water is thick and the skin is coming off the corn; now drain and wash in several waters, rubbing the corn hard between the hands; put plenty of water in it and set back on stove to boil; in about an hour change the water again and wash. It usually requires eight hours to cook hominy. The amount will make five quarts of hominy.

### Strawberry Shortcake.

While the crust is baking carefully pick and wash the strawberries, drain on a cloth, put in a bowl and sprinkle powdered sugar over them. When the crusts are done butter richly, cover the lower one on the buttered side with berries and lay on the upper crust, butter side down. If three layers, butter both sides of the second. Other berries may be used in the same way. A tablespoonful of whipped or ice cream placed on top not only gives the shortcake a relish, but serves as a tempting ornament for the dainty.

### To Clean Furniture.

When your piano or other nice furniture has finger prints and look dull, take one pint soft water, one tablespoonful olive oil and wash with clean soft cloth, then take dry cloth and rub until perfectly dry; you will find your furniture looks like new.

### Refreshments for Whist Club.

The following refreshments can be used at a whist party conveniently: Ice cream, cake or cookies. I prefer ladies' fingers, fruit punch or lemonade, fruit or candy.

### Cooking the Cereal.

While washing the dishes from the evening meals put the cereal on and cook it. All that need be done to it on the following morning is to add a little water to it and heat.

## VERMONT ITEMS.

Hon. Frank L. Greene, of St. Albans, was elected Tuesday, July 30th, to serve out the unexpired term of the late Congressman Foster.

Barre has 2,810 persons of school age, between five and 18 years. This is a slight loss over last year's school census, which showed a total of 2,842.

The Woman's Club of St. Johnsbury has offered 15 prizes to boys and girls killing the greatest number of flies. The prizes are five of \$1 and 10 of 50 cents.

The Baptist church of Passumpsic celebrated its centennial July 16, services in the church in the afternoon and evening in observance of the event being largely attended.

A movement has been inaugurated in Springfield to give a reception to Albert L. Gutterston, winner of the running broad jump in the Olympic games at Stockholm, on his return home.

A woman afflicted with paralysis, who was on the way from Boston to the shrine of St. Anne de Beaupre in Canada, to pray for recovery, died on the train en route and was taken off at Barton.

When brown-tailed moths were seen on electric light poles near the park at White River Junction the other day, the hose was turned upon them and the majority were destroyed. The place has been free of the pest until recently.

Articles asking for the incorporation of the St. Johnsbury Hotel Co. have been filed at the office of the secretary of state in Montpelier. The petition is signed by W. J. Aldrich, H. W. Randall, Joseph Fairbanks, B. F. and F. W. Ball.

Hon. C. F. Smith, master of the State Grange, is the prohibition-progressive candidate for governor of Vermont, and it is said that he intends to make a very vigorous campaign throughout the farming sections of the State. If the farmers all vote for him Vermont will have a Grange chief executive and perhaps they will get together.

Temperance Echoes—Here and There. Who are—who are—who are we? "Stanstead County workers." Don't you see? We mean to work—we mean to plan. For Prohibition in Stansteadland.

Mrs. Florence Richards tells us this: "Have faith in what you seek to accomplish and each morning repeat this little prayer."

Now I rise me up to work,  
I pray the Lord I may not shirk.  
If I should die before the night  
I pray the Lord my work's done right.

So don't just sit around while things are drifting.  
But get out and try to get the facts in need of sifting.  
There's none of us have any rights to keep from being agitated  
As long as there's a wrong we might by helping get obliterated.

Lora S. Lamauce tells:

There's a word my mother used to say that returns to me, "I'd rather be one of the over-worked workers, than one of the under-worked shirkers."

Dear soul! The weather was never so cold, or wet, or blustery that she could not get out to her union, or the Sunday school, or prayer meeting, even when the snows of eighty winters rested upon her. People said she enjoyed perpetual youth. The secret was that her heart was young and she never wearied in doing the little duties that came to her.

There is long life in work. "Nerves" come less often from over-work than from over-tret. It is good for the brain to have plenty to think about, work to plan and letters to write. It is good for one's soul to have responsibility. It makes a strong, resolute and helpful character to have a multiplicity of matters to look after, and almost no one to help you carry the burden. One becomes resourceful, broad-minded, quick of decision, cheerful under difficulties. No one else ever accomplishes so much as the thrice busy woman.

Often the choice of a local leader falls upon a woman, bright, earnest, capable and willing, but alas! With her hands and heart already full. Perhaps she is the president of the Aid, a teacher in Sunday school, a leader in missionary circles, the treasurer in a woman's club, and has a family to look after besides. Under the circumstances our good sister's heart sinks within her and she thinks that she is going to be over-worked to the point of a break-down. But she will not.

She will stand it and go through it, just as she will stand the extra strain of having visitors for six weeks, or typhoid fever in the family, or a wedding. And she will develop all the time. She will become a trained worker who conserves every effort, makes every move count and wastes and fritters away no time. As Mrs. Clara Hoffman used to say, "I would not give the snap of my finger for a woman in the W. C. T. U. work who is not already twice busy. She never amounts to anything unless she is one of the busy women."

The busy woman has not time to get sick. She thinks of something else besides her aches and pains. I sometimes think membership in the W. C. T. U. is a very good life preserver.

"She does the most for God's great world, who does the best in her own little world."

**AS A MATTER OF BUSINESS**

The Beauty and Orderly Keeping of  
 One's Home Town Should Appeal  
 to Every Resident.

"The cities of Europe," declares an expert, "consider civic beauty an absolute asset in cash. Paris, for example, invariably has an eye to the beautiful in whatever it does. Paris would never dare to lose its prestige as the most beautiful city in the world. That would be bad business."

