Sherbrooke.

Mount St. Louis Institute,

444 SHERBROOKE STREET, - MONTREAL, CANADA.

Conducted by the Brothers of the Christian Schools.

This *Institution* occupies a very picturesque site on the elevation known as *Mount St. Louis*. The location enjoys excellent sanitary advantages. The building is commodious, and all improvements tending to promote the health and comfort of the students have been introduced. The ample grounds attached to the *Institute* afford every opportunity for physical development.

Studies.

The course of studies pursued in the *Institute* is intended to give young men a complete *Commercial* and *Scientific* education. It covers the ground usually gone over in the best *Business Colleges* and prepares the student for matriculation in *Science*.

The *English* and *French* languages receive equal attention, both being necessary for young men entering the mercantile profession or for the completion of a scholarly education. The *English* and *French Classics* are read with all the attention bestowed on the *Latin* or *Greek* authors in a classical course.

The curriculum embraces three Departments: the PREPARATORY, the BUSINESS and the SCIENTIFIC.

Preparatory Department.

Boys are entered in this department from the age of seven years. The classes are so graded as to insure a thorough course of instruction. It prepares for the *Business* or the *Scientific Department*, or for the study of the *Humanities*. Before passing from this to the senior departments, the pupils must undergo a satisfactory examination on their prescribed programme of studies.

Business Department.

This department comprises two grades: the *Theoretical*, in which the student is familiarized with the theory of book-keeping and kindred studies, and the *Actual Business Department*, in which he finds a perfectly organized system of practical *Book-keeping*.—A *Bank* with additions on the most improved systems, renders the student familiar with all the forms of commercial papers and proceedings.

Scientific Department.

The students of this department continue the study of the *English* and the *French Literature*. Special attention is paid to the *Higher Mathematics* and the *Natural Sciences*. Facilities are afforded the students for practical work in the laboratory or the field. A noteworthy feature is the introduction of the study of *Philosophy* during the last two years of this course, constant efforts being made to go beyond mere abstractions, and apply the truths and principles therein grasped to *Literature* and *History*.

For further particulars, address THE DIRECTOR.