"We ought to consider it a ruinous business policy for one of our cities not to protect its beauty. Take the railroad problem in our cities. At present some railroads are beginning to brace up and do splendid things, but for a long time wherever we had a railroad in a city it was death and desolation so far as beauty was concerned."

"We ought to do the same in other things. Here each fellow has gone ahead for himself, without regard to others. A city ought to be a unity. Each citizen should be allowed to do what he pleases only in so far as he does not hurt the city as a whole. As soon as he does that he should be stopped."

In conclusion he said:  
 "No one man is competent to plan a city. Such a task needs a combination of men. The problems of city planning today are not L'Enfant's nor Sir Christopher Wren's. What we now have to face is far more complicated."

"City planning should be undertaken by architects, landscape architects, traffic experts, and the various types of engineers working together. All these men, before making plans for the rebuilding of cities, should give special study to the various difficulties of civic improvement."

**DATE PALMS IN CALIFORNIA**

County Supervisors Are Planting  
 Them Along Roads and the  
 Work is Applauded.

The board of supervisors of Los Angeles county have authorized the county forestry commission to purchase 500 date palms at a cost of a dollar apiece to be planted along the San Fernando road. There is a great deal of work of this kind to be done in southern California. It was naturally a treeless section until the horticulturist came in and adorned it with millions of revenue-producing fruit trees. The highways are still neglected to a large extent, a thing that should be remedied with all possible dispatch. Every line of country road should have its ornamental trees, and the main thoroughfares should be parked with grass plots and parterres of flowers well cared for. We must not forget that this is the playground of the continent, and that tourists seeking enjoyment desire to have the sense of sight delighted above all things.—Los Angeles Times

**Never Need of Ugliness.**  
 No town is so small that it need be ugly. A little railroad "whistling post" could be attractive with trees. Some time the railroads of the west will send out their "arbor specials" as they send their good roads trains. There is little excuse for the habitations of men along the track to be usually the single unlovely thing in the Kansas railroad journey.

Have you noticed that where fine trees form a park in the air the people below have holiday manners? The people under the trees seem to be enjoying life. They are not satisfied with slovenliness. The accompaniment of nice lawns and pretty, well kept houses and clean streets is a tribute to the example of the trees. Even to be lazy under arching branches is the nicest sort of laziness. When you loaf in the shaded streets of towns like Lawrence and Manhattan you invite your soul. The "good, pray poet" would have liked these Kansas towns.

**Heat City With Electricity.**  
 It is planned to electrically heat the dwelling and business houses of Stavanger, Norway, and the board of directors of the electric light plant at that place has asked permission from the city council to make contracts up to a consumption of 100 horse power. It has been suggested that the price for the current thus used shall be \$6.75 per horse power (744 watts) per year. It is also planned to heat the government and city buildings in that manner. The population of Stavanger is 38,000, and the city has water power facilities to furnish 25,000 horse power for electrical purposes.

**Hypocrisy of Cities.**  
 The hypocrisy of cities lies in the fact that their front yards are clean and their back yards are dirty. The front yards are spread over with emerald grass shaved smooth by a lawn mower, and are often attractive with flowers, rich markets for the bees. The back yards are slatternly with ash heaps and refuse and many of them are never cleaned up. The front yards with their pleasant grass and their daffodils daffodilling and their crocuses croaking, are a pretense. They pretend that the whole premises are equally clean.—Vancouver Sun.

**Honors for the Eastern Townships College of Music.**

In the examination held by the Toronto College of Music, throughout the Dominion, Stanstead wins the following first places:

Third Piano, Maude Waldron; Second Piano, Bernice Elliot; Second Violin, Miss Alma Alger; First Violin, Julius Levinsky; Primary Violin, Lindsay Hovey.

Second places were won by the following candidates:

Third Piano, Lyell Gustin; Second Vocal, Corinne Vessot; First Violin Maurice Frégeau and Arthur Meadowcroft.

Add to the above facts the statement that the Eastern Townships College of Music passed 97 per cent of the candidates presented, and we are convinced that the school stands for earnest and honest work and builds for the future. Its staff of teachers was never before so strong as it was during the past year, and there has been but one change for the ensuing year. Miss Pierce (Mrs. Charles Wells) is to be succeeded by Miss Brown, who comes with unusually strong recommendations and testimonials.

**BORN.**

HOYT—At Stanstead, Que., July 31, 1912, a son to Mr. and Mrs. Louis Hoyt.

DUTTON—At Fitch Bay, Que., August 4, 1912, a son to Mr. and Mrs. Alvin Dutton.

**Deafness Cannot be Cured**  
 by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surface.  
 We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

**COUNCIL DOINGS.**

The regular August meeting of the Rock Island council was held on Monday evening, Councilors Kathan, Norris, Crawford and Gilmore being present.

One of the first items for consideration was the resignation of E. F. Millet from the position of constable. After Mr. Millet's letter had been read one of the councilors suggested that an effort be made to induce the constable to reconsider the matter. This brought out the statement that the E. T. Telephone Company, by whom Mr. Millet is permanently employed, had requested him to resign from the position of constable.

**REFERRED TO SATURDAY'S ROW.**

Speaking of the necessity for "police protection" Councilor Norris referred to the drunkenness and disorder on the Main street Saturday afternoon and evening. In the face of such disorder Councilor Norris did not see how any citizen could hold his head up with pride. Councilor Norris said it was a "go as you please affair" all the afternoon with a free fight in the evening. The sidewalk was blocked for more than an hour, during which time ladies had to take the middle of the street; the language used was, to say the least, not edifying.

**PETITION FOR SEWERS.**

A numerously signed petition asking that the sewerage and building questions be submitted to the rate-payers jointly was submitted. Serious consideration of this petition would, of course, have meant the repeal of the building by-law, voting on which was to take place the following day. Naturally the question of cost came up, but none of the councilors seemed to know the amount of the engineer's estimate or the whereabouts of the plans, etc., which were paid for out of the municipal treasury. Councilor Norris was of the opinion that the cost was estimated at something like \$13,000 when the surveys were made, but the village had grown some since that time. He was in favor of a sewerage system if the cost would not be too high; a municipal building could be put up at a cost of \$8,000; and this would leave a balance of \$8,500 which might properly, under the provisions of the present by-law, be turned to a sewerage system. Councilor Gilmore moved, seconded by Councilor Norris, "That the petition be laid on the table for further consideration." Although a number of the petitioners were present, no one pressed their claims. If the petition had been made before the final adoption of the last by-law it would have stood a better chance for success.

Mr. R. C. Parsons was present and asked to have the road to his property at the top of the Plain hill taken over by the corporation. Although not graded up to the road department's requirements he promised that it would be within a few days. If the council would accept the road the Water Company would then lay down a 4 in. main and put in a hydrant for fire protection. The petitioner did not wish to go to the expense of laying a small pipe to his property as this would become useless when the larger pipe was laid. The matter was referred to a special committee composed of Mayor Melloon, Councilors Kathan and Ball.

The following bills were homologated: Mr. Morrell, sprinkler tank, \$62.50; Morrill & Tilton \$12.55; C. E. Lee \$6.50.

The secretary-treasurer announced that more funds were necessary to meet current expenses, and a further temporary loan of \$600 was authorized. Mr. St. Pierre said that the corporation had been spending over \$400 weekly on roads, etc., until this branch of municipal work was discontinued a short time ago.

**MCCONNELL.**

The rain which was needed has been  
abundantly supplied and grain, roots,  
and pastures will do much better; but  
the long continued wet weather is  
very damaging to the hay crop, which  
is later than usual this year. There is  
still a good deal of hay to get; many  
farmers having large quantities cut,  
which will be badly damaged if indeed,  
it is not entirely spoiled.

**TRAGEDY NARROWLY AVERTED.**

An afternoon of drunkenness and  
disorder came perilously near termi-  
nating in a tragedy at about seven  
o'clock Saturday evening when in a  
quarrel a man named David Goyette,  
a painter in the employ of Charles  
Burnett, was struck on the head and  
knocked down by a man named Ed-  
mond Gerardin, a laborer employed by  
C. H. Kathan. Because of their  
condition both men were not alto-  
gether responsible for their acts. Af-  
ter laying out his opponent Gerardin  
started to escape down the passage  
between the Pike building and the  
Rock Island House, but was himself  
knocked down and rendered uncon-  
scious for the moment by some one  
who followed him up. When he re-  
gained his consciousness and got on  
his feet, after rolling about in the  
mud, he was allowed to go. In the  
meantime his victim, who had been  
carried inside, lay unconscious, bleed-  
ing from a wound above his left tem-  
ple, and the physician summoned ex-  
pressed the opinion that had the blow  
which made the wound been an inch  
lower death would have been the re-  
sult. The conflict took place on the  
Main street and some who witnessed  
it claim that Gerardin struck his op-  
ponent with a stone which he had  
picked up for the purpose; others say  
he did not, the latter holding that the  
wound must have been caused by the  
fall. Constable Millet was out of town  
and the mob held sway for some time,  
blocking the sidewalk until the ar-  
rival of Councilors Norris and Gil-  
more. Afterwards Gerardin was taken  
into custody at his home and locked  
up until Monday morning, when he  
was fined \$9.00 and costs, then allowed  
to go on suspended sentence.

Thoughts are naturally turned to  
the cause of all this disgrace; a stock  
argument against prohibition has al-  
ways been that "prohibition does not  
prohibit." People who use this argu-  
ment profess to believe in license as a  
means of "controlling" the liquor  
evil. Saturday's experience shows a  
striking example of the failure of li-  
cense to "control" anything except  
people's senses.

**SMITH'S MILLS.**

The death of the late Mr. John Peas-  
ley, which occurred on Tuesday even-  
ing, July 30th, removed from our  
midst one of Smith's Mills most re-  
spected citizens. Although Mr. Peas-  
ley had been in rather poor health for  
some months past, his death came as a  
great shock to his many friends.

The funeral was held at the Peasley  
home on Thursday afternoon and was  
largely attended, showing the high es-  
teem in which the deceased was held.  
Rev. Mr. Carr, Congregational min-  
ister, of Fitch Bay, conducted the ser-  
vice. The bearers were: Messrs. Fred  
and Thomas Young, F. H. Bigelow and  
James McNally. He is survived by a  
wife, one brother and a step-daugh-  
ter, who have the sympathy of all in  
their great loss. The interment took  
place in the family lot at Griffin cem-  
etery.

way, over Sunday.

Mr. and Mrs. C. F. Bayley, of Beebe,  
called on friends here Tuesday.

The Ladies Aid at Mrs. Guy Longe-  
way's was a very pleasant affair. A  
nice supper was served on the lawn,  
which was lighted by Japanese lan-  
terns, making a very pretty sight.  
Proceeds were \$5.12. It is expected  
that Mrs. W. M. Comstock will enter-  
tain the August meeting.

The friends of Miss Mayme Putney  
gave her a surprise party on Tuesday  
evening, before her departure for  
Groveton, N. H., where she intends to  
spend the winter.

Miss Bertha Martin is quite ill at  
her home. She is attended by Dr.  
Giffillan.

Service next Sunday afternoon at  
2.30 as usual.

Mr. Lee Richardson was called to  
Boytton on Saturday by the serious  
illness of his niece, little Evelyn Tay-  
lor. She is considered to be slightly  
improved at present.

A meeting of the directors of the  
Stanstead County Horticultural Society  
was held at Ayer's Cliff on Saturday.  
Nearly all were present and final ar-  
rangements were made for the coming  
exhibition, August 23rd and 24th. The  
Society has just finished a fine build-  
ing, 25x60, which will provide abun-  
dant space for exhibits. The Soci-  
ety is offering over One Hundred  
and Fifty Dollars, while special prizes  
aggregating Sixty Dollars are being  
offered. There are good markets in  
this county and more interest should  
be taken in apples, vegetables and  
flowers. To make this Society a suc-  
cess there needs to be a large mem-  
bership, and it is hoped that even if  
the season is somewhat cold and late,  
the people of the county will join and  
bring whatever they have. Prize lists  
can be had from any of the directors  
of the Agricultural Society of John P.  
Bowen, Secretary, Hatley.

# FREE ADVICE TO SICK WOMEN

Thousands Have Been Helped By Common Sense Suggestions.

Women suffering from any form of female ills are invited to communicate promptly with the woman's private correspondence department of the Lydia E. Pinkham Medicine Co., Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence. A woman can freely talk of her private illness to a woman; thus has been established a confidential correspondence which has extended over many years and which has never been broken. Never have they published a testimonial or used a letter without the written consent of the writer, and never has the Company allowed these confidential letters to get out of their possession, as the hundreds of thousands of them in their files will attest.

Out of the vast volume of experience which they have to draw from, it is more than possible that they possess the very knowledge needed in your case. Nothing is asked in return except your good will, and their advice has helped thousands. Surely any woman, rich or poor, should be glad to take advantage of this generous offer of assistance. Address Lydia E. Pinkham Medicine Co., (confidential) Lynn, Mass.

Every woman ought to have Lydia E. Pinkham's 80-page Text Book. It is not a book for general distribution, as it is too expensive. It is free and only obtainable by mail. Write for it today.

## DECREASE IN ALCOHOLIC USE

Sir Victor Horsley Says Impossible to State Any Given Minimum Amount of Drug Harmless.

The decision of all medical experts at home or abroad, meaning thereby such as have especially made a study of the effects of alcohol on the human body in health or disease, is that alcohol is a poison in any form, in any quantity, at any time, under any condition, in health or disease, either as a beverage or as a medicine. This view practically eliminates alcohol in any relation to the human economy, writes L. D. Mason, M. D., in the Temperance. Sir Victor Horsley, F. R. C. S., the celebrated neurologist and surgeon of London, England, sums up the whole situation in a few words: "One conclusion emerges from the recent investigation of the whole alcohol question, namely that it is quite impossible to state that any given minimum amount of the drug is harmless to our tissues," and we may add, this statement holds good either in health or disease.

Alcohol is a protoplasmic poison. "The organism is not an individual but a social mechanism, always bringing us at last to cells."—Virchow.

The most remarkable evidence of the increasing disease of alcohol in disease is found in the "records of supplies" in the London Metropolitan Hospitals. In the comparative consumption of spirits, wines and malt liquors in a period of fifty years the liquor bill is three times less and the milk bill three times more. There has been a steady decrease and increase in these particulars and it is more marked every year along the lines of economy and medical practice. In Europe and this country there are special hospitals known as "temperance hospitals" in which alcohol is not used at all. In the London County Asylum the comparative consumption and decrease in the use of spirits, wine and beer is remarkable in a period dating from 1880 to 1905 and 1906. In 1889 the amount of spirits and wine consumed was 1,909 gallons; in 1905 and 1906, 205 gallons. Beer consumed in 1899, 255,488 1/2 gallons; in 1905 and 1906, 1,281 1/2 gallons. From these facts there can be no doubt as a universal, world-wide fact that the hospitals of the world (for the fact applies in a measure to all civilized countries) are eliminating alcohol as a remedy in medical practice; and hospital practice regulates as a rule, and determines general medical practice.

The effects of alcohol on the intellectual faculties and higher brain are best shown in the words of Dr. Clouston, the celebrated neurologist and mental specialist of London, England: "From the medical and scientific point of view we have this great physiological fact before us—that the first thing that alcohol does in 99 cases out of 100 is to effect the mental working of the brain of the man who imbibes."

The lunacy statistics of England and Wales as shown in the sixty-third report of the commissioners contains among other interesting and important facts the following statement: "Taking a survey of the last fifty years it is seen that lunacy has increased from 38,762 cases in 1859 to 128,787 cases on January 1, 1909, an increase of 92,025. This is not merely an actual increase keeping pace with the increase of population. It is a vast proportionate increase, for whilst population has increased by 81.5 per cent., lunacy has increased 250 per cent." Dr. Clouston in the report of Morningside Asylum as early as 1903 says: "Alcoholic insanity steadily goes up and now it has doubled." All neurologists in this country and in Europe agree that all nervous diseases and insanity are at the present time largely on the increase and the use of alcohol is a prominent basic factor in this increase, to say nothing of other forms of disease not specifically affecting the nervous system.

Whether we consider alcohol as a drug to be used in medicine or as a beverage in daily life, we can only say of it after a consideration of the highest scientific and medical expert testimony in all centers of civilization, that it has no place in the human economy as a drug or beverage in disease or health; that its action "is evil and only evil and that continues all." One has only to read the proceedings of the American Society for the Study of Alcohol and Other Narcotics, the American Journal of Inebriety and the numerous articles in the American medical press as well as the papers read in the various medical societies and the active interest taken by many prominent American practitioners, to know the attitude of medicine in America towards alcohol as a drug. The same holds true of special journalism in Great Britain and on the Continent, as represented in the British Journal of Inebriety and the large influential society of medical men it represents, and the general attitude of the influential medical public to the cause, and practice of medical or scientific temperance, so-called, and a growing conservatism in the use of alcohol in disease, and its gradual elimination from medical practice.

### Liquors Not Needed.

"Fermented and distilled liquors are never necessary for any purpose, except in certain persons in whom the habit has created a need of them truly morbid."—Royce-Collard, M. D.

## ALASKA HAS MANY FLOWERS

Immense Fields of Yellow Poppies Grow as Far North as the Sea Islands.

Nome, Alaska.—One of the impressions left with the tourist in Alaska is of the luxuriance of the summer verdure, the rich green that suggests an English landscape. This verdure seems strange in a land associated usually with snow capped mountains and glaciers. The profusion of various colored flowers and grasses, the result of from eighteen to twenty hours of sunshine a day, makes this country in summer a surprise and delight.

Every one who goes to Alaska takes a promenade along the famous Sitka walk, laid out by the Russians years ago, on the shore of Sitka Bay and the beautiful Indian river. It is noteworthy, not alone because good roads are scarce in this country but also because of its beauty. Those who penetrate this "Lover's Lane," as it is called, are charmed with its delights. Immense and aged fir trees border it, mosses and lichens and wild flowers grow in the shade and the native berries fringe the pathway. The nature lover is enraptured with the mile and a half of sylvan beauty.

Where the Wild Flowers Flourish.

One can understand that such a walk may exist in Sitka, which enjoys warm breezes from the sea to such an extent that the air is always moist. The surprising revelation is to find wild flowers in the interior, in regions where snow and ice predominate for many months of the year. There are acres of forget-me-nots on mountains 6,000 feet above sea level, so many of them that they make a carpet of blue. You come across deserted Indian villages where the houses, which are built of rough boards, are approached through weeds and poplism so high and so rank that it is necessary to part them overhead in order to penetrate them. Acres of the magenta hued poplism lend a bright note to the landscape and it seems to grow everywhere.

Far up to the north, near the snow line on the high mountains, are willows, dwarf alders and birches, while below are firs and spruces, some of them hundreds of years old. Under them is verdure clothing the mountainsides so rank and so green that in imagination one is transported to tropical climates. This is especially pleasing to the eye, after the long, hard winter.

This luxuriance is the result of the long summer days and the fact that for ages the forests have been undisturbed. One log has fallen upon another and decayed, producing a rich vegetable muck in which almost everything will grow. The richness and softness of the soil makes Alaskan wood difficult to obtain and when any large enterprise has been undertaken, as building railroads, the timber, for the most part, has been shipped from Puget Sound.

The wild flowers in this northern country, along the coast and back toward the Yukon, delight with their beauty and fragrance. Far up, near the Sea Islands, are immense fields of yellow poppies, and in other sections there are wild geraniums of a bluish tint, yellow moccasin plants, saxifrage and bluebells.

### Skirt Prevents Wreck.

Mobile.—Pulling off her red flannel undershirt, Laura Jones, an aged negro mammy, signaled an incoming passenger train on the Bay Shore railroad in time to prevent the train from dashing into a serious washout.

The train was returning from an Alabama coast resort, and was heavily laden with passengers. When the passengers learned that the old ex-slave had perhaps saved their lives they took up a collection.

"Dis is de most money I've ever had in my born days," she exclaimed as she shuffled from the scene.

### Deadly "Movie" Realism.

Hollidaysburg, Pa.—Roy Wilt and James Salyard, ten-year-old boys, were playing "Old Scout and the Indian," just as they saw it in the moving picture show. Salyard pulled the trigger of an old rifle, and Wilt fell with a bullet in his body. He is dying at the hospital.

## THE VICTORIAN ORDER.

Three Noblewomen Represented in Nursing Movement.

The Victorian Order of Nurses for Canada was founded to meet real needs in the Dominion. Up to the time of its organization there were two large classes of people who were left practically unprotected in time of illness. There was first the class of the very poor, who could not afford to pay anything towards their nursing care, and, then, the much larger classes, necessarily in a new and prosperous country like Canada, of the people of moderate means, who were able and willing to pay something towards their care, but could not pay the private nurse's fees—moderate though these fees are—nor could they accommodate an extra person in their homes. These needs had gone on for a long time, but it was not until the year 1897 that any satisfactory attempt was made to meet them. In that year, when all of the late beloved Queen's loyal subjects were seeking suitable memorials to commemorate her Diamond Jubilee, the happy thought came to Lady Aberdeen to found an Order of Nurses, whose special work would be the care of those two large classes. So the Victorian Order of Nurses was founded, under royal charter, and the chief objects set forth:

The objects are:—  
 (1) To supply nurses thoroughly trained in hospital and district nursing, and subject to one central authority, for the nursing of the sick who are otherwise unable to obtain trained nursing in their own homes, both in town and country districts;  
 (2) To bring local associations for supplying district nurses into association by affiliation with the Order which bears Her Majesty's name, and to afford pecuniary or other assistance to such local associations;

(3) To maintain, as a first necessity, a high standard of efficiency for all district nursing;  
 (4) To assist in providing small cottage hospitals or nursing homes.

Then in the year 1900 Lady Minto who was then honorary president of the Order made an extended tour through the Dominion, and was so impressed with the needs of the people in the newer—the outlying—parts of Canada for more adequate nursing care than could be given by means of visiting or district nursing, that she was instrumental in starting a fund which finally settled into what is now known as the Lady Minto Cottage Hospital Fund. It is from the interest on this fund that grants are made from time to time towards the building of small hospitals in parts where they are needed, and where there would be difficulty in raising the necessary money without such assistance. The next improvement was the plan formulated in 1909, known as the Lady Grey County District Nursing Scheme.

Roughly outlined, it is to organize local associations in large country districts—twenty miles square or more—to supply trained nurses for the people on the ranches, farms, or homesteads. The nurses will have their headquarters in the most central spot possible, and will go to patients near at hand, or five, ten, fifteen, or twenty mile districts. They will combine district with continuous nursing, and we hope that the nurses will not only prove nurses to the sick and suffering, but also be friendly visitors, teachers, and advisers to the people in the lonely parts of this vast land.

The order is in its fifteenth year, and there are under it thirty-one town districts, one country district, seventeen hospitals, and four training centres. The staffs vary from one of fifty-one nurses. There are now 153 nurses working under the Order. It extends from the Atlantic to the Pacific Ocean, has branches in every province, excepting little Prince Edward Island, and each year the nurses are penetrating into new parts of the country.

### Church Activities.

The news of Western Canada recently included an unusual church item.

At Spartanburg, B.C., a church, not a stone or stick of which was standing at sunrise on a recent day, was worshipped in during the evening by a congregation that filled the building and overflowed into the street.

It had been announced by the members of Bethel Methodist Church that they would erect a building in one day, the church to be known as El Bethel. There were those who doubted, but when more than two hundred workmen, well organized, gathered at the scene it became apparent that the undertaking might be accomplished.

It is estimated that 5,000 persons visited the building during the day. Motion picture machines played upon the building at every stage of its erection. At night the building stood completed, painted, papered, and furnished throughout.

### Heads Manitoba Commission.

All shades of opinion in Manitoba seem to approve the appointment of Judge Robson as provincial public utilities commissioner. Hugh Amos Robson, who is a Liberal in politics, having been appointed judge of the king's bench of Manitoba by Sir Wilfrid Laurier, was born at Barrow-in-Furness, England, in 1871, and studied law at Regina, N.W.T. Civic authorities who have just invested the control of Winnipeg's public utilities, representing a capitalization of several millions, in the newly created provincial public utilities commissioner, express themselves as very well satisfied with the appointment.

### Immigrants From Britain.

British Government returns of emigration shows that the following went to Canada during April: From England, 20,163; from Scotland, 5,537; from Wales, 316; from Ireland, 1,324; total, 27,370.

To the other dominions the number was 10,024. While Scotland's population is one-eighth of England's, emigration from Scotland is twice as rapid as from England.

### SHOP AND WATER POWER FOR SALE

We have vacated our wood shop in the Foundry Hill, moving to our new wood shop near our Canadian factory, and the old shop is for sale. It is 40x50, 2 1/2 stories and a basement, with a frontage of about 112 feet, and it runs to the Southside of the canal. There is 12 feet head and 36 horse power, and this property carries its prorate proportion of the canal improvement. Its location and water power makes it a very desirable property. The price at which we are offering it is low, taking into consideration the present activity of the realty market in our villages.

## AN HONORED CANADIAN.

The Recent Death of Lady Tupper is a Loss to the Canadian People.

A long and happy life ended in the death of Lady Tupper, the wife of Sir Charles Tupper, whose wedding took place sixty-six years ago. Many Canadians will remember that in October, 1896, the golden wedding of Sir Charles and Lady Tupper was celebrated at Ottawa, when they received the hearty congratulations of friends and admirers from all provinces of the Dominion. Speaking to a newspaper representative on that occasion, Sir Charles said:

"Yes, it will be exactly fifty years to-morrow since Lady Tupper and I were married. We were born within a mile of each other, near Amherst, in Cumberland County, Nova Scotia, and knew each other from childhood days. My wife was a daughter of the Hon. Silas H. Herbert Morse, prothonotary of the Supreme Court of Nova Scotia, and her mother was Elizabeth Stewart, a sister of the late Hon. Alexander Stewart, C.B., Master of Rolls and Judge of the Court of Admiralty.

"We were married," continued Sir Charles, "at my wife's residence by the Rev. Canon Townsend. The marriage took place at her residence because the Anglican church was being rebuilt at the time.

The diamond wedding of Sir Charles and Lady Tupper was celebrated ten years later. For the last five years Lady Tupper's health had been precarious and her death was not unexpected. Lady Tupper became widely known and loved in the Motherland long ago, where her husband's activities in the interests of Canada brought them into contact with Court circles and with noted statesmen of both the great political parties, and, of course, their families. As far back as 1867, while in England on the occasion of the London Conference on Confederation, Lady Tupper had the honor of being presented to Her Majesty Queen Victoria at a special drawing room at which only representatives of foreign countries or persons recently appointed to high office were present. She was again presented to Her Majesty in 1886.

While Sir Charles had his official residence in London, as High Commissioner for Canada, from 1884 to 1896, Lady Tupper had many arduous and responsible social duties to fulfill in connection with his official position which she discharged with the grace, dignity and sweetness which characterized her actions throughout her life. —Saturday Night.

## She Won Her Robes.

Miss Melrose Sissons of Portage La Prairie has had since she was a child a "satiable" desire to grapple with legal problems. So, in due course, she fled forth to Winnipeg to the University of Manitoba, and obtained from there a degree "Magna cum laude." Portia's robes were drawing closer, but when she asked to be allowed to study at the Blackstone fountain, she discovered that women could attend colleges and universities, take degrees and medals, but they must not study the profession on which she had set her heart. The honorable benefactors informed her that only persons were admitted to the study and practice of law, and that whereas the law was interpreted according to English procedure which held that the word "person" meant "male person," therefore, she being a woman and not a person could not study or practice law in Manitoba. Miss Sissons decided to go further west and find out her status there. In the meanwhile, the Hon. Hugh Armstrong, Provincial Treasurer, having heard of the reading of the benches, gave notice of an amendment. Government and Opposition saw eye to eye with him upon this point, and thus was the cause won in Manitoba. —Saturday Night.

## Gardening in Ontario.

With the warmer suns there are abundant signs of an increasing interest in gardening throughout the Province of Ontario.

It is good to surround the homes of the people with beautiful, uplifting things, and a country without such environment will not stand. Mere commercial endeavors without thoughts of civic beauty, flower smothered home surroundings and everything that tends to bring the country into the town are sordid and uninspiring.

We shall be glad to see more small gardens, the gardens of those who must follow this hobby in their spare hours, in the large cities. This feature, which impresses everyone who visits the old homeland, will come in time into this country—the fruit and vegetable plots and flowers with them, the cottages or houses—whichever one is pleased to call them—set, as far as possible amidst natural, and certainly economic, surroundings.—Canadian Courier.

## Remarkable Conduct of the Duke.

Toronto daily papers gave their readers some amazing information about H.R.H. the Duke of Connaught during his recent stay in the Queen City.

The Telegram related how he swung his umbrella "much like persons of more common clay."

The Star described how H.R.H. walked down Avenue Road in the rain. Also, like a wise man, he wore rubbers.

The News asserts emphatically that the Duke rises before breakfast every morning, and sometimes takes a walk after breakfast.

Other papers had equally startling announcements. It would really seem that the duke is human after all.

## The First Section.

The sale of the first section of land, near Brandon, in Manitoba, disposed of by the company, was negotiated by Mr. Scott, the present Dominion Immigration Commissioner in Britain. This was as far back as September, 1881. Strange to say, the purchaser was one Charles Whitehead, a son of the stoker of George Stephenson's first locomotive.

## THE BALL SUBDIVISION

This beautiful property is now ready for sale. It has been carefully plotted and over 200 Maple and Spruce trees planted. Phelps Avenue has been graded to the property on its Canadian side, and Caswell Avenue has been graded and graveled to the property on its Vermont side. The two Avenues are connected by a new street, named Ball Street, running North and South. The location of this property is about ideal for residential purposes, being very accessible from either of the Villages, and it has lots located on either side of the Boundary Line, and two, numbers 11 and 12 are bisected by the line. The price is very reasonable for this kind of property and it will doubtless sell readily because of its desirability.

HENRY T. BALL, Proprietor, Rock Island, Que.

The plot can be seen and the prices of the property be obtained also in the office of Charles E. Bennett, Derby Line, Vermont.

## SPECIAL RESTRICTIONS

- 1st. If the municipality wish to increase the width of the streets, which are now 35 feet, 10 feet is reserved in the conveyance for the purpose.

**HATLEY VS. FRONTIERS.**  
The locals went to Hatley August 1st to play the return game, and according to reports and the records it was one of the great games of the season. "Lee" pitched one of his best games and the support was equally efficient and from all home fellows. At the 10th inning the score stood 2 and 2, and this shows that it was "nip and tuck" throughout, but in the 10th the Frontiers batted the sorrel top gentleman all over the lot, scoring six runs. The line up:

Hatley	Frontiers	
Simmonds	p.	L. Jenkins
Lawson	c.	Seguin
Kinlock	1b.	Cosby
Childs	2b.	Pike
Brune	3b.	LaCase

The Canadian people living here would be more than pleased to welcome any of their Stanstead friends the 14th and 15th of August to their C. E. L. A. Bazaar, which promises to be of more than usual interest, as we shall have for sale an apron from every state in the union, one from Porto Rico and one from Canada. The one from Washington, D. C., was made by our President's wife; Mrs. Taft also sent us a handkerchief, two letters and her visiting card. The apron from South Dakota was made by three little Indian girls. The one from Georgia by a little negro girl. Hand made sofa pillows, made by the Navajo Indians in Arizona. Silver filigree work from Bulgaria. Leather work from California and many beautiful gifts and souvenirs from different parts of the world. We shall have the ice cream candy mystery and souvenir booths as usual with a good program each evening. Miss Kathleen Taylor, violinist, from Lennoxville, Que., and others are expected to take part in the exercises.

**SHOULD ADVERTISE IN THE HOME FIELD**

Publicity Expert Says Local Papers Are Best Mediums for Factories.

By THOMAS G. TROY.

Just what might be considered the home field is a question that might be debated at great length with but little chance for successful settlement of it. Nearly every manufacturer will concede that the immediate vicinity surrounding the location of his factory is home territory, whether or not also a home field. We will choose for the time being to designate as territory the home locality which is unproductive and as field that home locality which is productive.

There are two reasons for a manufacturer locating his factory at any particular place—that is, when the home is not the sole object in view. One is to get as close as possible to the field of raw material and thereby reduce the cost of its transportation and the other is to get as near as possible to the field or demand for the manufactured product. The former is a rather antiquated idea, and the latter the more modern. If a factory located itself in a territory to be close to the raw material, and there is not demand for his manufactured product, then his home surrounding cannot be considered a field for him, and it will not pay to advertise in his home territory. It would be just as sensible to try to coax the old town pump to yield up rich Jersey milk as to expect advertising to produce results in a territory where your goods cannot be used.

But the manufacturer who locates his factory in the heart of the field where the demand is great, should advertise in the home field. It is just as sensible that he do so as it is reasonable for the manufacturer to not advertise in the territory where there is no demand for his goods. In short, this principle becomes pertinent as apparent, advertise where it is possible to get results, and don't advertise where no results can possibly be gotten. This principle has become a fixed law.

Advertising is the creator of sales. The field never seeks the goods. The goods always seek the field. It is the advertising that brings to the attention of the prospective buyer the usefulness of the manufactured article and inspires within him the desire to own and use the article in question. It is the fact as to whether or not the article manufactured can become of use that determines the value or valuelessness of the field and where to advertise. The manufacturer who leaves the field of raw material and moves to Iowa with a product that will sell only in Kansas, Missouri or Arkansas, or all three states, and is not salable in Iowa, is lacking in judgment.

There is a firing line of competition in the manufacturing game and it is where the goods are sold and not where they are made. If you would pitch your camp close to the firing line you should be ready for the conflict, you should build your factory right in the heart of the field which will use your goods. If your goods are salable in Iowa as well as in other states, you should advertise them in Iowa just as strongly as you do in any other state. But who in your home field will know of the usefulness of your product if you do not tell them of it? The fact that they see smoke come from the stack of your factory six days a week, or hear the shrill blasts of your steam whistle four times daily, or know Sam Jones, one of your factory workers, does not impress on the purchasing public the service your goods represent. The public at home, right around your factory door, must be told in unmistakable terms, the great service your goods will be to them if you would win their patronage. It matters not what your line is, the goods you sell become servants. No person desires to hire, even a servant, unless they know something about them. The greater the merits of your goods, the more essential it becomes for you to impress on your home folks the virtues of them. In order that the home folks may know what your goods are and the service they give. Many times they too will carry your message for you when they know the worth. Even though your goods may lack perfection, it will pay you to bid for your business in the home field. Your neighbors will be more charitable with you than strangers. Your friends will bear with you till you get your goods perfected, if need be.

The purpose of advertising is to create a demand for goods and to help the local dealer to sell them. The elimination of excess baggage in circulation is impossible. It can be reduced to a minimum, but not eliminated. Since the demand for every generally marketed product is directed to the local market, why is it not more practical to use the local paper? Could not the patronage of a community be directed to the local dealer more ef-

fectively through the columns of the local paper with its local influence, than through a paper of general circulation and general influence? Most of the reasonable manufacturers will concede the greater influence of the local paper in any community than that of any paper, periodical or magazine of general circulation.

When you buy advertising space you want the maximum amount of circulation that your money will buy, but more than that you want the greatest amount of influence you can get. It is the influence of your ad that pulls business. The blame of the average manufacturer of today who forsakes the home paper as an advertising medium may be laid to the door of the modern advertising agency. They have, perhaps unknowingly, turned their attention to putting the dollars in their own cash till whether any go to the advertisers or not.

The time is not far distant when the local paper will come into its own and the manufacturer will use the local paper where he wants local influence to create local trade for the local dealer who handles his product.

**"THE MAN WHO STOOD STILL"**  
Aurora, Ill., Merchant Refused to Believe He Could Not Do Business Without Advertising.  
Death the other day claimed a man who for years has been among the best known residents of northern Illinois because of one unusual trait of his character—the fact that he was a business man who tried to carry on a mercantile enterprise without advertising.

It reads like a publicist's joke, but it is really sober truth that D. W. Stockwell, who passed away after half a century's business career in Aurora, Ill., was known to most people in that section solely because of the fact that he refused to believe he could not operate his store year in and year out as he had begun to conduct it during the civil war.

Unwilling to adjust himself to the rapidly changing conditions which resulted from the cessation of that great conflict and the coincident wonderful expansion of business, he found himself gradually losing his patrons—who for years had given him a rich trade—until his store became known far and near as one in which no business was done. It is said that much of the stock on the shelves of the store closed out in settling up the estate, was purchased shortly after the war. Stockwell had waited for forty years for customers to come and buy his wares, but few persons ever darkened his doors.

"The Man Who Stood Still," he was called, for the reason that he had not kept pace with the progress of his times. Perhaps it would have been even better to say that he tried to turn progress backward.

What success he had is best shown in the fact that when his death was announced, those who knew him smiled.

The First Showing of Fall Suits  
Dresses and Coats. For the benefit of our customers who come from a distance we have arranged to continue our Summer Clearance Sale through the first weeks of August and at the same time show them the Fall styles of Coats, Suits and Dresses.

**New Coats for Fall**  
Are shown in Norfolk, Mackinaw and Long Coats. The styles are decidedly smart, and the textures warm but not as heavy in weight as shown in previous years.

**Ready-to-wear Gowns**  
Suitable for every occasion, made of serge, Chiffon, lace and silk. One of the most popular materials for a Smart Fall Dress is broadcloth, silk and chambray; there are also many beautiful combinations of lace and silk, and lace and marquisette. One model of the latter material is so arranged that different colored slips and sashes can be very effectively worn with it, thus making several changes with one dress.

**Good Quality Messaline Dresses**  
The very latest model, made with the popular one sided effect, lace yoke, collar and undersleeves, beautiful colorings. Priced at \$10.

**Suits for fall**  
All who have seen the New Fall Suits have been much pleased with the style of them. Coats are longer, and skirts a little wider. Many of the Coats are bound with braid, giving them a very neat appearance.

**Foulard Silk Dresses at Clearance Sale Prices**  
A lot of New Foulard Silk Dresses bought of a manufacturer who was obliged to make up the balance of his stock of silk to keep his factory running during the dull season. There are no dresses in this lot that are worth less than \$12.50 and from that price up. Now all offered at \$7.95.

**White Lawn Dresses**  
With colored collars and colored dresses with white collars, trimmed with white lace insertion. Regularly \$3.50 reduced to \$2.45.

**White Lingerie and Marquisette Dresses**  
Regularly \$8.95 now \$3.95; \$7.50 to \$8.95 now \$5; \$10.95 now \$6.95; \$17.50 now \$10.95.
